Determination of eligibility are made in accordance with the provisions of 36 CFR 63, procedures for requesting determinations of eligibility, under the authorities in section 2(b) and 1(3) of Executive Order 11593 and section 106 of the National Historic Preservation Act of 1966, as amended, as implemented by the Advisory Council on Historic Preservation's procedures, 36 CFR part 800. Properties determined to be eligible under section 63.3 of the procedures for requesting determinations of eligibility are designated by (63.3).

Properties which are determined to be eligible for inclusion in the National Register of Historic Places are entitled to protection pursuant to section 106 of the National Historic Preservation Act of 1966, as amended, and the procedures of the Advisory Council on Historic Preservation, 36 CFR part 800. Agencies are advised that in accord with the procedures of the Advisory Council on Historic Preservation, before any agency of the Federal Government may undertake any project which may have an effect on an eligible property, the Advisory Council on Historic Preservation shall be given an opportunity to comment on the proposal.

The following list of additions, deletions and corrections to the list of properties determined for inclusion in the National Register is intended to supplement the cumulative version of that list published in February of each year.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-39]

CERTAIN LUGGAGE PRODUCTS

Commission Determination and Action

The United States International Trade Commission conducted investigation No. 337-TA-39 pursuant to section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on certain luggage products covered by the claim of U.S. Letters Patent Des. 242,181, owned by the complainant, Airway Industries, Inc., of Ellwood City, Pa. The Commission determined that there is a violation of the statute by the respondents, with the exception of Henry Rosenfeld Luggage, and hereby directs exclusion of unlicensed articles meeting the claim of the patent. Chairman Parker determined that there is no violation of section 337 of the Tariff Act of 1930, as amended. Commissioner Stern did not participate.

COMMISSION DETERMINATION

Having reviewed the evidentiary record in this matter including (1) the submissions filed by the parties, (2) the transcripts of the hearings on temporary and permanent relief and the exhibits which were accepted into evidence in the course of the hearings or by the subsequent order of the presiding officer, (3) the recommended determination of the presiding officer, and (4) the public hearing before the Commission on September 20, 1978, the Commission on October 31, 1978, determined—

1. To grant in part motion No. 39-12 and dismiss Shen-Tai Industry Co., Ltd.; Win Quality Industry Co., Ltd.; Nan Zong Leather Products Co., Ltd.; and Lih Hwa Industries, Ltd., as respondents in the investigation; and also grant motion No. 39-18 and dismiss Tuerkes-Beckers as a respondent in this investigation;

2. With respect to the remaining respondents in investigation No. 337-TA-39,[1] except Henry Rosenfeld Luggage, that there is a violation of section 337 of the Tariff Act of 1930, as amended, in the importation into the United States of articles that meet the claim of the complainant's U.S. Letters Patent Des. 242,181, and in their sale by the owner, importer, consignee or their agents, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States; with respect to Henry Rosenfeld Luggage, there is no violation of section 337 of the Tariff Act of 1930, as amended; Chairman Parker determined there is no violation of section 337 of the Tariff Act of 1930, as amended;

3. That the appropriate remedy for such violation is to direct that certain luggage products made in accordance with the claim of U.S. Letters Patent Des. 242,181 be excluded from entry into the United States for the term of said patent, except under license of the patent owner;[1]

4. That after considering the effect of such exclusion upon the public

[1]Chang Cheng Plastic Enterprise Co., Ltd.; Dongmee Trading Co., Ltd.; Suh Won Industries, Inc.; Dong-A Sewing Products Co., Ltd.; Pung Kook Industrial Co., Ltd.; Sam Yung Chemical Ind. Co., Ltd.; Tsun-Ho Yeh; Yoo Poong Luggage Mfg. Co., Ltd.; Yuan-Fong; Worldmart Industries, Ltd.; Youngnam Enterprises Co., Ltd.; San Ho Plastics Fabrication Co., Ltd.; Henry Rosenfeld Luggage; Worldmart Industries, Inc.; Winn International Corp.; Collins Co., Ltd.; Dae Dong Chemical Co.; and Dae Wha Products, Inc.

[1]Chairman Parker, having determined there is no violation, did not vote on the questions of remedy, public policy, and bonding.

health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers, such articles should be excluded from entry; [1] and

5. That the bond provided for in subsection (g)(3) of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337(g)(3)) be in the amount of 210 percent of the value of the articles concerned,[1] f.o.b. foreign port.

COMMISSION ORDER

Accordingly, it is hereby ordered that—

1. Shen-Tai Industry Co., Ltd.; Win Quality Industry Co., Ltd.; Nan Zong Leather Products Co., Ltd.; Lih Hwa Industries, Ltd.; and Tuerkes-Beckers are dismissed as respondents in the investigation;

2. Certain luggage products made in accordance with the claim of complainant's U.S. Letters Patent Des. 242,181 are excluded from entry into the United States for the term of said patent except (1) as provided in paragraph 3 of this order, infra, or (2) as such importation is licensed by the owner of U.S. Letters Patent Des. 242,181;

3. That the articles ordered to be excluded from entry are entitled to entry into the United States under bond in the amount of 210 percent of the value of the articles, f.o.b. foreign port, from the day after the day this order is received by the President pursuant to section 337(g) of the Tariff Act of 1930, as amended, until such time as the President notifies the Commission that he approves this action or disapproves this action, but, in any event, not later than sixty (60) days after such day of receipt;

4. That this order will be published in the FEDERAL REGISTER and served upon each party of record in this investigation and upon the U.S. Department of Health, Education, and Welfare, the U.S. Department of Justice, the Federal Trade Commission, and the Secretary of the Treasury; and

5. That the United States International Trade Commission may amend this order at any time.

Issued: November 30, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[Docket No. M-78-115-C]

GARDEN CREEK POCAHONTAS CO.

Petition for Modification of Application of Mandatory Safety Standard

Garden Creek Pocahontas Company, P.O. Box 11430, Lexington, Kentucky 40575, has filed a petition to modify application of 30 CFR 77.214(a) (refuse piles) to its V.P. 6 Mine in Buchanan County, Virginia. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977, Public Law 95-164.

The substance of the petition is as follows:

(1) The petitioner proposes to construct and maintain a refuse pile for the mine in an area that contains three abandoned mine openings and the outcrop of one seam of coal which has been auger mined.

(2) The petitioner proposes to seal and cover these areas with non-combustible material according to technical specifications presented with the petition.

(3) The petitioner states that the construction and maintenance of the refuse site according to these technical specifications will achieve no less protection than that provided by the standard.

REQUEST FOR COMMENTS

Persons interested in this petition may furnish written comments on or before January 4, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: November 23, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

Office of the Secretary

APPLICATIONS FOR WORKER ADJUSTMENT ASSISTANCE

Investigations Regarding Certifications of Eligibility

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 15, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 15, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 21st day of November 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

Office of the Secretary

ALDON'S INC. ET AL.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 18, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 18, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 29th day of November 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-4122]

ARONSON TEXTILE CO., NEW YORK, N.Y.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4122: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was inititated on August 31, 1978 in response to a worker petition received on August 24, 1978 which was filed by the Distributive Workers of America on behalf of workers and former workers acting as converters of acetate nylon piece goods at Aronson Textile Company, New York, New York.

The Notice of Investigation was published in the FEDERAL REGISTER on September 12, 1978 (43 FR 40576). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Aronson Textile Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each or the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criteria has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Imports of finished fabric (bleached, dyed, and printed) fluctuated, in absolute terms, from 1975 through the first half of 1978. From 1974 through 1977 the ratio of imports to domestic production has remained below 2 percent.

A Department survey of Aronson Textile Company's major customers who had reduced their purchases from that firm indicated that none purchased imports while all had increased purchases from other domestic sources in the first three quarters of 1978 compared to the same period in 1977. A change in fashion preferences accounted for the switches away from the products supplied by Aronson Textile Company to products supplied by other domestic suppliers of piece goods.

CONCLUSION

After careful review, I determine that all workers of Aronson Textile Company, New York, New York are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of November 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-4158]

CARDOT MANUFACTURING CO., WEST WARWICK, R.I.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4158: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was intitated on September 14, 1978 in response to a worker petition received on September 13, 1978 which was filed on behalf of workers and former workers producing ladies' sportswear and dresses at the Cardot Manufacturing Company, West Warwick, Rhode Island. the investigation revealed that "sportswear" consisted of jackets and slacks and that the produced skirts, not dresses.

The Notice of Investigation was published in the FEDERAL REGISTER on September 26, 1978 (43 FR 43587). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Cardot Manufacturing Company, its manufacturers, the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that increases of imports of articles like or directly competitive with articles produced by the firm of subdivision have contributed importantly to the total or partial separation, or threat thereof, and to the absolute decline in sales or production.

Cardot Manufacturing Company was engaged in contract work solely for one manufacturer during the period under investigation. A Department survey revealed that this manufacturer did not employ any foreign contractors nor did the manufacturer import any jackets, slacks, or dresses during the past 3 years. Sales by this manufacturer increased in FY 1976 and 1977 compared to the previous fiscal year.

CONCLUSION

After careful review, I determine that all workers of Cardot Manufacturing Company, West Warwick, Rhode Island are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of November 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-4316]

CARLISLE FINISHING CO., CARLISLE, S.C.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4316: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on October 31, 1978 in response to a worker petition received on October 31, 1978 which was filed by the Machine Printers and Engravers Association on behalf of workers and former workers engaged in the commission dyeing, printing, and finishing of fabric at Carlisle Finishing Company, Carlisle, S.C.

The Notice of Investigation was published in the FEDERAL REGISTER on November 7, 1978 (43 FR 51865). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Carlisle Finishing Company, Cone Mills Corporation, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

The average number of production workers employed at Carlisle Finishing Company, Carlisle, S.C. increased in 1977 compared with 1976, and increased in the first three quarters of 1978 compared with the same period in 1977. The average number of hours worked per worker also increased during these same periods. Average quarterly employment increased in every quarter when compared with the same quarter of the previous year from the third quarter of 1977 through the second quarter of 1978. There is no immediate threat of a further separation of workers at this plant.

CONCLUSION

After careful review, I determine that all workers of Carlisle Finishing Company, Carlisle, S.C. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of November 1978.

JAMES F. TAYLOR,
Director, Office of Management Administration and Planning.

[TA-W-3913]

COMMUNICATION CO., CORAL GABLES, FLA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3913: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 27, 1978 in response to a worker petition received on June 26, 1978 which was filed on behalf of workers and former workers producing land mobile radio equipment at Communication Company, Coral Gables, Florida.

The Notice of Investigation was published in the FEDERAL REGISTER on July 7, 1978 (43 FR 29364). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of E. F. Johnson Company, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation indicated a downward trend of imports of land mobile radio units from 1976 through 1977 and the first six months of 1978. Imports of land mobile radio units decreased from $73.1 million in 1976 to $58.1 million in 1977 and decreased from $37.7 million in the first six months of 1977 to $23.0 million in the first six months of 1978. The ratios of imports to domestic production and consumption decreased from 1976 to 1977 and decreased in the first six months of 1978 compared to the first six months of 1977.

CONCLUSION

After careful review, I determine that all workers of Communication Company, Coral Gables, Florida are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of November 1978.

JAMES F. TAYLOR,
Director, Office of Management Administration and Planning.

[TA-W-3684]

COUNTRY GIRLS FASHIONS INC., LYNDHURST, N.J.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3684: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 8, 1978 in response to a worker petition received on April 28, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' skirts and vests at Country Girls Fashions, Incorporated, Lyndhurst, New Jersey. The investigation revealed that ladies' jackets are also produced.

The Notice of Investigation was published in the FEDERAL REGISTER on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Country Girls Fashions, Incorporated, its customers (manufacturers), the National Cotton Council of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

The earliest possible impact date which could be set under the law is April 25, 1977. The average number of workers increased in May through December 1977 compared with the same period of 1976. Employment increased in the first quarter of 1978 compared with the same period of 1977. There have been no significant partial separations.

There is no immediate threat of separation to the workers of Country Girl Fashions.

CONCLUSION

After careful review, I determine that all workers of Country Girls Fashions, Incorporated, Lyndhurst, New Jersey are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

[TA-W-3942]

DUPLAN FABRICS, INC., NEW YORK, N.Y.

Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on July 5, 1978 in response to a worker petition received on July 5, 1978 which was filed on behalf of workers and former workers at the sales office and headquarters for Duplan Fabrics, Incorporated and Duplan Corporation, New York, N.Y.

The Notice of Investigation was published in the FEDERAL REGISTER on July 18, 1978 (43 FR 30928-29). No public hearing was requested and none was held.

Since the identical group of workers is the subject of the ongoing investigation TA-W-3940, a new investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 28th day of November 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[4510-28-M]

[TA-W-4113; 4113A; 4113B; and 4113C]

NANNETTE MANUFACTURING CO., GLOUCESTER, N.J.; PHILADELPHIA, PA.; GLASSBORO, N.J; ELKTON, MD.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4113: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on August 24, 1978 in response to a worker petition received on August 22, 1978 which was filed by the United Garment Workers of America on behalf of workers and former workers producing infants' and children's apparel at Nannette Manufacturing Company, Gloucester, New Jersey. The investigation was expanded to include workers and former workers producing infants' and children's apparel at the Philadelphia, Pennsylvania (TA-W-4113A); Glassboro, New Jersey (TA-W-4113B); and Elkton, Maryland (TA-W-4113C) plants of Nannette Manufacturing Company.

The Notice of Investigation was published in the FEDERAL REGISTER on September 5, 1978 (43 FR 39457). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Nannette Manufacturing Company, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of children's dresses increased in the first half of 1978 compared to the same period of 1977.

Nannette Manufacturing Company imports finished garments—infants' wear and girls' dresses—for sale in the domestic market. Company imports increased relative to sales and domestic production in 1977 compared to 1976 and in the first three seasons of 1978 compared to the same period of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with infants' and children's apparel produced at the Philadelphia, Pennsylvania; Glassboro and Gloucester, New Jersey; and Elkton, Maryland plants of Nannette Manufacturing Company contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Nannette Manufacturing Company, Gloucester, New Jersey; Philadelphia, Pennsylvania; Glassboro, New Jersey; and Elkton, Maryland who became totally or partially separated from employment on or after August 10, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of November 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3884]

TOBIN PACKING CO., INC., ALBANY, N.Y.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3884: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 22, 1978 in response to a worker petition received on June 20, 1978 which was filed on behalf of workers and former workers slaughtering and packaging meat at Tobin Packing Company, Inc., Albany, New York.

The Notice of Investigation was published in the FEDERAL REGISTER on June 30, 1978 (43 FR 28579-28580). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Tobin Packing Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separation, or threat thereof, and to the absolute decline in sales or production.

Imports of fresh and frozen pork increased from 25 million pounds in 1976 to 27 million pounds in 1977, and increased from 14 million pounds in the first 6 months of 1977 to 27 million pounds in the first 6 months of 1978. Imports as a percentage of production remained unchanged at 0.21 percent from 1976 to 1977.

Imports of processed pork decreased from 293 million pounds in 1976 to 271 million pounds in 1977, and increased from 148 million pounds in the first 6 months of 1977 to 151 million pounds in the first 6 months in 1978. Imports as a percentage of production decreased from 2.9 percent in 1976 to 2.5 percent in 1977.

Customers responding to the Department's survey indicated that they did not purchase any imported pork products in 1976, 1977 and the first 6 months of 1978.

CONCLUSION

After careful review, I determine that all workers of Tobin Packing Company, Inc., Albany, New York are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of November 1978.

JAMES F. TAYLOR,
Director, Office of Management Administration and Planning.

[TA-W-3985]

TORSION BALANCE CO., CLIFTON, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3985: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 19, 1978 in response to a worker petition received on July 17, 1978 which was filed on behalf of workers and former workers producing balance scales, pharmaceutical and student balances at Torsion Balance Company, Clifton, New Jersey. The investigation revealed that production is not limited to pharmaceutical and student balances, but includes many types of laboratory balances.

The Notice of Investigation was published in the FEDERAL REGISTER on July 28, 1978 (43 FR 32885). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Torsion Balance Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of laboratory balances increased absolutely from $9.7 million in 1976 to $14.3 million in 1977. Imports increased from $3.1 million in the first quarter of 1977 to $4.4 million in the first quarter of 1978.

A survey of customers of Torsion Balance Company, Clifton, New Jersey, revealed that customers decreased purchases of balances from the subject firm in the first half of 1978 compared to the first half of 1977 while increasing purchases of imported balances during the same period.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with laboratory balances produced at Torsion Balance Company, Clifton, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Torsion Balance Company, Clifton, New Jersey who became totally or partially separated from employment on or after January 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of November 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-4131]

U.S. PLASTIC & CHEMICAL CORP., DANIELSON, CONN.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4131: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on August 31, 1978 in response to a worker petition received on August 28, 1978 which was filed by the United Rubber, Cork, Linoleum and Plastic Workers of America on behalf of workers and former workers engaged in the production, polishing and finishing of buttons at the Danielson, Connecticut plant of U.S. Plastic and Chemical Corporation. The investigation revealed that the Danielson plant produced plastic buttons and is now confined to the polishing and finishing operations of the total process.

The Notice of Investigation was published in the FEDERAL REGISTER on September 12, 1978 (43 FR 40576). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of U.S. Plastic and Chemical Corporation, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Production and employment declines at the Danielson, Connecticut plant of U.S. Plastic and Chemical Corporation are attributable to a domestic transfer of production.

U.S. Plastic and Chemical Corporation began the transfer of button production from its Danielson, Connecticut plant to its Putnam, Connecticut plant in April and May of 1977.

The production of buttons at the Danielson plant ceased entirely in February, 1978.

Total Company production of buttons increased, in quantity, in each month from September through December of 1977 as compared to the respective month of 1976. Companywide production continued to increase during the January-August period of 1978 compared to January-August of 1977, as production was transferred to the Putnam, Connecticut plant.

Company sales increased, in quantity and in value, in the January-August period of 1978 compared to the same period of 1977.

U.S. Plastic and Chemical Corporation imported raw materials for button production and some finished buttons. The finished buttons, however, were an insignificant proportion of company sales in 1977 and in the first nine months of 1978. In addition, the finished button imports are not plastic buttons but consist of types and styles of buttons that are not produced by the company.

CONCLUSION

After careful review, I determine that all workers of the Danielson, Connecticut plant of U.S. Plastic and Chemical Corporation are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of November 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

WEYERHAEUSER CO., RIDGWAY, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3771: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 24, 1978 in response to a worker petition received on May 23, 1978 which was filed by the United Brotherhood of Carpenters and Joiners of America, incorrectly stated as workers in the Notice of Investigation, on behalf of workers and former workers producing sliced veneer at the Ridgway, Pennsylvania plant of Weyerhaeuser Company. The investigation revealed that solid core apartment/office doors were also produced at the plant.

The Notice of Investigation was published in the FEDERAL REGISTER on June 6, 1978 (43 FR 24634-5). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Weyerhaeuser Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group of eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

The ratios of imports to domestic production for wood doors and hardwood veneer were 2 percent or less and 1 percent or less, respectively in each year from 1974 through 1977.

A survey of customers of Weyerhaeuser Company was conducted by the Department. The survey indicated that customers who had purchased doors or veneer from Weyerhaeuser Company did not purchase imports of the respective products in the period January 1976 through August 1978.

CONCLUSION

After careful review, I determine that all workers of the Ridgway, Pennsylvania plant of Weyerhaeuser Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of November 1974.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

Pension and Welfare Benefit Programs

ADVISORY COUNCIL ON EMPLOYEE WELFARE AND PENSION BENEFIT PLANS

Meeting Rescheduling

Pursuant to Section 512 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1142) on November 21, 1978, the Department announced a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m. on Tuesday, December 12, 1978, in the Ambassador Room, Shoreham Americana, Connecticut Avenue at Calvert Street, NW., Washington, D.C.

The purpose of this Notice is to advise all interested persons that the meeting has been rescheduled for January 1979 at a date yet to be determined.

Signed at Washington, D.C., this 29 day of November 1978.

IAN D. LANOFF,
Administrator of Pension and Welfare Benefit Programs.

NUCLEAR REGULATORY COMMISSION

[Construction Permit Nos. CPPR-139, CPPR-140]

UNION ELECTRIC CO., (CALLAWAY PLANT, UNITS 1 AND 2)

Order Regarding Oral Argument

NOVEMBER 23, 1978.

Oral argument on the appeals taken by the Union Electric Company and William Smart from the September 28, 1978 initial decision of the Licensing Board in this show cause proceeding [1] will be heard at *9:30 a.m. on Wednesday, January 10, 1979 in the Moot Courtroom of the Howard University School of Law.* That courtroom is located on the basement level of Houston Hall on the Law school campus. Although the official address of the school is 2935 Upton Street, N.W., Washington, D.C. (east of Connecticut Avenue), Houston Hall is best approached from Van Ness Street.

The order of presentation and the time allotted each party for argument will be announced next month following our receipt of appellees' briefs. The appeals present narrow issues of law on stipulated facts and this Board will be fully familiar with the parties' positions as developed in their briefs. Accordingly, no party should expect more than forty minutes for argument.

The Secretary to this Board is to be advised by letter, mailed no later than January 2, 1979, of the names of counsel who will be participating in the argument.

It is so ordered.

For the Appeal Board.

MARGARET E. DU FLO,
Secretary to the Appeal Board.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.70, Revision 3, "Standard Format and Content of Safety Analysis Reports for Nuclear Power Plants," identifies the principal information that should be provided by applicants in safety analysis reports for nuclear power plants using light-water-cooled reactors and provides a uniform format for presenting this information. Revision 3 includes a new Appendix A that provides guidelines for submitting information on safety-related interfaces for standard designs of major portions of nuclear power plants. (The content of Appendix A was previously issued for public comment as "Interfaces for Standard Designs," NUREG-0102, August 1976.) This revision reflects public comments and refinements in the NRC staff's information needs.

The issuance of Revision 3 of Regulatory Guide 1.70 implements one of the recommendations set forth by an NRC study group in NUREG-0292, "Nuclear Power Plant Licensing: Opportunities for Improvement," that was approved as Commission policy in October 1977. The purpose of this recommendation is to improve the quality of license applications by keeping Regulatory Guide 1.70 updated and consistent with NUREG-75/087, "Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants."

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docket and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of the latest revision of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copy-righted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland, this 27th day of November 1978.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of Standards Development.

Regulatory Guide 1.72, Revision 2, "Spray Pond Piping Made from Fiberglass-Reinforced Thermosetting Resin," describes a method acceptable to the NRC staff for complying with the Commission's regulations with regard to the design, fabriation, and testing of fiberglass-reinforced thermosetting resin piping for spray pond applications. This guide has been revised as a result of public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

POSTAL SERVICE

INTERNATIONAL EXPRESS MAIL RATES

Proposed Rates

AGENCY: Postal Service.

ACTION: Proposed International Express Mail Service Rates.

SUMMARY: Pursuant to its authority under 39 U.S.C. 407, the Postal Service proposes to begin International Express Mail Service with the Republic of China (Taiwan), Singapore, the Federal Republic of Germany (West Germany), and Switzerland at rates indicated in the tables below. Rates to two of these countries, the Federal Republic of Germany and Switzerland, are proposed to be the same as those currently charged to other European countries. Rates for the Republic of China and Singapore are new. Depending upon when agreements are concluded with each country, the proposed rates could become effective as early as January 1, 1979.

DATE: Comments must be received on or before December 22, 1978.

ADDRESS: Written comments should be directed to the General Manager, Expedited Mail Services Division, Customer Services Department, U.S. Postal Service, Washington, D.C. 20260. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m. Monday through Friday in Room 5986.

FOR FURTHER INFORMATION CONTACT:

Patricia M. Gibert (202) 245-5624.

SUPPLEMENTARY INFORMATION: Although 39 U.S.C. 407 does not require advance notice and opportunity for submission of comments and the Postal Service is exempted by 39 U.S.C. 410(a) from the advance notice requirement of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C. 553), the Postal Service invites interested persons to submit written data, views, or arguments concerning the proposed rates of postage for International Express Mail set out in the following tables (designated 8-3, 8-9, 8-11 through 8-14 for inclusion in Publication 42, International Mail, incorporated by reference, 39 CFR 10.1).

(39 U.S.C. 401, 403, 404 (2), 407, 410(a).)

ROGER P. CRAIG,
Deputy General Counsel.

PRESIDENTIAL COMMISSION ON WORLD HUNGER

REPORTS FROM SUBCOMMITTEES

Meeting

The second meeting of the Presidential Commission on World Hunger will be held on Monday, December 18, 1978, from 10:00 am to approximately 4:00 pm at the Department of State.

The agenda for the meeting will be concerned with reports from the Commission's subcommittees and other business as required.

The meeting will be open to observation by the public by reservation. Requests for reservations should be made in person or by letter addressed to the Presidential Commission on World Hunger, 734 Jackson Place, NW., Washington, D.C. 20006. Reservation requests must be made by Thursday, December 14, 1978.

Minutes of the Commission meeting will be available upon request 30 days after the meeting. In addition, copies of the meeting transcript will be available for public inspection and copying at actual cost at the Commission offices.

DANIEL E. SHAUGHNESSY,
Deputy Executive Director, Presidential Commission on World Hunger.

SECURITIES AND EXCHANGE COMMISSION

[File No. 81-420]

AMERICAN FAMILY MUTUAL INSURANCE CO.

Application and Opportunity for Hearing

NOVEMBER 27, 1978.

Notice is hereby given that American Family Mutual Insurance Company ("Applicant") has filed an application, pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), that Applicant be granted a partial exemption from the reporting provisions of Section 15(d) of that Act.

The Applicant states, in part:

1. Applicant is incorporated under the laws of the State of Wisconsin.

2. A wholly-owned subsidiary of the Applicant, American Family Financial Services, Inc., offered $10,000,000 principal amount of 9% Senior Notes due February 1, 1986 pursuant to a registration statement. The payment of principal and interest on the Notes was unconditionally guaranteed by the Applicant.

3. Information concerning the Applicant's business, and audited financial statements prepared in conformity with accounting principles established by the Wisconsin Commissioner of Insurance were included in the registration statement covering such offering.

4. Applicant proposes to file joint periodic reports with the subsidiary on Forms 10-K and 10-Q and include textual information substantially similar to that provided in the registration statement.

In the absence of a partial exemption, Applicant is required to file all reports required by Section 15(d) of the 1934 Act. Applicant believes that its request for an order partially exempting it from the provisions of Section 15(d) of the 1934 Act is appropriate in view of Applicant's status as co-registrant. Applicant believes that the time, effort and expense involved in preparation of additional periodic reports would be disproportionate to any benefit of the public.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 500 North Capitol Street NW., Washington, D.C. 20549.

Notice is further given that any interested person not later than December 22, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. 81-418]

AMERICAN SAFETY EQUIPMENT CORP.

Application and Opportunity for Hearing

NOVEMBER 27, 1978.

Notice is hereby given that American Safety Equipment Corporation ("Applicant") has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act") for an order exempting Applicant from the provisions of Section 15(d) of that Act.

The Applicant states, in part:

1. On July 28, 1978, Applicant became a wholly owned subsidiary of The Marmon Group, Inc. As a result of the merger, Applicant no longer has any public stockholders.

2., Applicant's common stock has been removed from listing and registration on the American Stock Exchange, and there is no trading in this security.

In absence of an exemption, Applicant would be required to file periodic reports pursuant to the provisions of Section 15(d) of the 1934 Act. Applicant believes that its request for an order exempting it from the reporting provisions of Section 15(d) is appropriate inasmuch as it is now a wholly owned subsidiary and has no publicly held common stock.

For a more detailed statement of the information presented, all persons are referred to the application which may be examined at the Commission's Public Reference Section, 1100 L St., N.W., Washington, D.C. 20549.

Notice is further given that any interested person, not later than December 22, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed to Secretary, Securities, and Exchange Commission, 500 North Capitol Street, N.W., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request and the issues of fact and law raised by the application which he desires to controvert. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

DIVERSEY CORP.

Application and Opportunity for Hearing

NOVEMBER 27, 1978.

Notice is hereby given that The Diversey Corporation ("Applicant") has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act") for an order granting Applicant an exemption form the provisions of Section 15(d) of the 1934 Act.

The Applicant states, in part:

1. On July 14, 1978 Applicant merged into Oron Interim Corporation, a Subsidiary of ORON, Inc, and became a wholly-owned subsidiary of the Molson Companies, Ltd., a Canadian corporation. As a result of the merger, Applicant no longer has any publicly owned common stock.

2. The Applicant has filed with the Commission its Annual Report on Form 10-K, containing audited financial statements for the year ended December 31, 1977, plus a consolidated summary of operations of Applicant for the five years ended December 31, 1977.

Applicant argues that the granting of the exemption would not be inconsistent with the public interest or the protection of investors.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 500 North Capitol Street, Washington, D.C. 20549.

Notice is further given that any interested person not later than December 22, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability fo a hearing thereon. Any such commuication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street, NW., Washington, D.C 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for the request, and the issues of fact and law raised by the application which such person desires to controvert. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01-M]

[File No. 81-406]

INTERPOOL LTD.

Application and Opportunity for Hearing

NOVEMBER 27, 1978.

Notice is hereby given that Interpool Limited ("Applicant") filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended, (the "1934 Act") seeking an exemption from the requirements to file reports pursuant to Section 15(d) of the 1934 Act.

The Applicant states, in part:

1. The Applicant is a Bahamian company subject to the reporting provisions of Section 15(d) of the 1934 Act.

2. On June 28, 1978 a tender was made for all the Capital Shares of the Applicant by Thyssen-Bornemisza N.V., a Netherlands Antilles company and the applicant is now approximately 99 percent owned by Thyssen-Bornemisza N.V.

In the absence of an exemption, Applicant is required to file periodic reports pursuant to Sections 15(d) of the 1934 Act. Applicant believes that its request for an order exempting it from the reporting requirements is appropriate in view of the fact that Applicant believes that the time, effort and expense involved in preparation of additional periodic reports would be disproportionate to any benefit to the public.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 500 North Capitol Street NW., Washington, D.C.

Notice is further given that any interested person not later than Dec. 22, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed to Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

MIDWEST STOCK EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on November 17, 1978, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Rule 23 of Article VIII is hereby further amended from the proposal in the initial filing on this form as follows:

ARTICLE VIII—ARBITRATION OF SMALL CLAIMS

Rule 23.*

(a) No change in text.

(b) The Claimant shall file with the Director of Arbitration one (1) executed Submission Agreement and one (1) copy of the Statement of Claim of the controversy in dispute, together with documents in support of the claim. The statement of claim shall specify the relevant facts, the remedies sought and whether or not a hearing is [requested] *demanded.*

(c) No change in text.

(d) No change in text.

(e) The Director of Arbitration shall endeavor to serve promptly by mail or otherwise on the Claimant a copy of the Answer, Counterclaim, Third Party Claim or other responsive pleading, if any. The Claimant, *if a Counterclaim is asserted against him,* shall within ten (10) calendar days [file a Reply to any Counterclaim with the Director of Arbitration who will serve a copy of the Reply on the Respondent(s). In his discretion, the arbitrator may, at the request of any party, permit such party to submit additional documentation relating to the pleadings.] *either (i) file a Reply to any Counterclaim with the Director of Arbitration who will serve a copy of the Reply on the Respondent(s) or (ii) if the amount of the Counterclaim exceeds the Claim, shall have the right*

* Brackets ([]) indicate deletions: *Italics* indicate new material.

V 43/234 DEC 5 78 UMI

to file a statement withdrawing the Claim. If the Claimant withdraws the Claim, the proceedings will be discontinued without prejudice to the rights of the parties.

(f) No change in text.

(g) No change in text.

(h) No change in text.

(i) [The arbitrator may, in his sole discretion, request that the Director of Arbitration appoint (2) additional arbitrators so that the matter in controversey will be decided by three (3) arbitrators.] *Upon the request of the arbitrator, the Director of Arbitration shall two (2) additional arbitrators to a panel which shall decide the matter in controversy.*

(j) No change in text.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

PURPOSE OF PROPOSED RULE CHANGE

The proposed rule change was drafted by the Securities Industry Conference on Arbitration in answer to an SEC directive to the securities industry to establish a uniform system for the resolution of the customers' small claims against brokers.

BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

The proposed rule change seeks to remove impediments to the establishment of a national market system and seeks to protect the public investors by creating a uniform rule for the resolution of customer disputes involving small claims.

COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS OR OTHERS ON PROPOSED RULE CHANGE

The Midwest Stock Exchange, Incorporated has neither solicited nor received any comments.

BURDEN ON COMPETITION

The Midwest Stock Exchange, Incorporated believes that no burdens have been placed on competition.

On or before January 9, 1979, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before December 26, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

NOVEMBER 24, 1978.

[Release No. 10491; 812-4367]

PUTNAM CONVERTIBLE FUND, INC. ET AL.

Filing of Application for an Exemption

NOVEMBER 27, 1978.

Notice is hereby given that Putnam Convertible Fund, Inc., Putnam Equities Fund, Inc., The George Putnam Fund of Boston, The Putnam Growth Fund, Putnam High Yield Trust, The Putnam Income Fund, Inc., Putnam Investors Fund, Inc., Putnam Option Income Trust, Putnam Tax Exempt Income Fund, Putnam Vista Fund, Inc., and Putnam Voyager Fund, Inc. (collectively, "Funds"), and Putnam Fund Distributors, Inc. ("Distributors") (collectively, "Applicants"), 265 Franklin Street, Boston, Massachusetts 02110, filed an application on September 13, 1978, and an amendment thereto on October 26, 1978, for an order, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicants from the provisions of Section 22(d) of the Act and Rule 22d-1 thereunder to the extent necessary to permit sales of the Funds' securities at net asset value to Putnam Affiliated Employees, as defined below, who are participants in a non-tax qualified employee benefit plan. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Funds are each registered under the Act as diversified, open-end management investment companies and are organized as corporations or established as Massachusetts business trusts under Massachusetts law. The Funds are currently engaged in continuous public offerings of their shares through Distributors, as principal underwriter, at public offering prices equal to net asset value plus a sales charge.

Distributors, a Massachusetts corporation, is a wholly-owned subsidiary of Marsh & McLennan Management Company, a holding company whose other subsidiaries include the Putnam Management Company, Inc. ("Putnam Management"), which serves as investment manager for the Funds, Putnam Administrative Services Company, Inc., the Funds' shareholder servicing agent, and Putnam Advisory Services, Inc., Putnam Capital Services, Inc., and The Putnam Advisory Company, Inc., which provide investment management and related services to clients other than mutual funds (Marsh & McLennan Management Company and its subsidiaries which provide investment management and related services including any acquired or formed subsequent to the date of this application are hereinafter referred to as the "Marsh & McLennan Management Companies"). Two subsidiaries of Marsh & McLennan Management Company, Landauer Associates, Inc., which engages in real estate consulting, and Victor O. Schinner & Company, Inc., which engages in insurance management and underwriting, are not included as Marsh & McLennan Management Companies. As of September 1, 1978, the employees of Marsh & McLennan Management Companies totaled approximately 325 (employees of Marsh & McLennan Management Companies are hereinafter referred to as "Putnam Affiliated Employees"). Marsh & McLennan Management Company is a wholly-owned subsidiary of Marsh & McLennan Companies, Inc., a publicly owned holding company whose other principal subsidiaries are international insurance brokers and employee benefit consultants.

Applicants propose to permit those Putnam Affiliated Employees participating in an employee benefit plan ("Plan") sponsored by the employers constituting Marsh & McLennan Management Companies to purchase shares of the funds at net asset value. Applicants state that participating Putnam Affiliated Employees will be able to invest in the Plan (1) by payroll deduction in the amount of $25 or more for each investment, (2) Through automatic periodic bank checking account withdrawal plans in the amount of $25 or more for each investment, and (3) by investment at any time in the amount of $50 or more sent directly from the participant to Distributors provided the participant has invested at least $500 in shares of the Fund in which the participant

seeks to invest, regardless of whether such investment was made pursuant to the Plan.

Distributions of Fund shares acquired under the Plan would be reinvested at net asset value in shares of such Fund. Applicants also state that participants will agree not to resell Fund shares acquired through their participation in the Plan except by repurchase or redemption by or for the account of the Fund issuing such shares.

Applicants assert that no individual or in-person group sales solicitations or presentations concerning the Plan will be made. According to the application, all Putnam Affiliated Employees will receive, at least annually, notice from their employers concerning the Plan. This notice, which will be furnished at the expense of such employers, will identify the various Funds, describe their investment objectives, indicate that investments in the Plan would be at net asset value and detail the payroll deduction and other ways in which investments could be made. This notice would also indicate that additional information concerning the Plan and the Funds could be obtained from Distributors and would inform employees of the availability of prospectuses of the Funds from the employers.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company shall sell any redeemable security issued by it to any person except either to or through a principal underwriter for distribution or at a current public offering price described in the prospectus, and, if such class of security is being currently offered to the public by or through an underwriter, no principal underwriter of such security and no dealer shall sell any such security to any person except a dealer, a principal underwriter, or the issuer, except at a current public offering price described in the prospectus. Rule 22d-1 permits reductions in or eliminations of the sales load charged upon the sale of shares under certain circumstances. Applicants submit that the sale of Fund shares to Putnam Affiliated Employees at net asset value under the Plan may conflict with the Provisions of Section 22(d) of the Act and Rule 22d-1 thereunder.

Applicants argue that while Rule 22d-1(i) permits sales without any sales charge to certain employees of affiliated persons of the Funds, this would not be available to employees of Marsh & McLennan Management Companies, except for employees of Distributors and Putnam Management. Applicants also claim that an argument may be made that purchases of Fund shares at net asset value by Putnam affiliated Employees under the Plan are permitted by Rule 22d-1(f), which permits elimination of sales charges upon the sale pursuant to a uniform offer described in the prospectus and made to employee benefit plans not qualified under Section 401 of the Internal Revenue Code provided such non-qualified plans satisfy uniform criteria relating to the realization of economies of scale in sales effort and sales-related expenses. Applicants submit it is not clear, however, that net asset value sales to the Putnam Affiliated Employees covered by the Plan would meet the "uniform offer" requirement of Rule 22d-1(f) and have determined to seek an exemption from Section 22(d) of the Act and the rules thereunder, pursuant to Section 6(c) of the Act.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants submit that investment by Putnam Affiliated Employees pursuant to the Plan in shares of the Funds at net asset value is supported by policy considerations, that such sales should result in demonstrable economies in sales effort and sales related expense as compared with other sales and would not be unjustly discriminatory, and that the grant of the exemption requested by the application is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes of Section 22(d) of the Act. Applicants further submit that the affiliation of the Funds' principal underwriter and investment manager to the other Marsh & McLennan Management Companies is the basis for a unique relationship of the Marsh & McLennan Management Companies to the Funds which can be expected to result in economies of sales effort and sales related expenses that justifies elimination of all sales charges on Fund shares purchased by participants in the Plan without discrimination against other employee benefit plans or other purchasers of Fund shares.

According to the application, features of the plan which are expected to give rise to economies of scale in sales effort and sales related expense are: (1) There will not be any personal solicitation of participants by Distributors, its representatives or other broker-dealers; (2) employees purchasing shares through payroll deduction will have shares purchased for their accounts at each payroll date with payment for such shares being made by a single check; (3) distributions on Fund shares will be automatically reinvested in additional Fund shares; and (4) all eligible employees will receive at least annually, at the expense of their employers, notice of the availability of the Plan. Applicants believe that such investments promote employee incentive, good will and loyalty.

Notice is further given than any interested person may, not later than December 22, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SUNAIR ELECTRONICS, INC.

Suspension of Trading

NOVEMBER 22, 1978.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of Sunair Electronics, Inc. being traded on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of

V 43/234 DEC 5 78 UMI

1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 12:45 p.m. on November 22, 1978 through December 1, 1978.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01-M]

WASHINGTON MUTUAL SAVINGS BANK, AS ORIGINATOR AND SERVICER

Application and Opportunity for Hearing

NOVEMBER 27, 1978.

Notice is hereby given that Washington Mutual Savings Bank ("Applicant"), 1101 Second Avenue, Seattle, Wash. 98101, has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended ("1934 Act") for exemption from certain reporting requirements of Section 15(d) of the 1934 Act.

The Applicant states in part:

Applicant, a mutual savings bank operating under the laws of the State of Washington, is the originator and servicer under a Pooling and Servicing Agreement providing for the issuance of Mortgage-Backed Certificates, Series A, 9% Pass-through Rate.

In the Absence of an exemption, the Applicant would be required to file reports adhering to all the item requirements of the Forms 10-K, 10-Q, 8-K.

Accordingly, Applicant believes that the exemptive order requested by it is appropriate in view of the fact that Form 10-Q and certain items of the Forms 10-K and 8-K are inapplicable to the pass-through mortgage pool arrangement.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the office of the Commission at 500 North Capitol Street NW., Washington, D.C. 20549.

Notice is further given that any interested person not later than December 22, 1978, may submit to the Commission in writing his views on any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. 81-404]

WEKSLER INSTRUMENTS CORP.

Application and Opportunity for Hearing

NOVEMBER 27, 1978.

Notice is hereby given that Weksler Instruments Corporation ("Applicant") has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), for an order exempting Applicant from the provisions of Sections 13 and 15(d) of the 1934 Act.

The Applicant states, in part:

1. On May 10, 1978, Applicant merged with WIC Newco, Inc. As a result of the merger, Applicant no longer has any publicly owned common stock.

2. The Applicant has filed with the Commission its Form 10-Q for the period ended June 30, 1978 which reflects the merger.

Applicant argues that the granting of the exemption would not be inconsistent with the public interest or the protection of investors.

For more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 500 North Capitol Street, Washington, D.C. 20549.

Notice is further given that any interested person not later than December 22, 1978, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street, N.W., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 01/01-0298]

CHANDLER PHILLIPS CAPITAL CORP.

License to Operate as a Small Business Investment Company

Notice is hereby given that an Application has been filed with the Small business Administration pursuant to § 107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1978)) under the name of The Chandler Phillips Capital Corporation (Applicant), for a License to operate as a Small Business Investment Company under the provisions of the Small Business Investment Act of 1958, as amended (Act), and the Rules and Regulations promulgated thereunder.

The Applicant is incorporated under the laws of the State of Connecticut and it will commence operations with a capitalization of $500,000, which amount is to be raised through the private sale of 100 percent of its Common Stock to The Business Credit Center, Inc. (Business). Business, parent of the Applicant through its 100 percent stock ownership thereof, was incorporated in September 1978, to engage in the business of commercial finance. Business is located at 65 La Salle Road, West Hartford, Connecticut 06107. The Chairman of the Board and President of Business, Richard E. Mount and Harold C. Hurley, Jr., respectively, are founders and sole holders of the Class B Common Stock of Business which elects a majority of the Board of Directors of Business and, therefore, control the management of Business.

The Applicant will have its principal place of business at 65 La Salle Road, West Hartford, Connecticut 06107 and it intends to conduct operations principally in the State of Connecticut.

The Officers and Directors of the Applicant will be:

Name and Title
Richard E. Mount, chairman and secretary, 31 Oak Ridge Lane, West Hartford, Connecticut 06107.
Harold C. Hurley, Jr., President, Treasurer and Director, 67 Haywood Drive, Glastonburg, Connecticut 06033.
Harry E. Mount, Director, 219 Walden Street, West Hartford, Connecticut 06107.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the Applicant under their management, including adequate profitability and financial soundness in accordance with the Act and SBA Regulations.

Notice is hereby given that any person may on or before December 20, 1978, submit written comments on the Applicant to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published by the Applicant in a newspaper of general circulation in West Hartford, Connecticut.

(Catalogue of Federal Domestic Assistance Program No. 59.011 Small Business Investment Companies)

Dated: November 28, 1978.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

Federal Railroad Administration

Minority Business Resource Center Advisory Committee

Meeting

Pursuant to Section 19(a) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463); 5 U.S.C. App. I), notice is hereby given of a meeting of the Minority Business Resource Center Advisory Committee to be held December 14, 1978, at 10:00 a.m. until 3:00 p.m. at the New Orleans Marriott Hotel, 555 Canal Street, New Orleans, Louisiana 70140. The agenda for the meeting is as follows:

Expanding market opportunities
MBRC interim assessment of program needs

Attendance is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to attend and persons wishing to present oral statements should notify the Minority Business Resource Center not later than the day before the meeting. Information pertaining to the meeting may be obtained from Mr. Harvey C. Jones, Advisory Committee Staff Assistant, Minority Business Resource Center, Federal Railroad Administration, 400 7th Street, S.W., Washington, D.C. 20590, telephone: (202) 472-2449. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, D.C. on September 7, 1978.

KENNETH E. BOLTON,
Director.

[4810-28-M]

DEPARTMENT OF THE TREASURY

Office of Revenue Sharing

ENTITLEMENT PERIOD TEN

Use of Estimated Data for General Revenue Sharing Purposes

Pursuant to § 51.20(b)(3) of the revenue sharing regulations (31 CFR 51.20 (b)(3)) and the authority of the Secretary of the Treasury under section 109 (a)(7)(B) of the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1228 (a)(7)(B)), notice is hereby given that the Secretary has used additional data and estimates which have necessitated upward revisions to the populations of certain counties and states for purposes of the intrastate allocations for Entitlement Period Ten (October 1, 1978 to September 30, 1979). Such revisions are contained in the accompanying table which shows original and revised 1976 population estimates.

Section 51.20(a) of the regulations (31 CFR 51.20(a)) provides that the data used in the determination of allocations and adjustments will be the latest and most complete data supplied by the Bureau of the Census or such sources of data as in the judgment of the Secretary will provide for equitable allocations. Section 51.20(b)(3) of the regulations (31 CFR 51.20(b)(3)) requires that where the Secretary determines that the data provided by the Bureau of Census or the Department of Commerce are not current enough, not comprehensive enough, or are otherwise inadequate to provide for equitable allocations, the Secretary may use other data, including estimates. The Secretary's determination shall be final.

These revisions are the direct consequence of data verifications initiated by the Navajo, Oglala Sioux, and Osage Indian tribes for prior entitlement periods. Documentary evidence presented by the tribes, and estimates developed by the Bureau of Indian Affairs, indicated higher populations for those tribes than the Census-based estimates had provided for those entitlement periods. The documentary evidence and estimates necessitated upward revisions in the 1970 Census counts and the 1973 and 1975 estimates of the population of those counties and states in the accompanying table, for purposes of equitably determining the intrastate allocations. The last revisions in the 1975 population estimates for Entitlement Period Nine were published in the FEDERAL REGISTER on May 4, 1977 (42 FR 22615).

Since the 1976 Census-based estimates of population (as denoted by the column designated "Original") do not reflect the earlier documentation and Bureau of Indian Affairs estimates of population, it has been necessary to adjust comparably the 1976 population estimates of these same affected counties and states in the intrastate allocations for Entitlement Period Ten.

1976 POPULATION

[Entitlement period 10]

State and County	Original	Revised [1]
Arizona	2,249,255	2,273,240
Apache County	43,745	49,238

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

[Notice No. 228]

DECEMBER 1, 1978.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

NOTE.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

MOTOR CARRIERS OF PROPERTY

MC 808 (Sub-54TA, filed October 25, 1978. Applicant: ANCHOR MOTOR FREIGHT, INC., 21111 Chagrin Boulevard, P.O. Box 22005, Cleveland, OH 44122. Representative: J. A. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Gasoline, aviation gasoline, kerosene, diesel fuel, petroleum products, refined oil, illuminating or burning nos. 1, 2 & 3, in tank trucks*, (1) from Green Island, NY to points in Bennington, Rutland, Addison, Chittenden, Franklin, Lamoille and Washington Counties, VT; and (2) from Fair Haven, VT to Washington, Warren and Essex Counties, NY, under a continuing contract or contracts with J. R. Sousa & Sons, Inc., for 180 days. SUPPORTING SHIPPER(S): J. R. Sousa & Sons, Inc., Albany Avenue, Green Island, NY 12183. SEND PROTESTS TO: District Supervisor David A. Demers, P.O. Box 548, 87 State Street, Montpelier, VT 05602.

MC 145652TA, filed October 30, 1978. Applicant: ABBA CAB CO., INC., 4402 Waters Avenue, Savannah, GA 31404. Representative: M. J. Koncul, Jr.(same as above). *Passengers and their baggage*, from Savannah, GA to points in SC, i.e., Allendale, Bluffton, Beaufort, Columbia, Estill, Hardeeville, Orangeburg, Parris Island, Ridgeland, Yemassee, Hilton Head, Walterboro, Charleston, SC, for 180 days. SUPPORTING SHIPPER(S): Amtrak, 2611 Seaboard Coastline Drive, Savannah, GA 31408. SEND PROTESTS TO: District Supervisor G. H. Fauss, Jr., Box 35008, 400 West Bay Street, Jacksonville, FL 32202.

MC 145653TA, filed October 25, 1978. Applicant: THE BROWNIE CORPORATION, P.O. Box 273, Port Huron, MI 48060. Representative: William R. Neal (Same as above). *Beet pulp pellets*, from Carrollton, Caro, Croswell, Sebewaing, and Bay City, MI to Port Huron and Essexville, MI, for 180 days. Restricted to traffic having a subsequent movement by water. An underlying ETA seeks 90 days authority. SUPPORTING SHIPPER(S): Donal Lemm, Director of Transportation, I. S. Joseph Company, Inc., 777 Grain Exchange Building, 400 South Fourth Street, Minneapolis, MN 55415. SEND PROTESTS TO: Tim Quinn, 604 Federal Building & U.S. Courthouse, 231 W. Lafayette Boulevard, Detroit, MI 48226.

MC 145656TA, filed October 25, 1978. Applicant: B & B TRANSPORTATION & LIMOUSINE SERVICE, INC., #1 Finley Avenue West, Birmingham, AL 35204. Representative: D. H. Markstein, Jr., 512 Massey Building, Birmingham, AL 35203. *Passengers and their baggage in special and charter operations*, between points in Jefferson and Shelby Counties, AL on the one hand, and, on the other hand, points in the U.S., for 180 days. SUPPORTING SHIPPER(S): There are (8) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, DC, or copies thereof which may be examined at the field office named below. SEND PROTESTS TO: Mabel E. Holston, Trans. Assistant, Room 1616 2121 Building, Birmingham, AL 35203.

By the Commission.

H. G. Homme, Jr.,
Acting Secretary.

[Ex Parte No. MC-121]

POLICY STATEMENT ON MOTOR CARRIER REGULATION

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposal to issue a statement of general policy.

SUMMARY: The Commission proposes to adopt a policy statement which will provide notice that it has altered its standard of proof in cases involving motor carrier entry and acquisition. Past regulatory practice has emphasized the need to protect existing motor carriers against excessive competition and against the assumption of exessive debt in order to provide an environment in which a young industry would grow and provide needed public services. In light of the maturity of the motor carrier industry, and of changing economic conditions generally, the Commission has concluded that more weight should be given to the benefits of healthy competition and less emphasis should be placed on protection in carrying out its regulatory responsibilities in the motor carrier area.

DATES: Written comments should be filed with the Commission on or before February 5, 1979.

ADDRESSES: Send comments to: Office of Proceedings, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

George M. Chandler, (202) 275-7723.

SUPPLEMENTARY INFORMATION: Pertinent to the adoption of this policy statement are the regulations recently adopted by the Commission in Ex Parte No. 55 (Sub-No. 26), *Protest Standards in Motor Carrier Application Proceedings*, 43 F.R. 50908 (1978). Under the standards adopted there, the automatic right of one carrier to oppose the application of another carrier will be limited to carriers which, among other things, have performed service within the scope of application. These are the carriers which would be in the best position to meet the burden of proof which, if the proposed policy statement is adopted, would be placed upon them. By the same token, it is anticipated that this policy statement would provide guidelines for determining whether carriers not having an automatic right to protest should be given leave to intervene in opposition to an application.

Background

Federal regulation of motor carrier entry began with the passage of the Motor Carrier Act of 1935. The statutory test which the Commission must apply in determining whether to grant an application for new interstate motor common carrier authority—public convenience and necessity—has remained unchanged since the Act was passed. The test applied in deciding contract carrier applications—consistence with the public interest and the National Transportation Policy—was last modified legislatively in 1957.

A number of factors combined to cause the Congress to bring motor carrier transportation under Federal regulation in the 1930's. First, and probably most important, was the state of the economy itself. The worst economic depression in our history was at its height, and a great many, if not most, businesses were in serious financial difficulties. Intercity trucking, being young and just beginning to grow, suffered more problems than did most other businesses. Certainly, one of the principal purposes behind the 1935 Act was to bring economic stability to an industry which was perceived by the Congress as one which would inevitably come to provide important and essential services for the public.

There seems to have been no one who predicted the course which the motor carrier industry, under regulation, would take in the years following the passage of the Motor Carrier Act. Some observers believed that motor transportation would develop in much the same way as had the railroads, with a relatively small number of large companies operating over fixed routes between major points, and a somewhat larger number of smaller companies feeding them traffic. Such large regular route carriers have indeed developed, but to a much greater extent, both in numbers and route structures, than anyone foresaw. Certainly, there was no anticipation that the highly specialized, truckload volume, irregular route trucking services which are so prevalent today would develop to the extend that they have. Nor, apparently, did anyone foresee the phenomenal growth of private transportation which has occurred and which now represents a major source of competition for the regulated carriers.

After passage of the 1935 Act, the Commission received and processed about 90,000 applications for "grandfather" authority. Since that time, the Commission has both received and granted an increasing number of motor carrier authorities. In the first six months of discal year 1978, which began October 1, 1977, the Commission received an average of 950 new applications per month for permanent motor carrier authority. During the same period, of the applications for motor carrier authority which reached decision on the merits (that is, all those which were not either dismissed or withdrawn), 94.3 percent resulted in a complete or partial grant of authority. The grant rate for June 1978 was 98.2 percent, and for July it was 96 percent. The highest rate previously attained was 86.4 percent in fiscal year 1975. The rate dropped to about 80 percent in fiscal 1976, and rose again to 86 percent in fiscal 1977.

The Commission's policies for dealing with motor carrier applications have evolved gradually over the more than 40 years that regulation has been in effect. As the economy changed and the Commission's membership changed; as motor carrier technology developed and the industry became strong and more specialized; and as shipper distribution practices and techniques changed, the Commission changed its policies gradually to meet what it perceived to be the needs of the shippers and the carriers.

Thus, even though the statutory language which the Commission must follow in deciding motor carrier entry cases has remained the same for many years, the way the language has been interpreted and applied has changed over time in recognition of a constantly changing world. Over the years, the trend has been to make it easier for applicants to obtain new operating authority. What we have seen in the past year or two is an acceleration of that trend—a trend which reflects clearly descernible changes in the regulated industry and the national economy.

The regulatory policies which became fixed in the 1930's and 1940's were characterized by a protectionist attitude which unquestionably reflected the national need for the development of a stable and profitable motor carrier industry. When that industry was young and was faced with the economic disaster of the depression years—and then when it was growing stronger and developing in the postwar years—protection was necessary. Carriers needed to be protected from excess competition if they were to raise the capital, make the investments, and develop the operating patterns necessary to make them financially viable and to meet the public need for service. When stable and reliable bus and trucking services were the exception rather than the rule, and when the automobile and private truck had not yet become a practical alternative, the need for a strictly regulated motor carrier industry, upon which the common carrier obligation to serve could readily be enforced, was a necessity to travelers and shippers.

Today, the motor carrier industry has arrived at a state of maturity characterized by routes and service patterns which blanket the Nation; by financial prosperity; by the existence, side-by-side and competing, of hundreds of successful firms, meeting both new and old customer needs and earning healthy profits; and by generally highly competent managements which have developed sophisticated technologies, cost-control systems, and pricing structures. Obviously, all bus and truck companies are not uniformly well positioned or well managed. In particular, we have recognized the financial problems of the regular route sector of the bus industry.

In the years since the Motor Carrier Act of 1935 was enacted, the regulated industry has matured into one of the most profitable, diverse, competitive, and best managed in the United States. New permanent operating authorities are being granted at the rate of almost 8,000 a year, but the Nation's expanding economy continues to create an apparently never-ending need for new motor carrier services. Although the Commission has become more liberal in granting motor carrier applications, it has still, up to now, been following entry control policies which have changed but little since the advent of Federal regulation. Today, the flood of applications has made it virtually impossible for the Commission to give more than passing attention to each, and has made well-

By the Commission. (Chairman

thing ever envisioned in the early

conclusory comments) to prove that

V 4 3 / 2 3 4

informed, precise motor carrier entry regulation difficult, if not impossible.

In responding to these changing conditions and developing service needs, the Commission has recently tended to give added weight to the needs and wishes of those supporting motor carrier applications. It has also given more weight to the benefits of competition, recognizing it as an effective force for regulating prices and service quality.

ENTRY REGULATION POLICIES

In evaluating motor common carrier applications, the Commission has long followed the three-point test first established in *Pan American Bus Lines Operation*, 1 M.C.C. 190, 203 (1936). That test provides that the Commission will consider an appliction for new authority in the light of the following criteria:

Whether the new operation or service will serve a useful public purpose, responsive to a public demand or need; whether this purpose can and will be served as well by existing lines or carriers; and whether it can be served by applicant with the new operation or service proposed without endangering or impairing the operations of existing carriers contrary to the public interest.

Common carriage.—Today's conditions require a change in that test. The criteria are overly protective for a mature and financially healthy industry, and they tend to restrain healthy competition. The third part of the *Pan American* test, which provides existing carriers with protection from competition which would endanger their abilities to continue to perform service needed by the public, offers what we are convinced is a sufficient degree of protection to carriers already in a particular market. Obviously, only the existing carrier is in a position to show that a grant of the application will have this impact upon it, and it is, therefore, the protestant which will have to bear the burden of proof as to this test. We believe that the second of the three tests laid down in the *Pan American* case—that is, the test which, in effect, requires an applicant to prove that the service it proposes cannot be performed by existing carriers—has outlived its usefulness, and it will no longer be applied.

In determining applications for *motor common carrier authority*, the Commission will henceforth apply the following test in deciding what service is required by the present and future public convenience and necessity:

(1) An applicant must demonstrate that the service proposed will serve a useful public purpose, responsive to a public demand or need.

(2) The Commission will grant common carrier authority commensurate with the demonstrated need unless it is established by those opposing the application that the entry of a new carrier into the field would endanger or impair the operations of existing common carriers contrary to the public interest.

Contract carriage.—In determining motor contract carrier applications, the Commission must apply certain statutory tests. First, it must be shown that the service proposed is that of a contract carrier as defined in 49 U.S.C. § 10102(12) (formerly section 203(a)(15) of the Interstate Commerce Act). Under this provision, a contract carrier is defined as one which provides service "under continuing contract with one person or a limited number of persons either (a) for the furnishing of transportation services through the assignment of motor vehicles for a continuing period of time to the exclusive use of each person served or (b) for the furnishing of transportation services designed to meet the distinct need of each individual customer." The Commission must also consider each contract carrier application in connection with certain criteria contained in 49 U.S.C. § 10923(b)(2) (formerly section 209(b) of the Act). They require that, in determining whether to issue a permit to a contract carrier, the Commission consider "the number of shippers to be served by the applicant, the nature of the service proposed, the effect which granting the permit would have upon the services of the protesting carriers and the effect which denying the permit would have upon the applicant and/or its shipper and the changing character of the shipper's requirements."

In considering *motor contract carrier* applications, the Commission's policy will be to find that the effect of a grant of contract carrier authority upon protesting carriers will not be a significant factor unless the protestants themselves can establish that such a grant would endanger or impair their operations to the extent that they would be unable to continue to provide adequate service within the scope of their authorities.

Emergency temporary authorities.—The Commission is considering establishing, by rule, a category of short-term, non-renewable emergency temporary authorities which would be issued upon receipt of a prospective user's certification that an immediate and urgent need for additional transportation service exists. These authorities would be limited in some respect, perhaps, in terms of time limit, or perhaps in terms of the number of loads or trips that the carrier could perform. Longer-term temporary authorities, including any renewal of a short-term authority, would be issued only after an informal record has been completed, following FEDERAL REGISTER publication and an opportunity for the filing of protests.

MOTOR FINANCE PROCEEDINGS

The Commission is concerned that its present policies in deciding applications of motor carriers to control, merge with, or purchase the operating authorities of other motor carriers may lead unnecessarily to the reduction of effective competition, especially with respect to short-haul markets and service at smaller communities. It has become common for a long-haul carrier to purchase the authority of a short-haul carrier, and to use that new authority solely as a means of extending its long-haul service into another market. The result is that the shippers who had relied upon the vendor's service no longer have that service available. Admittedly, they will instead have available the vendee's new single-line service for long-haul traffic, which may well be to their advantage. However, in the short-haul market formerly served by the vendor, the amount of motor carrier competition will have been diminished. It is our firm view that a purchase proceeding should not be used solely to provide for the extension of a motor carrier's service into new markets. In determining motor finance proceedings, the Commission will authorize an acquisition of operating authorities only if the acquiring carrier establishes that it will continue to perform service similar in scope and character to that authorized by the rights being acquired. If only a new service is intended, the proper vehicle is the filing of an application for new authority.

The Commission is also concerned that it is spending an inordinate amount of its resources considering motor carrier finance proceedings which do not have a significant effect either on the motor carrier industry or on the markets in which the carriers operate. Guidelines are now being developed to identify those motor carrier transfers and consolidations that warrant close scrutiny and possible challenge. We plan to use the guidelines to avoid a routine examination of motor carrier financial transactions and to focus only on those transactions which have discernible public interest consequences.

In order to carry out this policy, the Commission, in reviewing motor carrier finance applications, will concentrate most heavily on the potential competitive—or anticompetitive—aspects of the transaction. The parties will be expected to develop the record fully in this respect. For our part, we will make a positive effort to increase the expertise of our staff in antitrust and related matters.

This notice is promulgated under authority contained in 49 U.S.C. §§ 10321(a), 10921, 10922, 10923, 10928, 11343, and 11344 and 5 U.S.C. § 553.

Dated: November 13, 1978.

By the Commission. (Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham and Clapp.)

COMMISSIONER GRESHAM, concurring in part:

While I do not necessarily endorse all of the positions expressed in the policy statement, I have no objection to publishing it in the FEDERAL REGISTER for the purpose of eliciting public comments.

COMMISSIONER STAFFORD, dissenting:

This proposed policy statement is the next logical step in the Commission's steady march toward elimination of entry controls in the trucking industry.

FALSE PREMISE

A false premise underlies this proposal and, in fact, is the touchstone of almost all current Commission thinking with regard to trucking regulation. The false premise of which I speak is the theory that regulatory policies beginning in the 1930s and 1940s "were characterized by a protectionist attitude" toward the trucking industry.

The premise is false because it implies that protection of existing carriers was the primary consideration in the Commission's decisional process. This is wrong. The truth is that the decisional process involved a balancing of competing interests. But always the need of the public (shippers and passengers) was the primary concern of this agency. The balancing of sometimes competing interests was what Congress envisioned in the Motor Carrier Act of 1935. Congress did not want and did not need 11 Commissioners and a staff of 2,000 to act as a rubber stamp.

Nothing evidences historical Commission policy in favor of the shipper better than the *Pan American* case cited in the proposed statement. That landmark decision requires an applicant to show that the public needs a given transportation service. Showing that, the burden switches to existing carriers to show they can meet that public need. Then, the burden reverts to the applicant, to show that its service is in some way superior to that currently available. This is the balancing; but always the asssurance of adequate, responsive transportation to the public is the ultimate concern in that decisional process.

PROTECTIONISM

The proposed statement also claims that the industry has matured and grown so sophisticated during the last 40 years of regulation that it no longer needs the alleged "protections" referred to above. Surely, there are many more large companies, and industry leaders are far larger than anything ever envisioned in the early days. But the large carriers are still comparatively few in number, and small carriers represent the great bulk of the industry. If there ever was a need to protect the small carriers, there is no reason to believe that that need is any less today than it was 30 or 40 years ago. It is the bigger carriers, not the smaller ones, that are so much more sophisticated.

In fact, there can be little doubt that the persons that suffer most from relaxed entry standards are the small carriers. It is generally recognized that the larger carriers could survive equally well in a regulated or an unregulated environment. They have the size, the financial wherewithal, and technical expertise, to adjust prices and meet competition at all levels. The smaller carriers, however, already are probably operating on a shoestring, and do not have the financial or operational flexibility to adjust as well to new competition.

THE REAL IMPACT

The proposed statement of policy takes on greater significance when read in conjunction with two other recent decisions, *Liberty Trucking Co., Ext. General Commodities*, 130 M.C.C. 243 (decided October 6, 1978) and Ex Parte No. 55 (Sub-No. 26), *Protest Standards in Motor Carrier Application Proceedings* (not printed) (decided October 10, 1978). Under the proposed statement, the adequacy of existing service issue (set forth in *Pan American*) will no longer be a consideration. The third *Pan American* criterion will apparently remain intact. In *Liberty*, however, it was made clear that this criterion, potential adverse impact on existing carriers, will be virtually impossible to prove and will rarely be given consideration.

The proposed statement also modifies the criteria that will be considered in contract carrier licensing cases again by imposing an almost impossible burden of proof on protesting carriers. In the *Protest Standards* case, it was announced that henceforth common carriers would not be allowed to protest automatically a contract carrier application. By keeping out affected common carriers, there will be no effective opposition to contract carrier applications and those carriers who are allowed to intervene will never be able to prove their case.

CONCLUSION

In summary, therefore, I offer the following. The majority premises its proposal on an inaccurate statement of the way regulation has been administered. Furthermore, assuming protectionism for the industry was once an important goal of regulation, there is nothing (other than some vague, conclusory comments) to prove that small trucking companies do not still need those same protections. The proposed changes, viewed in conjunction with other recent decisions indicate that henceforth opposition to a licensing case will be a futile act. I believe that even the majority would agree that meaningful entry control in trucking will no longer exist when this statement is ultimately adopted.

H. GORDON HOMME, Jr.,
Secretary.

[Decisions Volume No. 51]

PERMANENT AUTHORITY APPLICATION DECISION-NOTICE

Decided: November 15, 1978.

The following applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

D E 5 7 8 UMI

Section 247(f) provides, in part, that applicant may file a reply within 20 days after the expiration of the protest period. If a reply is filed, the reply must comply with Rule 247(e)(4) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, and specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A reply which is not in reasonable compliance with the requirements of the rules may be rejected. If no reply is filed within the 20-day period, the application will be deemed unopposed.

Each applicant has filed a certificate of compliance with section 215 of the Interstate Commerce Act, as amended by the Motor Carrier Act of 1980, Pub. L. 96-296, 94 Stat. 793, 820 (1980), and with the Commission's regulations thereunder, 49 CFR 1160.24. Each applicant has also filed a certificate of service of its application upon the Governor of each State in which it seeks authority, and upon the Public Service Commission of each State in which it seeks intrastate authority, as required by 49 CFR 1160.24(c).

Each applicant has filed a statement of financial condition, as required by 49 CFR 1160.24(d).

Each applicant has filed a statement of environmental impact, as required by 49 CFR 1160.24(e).

Each applicant has filed a statement of safety fitness, as required by 49 CFR 1160.24(f).

Each applicant has filed a statement of energy impact, as required by 49 CFR 1160.24(g).

Each applicant has filed a statement of impact on small business, as required by 49 CFR 1160.24(h).

Each applicant has filed a statement of impact on rural areas, as required by 49 CFR 1160.24(i).

Each applicant has filed a statement of impact on the quality of service, as required by 49 CFR 1160.24(j).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(k).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(l).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(m).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(n).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(o).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(p).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(q).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(r).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(s).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(t).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(u).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(v).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(w).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(x).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(y).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(z).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(aa).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(bb).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(cc).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(dd).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(ee).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(ff).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(gg).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(hh).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(ii).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(jj).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(kk).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(ll).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(mm).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(nn).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(oo).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(pp).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(qq).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(rr).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(ss).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(tt).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(uu).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(vv).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(ww).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(xx).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(yy).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(zz).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(aaa).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(bbb).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(ccc).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(ddd).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(eee).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(fff).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(ggg).

Each applicant has filed a statement of impact on the preservation of competition, as required by 49 CFR 1160.24(hhh).

Each applicant has filed a statement of impact on the public interest, as required by 49 CFR 1160.24(iii).

V 4 3 / 2 3 4 D E 5 7 8 UMI

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find:

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the national transportation policy subject to the right of the Commission which is hereby expressly reserved to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of section 210 of the Interstate Commerce Act.

It is ordered:

In the absence of legally suffifcient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decisions-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board Number 3, Members Parker, Fortier, and Hill (Review Board Member Parker not participating).

H. G. HOMME, JR.,
Secretary.

MC 2135 (Sub-16F), filed October 6, 1978. Applicant: D. J. McNICHOL CO., a Delaware corporation, 6951 Horwitch Drive, Philadelphia, PA 19153. Representative: Harold P. Boss, 1100 17th Street NW., Washington, DC 20036. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting *such merchandise* as is dealt in by grocery and food business houses, and *equipment, materials, and supplies* used in the conduct of such businesses, between points in NJ in and south of Warren, Hunterdon, Somerset, Middlesex, and Monmouth Counties, those in PA in and east of Tioga, Lycoming, Union, Snyder, Juniata, Perry, Cumberland, and Adams Counties, and those in Broome, Chemung, Cortland, Delaware, Schuyler, Steuben, Tioga, and Tompkins Counties, NY, under a continuing contract with The Great Atlantic & Pacific Tea Company, Inc., of Montvale, NJ. (Hearing site: Philadelphia, PA, or Washington, DC.)

NOTE.—Dual operations may be at issue in this proceeding.

MC 2202 (Sub-567F), filed August 23, 1978. Applicant: ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Boulevard, Akron, OH. 44309. Representative: William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, DC 20014. (32) Between junction Interstate Hwy 81 and U.S. Hwy 11 approximately 3 miles north of the MD-PA State line, and junction Interstate Hwys 77 and 81 at or near Wytheville, VA: Over Interstate Hwy 81, serving junction Interstate Hwys 77 and 81 at or near Wytheville, for purpses of joinder only;

(33) Between junction U.S. Hwy 11 and PA Hwy 54, and junction PA Hwy 54 and Interstate Hwy 80; Over PA Hwy 54, serving junction PA Hwy 54 and Interstate Hwy 80, for purposes of joinder only; and

(34) Between junction Interstate Hwy 78 and PA Hwy 737 and junction U.S. Hwy 222 and PA Hwy 737 over PA Hwy 737; In connection with routes (1)-(34), serving all intermediate and off-route points in Lackawanna and Luzerne Counties, PA, and those points in PA on, east and south of a line extending from the MD-PA State line along U.S. Hwy 11 to Scranton, PA, then along U.S. Hwy 6 to Matamoras, PA. (Hearing site: Allentown, PA, or Charlotte, NC.)

MC 3581 (Sub-22F), filed September 13, 1978. Applicant: THE MOTOR CONVOY, a corporation, 275 Convoy Drive, S. W., Atlanta, GA 30334. Representative: K. Edward Wolcott, P.O. Box 872, Atlanta, GA 30301. To operate as a *common carrier*, by motor vehicle, over irregular routes transporting: (1) *Automobiles, trucks, tractors*, and *chassis*, in driveaway and truckaway service, in secondary movements, and (2) *parts* for the commodities named in (1) above, between points in KY, OH, and WV. (Hearing site: Detroit, MI)

MC 19105 (Sub-51F), filed October 23, 1978. Applicant: FORBES TRANSFER CO., INC., P.O. Box 3544, Wilson, NC 27893. Representative: Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Avenue and 13th Street NW., Washington, DC 20004. To operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Glass containers and accessories for containers*, between the facilities of Kerr Glass Manufacturing, at or near Wilson, NC, on the one hand, and, on the other, points in SC and VA. (Hearing site: Washington, DC)

MC 26396 (Sub-200F), filed September 1, 1978. Applicant: POPELKA TRUCKING CO., INC., d.b.a. THE WAGGONERS, P.O. Box 990, Livingston, MT 59047. Representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501. To operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Agricultural chemicals* (except commodities in bulk, in tank vehicles), from Mendota, IL, to ports of entry on the International Boundary line between the United States and Canada, in MI, ND, MT, ID, and WA, restricted to the transportation of traffic moving in foreign commerce destined to points in the Provinces of British Columbia, Alberta, Manitoba, and Saskatchewan, Canada. Condition: Prior receipt from applicant of an affidavit setting forth its complementary Canadian authority or explaining why no such Canadian authority is necessary. The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate Canadian officials regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect. (Hearing site: Chicago, IL)

MC 48948 (Sub-11F), filed October 30, 1978. Applicant: THE HOCKING CARTAGE CO., a corporation, R.R. No. 2, P.O. Box 373, Logan, OH 43138. Representative: James M. Burtch, 100 East Broad Street, Suite 1800, Columbus, OH 43215. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting (1) *clay products*, and *materials and supplies* used in the installation of clay products, from New Lexington and Junction City, OH, to those points in the United States in and east of ND, SD, NE, KS, OK, and TX; and (2) *materials* used in the manufacture of clay products, (except commodities in bulk), in the reverse direction. (Hearing site: Columbus, OH)

MC 67866 (Sub-36F), filed July 31, 1978. Applicant: FILM TRANSIT, INC., 3931 Homewood Road, Memphis, TN 38118. Representative: Warren A. Goff, 2008 Clark Tower, 5100 Poplar Avenue, Memphis, TN 38137. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *general commodities* (except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and livestock), between those points in OK on and east of a line beginning at the OK-TX State line and extending along U.S. Hwy 277 to junction U.S. Hwy 81, then north along U.S. Hwy 81 to the OK-KS State line, on the one hand, and, on the other, points in LA, AR, MS, those in KY on and west of a line beginning at the IL-KY State line and extending along U.S. Hwy 68 to junction U.S. Hwy 641, then along U.S. Hwy 641 to the KY-TN State line, those in TN, on and east of a line beginning at the KY-TN State line and extending along U.S. Hwy 31W to Nashville, then along U.S. Hwy 31 to Columbia, then along U.S. Hwy 50 to Lewisburg, then along U.S. Hwy 431 to the TN-AL State line, those in AL, on, west, and north of a line beginning at the TN-AL State line and extending along AL Hwy 17 to Hamilton, then over U.S. Hwy 78 to the AL-MS State line, and those in MO on and south of a line beginning at the AR-MO State line and extending along U.S. Hwy 62 to New Madrid and the Mississippi River, restricted against the transportation of (1) any package or article weighing more than 70 pounds, or exceeding 96 inches in length, or 150 inches in length and girth combined, and (2) packages or articles weighing in the aggregate more than (200) pounds from one consignor to one consignee on any one day. (Hearing site: Memphis, TN, or Little Rock, AR)

NOTE.—The person or persons who appear to be engaged in common control between applicant and another regulated carrier must either file an application under section 5(2) of the Interstate Commerce Act, or submit an affidavit indicating why such approval is unnecessary.

MC 67866 (Sub-37F), filed July 31, 1978. Applicant: FILM TRANSIT, INC., 3931 Homewood Road, Memphis, TN 38118. Representative: Warren A. Goff, 2008 Clark Tower, 5100 Poplar Avenue, Memphis, TN 38137. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *general commodities* (except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and livestock), between points in LA, AR, MS, those in KY on and west of a line beginning at the IL-KY State line and extending along U.S. Hwy 68 to junction U.S. Hwy 641, then along U.S. Hwy 641 to the KY-TN State line, those in TN, on and east of a line beginning at the KY-TN State line and extending along U.S. Hwy 31W to Nashville, then along U.S. Hwy 31 to Columbia, then along U.S. Hwy 50 to Lewisburg, then along U.S. Hwy 431 to the TN-AL State line, those in AL, on, west, and north of a line beginning at the TN-AL State line and extending along AL Hwy 17 to Hamilton, then over U.S. Hwy 78 to the AL-MS State line, and those in MO on and south of line beginning at the AR-MO State line and extending along U.S. Hwy 62 to New Madrid and the Mississippi River, restricted against the transportation of (1) any package or article weighing more than 70 pounds, or exceeding 96 inches in length, or 150 inches in length and girth combined, and (2) packages or articles weighting in the aggregate more than (200) pounds from one consignor to one consignee on any one day. (Hearing site: Memphis, TN, or New Orleans, LA.)

NOTE.—The person or persons who appear to be engaged in common control between applicant and another regulated carrier must either file an application under section 5 (2) of the Interstate Commerce Act, or submit an affidavit indicating why such approval is unnecessary. Condition: Issuance of a certificate in this proceeding is subject to the prior or coincidental cancellation of carrier's certificate in MC 67866 (Sub-33).

MC 68908 (Sub-8F), filed October 25, 1978. Applicant: MULLEN BROS., INC. OF NORTH ADAMS, MASSACHUSETTS, Downing Ind. Parkway, P.O. Box 1285, Pittsfield, MA 01201. Representative: Robert J. Gallagher, 1000 Connecticut Avenue NW., Suite 1200 Washington, DC 20036. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *household goods*, (1) between points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT, and (2) between points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT, on the one hand, and, on the other, points in AL, DE, FL, GA, KY, MD, NC, OH, PA, SC, TN, VA, WV, and DC. (Hearing site: Pittsfield, MA).

MC 71593 (Sub-13F), filed October 3, 1978. Applicant: FORWARDERS TRANSPORT, INC., 1815 Front Street, Scotch Plains, NJ 07076. Representative: Ronald S. Potter (same address as applicant). To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *paper, loose leaf binders, books, box files, file folders, paper pads, paper tablets*, and *record carrying cases*, (1) between Brooklyn and Syracuse, NY, Elizabeth, NJ, and Kankakee, IL, on the one hand, and, on the other, Atlanta, GA, and Los Angeles, CA, (2) between Brooklyn, NY, and Elizabeth, NJ, on the one hand, and on the other, Kankakee, IL, and Syracuse, NY, and (3) from Syracuse, NY, to Kankakee, IL, restricted to the transportation of traffic in (1), (2), and (3) above originating at or destined to the facilities of Boorum & Pease Company. (Hearing site: New York, NY, or Washington, DC.)

MC 80653 (Sub-11F), Filed October 2, 1978. Applicant: DAVID GRAHAM CO., a corporation, P.O. Box 115, Croydon, PA 19020. Representative: Paul F. Sullivan, 711 Washington Building, Washington, DC 20005. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting (1)(a) *molding machinery, presses, and vacuum equipment*, and (b) *parts* for the commodities named in (1)(a) above, from the facilities of Pennwalt Corporation, Stokes Division, at Philadelphia, PA, to those points in the United States in and east of WI, IL, KY, TN, and MS, and (2) *materials, equipment, and supplies* used in the manufacture of the commodities named in (1)(a) and (b) above, in the reverse direction. (Hearing site: Philadelphia, PA.)

MC 95084 (Sub-128F), filed September 11, 1978. Applicant: HOVE TRUCK LINE, a corporation, Stanhope, IA 50246. Representative: Kenneth F. Dudley, 611 Church Street, P.O. Box 279, Ottumwa, IA 52501. FEDERAL TRADE COMMISSION

TRANSMITTAL RULES

Early Termination of Waiting Period of the Premerger Notification Rules

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the 30-day waiting period of the premerger notification rules.

SUMMARY: McGraw Edison Company Profit Sharing Trust and McGraw Edison Company are granted early termination of 30-day waiting period provided by law and the premerger notification rules with respect to the proposed acquisition by McGraw Edison Company Profit Sharing Trust of voting securities of McGraw Edison Company. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by both parties. Neither agency intends to take any action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: October 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Malcolm R. Pfunder, Associate Director for Premerger Notification, Bureau of Competition, Room 303, Federal Trade Commission, Washington, D.C. 20580, (202) 523-3894.

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. § 18a, as added by sections 201 and 202 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act and § 803.11 of the rules implementing the Act permit the agencies, in individual cases, to terminate this waiting period prior to its expiration and to publish notice of this action in the FEDERAL REGISTER.

By direction of the Commission.

CAROL M. THOMAS,
Secretary.

2. Change of status for Hugh G. Parris from Assistant Manager of Power to Manager of Power.

PURCHASE AWARDS

1. Req. No. 822289—Hydrogen mixing blowers for Hartsville and Phipps Bend Nuclear Plants.
2. Req. No. 572453—Mini-computer systems for the Computing Services Branch.
3. Rejection of bids received in response to Invitation No. 577556 for indefinite quantity term contract for regulators, electrode holders, and accessories for any TVA warehouse or project.
4. Req. No. 822499—Balance of plant ANSI B31.1 principal piping systems for proposed Yellow Creek Nuclear Plant.
5. Req. No. 152690—161-kV main transformer for the Johnsonville Steam Plant.
6. Req. No. 46—Coal for Allen Steam Plant.

POWER ITEMS

1. Agreement between the city of Lenoir City, Tennessee, and TVA for a demonstration and test project involving electric thermal-storage facilities.
2. Memorandum of understanding with the Department of the Army covering arrangements for TVA to make transmission line modifications for the Tennessee-Tombigbee Waterway Project near Aberdeen, Mississippi.

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Glyphosate

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for residues of the herbicide glyphosate on a variety of raw agricultural commodities. The regulation was requested by Monsanto Co. This rule establishes maximum permissible levels for residues of glyphosate on a variety of raw agricultural commodities.

EFFECTIVE DATE: Effective on December 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW., Washington, D.C. 20460 (202-755-7013).

SUPPLEMENTARY INFORMATION: Notices were given that Monsanto Agricultural Products Co., 800 N. Lindbergh Blvd., St. Louis, Mo. 63166, had filed the following pesticide petitions with the EPA proposing the establishment of tolerances for combined residues of the herbicide glyphosate (*N*-phosphonomethyl)glycine and its metabolite aminomethylphosphonic acid in or on raw agricultural commodities:

Subsequently, the petitioner amended Pesticide Petitions (PP) 6F1798 and 7F2016 by withdrawing the proposed tolerances on cotton forage, hay, and trash (PP 6F1798) and by expanding the proposed tolerance on seed and pod vegetables to include seed and pod vegetable forage and hay (PP 7F2016). It has also been determined that "almond husks" should be changed to "almond hulls" and that dry alfalfa be called alfalfa hay. (A related document establishing food additive tolerances for residues of glyphosate on various processed byproducts appears elsewhere in today's FEDERAL REGISTER.) No comments were received in response to these notices of filing.

The data submitted in the petitions and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerances included a rabbit acute oral toxicity study with a lethal dose (LD_{50}) of 3.8 grams (g)/kilogram (kg) of body weight (bw), a 90-day rat feeding study with a no-observable-effect level (NOEL) of 2,000 ppm, a 90-day dog feeding study with an NOEL of 2,000 ppm, two rabbit teratology studies with an NOEL of 30 milligrams (mg)/kg bw/day, a two-year dog feeding study with an NOEL of 300 ppm, a three-generation rat reproduction study with an NOEL of 300 ppm, an 18-month mouse feeding study with no carcinogenic potential at 300 ppm (highest level fed) a two-year rat feeding study with an NOEL of 100 ppm, a hen neurotoxicity study (negative at 7.5 g/kg bw), a mouse dominant lethal study (negative at 10 mg/kg bw), a host-mediated mutagenicity assay (negative), an Ames test (negative), and a Rcc-assay mutagenicity test (negative).

Desirable studies that are lacking or to be repeated are teratology studies, an 18-month mouse oncogenicity study, an oncogenicity study in a second species, the dominant lethal mouse study, the Ames test, and the Rec-assay mutagenicity test. The teratology studies on hand together with the reproduction study showed glyphosate has a low potential for showing adverse effects on reproduction. The lifetime rat and mouse studies provide adequate assurance that glyphosate has a relatively low oncogenic potential. In a letter of August 29, 1978, the petitioner agreed to perform the above studies and to remove the proposed uses from the label should the results of the above studies exceed the risk criteria for chronic toxicity as stated in 40 CFR 162.11.

Tolerances have previously been established for residues of glyphosate on grain crops at 0.1 ppm and soybeans at 0.2 ppm for a theoretical maximal residue contribution (TMRC) of 0.0234 mg/day in a 1.5-kg diet compared with a maximal permissible intake (MPI) of 3 mg/day for a 60-kg man, or 0.78 percent of the MPI, which is based on an acceptable daily intake (ADI) of 0.05 mg/kg bw/day. The establishment of the proposed tolerances will add about 0.17 mg/day to the average diet for a total of 7 percent of the MPI, figuring in those glyphosate tolerances currently pending but not yet established. Tolerances have also been established on forage grasses and soybeans at 0.2 ppm (N) and soybean forage and hay at 0.4 ppm. Food additive tolerances (21 CFR 193.235) in connection with experimental programs have been previously established for residues of glyphosate in potable water and sugarcane molasses at 0.1 ppm. A feed additive regulation (21 CFR 561.253) has also been previously established for residues of glyphosate in sugarcane molasses at 2 ppm in connection with an experimental program.

A regulatory action was pending against glyphosate based on its contamination with *N*-nitrosoglyphosate, but this was resolved because no residues of the contaminant at detectable levels are present in raw agricultural commodities, nor does it pose a hazard to the applicator. The metabolism of glyphosate is adequately understood, an adequate analytical method (gas chromatography using a phosphorus-specific flame photometric detector) is available for enforcement purposes, and no other considerations are involved in establishing the proposed tolerances.

The tolerances established by amending 40 CFR 180.364 will be adequate to cover residues that would result in the liver and kidney of cattle, goats, hogs, horses, poultry, and sheep from the proposed uses as delineated in § 180.6(a)(2), and there is no reasonable expectation of finite residues resulting in other meat products, eggs, or milk from the uses as delineated in § 180.6(a)(3). The pesticide is considered useful for the purpose for which tolerances are sought, and it is concluded that the tolerances established by amending 40 CFR 180.364 will protect the public health. It is concluded, therefore, that the tolerances be established as set forth below.

Pesticide petitions	Raw agricultural commodities	Tolerances in parts per million	Publication dates
5F1560	Grapes	0.1	Nov. 27, 1974 (39 FR 41402)

[N] Negligible residues.

Any person adversely affected by this regulation may, on or before January 4, 1979, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708, 401 M St. SW., Washington 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on December 5, 1978, Part 180 is amended as set forth below.

Dated: Nov. 28, 1978.

(Sec. 408(d)(2), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)).)

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, § 180.364 is amended by alphabetically inserting new items in the table and by revising the table to read as follows:

§ 180.364 Glyphosate; tolerances for residues.

* * * * *

Commodity:	*Parts per million*
Alfalfa, fresh and hay	0.2
Almonds, hulls	1

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 193—TOLERANCES FOR PESTICIDES IN FOOD ADMINISTERED BY THE ENVIRONMENAL PROTECTION AGENCY

SUBCHAPTER E—ANIMAL FEEDS, DRUGS, AND RELATED PRODUCTS

PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

Glyphosate

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule amends 21 CFR 193.235 and 561.253 by establishing food and feed additive tolerances for residues of the herbicide glyphosate in dried citrus pulp, soybean hulls, and palm oil. The regulations were requested by Monsanto Co. This rule establishes a maximum permissible level for residues of glyphosate in dried citrus pulp, soybean hulls, and palm oil.

EFFECTIVE DATE: Effective on December 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460 (202/755-7013).

SUPPLEMENTARY INFORMATION: On March 12, 1976 (41 FR 10709), September 16, 1976 (41 FR 39831), and August 23, 1977 (42 FR 42373) notices were given that Monsanto Agricultural Products Co., 800 N. Lindbergh Blvd., St. Louis, MO 63166, had filed petitions (FAP 6H5115, 6H5144, and 7H5168) with the EPA. These petitions proposed that 21 CFR 193.235 and 561.253 be amended by establishing regulations permitting combined residues of the herbicide glyphosate (N-(phosphonomethyl)glycine) and its metabolite aminomethylphosphonic acid in dried citrus pulp (FAP 6H5115), palm oil (FAP 6H5144), and soybean hulls (FAP 7H5168) resulting from application of glyphosate to growing citrus fruits, palm trees, and soybeans with tolerance limitations of 0.4 part per million (ppm) in the dried citrus pulp, 0.1 ppm in the palm oil, and 20 ppm in or on the soybean hulls. No comments were received by the Agency in response to these notices.

The data submitted in the petitions and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerances included a rabbit acute oral toxicity study with a lethal dose (LD_{50}) of 3.8 grams (g)/kilogram (kg) of body weight (bw), a 90-day rat feeding study with a no-observable-effect level (NOEL) of 2,000 ppm, a 90-day dog feeding study with an NOEL of 2,000 ppm, two rabbit teratology studies with an NOEL of 30 milligrams (mg)/kg bw/day, a 2-year dog feeding study with an NOEL of 300 ppm, a three-generation rat reproduction study with an NOEL of 300 ppm, an 18-month mouse feeding study with no carcinogenic potential at 300 ppm (highest level fed), a 2-year rat feeding study with an NOEL of 100 ppm, a hen neurotoxicity study (negative at 7.5 g/kg bw), a mouse dominant lethal study (negative at 10 mg/kg bw), a host-mediated mutagenicity assay (negative), an Ames test (negative), and a Rec-assay mutagenicity test (negative).

Desirable studies that are lacking or to be repeated are teratology studies, an 18-month mouse oncogenicity

D E 5 7 8 UMI

[6560-01-M]

three-generation rat reproduction levels are present in raw agricultural

V 43/234 DEC 5 1978 UMI

study, an oncogenicity study in a second species, the dominant lethal mouse study, the Ames test, and the Rec-assay mutagenicity test. The teratology studies on hand together with the reproduction study showed glyphosate has a low potential for showing adverse effects on reproduction. The lifetime rat and mouse studies provide adequate assurance that glyphosate has a relatively low oncogenic potential. In a letter of August 29, 1978, the petitioner agreed to perform the above studies and to remove the proposed uses from the label should the results of the above studies exceed the risk criteria for chronic toxicity as stated in 40 CFR 162.11.

Tolerances have previously been established for residues of glyphosate on grain crops at 0.1 ppm and soybeans at 0.2 ppm for a theoretical maximal residue contribution (TMRC) of 0.0234 mg/day in a 1.5-kg diet compared with a maximal permissible intake (MPI) of 3 mg/day for a 60-kg man, or 0.78 percent of the MPI, which is based on an acceptable daily intake (ADI) of 0.05 mg/kg/bw/day. The proposed tolerance in palm oil contributes less than an additional 0.001 mg/day/1.5-kg diet, or about 0.002 percent of the MPI, which does not significantly increase the 0.78 percent of the MPI. Should all the tolerances for glyphosate currently pending be established, the TMRC will only be 7.02 percent of the MPI. The establishment of the proposed tolerances will add about 0.17 mg/day to the average diet for a total of 7 percent of the MPI.

Tolerances have also been established on forage grasses and soybeans at 0.2 ppm (negligible residues) and soybean forage and hay at 0.4 ppm. Food additive tolerances (21 CFR 193.235) in connection with experimental programs have been previously established for residues of glyphosate in potable water and sugarcane molasses at 0.1 ppm. A feed additive tolerance (21 CFR 561.253) has also been previously established for residues of glyphosate in sugarcane molasses at 2 ppm in connection with an experimental program.

A regulatory action was pending against glyphosate based on its contamination with *N*-nitrosoglyphosate, but this was resolved because no residues of the contaminant at detectable levels are present in raw agricultural commoditites, not does it pose a hazard to the applicator.

The matabolism of glyphosate is adequately understood, and adequate analytical method (gas chromatography using a phosphorus specific flame photometric detector) is available for enforcement purposes, and no other considerations are involved in establishing the proposed tolerances. (A related document establishing tolerances for residues of glyphosate in or on a variety of raw agricultural commodities, including the kidney and liver of cattle, goats, hogs, horses, poultry, and sheep at 0.1 ppm, appears elsewhere in today's FEDERAL REGISTER. The tolerances in the kidney and liver of cattle, goats, hogs, horses, poultry, and sheep at 0.1 ppm are adequate to cover residues in these tissues resulting from the proposed food and feed additive uses as delineated in 40 CFR 180.6(a)(2). There is no reasonable expectation of finite residues resulting in other meat products, milk, or eggs from the proposed food and feed additive uses as delineated in 40 CFR 180.6(a)(3)).

Thus, it concluded that the pesticide may be safely used in the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

The pesticide is considered useful for the purpose for which tolerances are sought. Therefore the regulations establishing tolerances of 0.4 ppm in or on citrus pulp, 0.1 ppm in palm oil, and 20 ppm in or on soybean hulls by amending 21 CFR 193.235 and 561.253 are being promulgated as proposed. Accordingly food and feed additive regulations are established as set forth below.

Any person adversely affected by this regulation may, on or before January 4, 1979, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. M-3708, 401 M St., SW, Washington 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on December 5, 1978, 21 CFR Parts 193 and 561 are amended as set forth below.

Dated: November 28, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

(Sec. 409(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1)))

1. Part 193, Subpart A, § 193.235 is amended by adding the new paragraph (e) at the end of the section to read as follows:

§ 193.235 Glyphosate.

* * * * *

(e) A tolerance is established for combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)-glycine) and its metabolite aminomethylphosphonic acid in or on the following processed food when present therein as a result of the application of the herbicide in palm tree culture:

0.1 part per million in palm oil.

2. Part 561, § 561.253, is amended by adding the new paragraph (f) at the end of the section to read as follows:

§ 561.253 Glyphosate.

* * * * *

(f) Tolerances are established for combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)-glycine) and its metabolite aminomethylphosphonic acid in the following processed feeds when present therein as a result of application of this herbicide to growing crops:

Feed:	*Parts per million*
Citrus pulp, dried	0.4
Soybean hulls	20

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Proposed Tolerance for the Pesticide Chemical Glyphosate

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of the herbicide glyphosate on coffee beans. The proposal was submitted by Monsanto Co. This amendment would establish a maximum permissible level for residues of glyphosate on coffee beans.

DATE: Comments must be received on or before January 4, 1979.

ADDRESS COMMENTS TO: Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M Street, SW, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, EPA (202/755-7013).

SUPPLEMENTARY INFORMATION: Monsanto Agricultural Products Co., 800 N. Lindbergh Blvd., St. Louis, MO 63166, has submitted a pesticide petition (PP 6E1809) to the EPA. This petition requests that the Administrator propose that 40 CFR 180.364 be amended by the establishment of a tolerance for combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)glycine) and its metabolite aminomethylphosphonic acid in or on the raw agricultural commodity coffee beans at 1 part per million.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included a rabbit acute oral toxicity study with a lethal dose (LD_{50}) of 3.8 grams (g)/kilogram (kg) of body weight (bw), a 90-day rat feeding study with a no-observable-effect level (NOEL) of 2,000 ppm, a 90-day dog feeding study with an NOEL of 2,000 ppm, two rabbit teratology studies with an NOEL of 30 milligrams (mg)/kg bw/day, a two-year dog feeding study with an NOEL of 300 ppm, a three-generation rat reproduction study with an NOEL of 300 ppm, an 18-month mouse feeding study with no carcinogenic potential at 300 ppm (highest level fed), a two-year rat feeding study with an NOEL of 100 ppm, a hen neurotoxicity study (negative at 7.5 g/kg bw), a mouse dominant lethal study (negative at 10 mg/kg bw), a host-mediated mutagenicity assay (negative), an Ames test (negative), and a Rec-assay mutagenicity test (negative).

Desirable studies that are lacking or to be repeated are teratology studies, an 18-month mouse oncogenicity study, an oncogenicity study in a second mammalian species, the dominant lethal mouse study, the Ames test, and the Rec-assay mutagenicity test. The teratology studies on hand together with the reproduciton study showed glyphosate has a low potential for showing adverse effects on reproduction. The lifetime rat and mouse studies provide adequate assurance that glyphosate has a relatively low oncogenic potential. In a letter of August 29, 1978, the petitioner agreed to perform the above studies and to remove the proposed uses from the label should the results of the above studies exceed the risk criteria for chronic toxicity as stated in 40 CFR 162.11.

Tolerances have previously been established for residues of glyphosate on grain crops at 0.1 ppm and soybeans at 0.2 ppm for a theoretical maximal residue contribution (TMRC) of 0.0234 mg/day in a 1.5-kg diet compared with a maximal permissible intake (MPI) of 3 mg/day for a 60-kg man, or 0.78 percent of the MPI, which is based on an acceptable daily intake (ADI) of 0.05 mg/kg bw/day. The tolerance of 1 ppm on coffee beans contributes an additional 0.011 mg/day/1.5-kg diet, or 0.37 percent, for a total of 1.15 percent of the MPI. Should all the tolerances for glyphosate currently pending be established, the TMRC will be only 7.02 percent of the MPI.

Tolerances have also been established on forage grasses and soybeans at 0.2 ppm (negligible residues) and soybean forage and hay at 0.4 ppm. Food additive tolerances (21 CFR 193.235) in connection with experimental programs have previously been established for residues of glyphosate in potable water and sugarcane molasses at 0.1 ppm. A feed additive tolerance has also previously been established for residues of glyphosate in sugarcane molasses at 2 ppm in connection with an experimental program.

A regulatory action was pending against glyphosate based on its contamination with *N*-nitrosoglyphosate, but this was resolved because no residues of the contaminant at detectable levels are present in raw agricultural commodities, nor does it pose a hazard to the applicator. The metabolism of glyphosate is adequately understood, an adequate analytical method (gas chromatography using a phosphorus-specific flame photometric detector) is available for enforcement purposes, and no other considerations are involved in establishing the proposed tolerance. There is no reasonable expectation of finite of residues in eggs, meat, milk, or poultry as delineated in 40 CFR 180.6(a)(3) from the use on green coffee beans.

The pesticide is considered useful for the purpose for which a tolerance is being sought, and it is concluded that the tolerance of 1 ppm on coffee beans established by amending 40 CFR 180.364 will protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains any of the ingredients listed herein, may request on or before January 4, 1979, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition/document control number, "PP 6E1809/P98". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: November 28, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

(Sec. 408(e), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e))).

It is proposed that Part 180, Subpart C, § 180.364 be amended by alphabetically inserting coffee beans at 1 ppm in the table to read as follows:

§ 180.364 Glyphosate; tolerances for residues.

* * * * *

Commodity:	*Parts per million*
* * * * *	
Coffee beans	1
* * * * *	

[FR Doc. 78-33813 Filed 12-4-78; 8:45 am]

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Proposed Tolerances for the Pesticide Chemical Glyphosate

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of the herbicide glyphosate on sugarcane. The proposal was submitted by Monsanto Co. This amendment would establish a maximum permissible level for residues of glyphosate on sugarcane.

DATE: Comments must be received on or before January 4, 1979.

ADDRESS COMMENTS TO: Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency (202-755-7013).

SUPPLEMENTARY INFORMATION: On April 8, 1976, a notice was given (41 FR 14924) that Monsanto Agricultural Products Co., 800 N. Lindbergh Blvd., St. Louis, Mo. 63166, has filed a petition (PP 6F1758) with the EPA. This petition proposed to amend 40 CFR 180.364 by establishing a tolerance for combined residues of the herbicide glyphosate (*N*(phosphonomethyl) glycine) and its metabolite aminomethylphosphonic acid in or on the raw agricultural commodity sugarcane at 0.05 part per million (ppm).

Subsequently, the petitioner amended the petition by increasing the proposed tolerance from 0.05 ppm to 0.1 ppm. (A related document establishing a food additive tolerance for residues of glyphosate in sugarcane molasses appears elsewhere in today's FEDERAL REGISTER). No comments were received in response to this notice of filing. Because of the potential exposure to humans to glyphosate residues, the tolerance is being proposed at this time to provide an opportunity for public comment.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included a rabbit acute oral toxicity study with a lethal dose (LD_{50}) of 3.8 grams (g)/kilogram (kg) of body weight (bw), a 90-day rat feeding study with a no-observable-effect level (NOEL) of 2,000 ppm, a 90-day dog feeding study with an NOEL of 2,000 ppm, two rabbit teratology studies with an NOEL of 30 milligrams (mg)/kg bw/day, a two-year dog feeding study with an NOEL of 300 ppm, a three-generation rat reporduction study with an NOEL of 300 ppm, an 18-month mouse feeding study with no carcinogenic potential at 300 ppm (highest level fed), a two-year rat feeding study with an NOEL of 100 ppm, a hen neurotoxicity study (negative at 7.5 g/kg bw), a mouse dominant lethal study (negative at 10 mg/kg bw), a host-mediated mutagenicity assay (negative), an Ames test (negative), and a Rec-assay mutagenicity test (negative).

Desirable studies that are lacking or to be repeated are teratology studies, an 18-month mouse oncogenicity study, an oncogenicity study in a second mammalian species, the dominant lethal mouse study, the Ames test, and the Rec-assay mutagenicity test. The teratology studies on hand together with the reproduction study showed glyphosate has a low potential for showing adverse effects on reproduction. The lifetime rat and mouse studies provide adequate assurance that glyphosate has a relatively low oncogenic potential. In a letter of August 29, 1978, the petitioner agreed to perform the above studies and to remove the proposed use from the label should the results of the above studies exceed the risk criteria for chronic toxicity as stated in 40 CFR 162.11.

Tolerances have previously been established for residues of glyphosate on grain crops at 0.1 ppm and soybeans at 0.2 ppm for a theoretical maximal residue contribution (TMRC) of 0.0234 mg/day in a 1.5-kg diet compared with a maximal permissible intake (MPI) of 3 mg/day for a 60-kg man, or 0.78 percent of the MPI. The 0.1 ppm tolerance on sugarcane contributes about an additional 0.005 mg/day/1.5-kg diet or approximately 0.18 percent for a total of about 0.9 percent of MPI, which is based on an acceptable daily intake (ADI) of 0.05 mg/kg bw/day. Should all the tolerances for glyphosate currently pending be established, the TMRC will only be 7.02 percent of the MPI.

Tolerances have also been established on forage grasses and soybeans at 0.2 ppm (negligible residues) and soybean forage and hay at 0.4 ppm. Food additive tolerances (21 CFR 193.235) in connection with experimental programs have been previously established for residues of glyphosate in potable water and sugarcane molasses at 0.1 ppm. A feed additive tolerance (21 CFR 561.253) has also been previously established for residues of glyphosate in sugarcane molasses at 2 ppm in connection with an experimental program.

A regulatory action was pending against glyphosate based on its contamination with *n*-nitrosoglyphosate, but this was resolved because no residues of the contaminant at detectable levels are present in the raw agricultural commodities, nor does it pose a hazard to the applicator. The metabolism of glyphosate is adequately understood, an adequate analytical method (gas chromatography using a phosphorus-specific flame photometric detector) is available for enforcement purposes, and no other considerations are involved in establishing the proposed tolerance.

The tolerance of 0.1 ppm in liver and kidney of cattle, goats, hogs, horses, poultry, and sheep established by another rule in today's FEDERAL REGISTER is adequate to cover residues in these tissues from the use on sugarcane as delineated in 40 CFR 180.6(a)(2). There is no reasonable expectation of residues in other meat products, eggs, or milk from the proposed use as delineated in 40 CFR 180.6(a)(3). The pesticide is considered useful for the purpose for which a tolerance is sought, and it is concluded that the tolerance established on sugarcane at 0.1 ppm by amending 40 CFR 180.364 will protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains any of the ingredients listed herein, may request on or before January 4, 1979, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition/document control number, "PP 6F1758/P97." All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

(Sec. 408(e), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(3)).)

Dated: November 28, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

It is proposed that Part 180, Subpart C, § 180.364 be amended by alphabetically inserting sugarcane at 0.1 ppm at the end of the table to read as follows:

§ 180.364 Glyphosate; tolerances for residues.

Commodity:	Parts per million
Sugarcane	0.1

TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS AND FOOD ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

Proposed Food and Feed Additive Tolerances for Glyphosate

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of the herbicide glyphosate in sugarcane molasses. The proposal was submitted by Monsanto Co. This amendment would establish a maximum permissible level for residues of glyphosate in sugarcane molasses.

DATE: Comments must be received on or before January 4, 1979.

ADDRESS COMMENTS TO: Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA. Rm. 401, East Tower, 401 M Street, SW, Washington DC 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, EPA, (202/755-7013).

SUPPLEMENTARY INFORMATION: On April 8, 1976, the EPA published in the FEDERAL REGISTER (41 FR 14924) a notice that Monsanto Agricultural Products Co., 800 Lindbergh Blvd., St. Louis, MO 63116, had submitted a petition (FAP 6H5126). This petition proposed that 21 CFR 193.235 and 561.253 be amended by the establishment of a regulation permitting residues of the herbicide glyphosate (*N*-(phosphonomethyl)glycine) and its metabolite aminomethlyphosphonic acid in or on sugarcane molasses resulting from the application of the herbicide to growing sugarcane with a tolerance limitation of 0.5 part per million (ppm). No comments were received in response to this notice. Subsequently, the petitioner amended the petition by increasing the proposed tolerance from 0.5 ppm to 2 ppm. Because of the potential increase in exposure of humans to glyphosate residues, the tolerance is being proposed at this time to provide for public comment. (A related document establishing a tolerance for residues of glyphosate on sugarcane appears elsewhere in today's FEDERAL REGISTER.)

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included a rabbit acute oral toxicity study with a lethal dose (LD_{50}) of 3.8 grams (g)/kilogram (kg) of body weight (bw), a 90-day rat feeding study with a no-observable-effect level (NOEL) of 2,000 ppm, a 90-day dog feeding study with an NOEL of 2,000 ppm, two rabbit teratology studies with an NOEL of 30 milligrams (mg)/kg bw/day, a two-year dog feeding study with an NOEL of 300 ppm, a three-generation rat reproduction study with an NOEL of 300 ppm, an 18-month mouse feeding study with no carcinogenic potential at 300 ppm (highest level fed), a two-year rat feeding study with an NOEL of 100 ppm, a hen neurotoxcity study (negative at 7.5 g/kg bw), a mouse dominant lethal study (negative at 10 mg/kg bw), a host-mediated mutagenicity assay (negative), an Ames test (negative), and a Rec-assay mutagenicity test (negative).

Desirable studies that are lacking or to be repeated are teratology studies, an 18-month mouse oncogenicity study, an oncogenicity study in a second mammalian species, the dominant lethal mouse study, the Ames test, and the Rec-assay mutagenicity test. The teratology studies on hand together with the reproduction study showed glyphosate has a low potential for showing adverse effects on reproduction. The lifetime rat and mouse studies provide adequate assurance that glyphosate has a relatively low oncogenic potential. In a letter of August 29, 1978, the petitioner agreed to perform the above studies and to remove the proposed uses from the label should the results of the above studies exceed the risk criteria for chronic toxicity as stated in 40 CFR 162.11.

Tolerances have previously been established for residues of glyphosate on grain crops at 0.1 ppm and soybeans at 0.2 ppm for a theoretical maximal residue contribution (TMRC) of 0.0234 mg/day in a 1.5-kg diet compared with a maximal permissible intake (MPI) of 3 mg/day for a 60-kg man, or 0.78 percent of the MPI, which is based on an acceptable daily intake (ADI) of 0.05 mg/kg bw/day. The establishment of the 2 ppm tolerance in sugarcane molasses will add about 0.0009 mg/day to the average human diet for a TMRC of 0.2105 mg/day, which is 7.02 percent of the ADI.

Tolerances have also been established on forage grasses and soybeans at 0.2 ppm (negligible residues) and soybean forage and hay at 0.4 ppm. Food additive tolerances (21 CFR 193.235) in connection with experimental programs have previously been established for residues of glyphosate in potable water and sugarcane molasses at 0.1 ppm. A feed additive tolerance (21 CFR 561.253) has also been previously established for residues of glyphosate in sugarcane at 2 ppm in connection with an experimental program.

A regulatory action was pending against glyphosate based on its contamination with *N*-nitrosoglyphosate, but this was resolved because no residues of the contaminant at detectable levels are present in raw agricultural commodities, nor does it pose a hazard to the applicator. The metabolism of glyphosate is adequately understood, and adequate analytical method (gas chromatography using a phosphorus-specific flame photometric detector) is available for enforcement purposes, and no other considerations are involved in establishing the proposed tolerance. Thus, it is concluded that the pesticide may be safely used in the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

The tolerance of 0.1 ppm in liver and kidney of cattle, goats, hogs, horses, poultry, and sheep established by another rule in today's FEDERAL REGISTER is adequate to cover residues in these tissues from the use in sugarcane molasses as delineated in 40 CFR 180.6(a)(2). there is no reasonable expectation of residues in other meat products, eggs, or milk as delineated in 40 CFR 180.6(a)(3). The pesticide is considered useful for the purpose for which a tolerance is sought. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenti-

cide Act, which contains any of the ingredients listed herein, may request on or before January 4, 1979, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition/document control number, "P6H5126/P12". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Federal Register Section from 8:30 to 4 p.m. Monday through Friday.

Dated: November 28, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

(Sec. 409, Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348).)

It is proposed that Part 193 and Part 561 be amended as follows:

1. part 193, Subpart A, § 193.235 is amended by revising paragraph (e) to read as follows:

§ 193.235 Glyphosate.

* * * * *

(e) Tolerances are established for combined residues of the herbicide glyphosate (*N*-(Phosphonomethyl) glycine) and its metabolite aminomethylphosphonic acid in the following processed foods when present therein as a result of application of the herbicide in palm tree culture and to growing sugarcane:

2 parts per million in sugarcane molasses.
0.1 part per million in palm oil.

2. part 561, § 561.253, is amended by revising paragraph (f) to read as follows:

§ 561.253 Glyphosate.

* * * * *

(f) Tolerances are established for combined residues of the herbicide glyphosate (*N*-phosphonomethyl) glycine) and its metabolite aminomethylphosphonic acid in or on the following processed feeds when present therein as a result of application of this herbicide to growing crops:

Feed:	*parts per million*
Citrus pulp, dried	0.4
Soybean hulls	20
Sugarcane molasses	2

Title 3—President

Proclamation 4611 • **December 1, 1978**

Admiralty Island National Monument

By the President of the United States of America

A Proclamation

Admiralty Island is outstanding for its superlative combination of scientific and historic objects. Admiralty Island contains unique resources of scientific interest which need protection to assure continued opportunities for study.

Admiralty Island has been continuously inhabited by Tlingit Indians for approximately 10,000 years. Archeological sites and objects are plentiful in the areas of Angoon, Chaik Bay, Whitewater Bay and other bays and inlets on the island. These resources provide historical documentation of continuing value for study. The continued presence of these natives on the island add to the scientific and historical value of the area.

The cultural history of the Tlingit Indians is rich in ceremony and creative arts and complex in its social, legal and political systems. Admiralty provides a unique combination of archeological and historical resources in a relatively unspoiled natural ecosystem that enhances their value for scientific study.

Subsequent to exploration and mapping by Captain George Vancouver at the end of the 18th century, Russian fur traders, Yankee whalers, and miners and prospectors have left objects and sites on Admiralty which provide valuable historical documentation of white settlement and exploitation of the island and its resources. Admiralty Island is rich in historic structures and sites, including whaling stations, canneries, old mining structures and old village sites, for example, Killisnoo Village where a whaling and herring saltery station were established in 1880.

Unusual aspects of the island ecology include its exceptional distribution of animal species, including dense populations of brown bears and eagles, but excluding entirely—because of the island's separation from the mainland—a large number of species indigenous to the general area. This peculiar distribution enhances the island's value for scientific study.

The unique island ecology includes the highest known density of nesting bald eagles (more than are found in all the other States combined); large numbers of Alaska brown bear; and the largest unspoiled coastal island ecosystem in North America. Admiralty Island was added to the Tongass National Forest in 1909, and specific portions of the island have been designated as bear and eagle management areas and numerous scientific studies of the bear and eagle habitat have been conducted by scientists from around the world. The island is an outdoor living laboratory for the study of the bald eagle and Alaska brown bear.

Protection of the entire island, exclusive of the Mansfield Peninsula, is necessary to preserve intact the unique scientific and historic objects and sites located there. Designation of a smaller area would not serve the scientific purpose of preserving intact this unique coastal island ecosystem.

V 43/234 DEC 5 78 UMI

Hunting and fishing shall continue to be regulated, permitted and controlled in accord with the statutory authorities applicable to the Monument area.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the government of the United States to be National Monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by section 2 of the Act of June 8, 1906, (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Admiralty Island National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area described on the document entitled "Admiralty Island National Monument (Copper River, Meridian)", attached to and forming a part of this Proclamation. The area reserved consists of approximately 1,100,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the Monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this Monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this Monument and for the proper administration of the Monument in accordance with applicable laws.

The establishment of this Monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616 (d)(1)); however, the National Monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this Monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

[3195-01-M]

Proclamation 4612 • **December 1, 1978**

Aniakchak National Monument

By the President of the United States of America

A Proclamation

The Aniakchak Caldera is located in the heart of the Alaska Peninsula. It is so unexpected a feature that it remained unknown to all but the Natives of the region until about 1920. With its average diameter of approximately six miles, Aniakchak is one of the world's largest calderas.

In the interior of the caldera are textbook examples of certain volcanic features such as lava flows, cinder cones, and explosion pits. Also lying within the caldera is Surprise Lake which is fed by warm springs and is uniquely charged with chemicals. Surprise Lake is the source of the Aniakchak River, which cascades through a 1,500 foot gash in the caldera wall and downward for 27 miles to the Pacific Ocean.

The flanks of the caldera provide a geological and biological continuum by which to make a comparative study of the formation of the caldera and the significant process of biological succession of both plant and animal species occurring in the vicinity of the caldera, an area that was rendered virtually devoid of life forms by a major eruption of the volcano in 1931.

The caldera is also climatologically unique in that, because of its topography and setting, it appears to be able to generate its own weather. A striking phenomenon known as cloud "niagaras" occurs frequently as strong downdrafts form over the caldera walls.

The land withdrawn and reserved by this Proclamation for the protection of the geological, biological, climatological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Aniakchak National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Aniakchak National Monument on the map numbered ANIA-90,006 attached to and forming a part of this Proclamation. The area reserved consists of approximately 350,000 acres,

DEC 5 1978 UMI

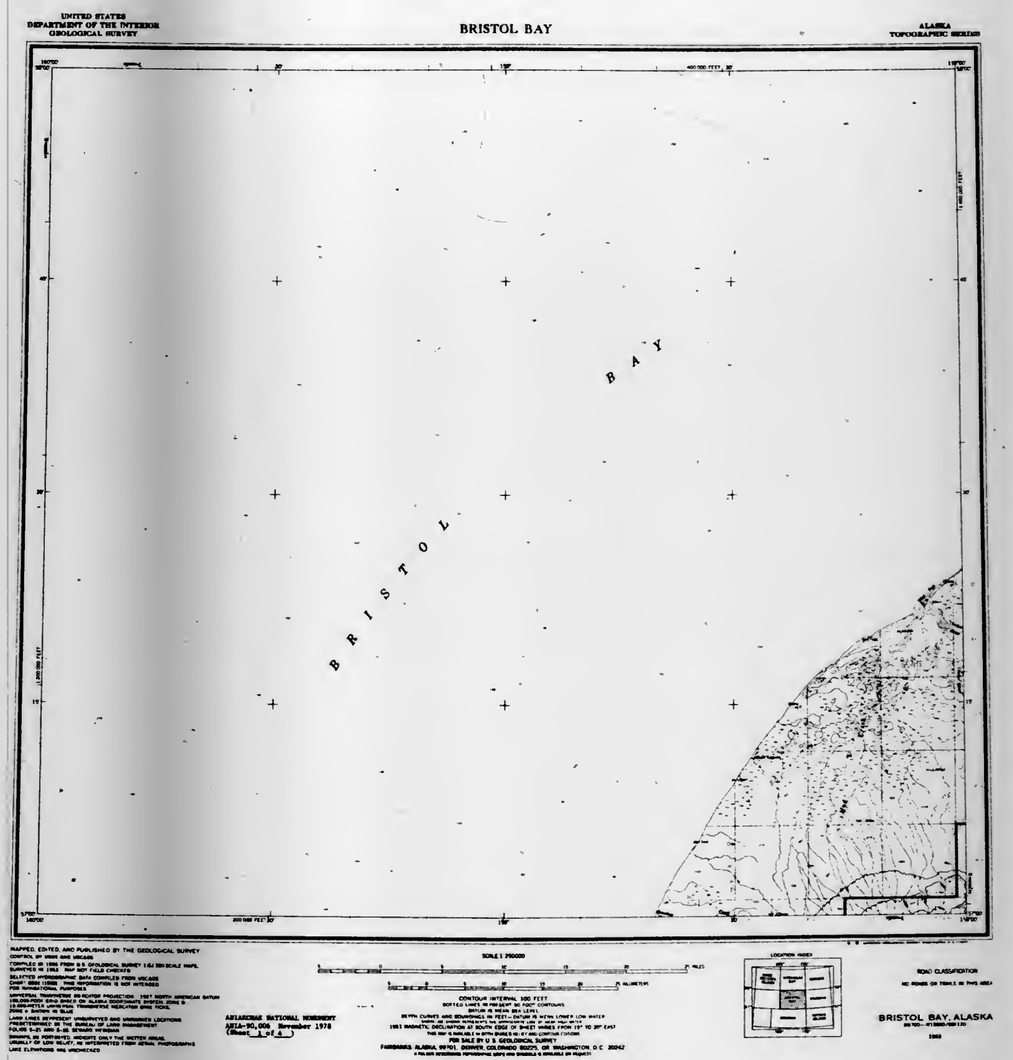
V 43/234 DEC 5 78 UMI

and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

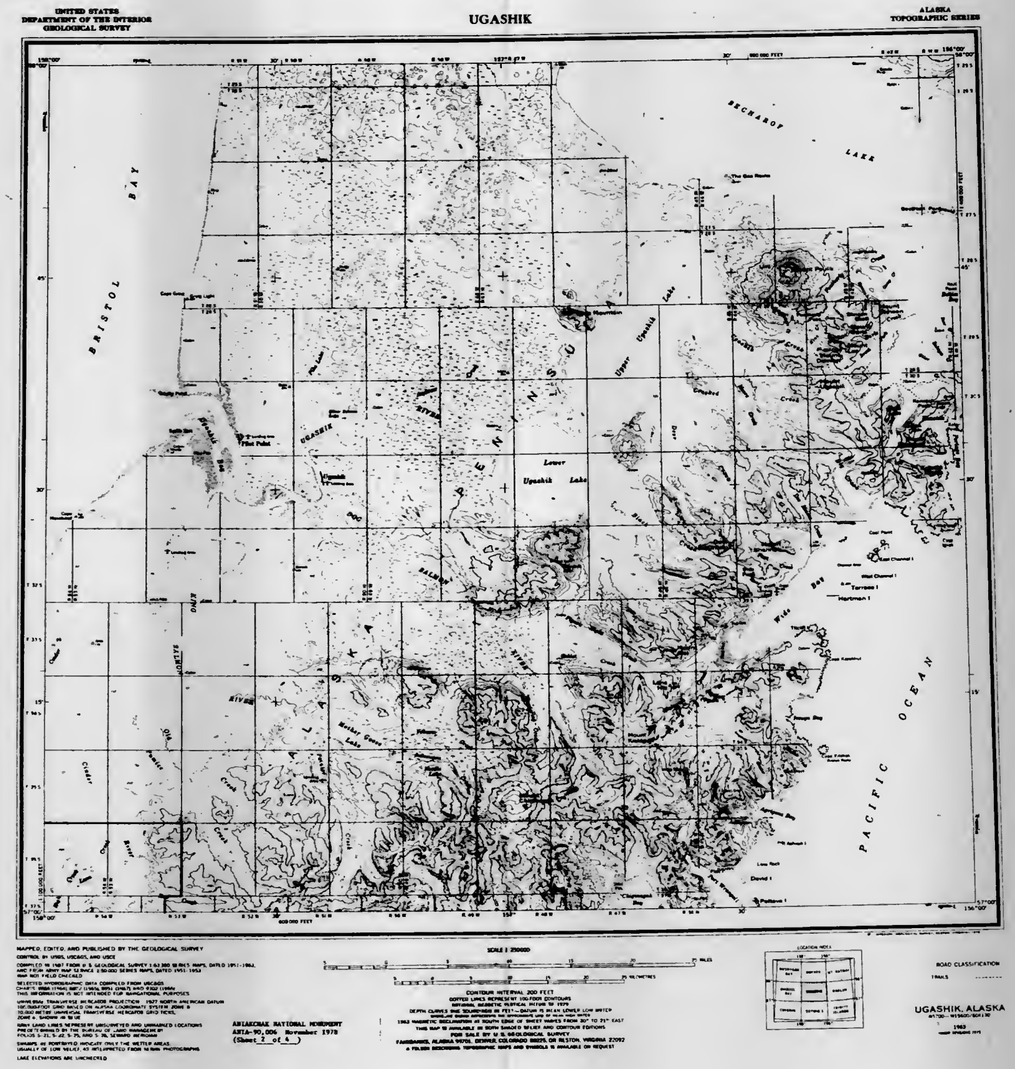
The establishment of this monument is subject to valid existing rights, including, but not limited to, rights confirmed in Section 15 of the Act of January 2, 1976 (89 Stat. 1145), and valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton*, Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

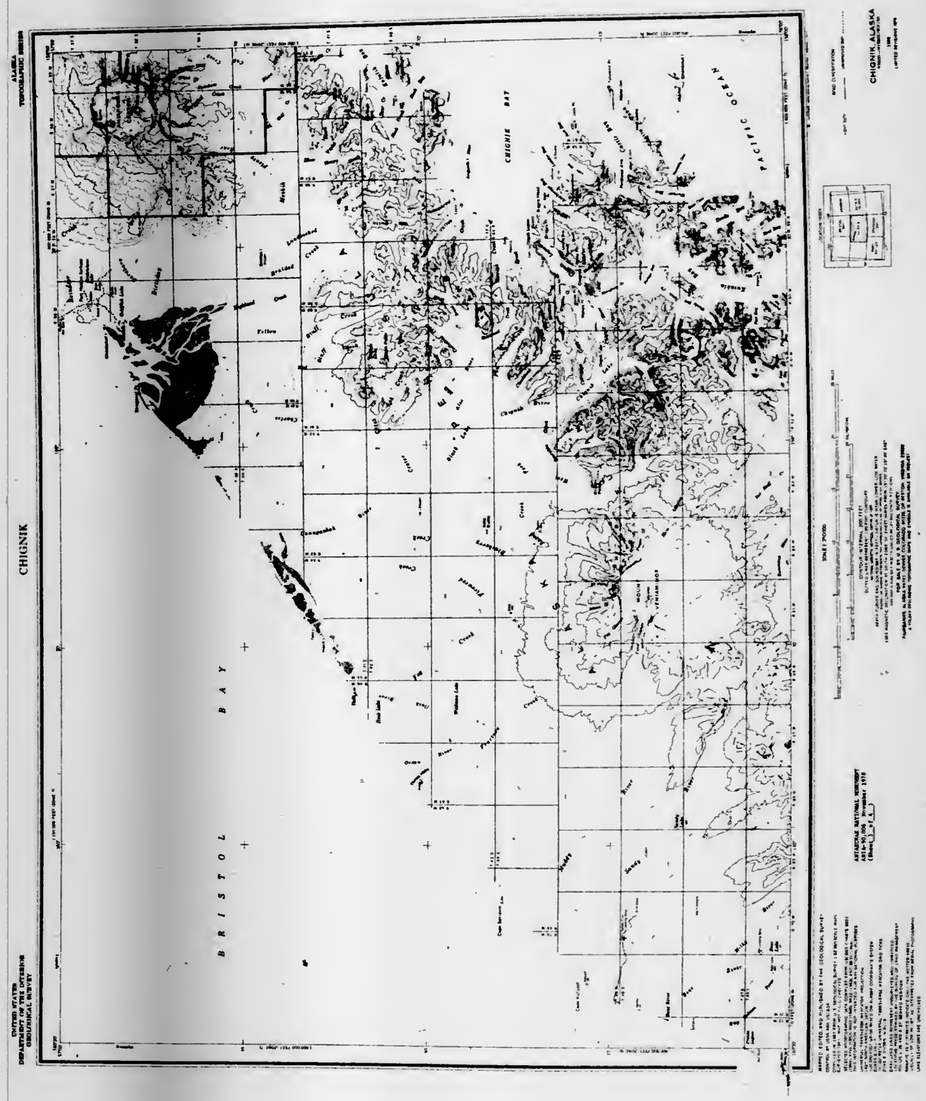


The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.



IN WITNESS WHEREOF, I have hereunto set my hand this first day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.



Jimmy Carter

Proclamation 4613 • **December 1, 1978**

Becharof National Monument

By the President of the United States of America

A Proclamation

This monument on the Alaska Peninsula supports one of the densest known populations of the great Alaska brown bear. This area encompasses habitat used by a discrete population of bears for denning and foraging, both north and south of Becharof Lake.

At the southern end of Becharof Lake, several hundred bears concentrate during salmon spawning season. Certain of the bears make their dens in the area on islands a few feet above the water level, a unique phenomenon of great interest in the study of this great carnivore. Deeply worn bear trails also indicate decades of extensive use, making this area important to the study of the bears' long term habits and population fluctuation. Rich salmon spawning habitats and the presence of such prey species as caribou and moose are key factors in the intensive use of the area by the bears.

The biology of the brown bears, their habitat and associated plant and animal species within the monument, together with other ecological features of the area, combine to offer excellent opportunities for scientific study and research.

The area is interesting and significant geologically, as it contains one of Alaska's most recent volcanically active areas, the Gas Rocks under Mount Peulik. Studies here of recent volcanism may contribute to the growing understanding of this powerful geological force.

The land withdrawn and reserved by this Proclamation for the protection of the geological, biological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for the local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Becharof National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as Becharof National Monument on the map numbered FWS-81-00-0414 attached to and forming a part of this

D E 5 7 8 UMI

V 43 / 234

Proclamation. The area reserved consists of approximately 1,200,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any public land order effecting a withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act, 43 U.S.C. 1616(d)(1); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton*, Civil No. A–48–72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of sport hunting, and of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close this national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population or to sport hunting of a particular fish or wildlife population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4614 • **December 1, 1978**

Bering Land Bridge National Monument

By the President of the United States of America

A Proclamation

The Bering Land Bridge, now overlain by the Chukchi Sea, the Bering Sea and Bering Strait, was the migration route by which many plants, animals, and humans arrived on the North American continent. The monument hereby created has within it an invaluable record of this migration.

There are found here rich archeological sites giving evidence of human migration during the periods the Bridge was water-free. Also found are paleontological sites providing abundant evidence of the migration of plants and animals onto the continent in the ages before the human migrations. The arctic conditions here are favorable to the preservation of this paleontological record from minute pollen grains and insects to the large mammals such as the mammoth.

The monument is also the summering area for a number of Old World bird species, which feed and nest in the area. It is one of the few places in North America where ornithologists are able to study these species.

The diversity of the soils, topography, permafrost action and climate within the monument leads to an excellent representation of varied, yet interrelated tundra plant communities. Their proximity and diversity make the area a prime outdoor laboratory.

The area is also rich in volcanics. Here is the opportunity to study unique Arctic lava flows which erupted through deep permafrost. The tubes and cracks of these flows are now filled with the sheen of permanent ice. In the Devil Mountain area are the uniquely paired maar explosion craters which were formed by violent explosions resulting from the steam pressure released when the hot volcanic ejecta contacted the water and ice that covered this wetland area. These craters are now crystal clear lakes bounded by a shoreline of volcanic ash, cinders and scoria.

The land withdrawn and reserved by this Proclamation for the protection of the geological, archeological, paleontological, biological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

V 43/234

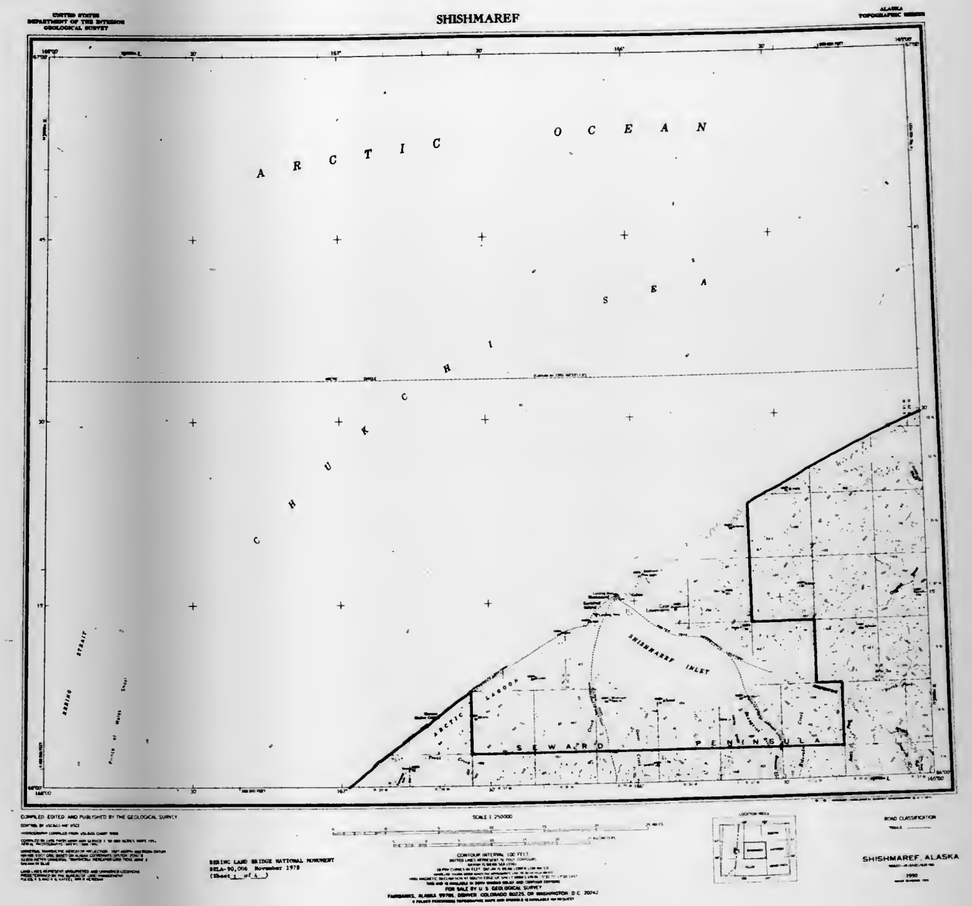
NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Bering Land Bridge National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Bering Land Bridge National Monument on the map numbered BELA-90,006 attached to and forming a part of this Proclamation. The area reserved consists of approximately 2,590,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton*, Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.



Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4615 • **December 1, 1978**

Cape Krusenstern National Monument

By the President of the United States of America

A Proclamation

The area of northwest Alaska known as Cape Krusenstern contains an archeological record of great significance. The Cape's bluffs and its series of one hundred fourteen horizontal beach ridges hold an archeological record of every major cultural period associated with habitation of the Alaska coastline in the last 5000 years.

The unglaciated lands lying inland, including the Kakagrak Hills, the Rabbit Creek area and others, have an older archeological record dating back to pre-Eskimo periods of at least 8000 years ago. This continuum of evidence is of great historic and scientific importance in the study of human survival and cultural evolution.

There are in this area examples of other unique natural processes. The climatological conditions are conducive to the formation of Naleds, one spectacular example of which occurs in the area. In the same inland area at Kilikmak Creek is found the only known Alaskan example of a still recognizable Illinoisian glacial esker, a formation which is over 100,000 years old.

The unique geologic process of erosion and sediment transport in this area created and continues to create the beach ridges in which is preserved the archeological record of the beach civilizations. Also found in the area is a wide variety of plant and animal species, from the marine life along the shoreline and its lagoons to the inland populations such as musk-oxen, Dall sheep, caribou and many smaller species.

The land withdrawn and reserved by this Proclamation for the protection of the geological, archeological, biological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for the local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

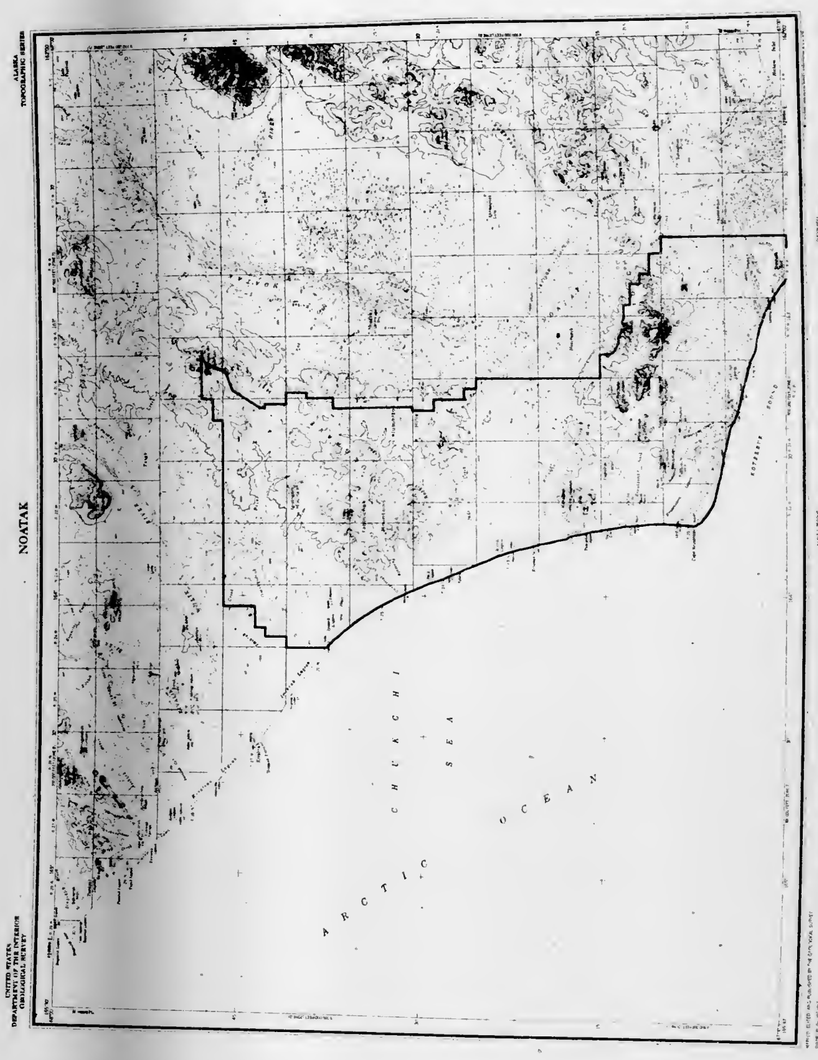
NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Cape Krusenstern National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Cape Krusenstern

V 43/234 DEC 5 78 UMI

National Monument on the map numbered CAKR-90,008 attached to and forming a part of this Proclamation. The area reserved consists of approximately 560,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).



Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4616 **December 1, 1978**

Denali National Monument

By the President of the United States of America

A Proclamation

In the creation of Mount McKinley National Park the southern half of the mountain's massif was inadvertently excluded from the Park. The creation of Denali National Monument will bring within the protection of the National Park System the entirety of this, the highest peak on the North American continent. This face markedly differs from the north side for it has a more gradual rise and a significant system of glaciers. It is also the approach route used historically by those seeking to scale Mount McKinley.

Certain of the glaciers on the south face are among the largest in Alaska, reaching up to 45 miles in length. Yet, only the very uppermost parts are presently within the National Park. Their protection is enhanced by the creation of this monument.

In the southwest area of the monument hereby created are the geologically unique Cathedral Spires. From this granitic pluton mass radiate eight major glacial troughs exhibiting cirques and headwalls rising 5,000 feet from their bases.

The monument also protects significant habitat for the McKinley caribou herd which has provided a basis for scientific study since the early twentieth century. Associated with the herd in this ecosystem are other scientifically important mammals such as grizzly bear, wolf and wolverine.

The Toklat River region includes a unique area of warm springs which attracts an unusual late run of Chum salmon. This run provides an important late fall food source for the grizzly bear population of the area which, because of its accessibility, has been the subject of many scientific studies.

The land withdrawn and reserved by this Proclamation for the protection of the geological, biological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for the local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

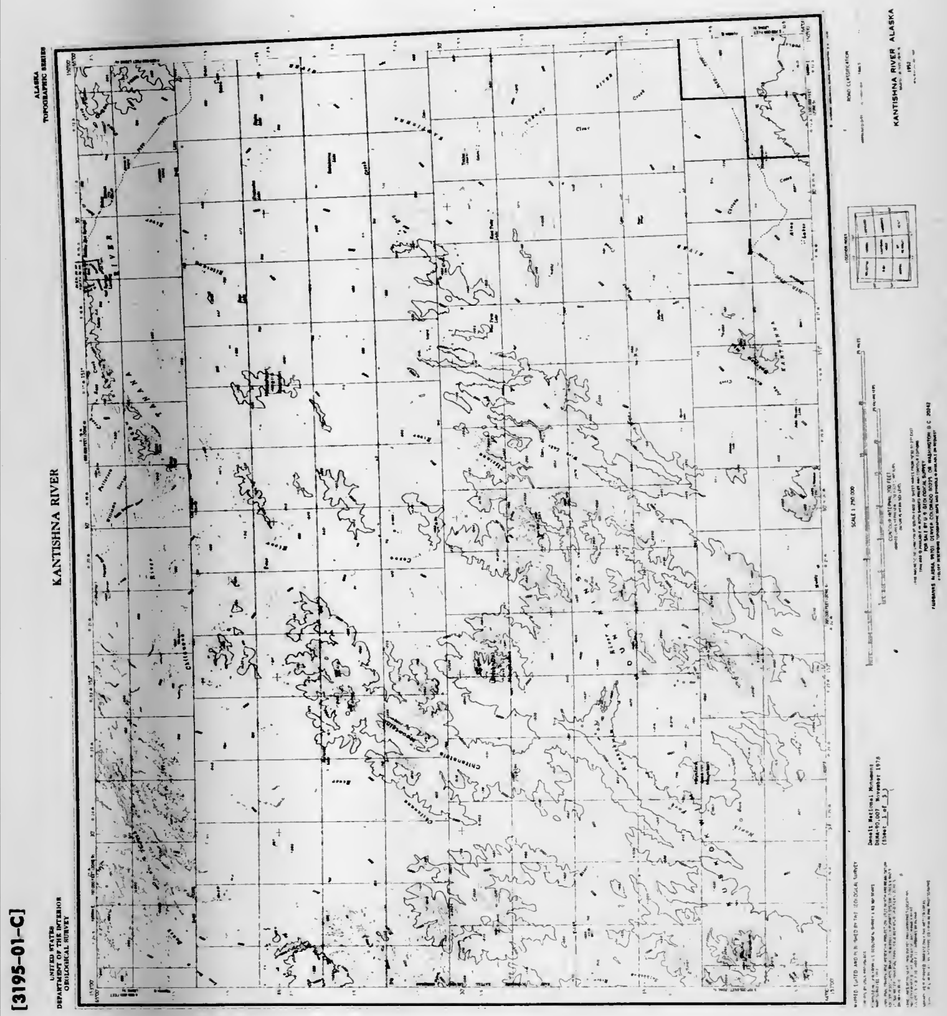
NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Denali National Monument all lands, including

V 43 / 234 DEC 5 1978 UMI

submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Denali National Monument on the map numbered DENA–90,007 attached to and forming a part of this Proclamation. The area reserved consists of approximately 3,890,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquistion of title thereto by the United States.

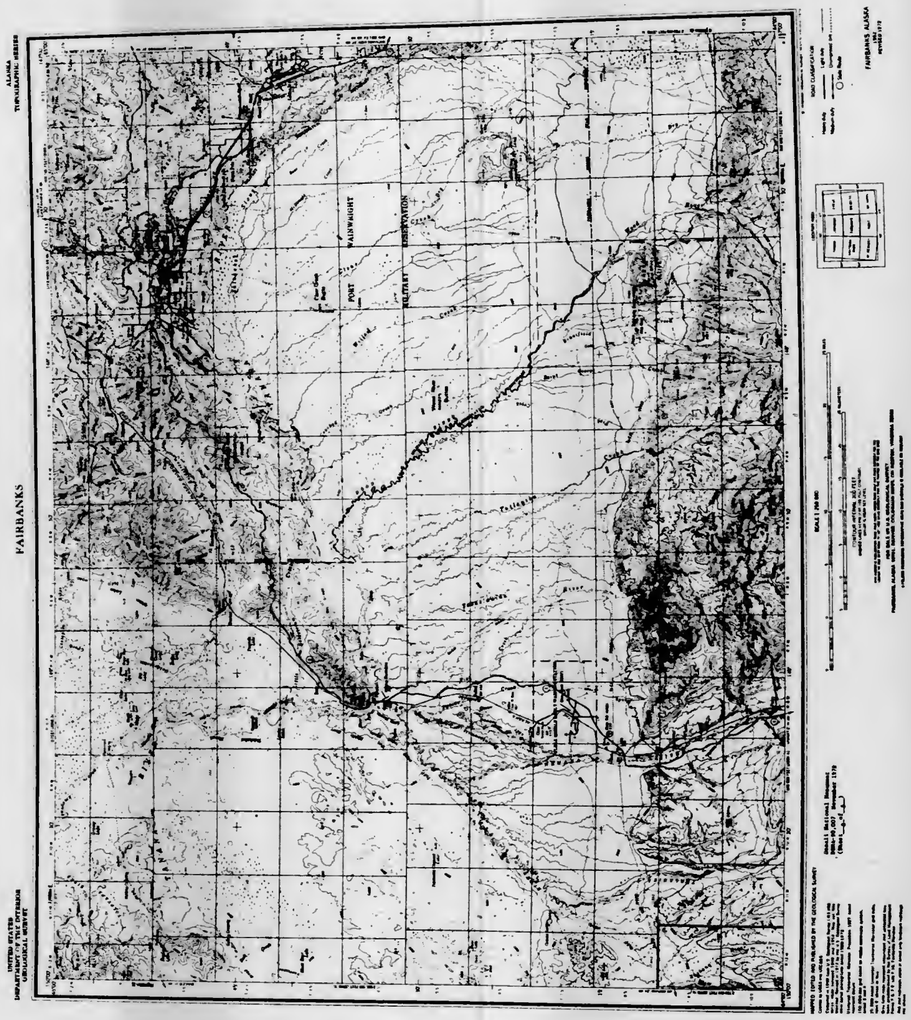
All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

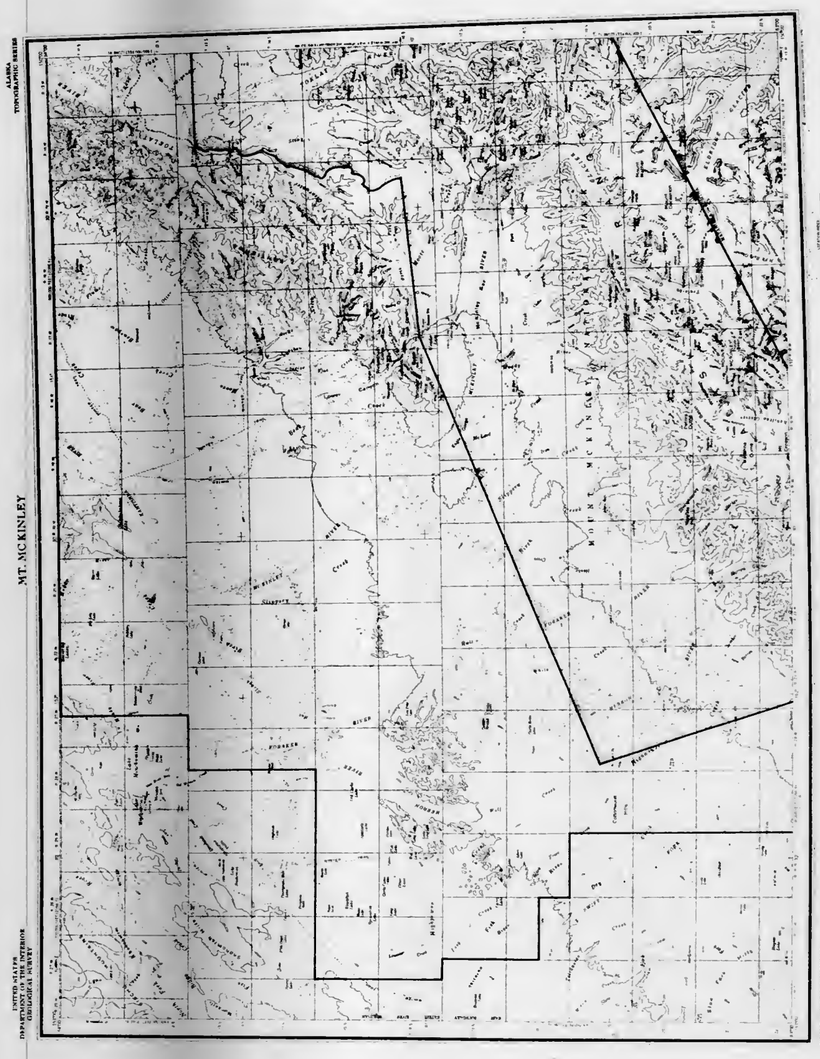


Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton*, Civil No. A–48–72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.



Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.



IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4617 • **December 1, 1978**

Gates of the Arctic National Monument

By the President of the United States of America

A Proclamation

Lying wholly north of the Arctic Circle, the Gates of the Arctic National Monument hereby created preserves an area containing a wide variety of interior arctic geological and biological forms. The essence of the geology of the area is its great diversity. There are excellent examples of glacial action which formed U-shaped valleys and morraine-dammed lakes. In contrast are the fissure-shaped precipices of Ernie Creek and the tilted limestone blocks along the northern edge of the Brooks Range.

Associated with these various land forms is a progression of ecosystems representing a continuum of communities from the boreal spruce forest and riparian shrub thickets in the south to the arctic tussock tundra in the north. These communities of plants and undisturbed animals offer excellent opportunities for study of natural interaction of the species.

The monument also protects a substantial portion of the habitat requirements for the Western Arctic caribou herd which uses ancient routes through the mountains for migration. This herd, which has suffered severe population losses recently, is of great value for the study of the population dynamics relating to both the decline and recovery of the herd.

The archeological and historical significance of the area is demonstrated by the studies which have revealed evidence of human habitation for approximately 7,000 years. Several known traditional Indian-Eskimo trade routes run through the monument area giving the promise of further important archeological discoveries. In the Wiseman and Ernie's Cabin mining regions in the south are offered opportunities for historical study of the life of the Alaskan pioneer miner of the early twentieth century.

The land withdrawn and reserved by this Proclamation for the protection of the biological, geological, archeological, historical, and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends upon subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of

[3195-01-C]

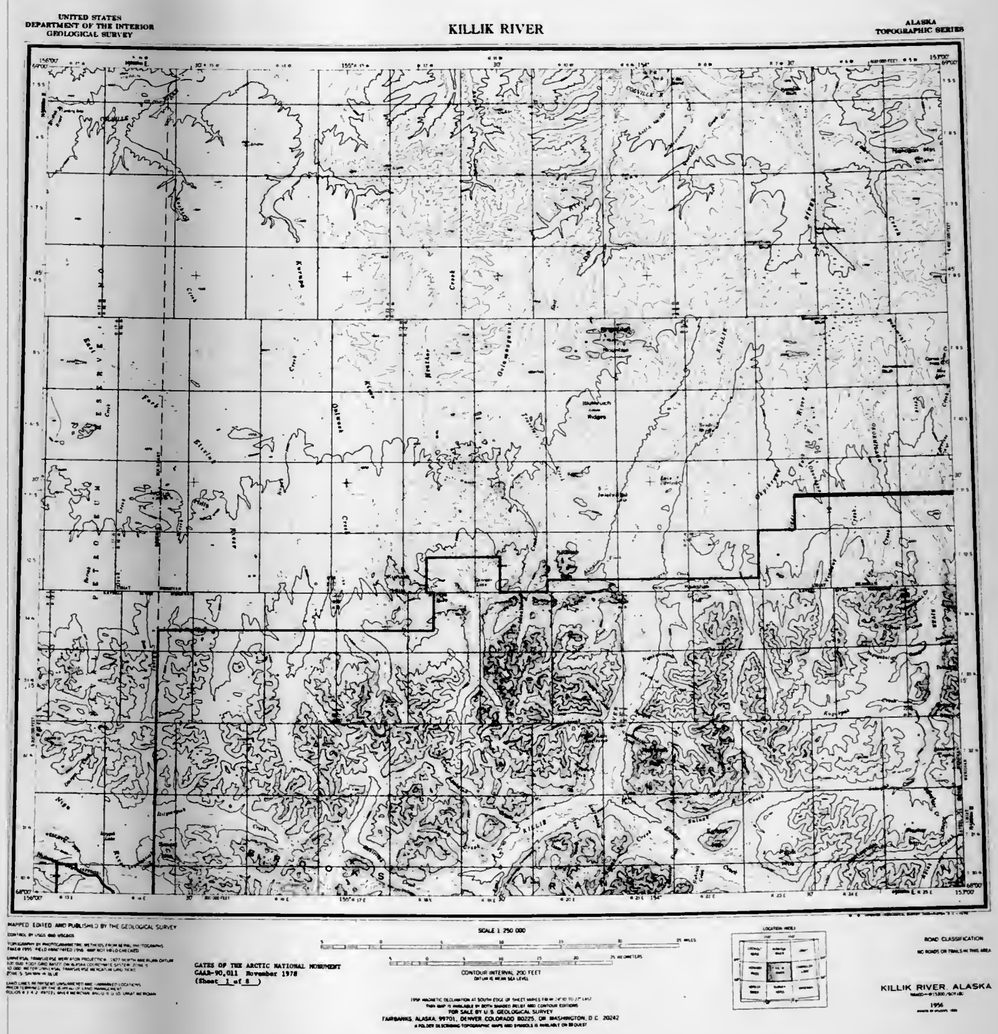
V 43/234 DEC 5 78 UMI

June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Gates of the Acrtic National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Gates of the Arctic National Monument on the map numbered GAAR-90,011 attached to and forming a part of this Proclamation. The area reserved consists of approximately 8,220,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the united States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*)., and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton*, Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).



The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4618 • **December 1, 1978**

Enlarging the Glacier Bay National Monument

By the President of the United States of America

A Proclamation

Glacier Bay National Monument was created by Presidential Proclamation in 1925 and was enlarged in 1939 and again in 1955. It protects the great tidewater glaciers and a dramatic range of plant communities. The enlargement accomplished by this Proclamation furthers the protection of the array of geological and ecological interests in the area.

This addition includes the northwesterly side of Mount Fairweather, the highest peak in this part of Alaska, and the Grand Plateau Glacier, both significant to students of glaciology.

The Alsek River corridor provides the only pass through the coastal mountain range for 120 miles. This is the route by which large mammals first entered this isolated area and is used by a significant percentage of the Alaska bald eagle population en route to the Klukwan area where they winter.

The addition also protects two botanically significant areas. In the hills flanking Grand Plateau Glacier live the oldest plant communities in southeast Alaska which survive because the area escaped both glaciation and inundation. Also important to the study of ecological succession are the mature aquatic vegetative communities of the pre-neoglacial lakes in the Deception Hills area.

The land withdrawn and reserved by this Proclamation for the protection of the geological, biological, and other phenomena enumerated above supports now, as it has in the past, a unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhances the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the area added to the Glacier Bay National Monument by this Proclamation.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved for inclusion in the Glacier Bay National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Enlargement of Glacier Bay National Monument on the map numbered GLBA-90,005 attached to and forming a part of this Proclamation. The area reserved consists of approximately 550,000 acres, and is necessary to ensure the proper

V 43/234 DEC 5 78 UMI

care and management of the objects the monument was established to preserve and those added by this Proclamation. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this addition are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

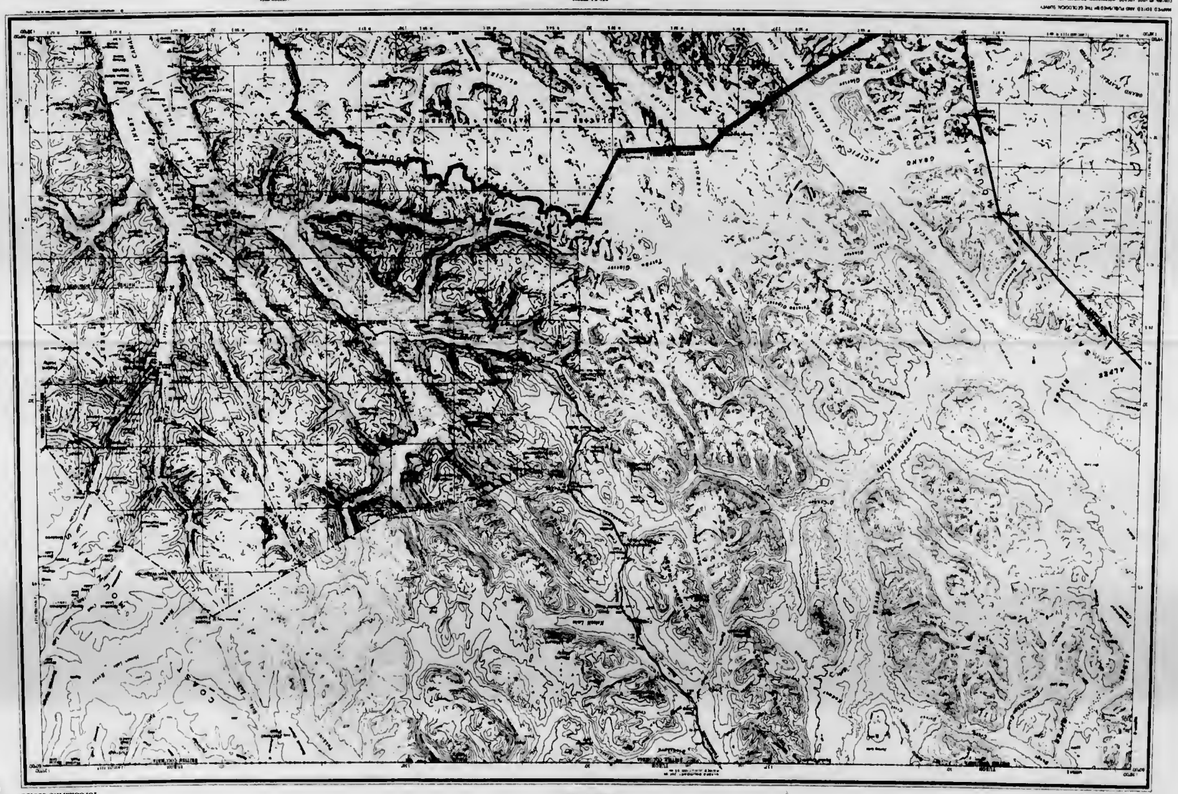
The establishment of this addition is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act, (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Furthermore, nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A–48–72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close this addition, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.



Jimmy Carter

Proclamation 4619 **December 1, 1978**

Enlarging the Katmai National Monument

By the President of the United States of America

A Proclamation

In 1912, Mount Katmai gave vent to an extremely violent volcanic eruption. To preserve this excellent example of recent volcanism and ash deposition, Katmai National Monument was established in 1918. In the ensuing years it was recognized that in addition to the volcanoes, the area included a significant population of Alaskan brown bear and important spawning grounds for the Bristol Bay red salmon. The area was enlarged in view of these features in 1931, 1942 and 1969.

Continued research has revealed that the bear population is more mobile than originally believed. By the addition made hereby, a viable gene-pool population of the Alaskan brown bear can be protected free from human harassment. The addition closes a fifteen mile gap between the former monument boundary and the McNeil River State Game Sanctuary thereby completing the protection of the range of this population of the world's largest carnivore.

The enlargement also protects the headwaters of the drainages which provide the spawning grounds for the red salmon. By protecting the quality of the water in these watersheds, the drama of the salmon run, a phenomenon of great scientific interest over the years, may be perpetuated.

The land withdrawn and reserved by this Proclamation for the protection of the biologic and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein, because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the area added to Katmai National Monument by this Proclamation.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

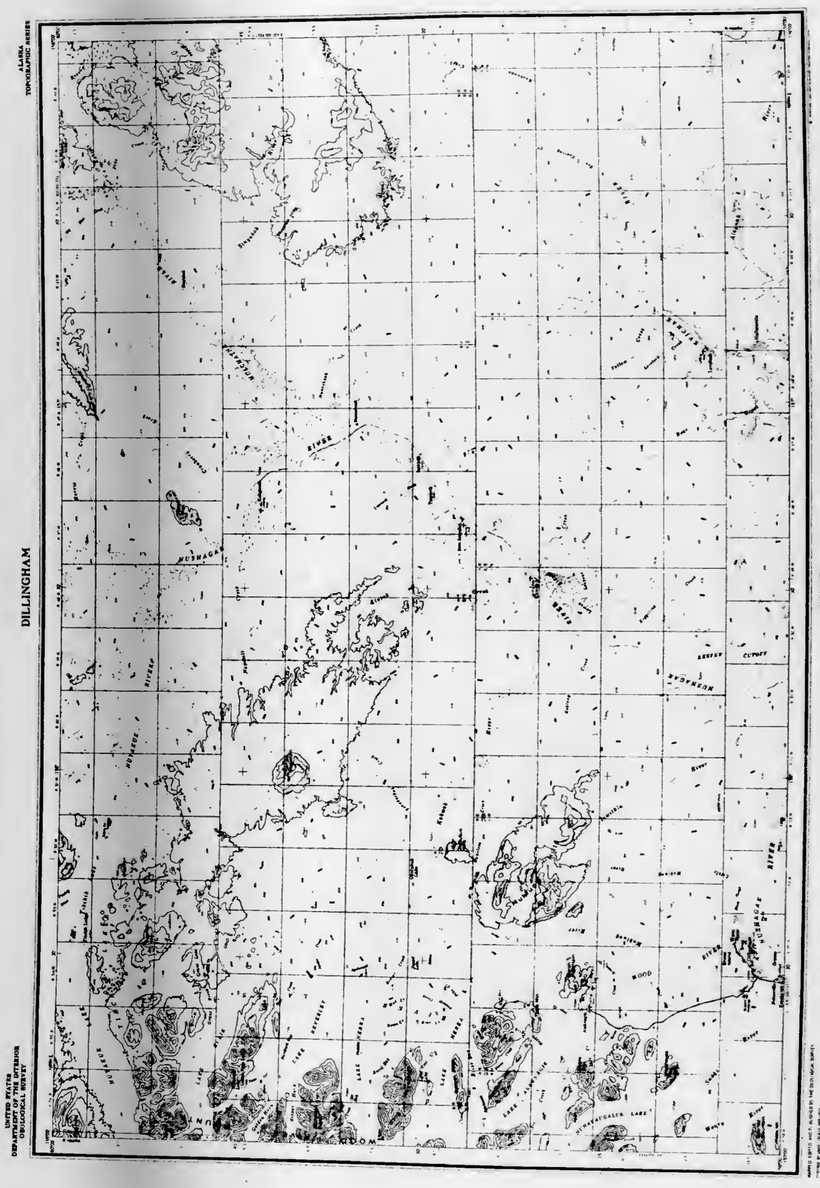
NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved for inclusion in the Katmai National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Enlargement of Katmai National Monument on the map numbered KATM-90,007 attached to and forming a part of this Proclamation. The area reserved consists of

V 43/234 DEC 5 78 UMI

approximately 1,370,000 acres, and is necessary to ensure the proper care and management of the objects the monument was established to preserve and those added by this Proclamation. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

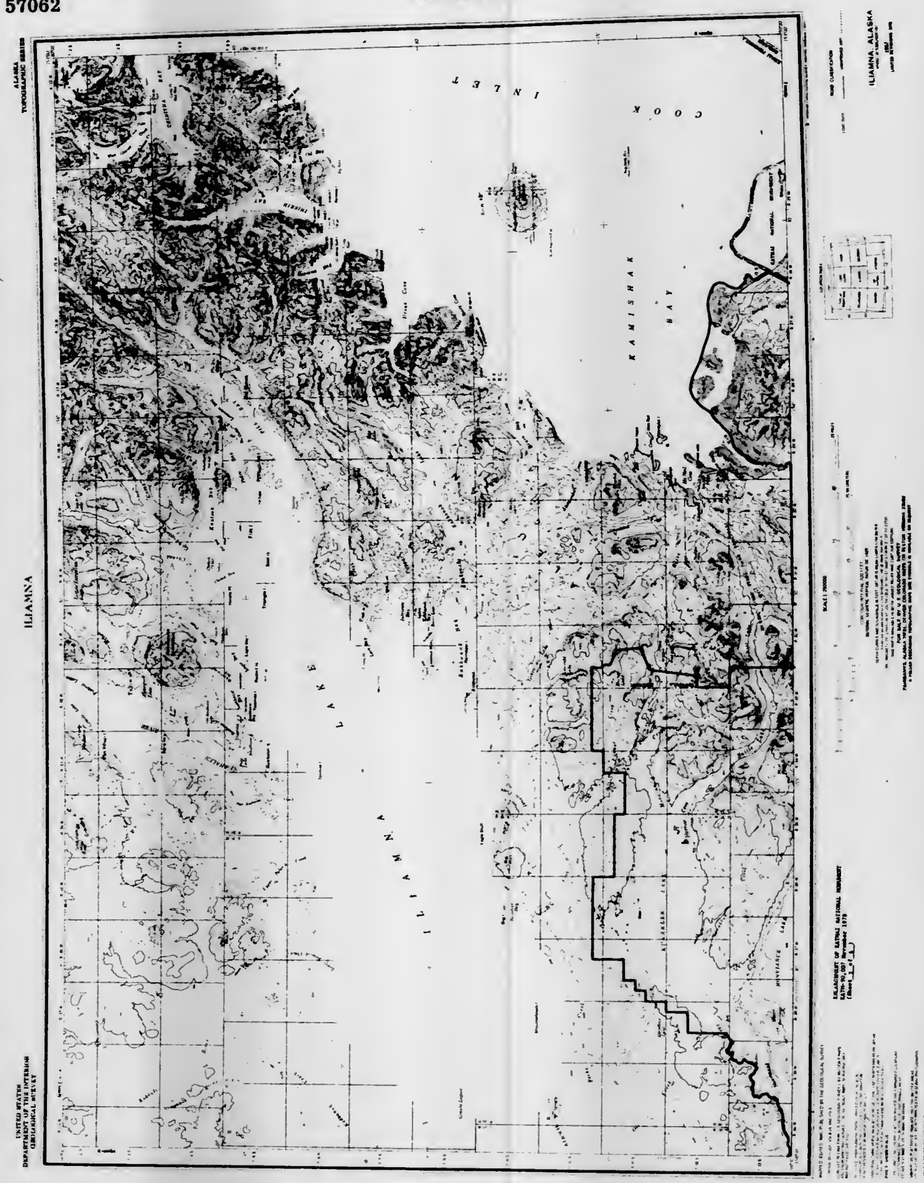
All lands, including submerged lands, and all waters within the boundaries of this addition are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this addition is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

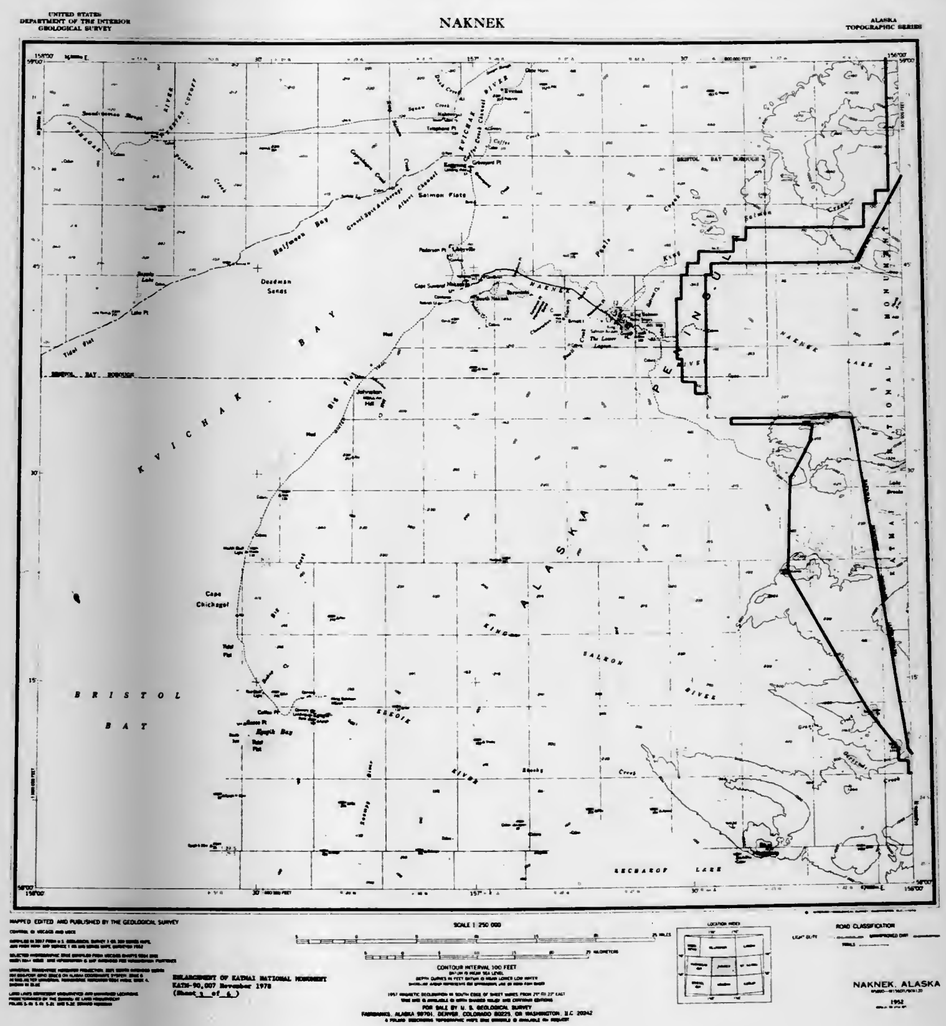


Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Furthermore, nothing in this Proclamation is intended to modify, revoke or abrogate the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton*, Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close this addition, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.



Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.



IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4620 **December 1, 1978**

Kenai Fjords National Monument

By the President of the United States of America

A Proclamation

Kenai Fjords National Monument borders the Gulf of Alaska and includes the Harding Icefield and extensions of mountain peaks out into the sea. The area holds a significant opportunity for geologic study of mountain building and for scientific study of ecological variations from an icecap environment to a marine shoreline environment.

The Harding Icefield, one of the Nation's major icecaps, continues to carve deep glacial valleys through the Kenai Mountains. The mountains themselves illustrate tectonic movement through uplift and subsidence over geologic time. Former alpine valleys are now fjords, and former mountain peaks are now tips of islands and vertical sea stacks.

Between the fjords, richly varied rain forest habitats offer opportunities to study life forms adaptable to the wet coastal environment. On the land these include mountain goat, black bear, otter, ptarmigan, and bald eagle. The area is extremely rich in sea bird life of interest to ornithologists and in marine mammals which come to feed in the fjords from their hauling and resting places on nearby islands. The recovery of the sea otter population from almost total extermination to relatively natural populations in this area is of continuing scientific interest.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Kenai Fjords National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as Kenai Fjords National Monument on the map numbered KEFJ-90,008 attached to and forming a part of this Proclamation. The area reserved consists of approximately 570,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care

V 43/234 DEC 5 78 UMI

and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A–48–72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

FEDERAL REGISTER, VOL. 43, NO. 234—TUESDAY, DECEMBER 5, 1978

[3195-01-M]

Proclamation 4621 • **December 1, 1978**

Kobuk Valley National Monument

By the President of the United States of America

A Proclamation

The Kobuk Valley and its environs, an area located in the northwest interior of Alaska, contains important archeological data and biological and geological features of great scientific significance.

Archeological features within the area illustrate an unbroken continuum of human adaptation to the natural environment from the early pre-Eskimo people of 10,500 years ago to present-day local residents. Scientists recently discovered more than 100 dwellings occupied in about 1250 A.D., comprising the largest settlement of its kind. The Onion Portage Archeological District is located within the area, and is listed on the National Register of Historic Places. Archeological research at Onion Portage has yielded evidence of more than 10,000 years of human occupation.

The area contains the Great and Little Kobuk Sand Dunes, which lie north of the Arctic Circle and include both active and stabilized dunes. Scientific studies of the dunes show them to be older than 33,000 years, and several plants have been found in association with the dunes environment which are scientifically unusual in the area. The Great Kobuk Sand Dunes attain a height of 100 feet.

The inclusion of the watersheds on the north and south of the Kobuk River protects a uniquely representative series of interrelated plant communities. There is here an essentially unspoiled laboratory for the study of the northern boreal forest.

A rich variety of wildlife also occurs within the area. Major portions of the northwest arctic caribou herd move through the area in spring and fall migrations. The area also includes one of only two significant populations of the Alaskan sheefish. The water environment is habitat for nesting waterfowl, moose, and muskrat. A relatively dense population of grizzly and black bears, wolf, wolverine, fox, otter, and other northern furbearing mammals range over the entire area.

The land withdrawn and reserved by this Proclamation for the protection of the archeological, geological, biological, and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhances the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with these objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is one of the values to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases

V 43/234 DE 5 78 UMI

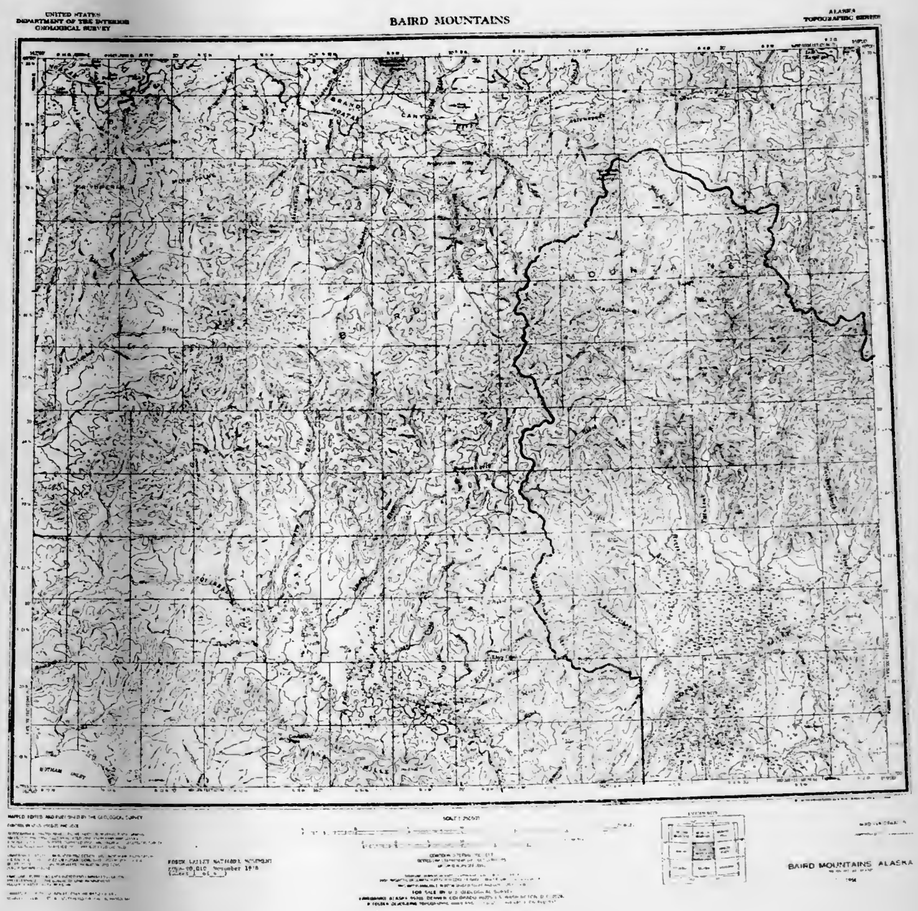
shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Kobuk Valley National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Kobuk Valley National Monument on the map numbered KOVA-90,010 attached to and forming a part of this Proclamation. The area reserved consists of approximately 1,710,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).



The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4622 **December 1, 1978**

Lake Clark National Monument

By the President of the United States of America

A Proclamation

An area in south-central Alaska contains examples of geological phenomena associated with two major mountains chains, the Alaska Range and the Chigmit Mountains, in an array that includes jagged peaks and two symmetrical, steaming volcanoes. These volcanoes, Redoubt and Iliamna, have been listed on the National Registry of Natural Landmarks.

The area's land forms also contribute to an outstanding example of ecological diversity in zones which remain relatively unspoiled for continued scientific research. Large mammals such as moose, caribou, Dall sheep, grizzly bear, black bear, and wolverine occur in natural populations. Whistling swans nest and rare trumpeter swans assemble in the area. Other birds, including bald eagle, gyrfalcon, osprey, and endangered peregrine falcon, breed within the area. Seabird colonies occur along the coast. One of the most stable natural populations of caribou in Alaska, the Mulchatna herd, calves and migrates within the area, offering significant opportunities for scientific study of this mammal.

Sockeye salmon runs within the area are exceptional. The area includes the upper drainage of the Kvichak River System, which is the single most productive spawning and rearing habitat for red salmon in the world, and the subject of scientific research for many years.

Historical resources of the area are significant. Kijik Village, on the shore of Lake Clark, is the site marking the first known Russian exploration of the region in the late eighteenth century. The area holds great promise for the discovery of further evidence defining the impact of the Native-European contacts.

The land withdrawn and reserved by this proclamation for the protection of the geological, archeological, historical, biological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhances the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with these objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of

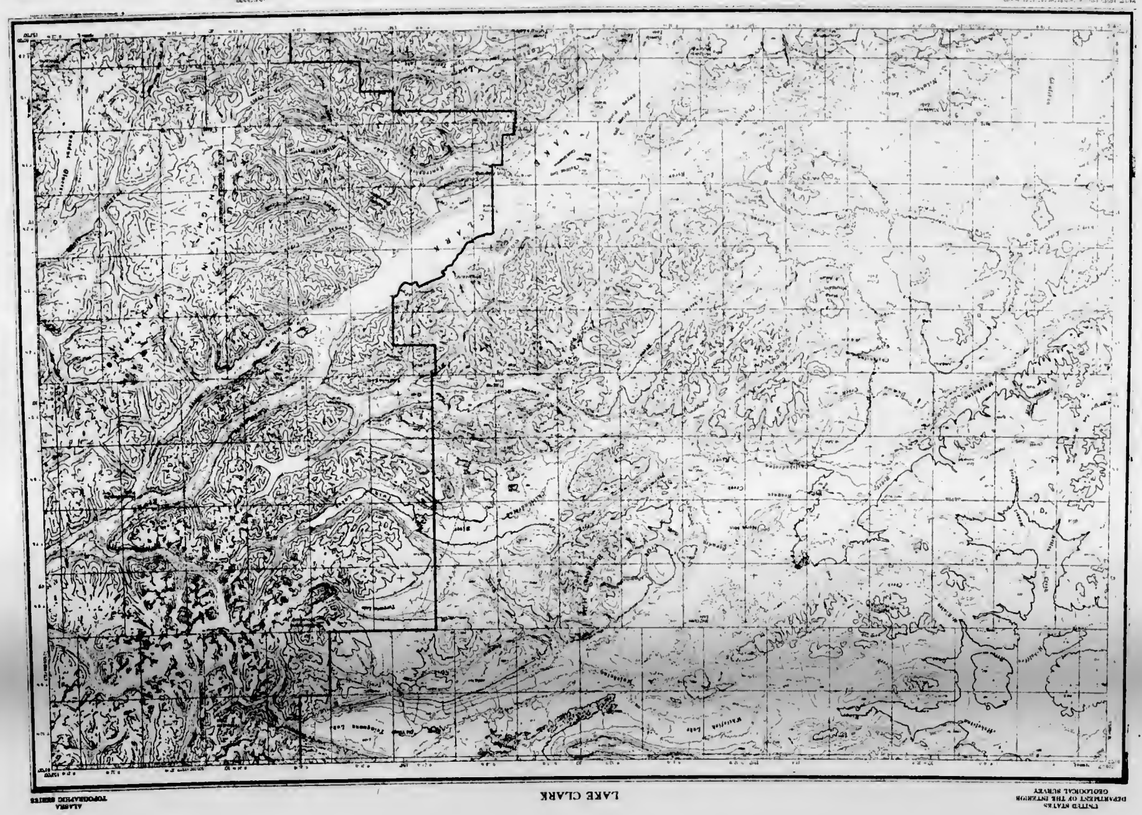
V 43/234 DE 5 78 UMI

June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Lake Clark National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Lake Clark National Monument on the map numbered LACL-90,009 attached to and forming a part of this Proclamation. The area reserved consists of approximately 2,500,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).



The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4623 • **December 1, 1978**

Misty Fiords National Monument

By the President of the United States of America

A Proclamation

Misty Fiords is an unspoiled coastal ecosystem containing significant scientific and historical features unique in North America. It is an essentially untouched two million-acre area in the Coast Mountains of Southeast Alaska within which are found nearly all of the important geological and ecological characteristics of the region, including the complete range of coastal to interior climates and ecosystems in a remarkably compact area.

Among the objects of geologic importance are extraordinarily deep and long fiords with sea cliffs rising thousands of feet. Active glaciers along the Canadian border are remnants of the massive ice bodies that covered the region as recently as about 10,000 years ago, at the end of the Pleistocene epoch. However, there have been periodic glacial advances and retreats in more recent historic periods. Some of the area has been free from glaciation for only a short period of time, creating the unusual scientific phenomenon of recent plant succession on newly-exposed land with the accompanying animal species. The Behm Canal, the major inlet at the heart of the area, is more than fifty miles long and extraordinary among natural canals for its length and depth.

The watershed of the Unuk River, which comprises the northern portion of the Misty Fiords area, has its headwaters in Canada. It is steeply mountainous and glaciated and contains the full range of ecosystems and climates from interior to coastal. Mineral springs and lava flows add to the uniqueness of the area and its value for scientific investigation. South of the Unuk, the Chickamin River System and the Le Duc River originate in active glaciers and terminate in Behm Canal. Further south, Rudyerd Bay Fiords and Walker Cove are surrounded by high, cold lakes and mountains extending eastward to Canada.

First inhabitants of Misty Fiords may have settled in the area as long ago as 10,000 years. The area contains cultural sites and objects of historical significance, including traditional native hunting and fishing grounds. Later historical evidence includes a mid-1800's military post-port entry on Tongass Island and a salmon cannery in Behm Canal established in the late 1800's.

Misty Fiords is unique in that the area includes wildlife representative of nearly every ecosystem in southeast Alaska, most notably bald eagles, brown and black bears, moose, wolves, mountain goats and Sitka black-tailed deer. Numerous other bird species nest and feed in the area, notably falcons and waterfowl. Misty Fiords is a major producer of all five species of Pacific salmon and is especially important for king salmon. Numerous other saltwater, freshwater and anadromous fish species and shellfish are plentiful in this area, which is an extraordinarily fertile interface of marine and freshwater environments. Unusual plantlife includes Pacific silver and subalpine fir trees near the northern limit of their range. The area includes an unusual variety of virgin forests, ranging from coastal spruce-hemlock to alpine forests.

As an intact coastal ecosystem, Misty Fiords possesses a collective array of objects of outstanding value for continuing scientific study. The boundaries of

MISTY FIORDS NATIONAL MONUMENT

V 4 3 / 2 3 4

the area follow watershed perimeters and include the smallest area compatible with protection of this unique ecosystem and the remarkable geologic and biological objects and features it contains.

Hunting and fishing shall continue to be regulated, permitted and controlled in accord with the statutory authorities applicable to the monument area.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, at his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the government of the United States to be National Monuments, and to reserve as part thereof parcels of lands, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by section 2 of the Act of June 8, 1906, (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Misty Fiords National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area described on the document entitled "Misty Fiords National Monument (Copper River Meridian)", attached to and forming a part of this Proclamation. The area reserved consists of approximately 2,285,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the Monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this Monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this Monument and for the proper administration of the Monument in accordance with applicable laws.

The establishment of this Monument is subject to valid existing rights, including, but not limited to, valid selection under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under section 17 (d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616 (d)(1)); however, the National Monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton*, Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this Monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4624 • **December 1, 1978**

Noatak National Monument

By the President of the United States of America

A Proclamation

The Noatak River basin is the largest mountain-ringed river basin in the Nation still virtually unaffected by technological human activity. This basin has been designated as a Biosphere Reserve under the United Nations' auspices, in recognition of its international importance for scientific study and research.

The area includes landforms and ecological variations of scientific interest. The Grand Canyon of the Noatak River is a dissected valley 65 miles long. The area contains the northwesternmost fringe of boreal forest in North America, and is a transition zone and migration route for plants and animals between subarctic and arctic environments. The diversity of the flora is among the greatest anywhere in the earth's northern latitudes.

The Noatak Valley area contains a rich variety of birdlife including several Asian species. The area is crossed twice a year by two-thirds of the Western Arctic caribou herd, and is prime habitat for the barren ground grizzly bear, moose, and several predator species.

Nearly 200 archeological sites, dating as far back in time as 5,000 years, are within the area. They give promise of future discoveries leading to a deeper understanding of the area's prehistory.

The Noatak basin is an area where indigenous plants and animals perpetuate themselves naturally, in a freely functioning ecosystem. Protection of this area will assure the preservation of an essential base against which scientists may judge environmental dynamics of the future.

The land withdrawn and reserved by this Proclamation for the protection of the geological, archeological, biological, and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends upon subsistence hunting, and its availability for study, enhances the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Noatak National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Noatak National Monument on the

[3195-01-C]

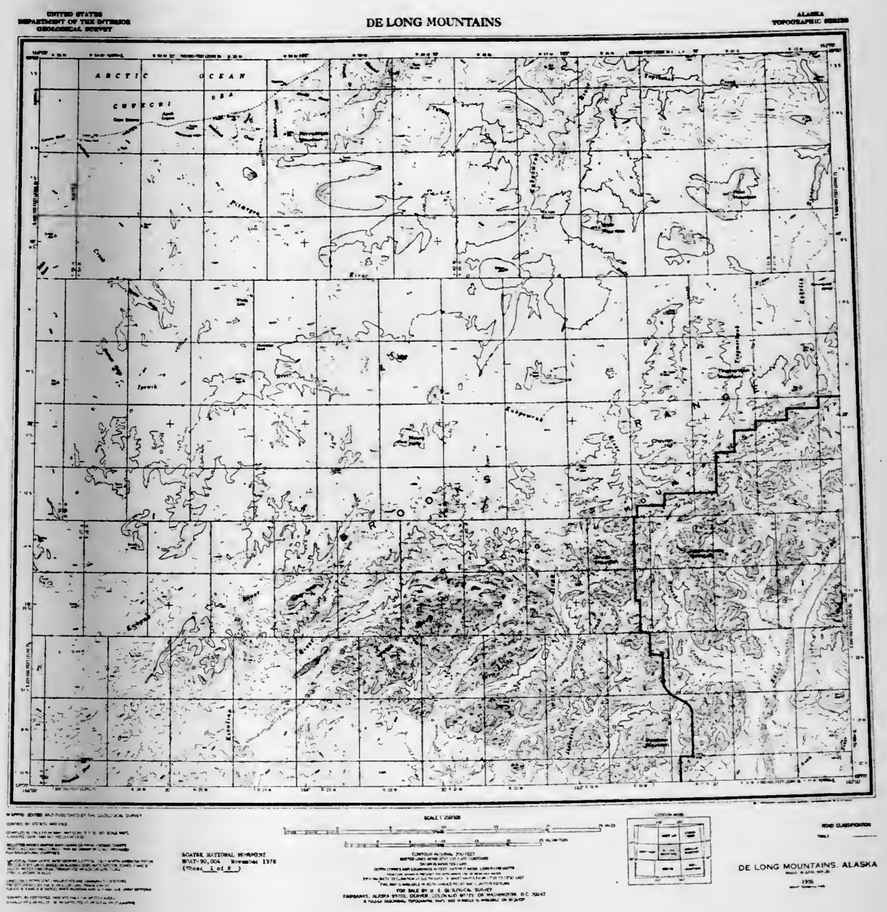
V 43/234 DE 5 78 UMI

map numbered NOAT-90,004 attached to and forming a part of this Proclamation. The area reserved consists of approximately 5,800,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

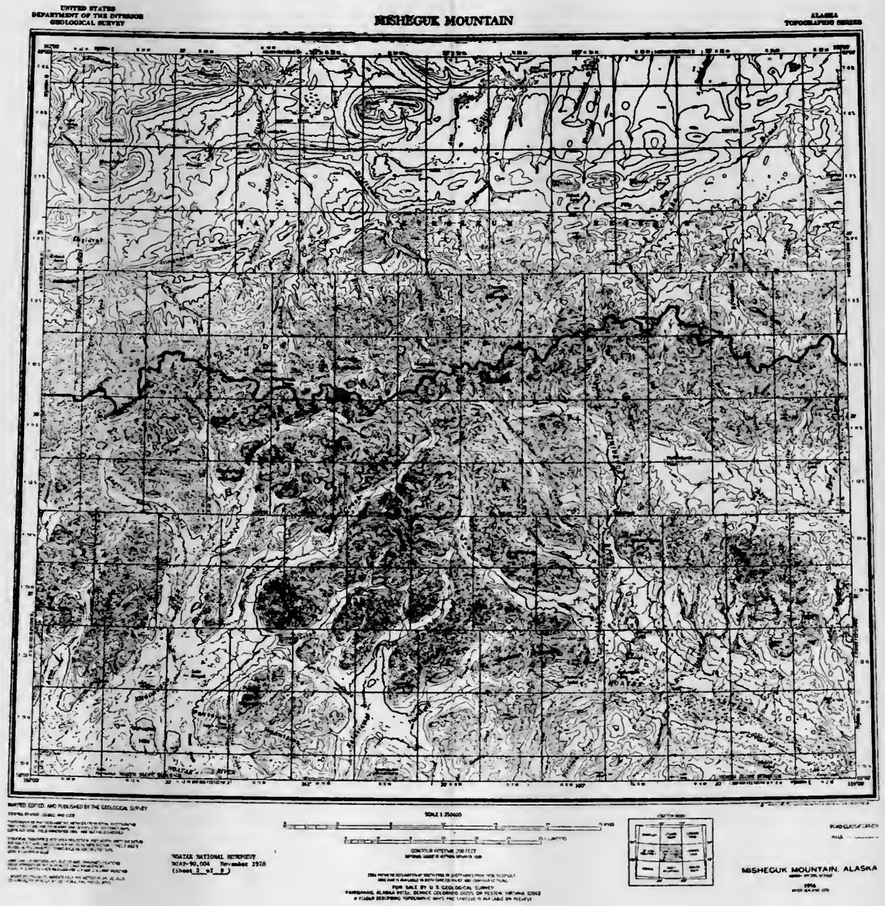
The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).



The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.



IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4625 • **December 1, 1978**

Wrangell-St. Elias National Monument

By the President of the United States of America

A Proclamation

An area of southeastern Alaska adjacent to the International Boundary with Canada contains a variety of landforms, including high mountain peaks and steep canyons, with associated geological, ecological, biological, and historical phenomena of great importance.

The area includes the greatest assemblage of mountain peaks over 14,500 feet in elevation found in the Nation, the nation's second highest mountain (Mount St. Elias, at 18,008 feet), several inactive and one active volcano (Mount Wrangell), and an active glacial complex, including some of the largest and longest glaciers in the Nation. The high mountain peaks and glaciers offer an excellent opportunity for glaciological studies. The Malaspina Glacier is listed on the National Registry of Natural Landmarks.

Thermal features in the area include the mud cones and hot springs on the western base of Mount Drum. More complete undeveloped river systems exist here than in any other land area in the Nation, with more than 1,000 miles of powerfully running, silt-laden rivers.

Biologically unique subspecies of flora and fauna have developed in the Bremner and Chitina River Valleys. As a result of their isolation by virtue of ice fields and the Copper River, these areas are virtually ecological islands in whch development of subspecies is largely unaffected by interchange with outside plant and animal species.

Wildlife populations include the largest population of wild mountain sheep in North America, moose, mountain goat, and a non-migratory population of caribou. The area is the only part of Alaska where four of the five identifiable forms of bear occur, including the interior grizzly, the coastal brown bear, the black bear, and the rare, blue-color phase of the black bear called glacier bear. Along the coast of the Gulf of Alaska bald eagles and a large and varied shorebird population occur.

Cultural development within the area is of interest to archeologists and historians. Three major culture areas converge here, each with distinctive cultural patterns: the North Athapascans, the Pacific Eskimo, and the Chugach. Mining history is evidenced by the Kennecott Copper Works, a National Historic Landmark.

The land withdrawn and reserved by this Proclamation for the protection of the geological, archeological, biological, and other phenomena enumerated above supports now, as it has in the past, a unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhances the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of

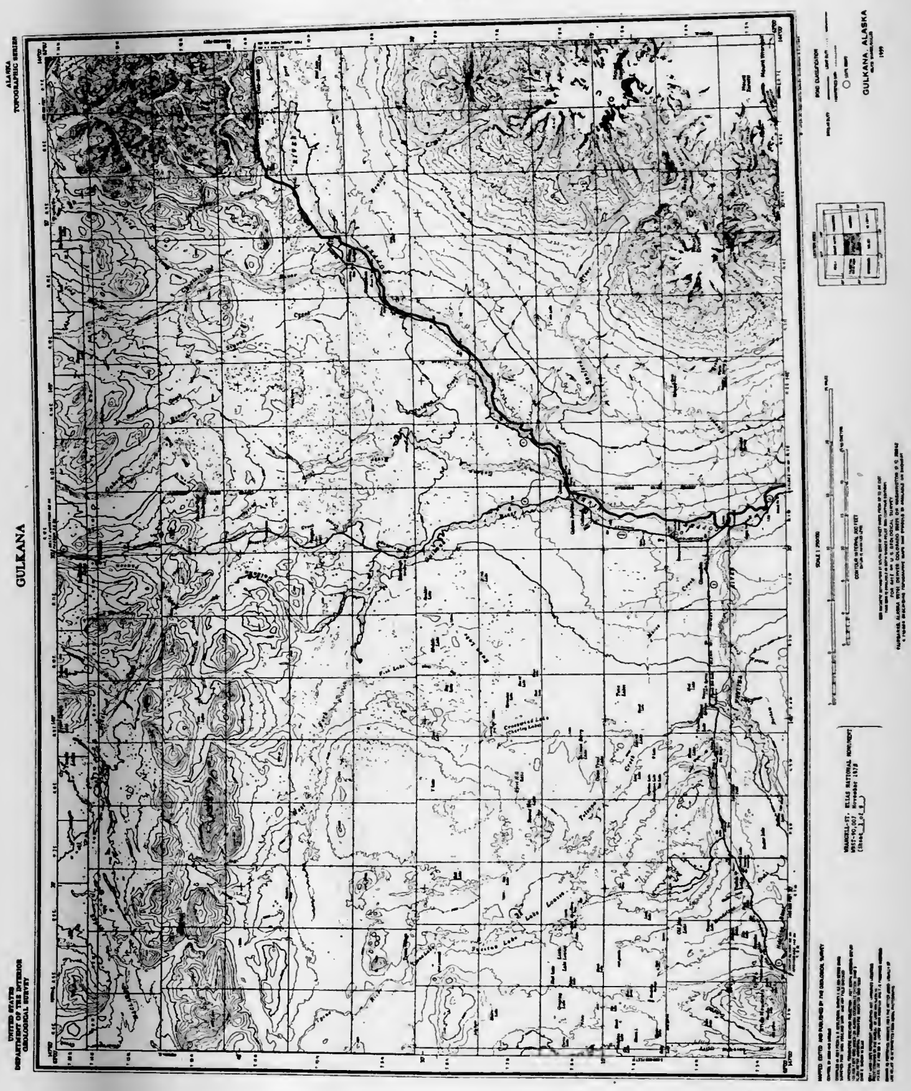
V 43/234 DEC 5 78 UMI

historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Wrangell-St. Elias National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Wrangell-St. Elias National Monument on the map numbered WRST-90,007 attached to and forming a part of this Proclamation. The area reserved consists of approximately 10,950,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the pubic land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

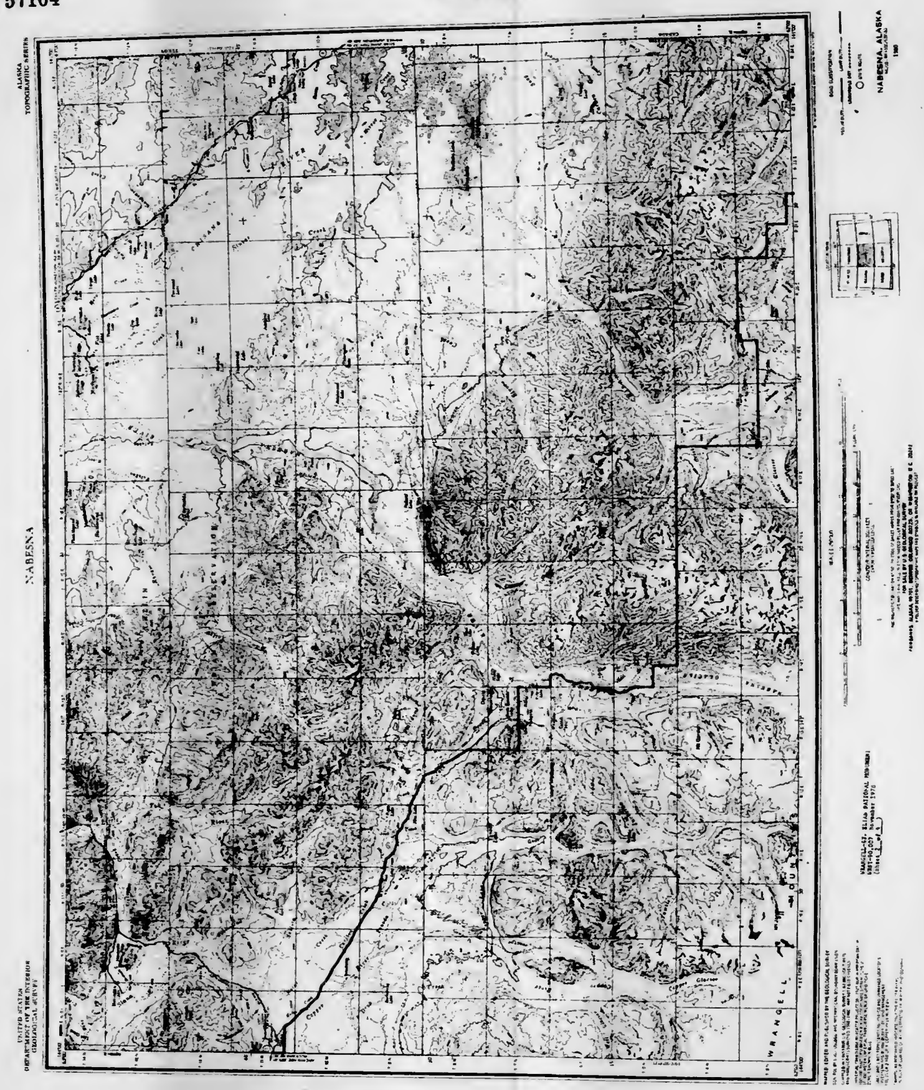
The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).



Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.



IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4626 • **December 1, 1978**

Yukon-Charley National Monument

By the President of the United States of America

A Proclamation

The Yukon-Charley National Monument, an area in east-central Alaska, includes a combination of historic and scientific features of great significance. The Upper Yukon River basin contains historic remains of early mining activity, and includes outstanding paleontological resources and ecologically diverse natural resources, offering many opportunities for scientific and historic study and research.

The area provides breeding habitat for the endangered peregrine falcon, and may produce about one-fourth of the know individuals of the *anatum peregrine* subspecies in its northern habitat. Wildlife also include isolated wild populations of Dall sheep, moose, bear, wolf, and other large mammals. Nearly 200 species of birds, including 20 different raptors, are present in the area.

Geological and paleontological features within the area are exceptional, including a nearly unbroken visible series of rock strata representing a range in geologic time from pre-Cambrian to Recent. The oldest exposures contain fossils estimated to be 700 million years old, including the earliest forms of animal life. A large array of Ice Age fossils occurs in the area.

Within the area is the Charley River basin, parts of which were unglaciated, preserving relict Pleistocene plant communities. The Charley River is considered to be one of the cleanest and clearest of the major rivers in Alaska, and thereby offers excellent opportunities for scientific studies. In the upper Charley River basin, artifacts occur dating back possibly 11,000 years, attesting to the presence of ancient hunters who were the ancestors of the modern Athapascan people.

The land withdrawn and reserved by this Proclamation for the protection of the historical, archeological, biological, geological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for the local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of

[3195-01-C]

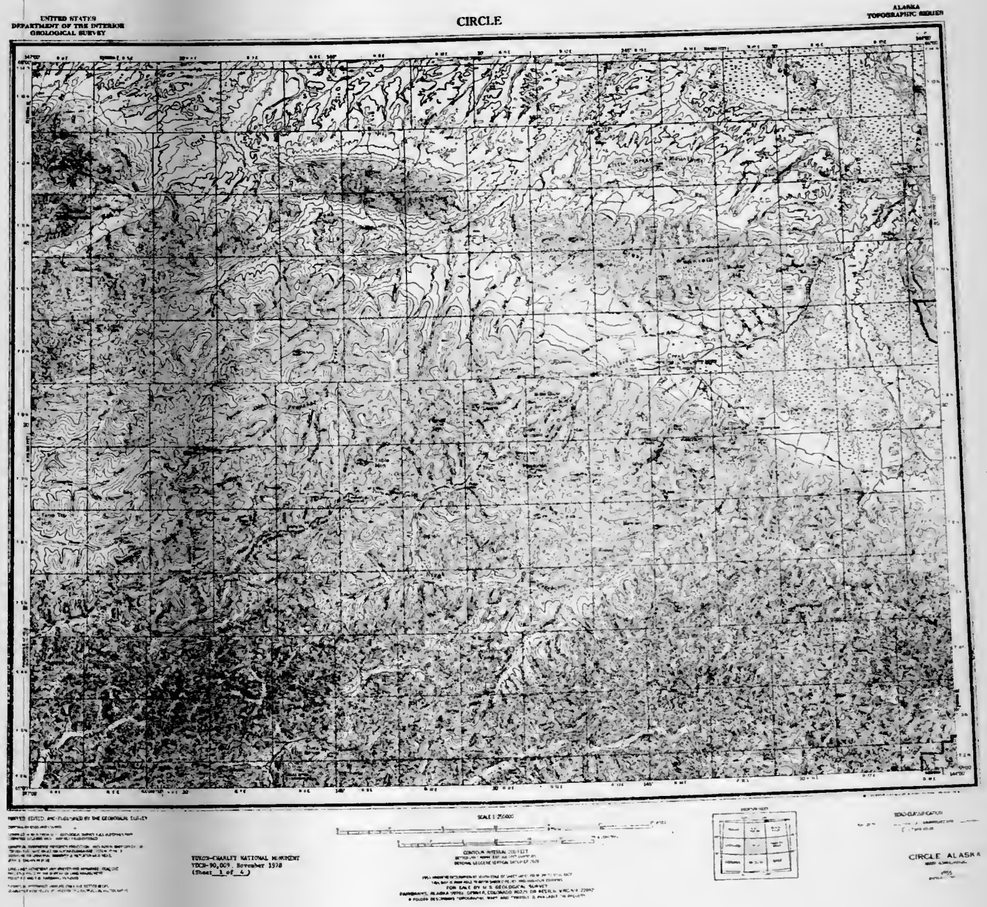
V 4 3 / 2 3 4 D E 5 7 8 UMI

June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Yukon-Charley National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as the Yukon-Charley National Monument on the map numbered YUCH-90,009 attached to and forming a part of this Proclamation. The area reserved consists of approximately 1,720,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisistion of title thereto by the United States.

All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

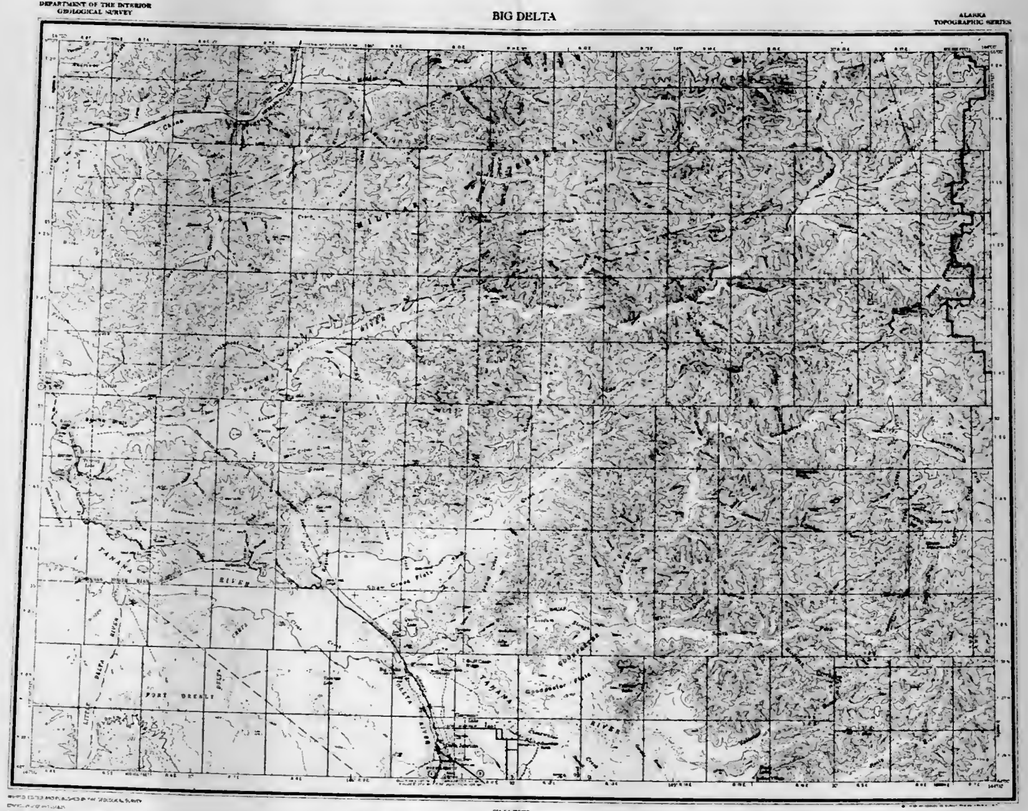
The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act (43 U.S.C. 1616(d)(1)); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).



The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close the national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.



IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

Proclamation 4627 • **December 1, 1978**

Yukon Flats National Monument

By the President of the United States of America

A Proclamation

The Yukon Flats National Monument exemplifies the largest and most complete example of an interior Alaskan solar basin with its associated ecosystem. The mountain-ringed Yukon Flats basin straddles the Arctic Circle and is bisected by the Yukon River.

The physiography of this basin, coupled with the continuous sunlight of the summer months, results in a climatological phenomenon in the basin of warmer summer temperatures and less cloudiness, precipitation and wind than in surrounding areas. These factors produce a lush wetland area which makes the Yukon Flats basin one of North America's most productive wildlife habitats. The pristine ecological nature of the Yukon Flats offers an excellent opportunity for study of the factors contributing to the immense productivity of the solar basin areas.

The Yukon Flats contributes significant populations of several species of waterfowl to all four of the continent's flyways, including 10–25 percent of the North American breeding population of canvasback ducks. This area is also significant for its capacity to provide nesting for ducks displaced from Canadian pothole provinces in drought years. The productivity, migration flows and key habitat for particular species offer abundant scientific research possibilities.

Additionally, the area produces a unique race of salmon which migrate over 2,000 miles from the sea to spawn. This genetic capability is unknown elsewhere.

From prehistoric times, the area's rich populations of furbearers have attracted humans to the area. The establishment of Fort Yukon, the first English speaking settlement in Alaska, was directly related to the Hudson Bay Company's fur trade. The area's preservation offers to the scientist the opportunity to investigate the life and society of the peoples which utilized these resources.

The land withdrawn and reserved by this Proclamation for the protection of the geological, historical, biological and other phenomena enumerated above supports now, as it has in the past, the unique subsistence culture of the local residents. The continued existence of this culture, which depends on subsistence hunting, and its availability for study, enhance the historic and scientific values of the natural objects protected herein because of the ongoing interaction of the subsistence culture with those objects. Accordingly, the opportunity for the local residents to engage in subsistence hunting is a value to be protected and will continue under the administration of the monument.

Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments, and to reserve as part thereof parcels of land, the limits of which in all cases

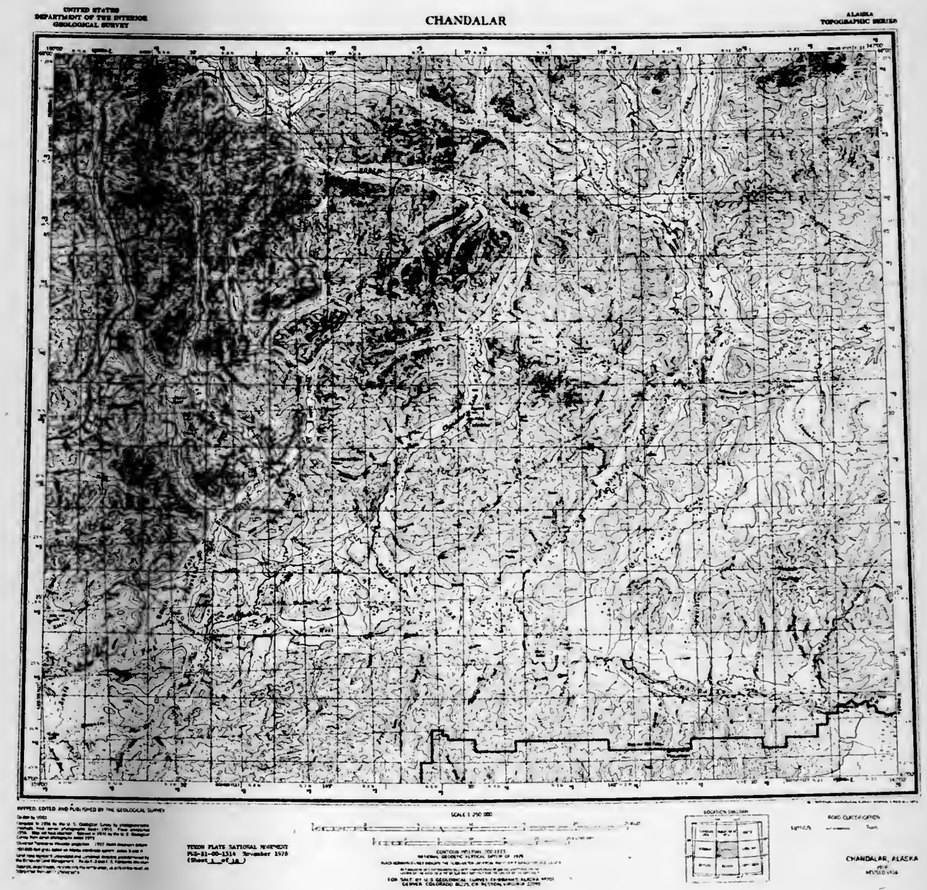
V 43/234 DUE 5 7 8 UMI

shall be confined to the smallest area compatible with the proper care and management of the objects to be protected.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act of June 8, 1906 (34 Stat. 225, 16 U.S.C. 431), do proclaim that there are hereby set apart and reserved as the Yukon Flats National Monument all lands, including submerged lands, and waters owned or controlled by the United States within the boundaries of the area depicted as Yukon Flats National Monument on the map numbered FWS-81-00-1514 attached to and forming a part of this Proclamation. The area reserved consists of approximately 10,600,000 acres, and is the smallest area compatible with the proper care and management of the objects to be protected. Lands, including submerged lands, and waters within these boundaries not owned by the United States shall be reserved as a part of the monument upon acquisition of title thereto by the United States.

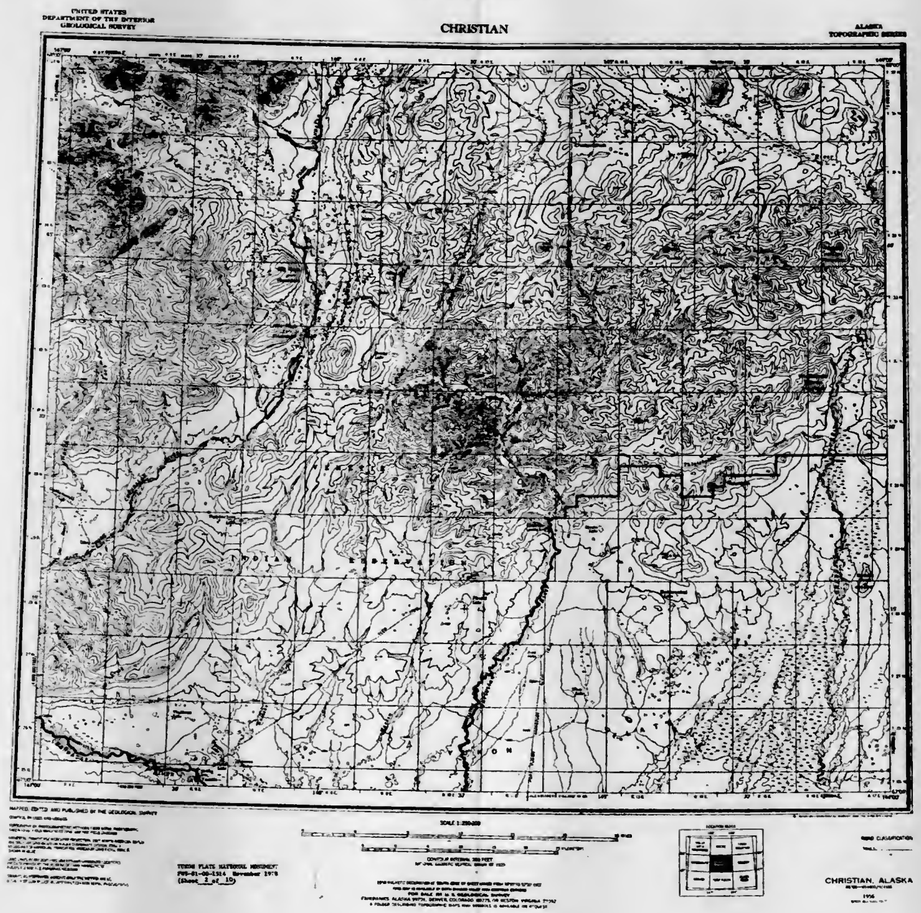
All lands, including submerged lands, and all waters within the boundaries of this monument are hereby appropriated and withdrawn from entry, location, selection, sale or other disposition under the public land laws, other than exchange. There is also reserved all water necessary to the proper care and management of those objects protected by this monument and for the proper administration of the monument in accordance with applicable laws.

The establishment of this monument is subject to valid existing rights, including, but not limited to, valid selections under the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601 *et seq.*), and under or confirmed in the Alaska Statehood Act (48 U.S.C. Note preceding Section 21).

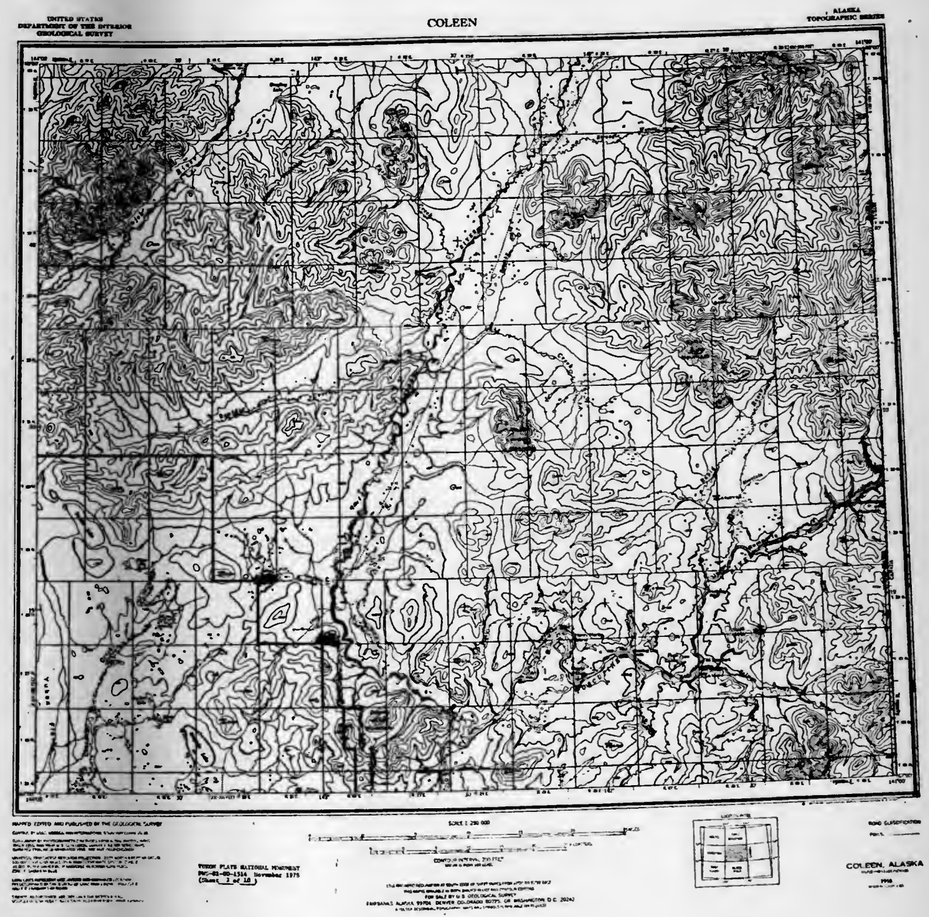


Nothing in this Proclamation shall be deemed to revoke any existing withdrawal, reservation or appropriation, including any public land order effecting a withdrawal under Section 17(d)(1) of the Alaska Native Claims Settlement Act, 43 U.S.C. 1616(d)(1); however, the national monument shall be the dominant reservation. Nothing in this Proclamation is intended to modify or revoke the terms of the Memorandum of Understanding dated September 1, 1972, entered into between the State of Alaska and the United States as part of the negotiated settlement of *Alaska v. Morton,* Civil No. A-48-72 (D. Alaska, Complaint filed April 10, 1972).

The Secretary of the Interior shall promulgate such regulations as are appropriate, including regulation of sport hunting, and of the opportunity to engage in a subsistence lifestyle by local residents. The Secretary may close this national monument, or any portion thereof, to subsistence uses of a particular fish, wildlife or plant population or to sport hunting of a particular fish or wildlife population if necessary for reasons of public safety, administration, or to ensure the natural stability or continued viability of such population.



Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy or remove any feature of this monument and not to locate or settle upon any of the lands thereof.



IN WITNESS WHEREOF, I have hereunto set my hand this 1st day of December, in the year of our Lord nineteen hundred and seventy-eight, and of the Independence of the United States of America the two hundred and third.

[AA-23139]

ALASKA

Notice of Proposed Withdrawal of Lands

On November 28, 1978, the U.S. Department of Agriculture filed an application, Serial No. AA-23139, which was corrected by letter of December 1, 1978, for the withdrawal of the lands described below from location and entry under the general mining laws, 30 U.S.C., Ch. 2., and from selection, location, and entry under section 6 of the Alaska Statehood Act, 72 Stat. 339, subject to valid existing rights:

ALASKA

CHUGACH NATIONAL FOREST AND ADJACENT PUBLIC LANDS

COLLEGE FIORD-PRINCE WILLIAM SOUND-NELLIE JUAN AREA

Seward Meridian, Alaska

T. 1 N., Rs. 1 through 7 E.,
T. 1 N., Rs. 8 and 9 E., all land except Evans Island,
T. 1 N., R. 10 E.,
T. 2 N., Rs. 1 through 10 E.,
T. 3 N., Rs. 1 through 11 E.,
T. 4 N., Rs. 1 through 12 E.,
T. 5 N., Rs. 1 through 12 E.,
T. 6 N., Rs. 1 through 12 E.,
T. 7 N., Rs. 1 through 12 E.,
T. 8 N., Rs. 1 through 12 E.,
T. 9 N., Rs. 1 through 12 E.,
T. 10 N., R. 2 E., all lands within National Forest Boundary
T. 10 N., Rs. 3 through 12 E.,
T. 11 N., Rs. 2 through 4 E., all lands within National Forest Boundary.
T. 11 N., Rs. 5 through 12 E.,
T. 12 N., Rs. 5 through 7 E., all land south and east of the hydrographic divide,
T. 12 N., Rs. 8 through 12 E.,
T. 13 N., Rs. 7 and 8 E., all land south and east of the hydrographic divide,
T. 13 N., Rs. 9 through 12 E.,
T. 14 N., Rs. 8 and 9 E., all land south and east of the hydrographic divide,
T. 14 N., Rs. 10 through 12 E.,
T. 15 N., R. 9 E., all land south and east of the hydrographic divide,
T. 15 N., Rs. 10 through 12 E.,
T. 16 N., Rs. 9 and 12 E., all land south and east of the hydrographic divide,
T. 17 N., R. 12 E., all land south and east of the hydrographic divide,
T. 1 N., Rs. 1 and 2 W., all land within National Forest boundary
T. 2 N., R. 1 W.,
T. 2 N., R. 2 W., all land within National Forest Boundary
T. 3 N., Rs. 1 and 2 W.,
T. 3 N., Rs. 3 and 4 W., all land within National Forest boundary,
T. 4 N., Rs. 1 through 3 W.,
T. 4 N., R. 4 W., all land within National Forest boundary,
T. 5 N., Rs. 1 through 3 W.,
T. 5 N., R. 4 W., all land within National Forest boundary,
T. 6 N., Rs. 1 through 3 W.,
T. 6 N., R. 4 W., all land within National Forest boundary,
T. 7 N., Rs. 1 through 3 W.,
T. 7 N., R. 4 W., all land within National Forest boundary,
T. 8 N., Rs. 1 through 3 W.,
T. 8 N., R. 4 W., all land within National Forest boundary,
T. 9 N., R. 1 W., all land within National Forest boundary,
T. 9 N., Rs. 2 and 3 W.,
T. 9 N., R. 4 W., all land within National Forest boundary,
T. 10 N., Rs. 1 through 4 W. all land within National Forest boundary.
T. 1 S., Rs. 1 and 2 E., all land east of the Resurrection Peninsula hydgrographic divide, and all lands within National Forest Boundary,
T. 1 S., Rs. 3 through 7 E.,
T. 1 S., R. 8 E., all land on Bainbridge Island,
T. 2 S., R. 1 E., all lands east of the Resurrection Peninsula hydrographic divide,
T. 2 S., Rs. 2 through 6 E.,
T. 2 S., Rs. 7 and 8 E., all lands except Evans and Latouche Islands,
T. 3 S., R. 1 E., all lands east of the Resurrection Peninsula hydrographic divide,
T. S. 3., Rs. 2 through 7 E.,
T. S. 3., R. 8 E., all lands on Elrinston Island,
T. 4 S., R. 1 E.,

Copper River Meridian

T. 4 S., Rs. 10 and 11 W., all lands south and west of the hydrographic divide,
T. 5 S., Rs. 8 through 11 W., all lands south of the hydrographic divide,
T. 6 S., Rs. 7 and 8 W., all lands south and west of the hydrographic divide,
T. 6 S., R. 9 through 11 W.,
T. 7 S., Rs. 7 and 8 W., all land north and west of the hydrographic divide,
T. 7 S., Rs. 9 through 11 W.,
T. 8 S., R. 8 W., all land north and west of the hydrographic divide,
T. 8 S., Rs. 9 through 11 W.,
T. 9 S., R. 8 W., all land north and west of the hydrographic divide between Anderson and West Brook Glaciers,
T. 9 S., R. 9 W., all land north and west of the hydrographic divide,
T. 9 S., Rs. 10 and 11 W.,
T. 10 S., R. 9 W., all land west of the hydrographic divide,
T. 10 W., Rs., 10 and 11 W.,
T. 11 S., R. 10W., all land north and west of the hydrographic divide running through Mt. Freemantle,
T. 11 S., Rs. 10 and 11 W.,
T. 12 S., R. 11 W.

TONGASS NATIONAL FOREST AND ADJACENT PUBLIC LANDS

ETOLIN ISLAND AREA

Copper River Meridian

T. 66 S., R. 84 E., all land in the McHenry Inlet drainage,
T. 66 S., R. 85 E., all land south of the hydrographic divide south of Olive Cove and the head of Menefee Inlet and West of Menefee Inlet,
T. 67 S., R. 84 through 85 E., all lands south and east of the hydrographic divide between Burnett Inlet and McHenry Inlet,
T. 67 S., R. 85 E., all lands south and west of menefee Inlet and Canoe Passage,
T. 67 S., R. 86 E., all lands west of Ernest Sound and south of Menefee Inlet except the Niblack Islands,
T. 68 S., Rs. 84 and 85 E.,
T. 68 S., R. 86 E., all land west of Ernest Sound, excluding Deer Island and its associated islands,
T. 69 S., Rs. 85 and 86 E.,

STIKINE-LECONTE

Copper River Meridian

T. 55 S., R. 82 E., all land east of a protracted line drawn between Devils Thumb on the international divide and the point of intersection of the National forest boundary and the south boundary of T. 56 S., R. 82 E.,
T. 55 S., Rs. 83 and 84 E.,
T. 56 S., R. 82 E., all land east of a protracted line drawn between Devils Thumb on the international boundary and the point of the intersection of the National Forest boundary and the south boundary of this township,
T. 56 S., Rs. 83 and 84 E.,
T. 57 S., R. 82 E., E½
T. 57 S., R. 83 through 85 E.,
T. 58 S., R. 80 E., all land south of the hydrographic divide excluding McDonald Island and Mitkof Island as shown
T. 58 S., R. 81 E., all land south of the hydrographic divide
T. 58 S., R. 82 E., all land south and east of the hydrographic divide
T. 58 S., Rs. 83 through 86 E.,
T. 59 S., R. 81 E., all land excluding Mitkof Island
T. 59 S., Rs. 82 through 86 E.,
T. 60 S., R. 81 E., all land on Pocket Island
T. 60 S., Rs. 82 through 86 E.,
T. 60 S., R. 83 E., all land Kadin Island and Rynda Island
T. 61 S., Rs. 84 and 85 E., all land north of the hydrographic divide
T. 61 S., R. 86 E.,
T. 61 S., R. 87 E., all land west of the hydrographic divide
T. 62 S., R. 86 E., N¼
T. 62 S., R. 87 E., NW¼NE¼, N½NW¼

KEKU STRAIT (ROCKY PASS) AREA

Copper River Meridian

T. 57 S., R. 73 E., all land on Hamilton Pt., including unnamed island northwest of Hamilton Island.
T. 58 S., R. 73 E., all land in the NE¼, and in the SE¼ that land east of the ridgeline shown on U.S.G.S. map Petersburg, Alaska-Canada, 1960.
T. 58 S., R. 74 E., all land above mean high tide, south of the hydrographic boundary shown on U.S.G.S. map Petersburg, Alaska-Canada, 1960.
T. 58 S., R. 75 E., all land above mean high tide in the W½NW¼. NW¼SW¼, S½, SW¼.
T. 59 S., R. 73 E., 1 east of the hydrographic boundary shown on U.S.G.S. map Petersburg, Alaska-Canada, 1960.
T. 59 S., R. 74 E., all land above mean high tide.
T. 59 S., R. 75 E., all land west of the hydrographic boundary shown on U.S.G.S. map Petersburg, Alaska-Canada, 1960.
T. 60 S., R. 73 E., all land east of the hydrographic boundary, shown on U.S.G.S. map Petersburg, Alaska-Canada, 1960.
T. 60 S., R. 74 E., all land above mean high tide, north and east of the hydrographic boundary shown on U.S.G.S. map Petersburg, Alaska-Canada, 1960.
T. 60 S., R. 75 E., W½NW¼. SW¼.
T. 61 S., R. 75 E., all land above mean high tide east and north of the hydrographic boundary, excluding Monte Carlo Island shown on U.S.G.S. map Petersburg, Alaska-Canada, 1960.
T. 61 S., R. 76 E., W½, NW¼.

TEBENKOF BAY AREA

Copper River Meridian

T. 61 S., R. 71 E., all land south of a line beginning at Pt. Ellis; thence northeasterly to a point on the east line of T. 61 S., R. 71 E., approximately half way between Bay of Pillars and Tebenkof Bay,
T. 61 S., R. 72 E., all land south of a line beginning at a point on the west line of T. 61 S., R. 72 E., approximately half way between Bay of Pillars and Tebenkof Bay; thence southeasterly; thence easterly along the hydrographic boundary to a point half way along the west line of T. 61 S., R. 72 E.,
T. 61 S., R. 73 E., all land south of the hydrographic divide beginning approximately half way along the west line of T. 61 S., R. 73 E.; thence northeasterly; thence southeasterly; thence southerly to a point on the south line of T. 61 S., R. 73 E., approximately one mile east of Alecks Lake,
T. 63 S., Rs. 71 and 72 E.,
T. 63 S., R. 73 E., all land west of a line beginning at a point on the north line of T. 63 S., R. 73 E., approximately two and one half miles west of the east line of T. 63 S., R. 73 E.; thence southeasterly to the head of a drainage draining into Reid Bay; thence southwesterly to a point on the south line of T. 63 S., R. 73 E.,
T. 64 S., R. 71 E., all land north of a line beginning at the intersection of saltwater and the north line of T. 64 S., R. 71 E., thence southeasterly along the hydrographic divide to Green Mountain; thence easterly along said boundary to the west line of T. 64 S., R. 72 E.,
T. 64 S., Rs. 72 and 73 E., all land north of a line beginning at Green Mtn.; thence easterly along the hydrographic divide to a point on the east line of T. 64 S., R. 72 E., approximately one and one quarter miles south of the north line of T. 64 S., R. 72 E.

ADMIRALTY ISLAND AREA

Copper River Meridian

T. 40 S., R. 63 E., all land east of Lynn Canal
T. 40 S., R. 63 E., all land southwest of Sagi-naw Channel
T. 41 S., R. 64 E.,
T. 41 S., R. 65 E., all land southwest of Stevens Passage including Colt Island
T. 42 S., Rs. 64 and 65 E.,
T. 42 S., R. 66 E., all land on the south side of Stevens Passage including small island adjacent to Admiralty Cove.
T. 42 S., R. 67 E., all land on the south side of Stevens Passage
T. 43 S., Rs. 65 through 68 E.,
T. 43 S., R. 69 E., all land on the west side of Stevens Passage including Grand Island
T. 44 S., Rs. 65 through 68 E.,
T. 44 S., R. 69 E., all land on the west side of Stevens Passage including Grand Island
T. 45 S., Rs. 66 through 70 E.,
T. 46 S., Rs. 66 through 71 E.,
T. 47 S., Rs. 66 through 71 E.,
T. 48 S., Rs. 66 through 71 E.,

T. 49 S., Rs. 71 and 72 E.,
T. 50 S., Rs. 67 through 72 E.,
T. 51 S., Rs. 67 through 72 E.,
T. 52 S., Rs. 68 through 72 E.,
T. 53 S., Rs. 68 through 72 E.,
T. 54 S., Rs. 68 through 71 E.,
T. 55 S., Rs. 68 through 70 E.,
T. 56 S., Rs. 68 and 69 E.,

KARTA AREA

Copper River Meridian

T. 72 S., R. 82 E., all land south of the hydrographic divide beginning at a point on the south line of T. 72 S., R. 82 E., approximately two and one half miles east of the west line of T. 72 S., R. 82 E., thence northeasterly along the hydrographic divide to a point on the east line of T. 72 E., R. 82 E., approximately three miles south of the north line of T. 72 E., R. 82 E.,
T. 72 S., Rs. 83 and 84 E., all land south of the hydrographic divide south of Paul Young Creek,
T. 73 S., R. 82 E., all land east of the hydrographic divide dividing the Black Bear Lake watershed,
T. 73 S., R. 83 E., all land north of the hydrographic divide excluding the Aaris River and Maybeso Creek drainages,
T. 73 S., R. 84 E., all land north of the hydrographic divide including the McGilvery Creek, Salmon Lake, Flagstaff Creek and Sandy Point drainages,
T. 73 S., R. 85 E., all land west of Kasaan Bay.

WEST CHICHAGOF-YAKOBI

Copper River Meridian

T. 43 S., R. 54 S.,
T. 43 S., R. 55 E., All land of Yakobi Island.
T. 44 S., R. 54 E.,
T. 44 S., R. 55 E., All land south and west of the center line of Lisianski Inlet.
T. 45 S., R. 56 E., All land south and west of the center line of Lisianski Inlet.
T. 46 S., R. 55 and 56 E.,
T. 46 S., R. 57 E., All land south and west of the center line of Lisianski Inlet.
T. 46 S., R. 58 E., All lands south of the hydrographic divide north of Lisianski River,
T. 46 S., R. 59 E., All land south and west of hydrographic divide running across the SW¼,
T. 47 S., Rs. 55 through 58 E.,
T. 47 S., R. 59 E., All land south and west of the hydrographic divide running diagonally across the NE¼,
T. 47 S., R. 60 E., All land south and west of the hydrographic divide that runs diagonally across the SW¼ down the ridgeline terminating in the north Arm of Peril Strait 48.
T. 48 S., Rs. 56 through 59 E.,
T. 48 S., R. 60 E., All land south and west of the line through the center of the North Arm of Peril Strait.
T. 48 S., R. 61 E., All land south and west of a line through the center of the Arm of Peril Strait.
T. 49 S., Rs. 57 through 61 E.,
T. 49 S., R. 62 E., all land south of a line through the center of Peril Strait.
T. 50 S., Rs. 58 through 80 E.,
T. 50 S., R. 61 E., All land on Chichagof.
T. 50 S., R. 62 E., land known as Hoggatt reefs, Hoggatt Island, and Ford Rock.
T. 51 S., R. 59 and 60 E.,
T. 51 S., R. 61 E., All land north and west through center line of Peril Strait.
T. 52 S., R. 60 E., All land of the line through the center of Salisbury Sound and Kakul Narrows.
T. 52 S., R. 61 E., All land north and west of the line through the center of Kahul Narrows and Peril Strait

ENDICOTT

Copper River Meridian

T. 34 S., Rs. 59 and 60 E., all land east of Glacier Bay National Monument in the Endicott River drainage,
T. 35 S., Rs. 58 through 61 E., all land east of Glacier Bay National Monument in the Endicott River drainage,
T. 36 S., Rs. 58 through 61 E., all land east of Glacier Bay National Monument in the Endicott River drainage,
T. 37 S., R. 60 E., all land east of Glacier Bay National Monument in the Endicott River drainage.

IDAHO INLET—MUD BAY

Copper River Meridian

T. 42 S., R. 56 E., All land in the S½ that lies east of the hydrographic divide that runs immediately west of For Creek
T. 42 S., R. 57 and 58 E., All land S½.
T. 42 S., R. 59 E., All land south and east of hydrographic divide that runs along the ridge just west of the headwaters of Chicken Creek,
T. 43 S., R. 56 E., All land east of the hydrographic divide on the ridgeline of Indian Peninsula
T. 43 S., R. 57 E., All.
T. 43 S., R. 58 E., All land in N½, SW¼, N½SE¼, SW¼SE¼.
T. 43 S., R. 59 E., All land west of hydrographic divide that runs along the ridge west of Chicken Creek
T. 44 S., R. 56 E., All land east of hydrographic divide
T. 44 S., R. 57 E.,
T. 44 S., R. 58 All land west of hydrographic divide
T. 45 S., R. 58 E., All land north of hydrographic divide through Pegmatite Mt.
T. 45 S., R. 57 E., All land north and east of hydrographic divide that cuts diagonally across the NE¼

TRACY ARM-FIORDS TERROR

Copper River Meridian

T. 44 S., Rs. 73 through 75 E., all lands in the Tracy Arm drainage,
T. 45 S., R. 73 and 74 E., all lands south and east of the hydrographic divide north of Tracy Arm,
T. 45 S., Rs. 75 through 77 E.,
T. 46 S., R. 72 E., all land east of the hydrographic divide between Williams Cove and Gilbert Bay drainages and between Williams Cove and Stevens Passage drainages,
T. 46 S., R. 73 E., all land south and east of the hydrographic divide between Tracy Arm and Gilbert Bay drainages,
T. 46 S., Rs. 74 through 77 E.,
T. 47 S., R. 72 E., all lands in the Tracy Arm drainage,
T. 47 S., R. 73 E., all lands except those west of the hydrographic divide on the Snettisham Peninsula,
T. 47 S., Rs. 74 through 78 E.,
T. 48 S., R. 73 E., all land north and east of the hydrographic divide draining into Holkham Bay and Endicott Arm,
T. 48 S., Rs. 74 through 78 E.,

T. 49 S., Rs. 74 through 76 E., all land north
T. 29 S., R. 37 E., all land east and south of
T. 63 S., Rs. 93 and 94 E.,

and Mesa Lake thence east along the trail
withdrawal must submit a written re-
quest to be heard to the Alaska State

V 43/234 DE 5 78 UMI

T. 49 S., Rs. 74 through 76 E., all land north and east of the hydrographic divide
T. 49 S., R. 77 through 80 E.,
T. 50 S., Rs. 76 and 77 E., all land north and east of the hydrographic divide
T. 50 S., Rs. 78 through 80 E.,
T. 51 S., Rs. 77 and 78 E., all land north of the hydrographic divide south of Endicott Arm,
T. 51 S., R. 79 E., all land north and east of the hydrographic divide
T. 51 S., Rs. 80 and 81 E.,
T. 52 S., R. 78 E., all land north and east of the hydrographic divide
T. 52 S., R. 79 through 81 E., all land north and east of the hydrographic divide

CORONATION ISLAND-WARREN ISLAND-MAURILLE ISLAND

Copper River Meridian

T. 68 S., Rs. 72 through 75 E.,
T. 70 S., Rs. 72 through 75 E.,
T. 71 S., R. 76 E., all land except Gull Island and Emerald Island.
T. 71 S., R. 77 E., all land except Heceta Island.
T. 72 S., R. 76 E., all land above mean high tide except St. Joseph Island.
T. 72 S., R. 77 E.,

RUSSELL FIORD-YAKUTAT FORELANDS AREA

Copper River Meridian

T. 22 S., R. 34 E., E½ SE¼
T. 22 S., R. 35 E., S½
T. 22 S., R. 36 E., S½
T. 22 S., R. 37 E., SW¼, all land in SE¼ southwest of the hydrographic divide
T. 23 S., R. 34 E., all land south and east of Disenchantment Bay
T. 23 S., Rs. 35 and 36 E.,
T. 23 S., R. 37 E., all land south and west of the hydrographic divide
T. 23 S., R. 38 E., All land south and west of the hydrographic divide
T. 24 S., Rs. 34 through 37 E.,
T. 24 S., R. 38 E., all land N½NE¼, SE¼ NE¼, NW¼, S½
T. 24 S., R. 39 E., W½ SW¼
T. 25 S., Rs. 34 through 36 E.,
T. 25 S., R. 37 E., W½
T. 25 S., R. 38 E., N½.
T. 25 S., R. 39 E., N½ NW¼
T. 26 S., Rs. 34 through 37 E.,
T. 26 S., R. 38 E., SW¼NW¼, W½ SW¼.
T. 27 S., R. 35 E., all land north and east of a line that commences at the northwest corner of the Township running East along the North township line for approximately 1½ miles thence running southeasterly intersecting the Yakutat Highway approximately 1 mile west of the highway curve thence along the highway in the direction away from Yakutat to the intersection of the east township line
T. 27 S., R. 36 E., all land north and east of Yakutat Highway
T. 27 S., R. 37 E.,
T. 27 S., R. 38 E., all land west and south of a line running southerly from the north township line along the forest divide through Crescent Mt. thence southeasterly along the hydrographic divide to the south township line
T. 28 S., Rs. 36 and 37 E., all land north and east of Yakutat Highway.
T. 28 S., R. 38 E.,
T. 28 S., R. 39 E., W½
T. 29 S., R. 36 E., all land east of the west bank of Dangerous River
T. 29 S., R. 37 E., all land east and south of a line running from the intersection of the west township line and the west bank of Dangerous River northeasterly along the river bank to an unnamed intersecting river thence northeasterly along the centerline of the unnamed river to its intersection near the northeast township corner
T. 29 S., Rs. 38 and 39 E.,
T. 29 S., R. 40 E., S½
T. 29 S., R. 41 E., SW¼SW¼
T. 30 S., R. 36 E., all land east of the most northwesterly outlet of Dangerous River
T. 30 S., Rs. 37 through 41 E.,
T. 30 S., R. 42 E., all land south and west of the hydrographic divide
T. 31 S., Rs. 38 through 42 E.,
T. 31 S., R. 43 E., SW¼NW¼, SW¼.
T. 32 S., R. 40 E., all land on the north side of Dry Bay
T. 32 S., R. 41 E., all land on the north side of Dry Bay, and NE¼NE¼
T. 32 S.,R. 42 E., a one-mile-wide strip along the north boundary of the township.
T. 32 S., R. 43 E., NW¼NW¼.

SOUTH PRINCE OF WALES AREA

Copper River Meridian

T. 78 S., R. 85 E., all land east of the hydrographic divide between Nutkwa and Keete Inlets and Klakas Inlet.
T. 78 S., R. 86 R., all land west of the hydrographic divide between Klakas Inlet and Clarence Strait.
T. 79 S., R. 85 E., all land above mean high tide east of the hydrographic divide between Keete and Kassa Inlets and Klakas Inlet.
T. 79 S., R. 86 E., all land above mean high tide west of the hydrographic divide Klakas Inlet and Clarence Strait.
T. 80 S., R. 85 E., all land above mean high tide east of the hydrographic boundary between Cordova Bay and Klakas Inlet.
T. 80 S., R. 86 E., all land above mean high tide west of the hydrographic boundary between Moira Sound and Klakas Inlet.
T. 80 S., R. 87 E., section 31.
T. 81 S., R. 84 E., all land above mean high tide on the east side of Cordova Bay.
T. 81 S., R. 85 E., all land above mean high tide east of Cordova Bay.
T. 81 S., R. 86 E., all land above mean high tide west of the hydrographic divide between Cordova Bay and Clarence Strait.

T. 69 S., Rs. 92 and 93 E., all land east and north of the hydrographic divide excluding Orchard Creek drainage
T. 69 S., Rs. 94 through 97 E.,
T. 69 S., Rs. 98 and 99 E., all land west of the hydrographic divide between Soule River and Davis River drainages
T. 70 S., R. 92 E., all lands except Orchard Creek drainage
T. 70 S., R. 93 E., all land east of the hydrographic divide
T. 70 S., Rs. 94 through 98 E.,
T. 70 S., R. 99 E., all land south and west of the Seward Mountains ridge and Portland Canal opposite Round Pt. triangulation point
T. 71 S., R. 92 E., all land east of the hydrographic divide
T. 71 S., R. 93 E., all land north and east of the hydrographic divide
T. 71 S., Rs. 94 through 100 E.,
T. 72 S., R. 93 E., all land east of the hydrographic divide
T. 72 S., R. 94 through 100 E.,
T. 73 S., R. 93 E., all lands east of the hydrographic divide
T. 73 S., Rs. 94 through 101 E.,
T. 74 S., R. 93 E., all land east of the hydrographic divide
T. 74 S., R. 94 through 101 E.,
T. 75 S., R. 94 E., all land east of a line running from the northwest corner of the township to a trail between Thorne Arm and Mesa Lake thence east along the trail to southwest tip of Mesa Lake thence southerly along the hydrographic divide to approximately the midpoint of the south township line
T. 75 S., Rs. 95 through 101 E.,
T. 76 S., R. 94 E., all land east of the hydrographic divide
T. 76 S., Rs. 95 through 102 E.,
T. 77 S., R. 94 E., all land east of the hydrographic divide running southwesterly from Alava Ridge to a point on the shore between triangulation points "Luck" and "Cat"
T. 77 S., Rs. 95 through 102 E.,
T. 78 S., Rs. 95 through 101 E.,
T. 79 S., Rs. 95 through 101 E.,
T. 80 S., Rs. 96 through 100 E.,
T. 81 S., Rs. 97 through 100 E.,
T. 82 S., Rs. 97 through 99 E.,

All the foregoing described lands are above the line of mean high tide and aggregate 11,200,000 acres more or less.

The applicant desires that the lands be withdrawn for a two-year period to protect the scenic, historic, scientific, and/or primitive attributes of the area and in aid of possible legislation. The withdrawal applied for would be in additional to existing withdrawals and reservations.

On or before January 15, 1979, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to Curt McVee, State Director, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that a public hearing will be afforded in connection with the proposed withdrawal. All interested persons who desire to be heard on the proposed withdrawal must submit a written request to be heard to the Alaska State Director at the address shown above. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing.

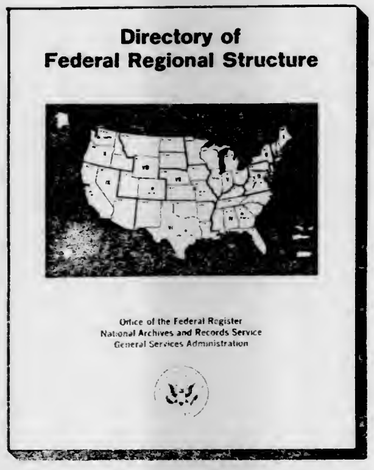
The Department's regulations at 43 C.F.R. Sec. 2351.4(c) provide, in part, that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn as requested by the applicant agency. The determination of the Secretary on the application will be published in the FEDERAL REGISTER.

For a period of 2 years from the date of publication of this notice in the FEDERAL REGISTER, the above described lands will be segregated from location, selection, and entry to the extent that the withdrawal applied for, if effected, would prevent such forms of disposal, unless the application is rejected or the withdrawal is approved prior to that date. If the withdrawal is approved, it will be for a period of 2 years, unless duly extended.

All communications in connection with this proposed withdrawal should be addressed to the Alaska State Director at the above address.

JAMES A. JOSEPH,
Under Secretary of the Interior.



DECEMBER 1, 1978.

Directory of Federal Regional Structure

[Revised as of May 1, 1978]

The Directory serves as a guide to the regional administrative structure of the departments and agencies of the Federal Government.

Designed to provide the public with practical information about regional offices, the Directory is particularly useful to citizens residing outside the Nation's Capital.

Included in the Directory is a map showing the 10 standard Federal regions followed by tables listing the key personnel, addresses, and telephone numbers for agencies with offices in those regions. In addition, maps and tables are provided for those agencies with regional structures other than that of the standard regional system.

MAIL ORDER FORM To:

Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	CSC		CSA	CSC
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

HDSO—Administration for Children, Youth, and Families Children's Bureau; Federal shares and allotment percentages, Child Welfare Services State grants 55822; 11-29-78
PHS—Health maintenance organizations; requirements for submission of applications for financial assistance 56103; 11-30-78

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[3410-02-M]

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Orange, Grapefruit, Tangerine, and Tangelo Reg. 2, Amdt. 5]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

Tangerine Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment allows each handler of Dancy variety tangerines to ship during the periods November 27 through December 3 and December 4 through December 10, 1978, a quantity of smaller size tangerines (2$^{9}/_{16}$ inches diameter) equal to 75 percent of total shipments during a specified prior period. In the absence of this amendment up to 25 percent of smaller tangerines could be shipped the week ending December 3, and only tangerines 2$^{9}/_{16}$ inches in diameter could be shipped the week ending December 10. This action will allow increases in suppies of tangerines during the periods specified in recognition of market needs and the size composition of the available crop in the interest of growers and consumers.

EFFECTIVE DATE: November 27, 1978, through December 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, (202) 447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* (1) Pursuant to the marketing agreement and Order No. 905, both as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the recommendations of the committee established under the marketing agreement and order, and upon other available information, it is found that the regulation of shipments of Florida tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The minimum size requirements, herein specified, for domestic shipments reflect the Department's appraisal of the need for the amendment of the current regulation to permit handling of smaller size fresh Florida tangerines of the designated variety during the specified period based on market needs for greater supplies of such variety. Because of the growing conditions in the production area the amount of large fruit is presently less than anticipated and there is a need to augment supplies by permitting shipment of a larger proportion of the smaller size fruit. The Dancy variety continues to size on the tree, and as the season progresses, increased quantities of such fruit is expected to meet the larger minimum size requirement. Relaxation of the minimum size requirements for a larger portion of each shipper's Dancy tangerine shipments will tend to promote the orderly marketing of Florida tangerines during the overlap period, when shipments of the Robinson variety are decreasing seasonally and Dancy are being shipped in greater volume.

The Citrus Administrative Committee, at an open meeting on November 28, 1978, reported that the amendment would allow shipment of approximately 85 additional carlots of Dancy variety tangerines during the specified period. The committee indicated there is a current market demand for larger quantities of smaller size Dancy tangerines and markets presently can absorb a larger portion of the supply of the smaller fruit. It indicated markets cannot absorb greater quantities of such smaller tangerines than the proportion recommended, without disruption of the markets.

The Department's Crop Reporting Board estimates the 1978-79 season's crop of Florida tangerines at 3.8 million boxes (approximately 7.6 million cartons). Hence, the volume of tangerines is comparable to that of last season.

The committee projected the market demand for all varieties of fresh tangerines this season, as follows: Dancy (2,500 carlots); Robinson (1,500 carlots); Honey (2,100 carlots). Each carlot is equivalent to one thousand cartons. The regulation, as amended, for Dancy tangerines relieves restrictions from those currently in effect, and amendment of such regulation, as hereinafter provided, will tend to avoid disruption of the orderly marketing of tangerines in the public interest.

It is concluded that the amendment of the size requirements, hereinafter set forth, is necessary to establish and maintain orderly marketing conditions and to provide acceptable size fruit in the interest of producers and consumers pursuant to the declared policy of the act.

(3) It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared policy of the act. Growers, handlers and other interested persons were given an opportunity to submit information and views on the amendment at an open meeting, and the amendment relieves restrictions on the handling of Florida tangerines. It is necessary to effectuate the declared purposes of the act to make the regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Accordingly, it is found that the provisions of § 905.302 (Orange, Grapefruit, Tangerine and Tangelo Regulation 2; 43 FR 43013; 52197; 53027; 54617), should be and are amended by revising paragraph (d) to read as follows:

§ 905.302 **Orange, Grapefruit, Tangerine, and Tangelo Regulation 2.**

* * * * * *

(d) *Percentage of size regulation applicable to Dancy variety tangerines.* Notwithstanding the provisions of Table I in paragraph (a) of this section, any handler may during each of the period November 27 through December 3, 1978, and December 4 through December 10, 1978, ship

[Marketing Order 905]

Dancy variety tangerines smaller than

$0.004 per standard packed box (1⅗

V 43/235 DEC 6 78 UMI

Dancy variety tangerines smaller than 2-9/16 inches in diameter: *Provided,* That such smaller tangerines are not smaller than 2-9/16 inches in diameter: *And provided further,* That the quantity of such smaller tangerines does not exceed 75 percent of the quantity shipped in the applicable prior period as determined by the procedure specified in § 905.152 (43 FR 32397) of this part.

* * * * *

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).)

Dated: December 1, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[3410-02-M]

FLORIDA CITRUS FRUITS

Expenses, Rates of Assessment, and Carryover of Unexpended Funds

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rules.

SUMMARY: These regulations authorize expenses and rates of assessment for the 1978-79 fiscal period, to be collected from handlers to support activities of the committees which locally administer Federal marketing orders covering Florida citrus fruits.

DATES: Effective August 1, 1978, through July 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, (202) 447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to Marketing Order Nos. 905, 912 and 913, each as amended (7 CFR Parts 905, 912, and 913), respectively, regulating the handling of citrus fruits grown in Florida, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by these committees, established under these marketing orders, and upon other information, it is found that the expenses and rates of assessment, as hereafter provided, will tend to effectuate the declared policy of the act.

[Marketing Order 905]

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

1. Section 905.217 of Title 7 Part 905 is revised to read as follows:

§ 905.217 Expenses, rate of assessment, and carryover of unexpended funds.

(a) Expenses that are reasonable and likely to be incurred by the Citrus Administrative Committee during fiscal period August 1, 1978, through July 31, 1979, will amount to $218,700.

(b) The rate of assessment for said period, payable by each handler in accordance with § 905.41, is fixed at $0.00275 per carton (⅘ bushel) of fruit.

(c) Unexpended funds in excess of expenses incurred during fiscal period ended July 31, 1978, shall be carried over as a reserve in accordance with § 905.42.

[Marketing Order 912]

PART 912—GRAPEFRUIT GROWN IN THE INDIAN RIVER DISTRICT IN FLORIDA

2. Section 912.218 of Title 7 Part 912 is revised to read as follows:

§ 912.218 Expenses and rate of assessment.

(a) Expenses that are reasonable and likely to be incurred by the Indian River Grapefruit Committee during fiscal period August 1, 1978, through July 31, 1979, will amount to $27,907.

(b) The rate of assessment for said period payable by each handler in accordance with § 912.41 is fixed at $0.001 per carton (⅘ bushel) of grapefruit.

[Marketing Order 913]

PART 913—GRAPEFRUIT GROWN IN THE INTERIOR DISTRICT IN FLORIDA

3. Section 913.214 of Title 7 Part 913 is revised to read as follows:

§ 913.214 Expenses, rate of assessment, and carryover of unexpended funds.

(a) Expenses that are reasonable and likely to be incurred by the Interior Grapefruit Marketing Committee during fiscal period August 1, 1978, through July 31, 1979, will amount to $27,300.

(b) The rate of assessment for said period payable by each handler in accordance with § 913.31 is fixed at $0.004 per standard packed box (1⅗ bushel) of grapefruit.

(c) Unexpended funds in excess of expenses incurred during fiscal period ended July 31, 1978, shall be carried over as a reserve in accordance with § 913.32.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), as these orders require that the rates of assessment for a particular fiscal period shall apply to all assessable fruit handled from the beginning of such period which began August 1, 1978. To enable the committees to meet fiscal obligations which are now accruing, approval of the expenses and assessment rates are necessary without delay. Handlers and other interested persons were given an opportunity to submit information and views on the expenses and assessment rates at an open meeting of each committee. It is necessary to effectuate the declared purposes of the act to make these provisions effective as specified.

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674).)

Dated: November 30, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[7535-01-M]

Title 12—Banks and Banking

CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION

PART 701—ORGANIZATION AND OPERATIONS OF FEDERAL CREDIT UNIONS

PART 745—CLARIFICATION AND DEFINITION OF ACCOUNT INSURANCE COVERAGE

Final Rulemaking—Share Accounts and Share Certificate Accounts; Qualified Trusts and Individual Retirement Accounts

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: These amendments amend existing regulations governing Individual Retirement Accounts (IRA) and Keogh accounts. The amendment to Part 701 excepts IRA and Keogh accounts from the minimum amount requirement for share certificates. The amendment to Part 745 conforms the regulation pertaining to share insurance coverage for IRA and Keogh accounts to the Financial Institutions Regulatory and Interstate Rate Control Act of 1978. That Act, among other things, raised the share insurance coverage for IRA and Keogh accounts from $40,000 to $100,000 per account.

EFFECTIVE DATE: November 10, 1978.

ADDRESS: National Credit Union Administration, 2025 M Street NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT:

J. Leonard Skiles, Deputy General Counsel, Office of the General Counsel, at the above address. Telephone: (202) 632-4870.

SUPPLEMENTARY INFORMATION: Pursuant to § 701.35(c)(2)(iii) of the National Credit Union Administration rules and regulations (12 CFR 701.35(c)(2)(iii)), the lowest minimum amount requirement for a share certificate account is set at $500. This particular limitation has discouraged, rather than encouraged, people of more modest means to establish IRA and Keogh accounts in Federal credit unions. Further, the $500 limitation has created a competitive imbalance. Section 701.35(c)(2)(iii), therefore, is amended by deleting the $500 minimum amount requirement for IRA and Keogh accounts.

Section 1401(c) of the Financial Institutions Regulatory and Interest Rate Control Act of 1978 amended the Federal Credit Union Act to authorize the National Credit Union Share Insurance Fund to insure funds held in IRA and Keogh accounts to a maximum of $100,000 per account. This particular provision became effective upon enactment, therefore, IRA and Keogh accounts are presently insured in accordance with the statutory change. This amendment simply conforms the regulation to Section 1401(c) of the Act.

In order to facilitate the achievement of the above stated objectives as rapidly as possible, the NCUA finds that application of the notice and public participation provisions of 5 U.S.C. Section 553 would be contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

Accordingly, 12 CFR 701.35(c)(2)(iii) and 745.9-2 are amended as set forth below.

LORENA C. MATTHEWS,
Acting Administrator.

NOVEMBER 22, 1978.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and sec. 209, 84 Stat. 1104 (12 U.S.C. 1789).)

§ 701.35 [Amended]

1. Section 701.35 Share Accounts and Share Certificate Accounts.

(a) Section 701.35(c)(2)(iii) is amended to read as follows:

* * * * *

(c) * * *
(2) * * *
(iii) Except for share certificate accounts established pursuant to § 721.4, the lowest minimum amount requirement shall be $500 or more;

* * * * *

2. Section 745.9-2 Qualified Trusts and Individual Retirement Accounts

(a) Section 745.9-2 is amended to read as follows:

§ 745.9-2 Keogh accounts and individual retirement accounts

(a) The present vested ascertainable interest of a participant or designated beneficiary in a trust or custodial account maintained pursuant to a pension or profit-sharing plan described under section 401(d) or section 408(a) of the Internal Revenue Code shall be insured up to $100,000 separately from other deposits of the participant or designated beneficiary.

(b) Upon liquidation of the credit union, any insurance coverage payment shall be made by the Administrator to the trustee or custodian, or the successor trustee or custodian, unless otherwise directed in writing, by the plan participant or beneficiary.

[6320-01-M]

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

[Regulation PR-184 Procedural Regulations Amendment No. 46 to Part 302]

PART 302—RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

Notice of Approval by Comptroller General

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule gives notice of approval by the Comptroller General of the reporting requirements contained in a regulation concerning applications for unused authority under the Airline Deregulation Act of 1978. This approval is required by the Federal Reports Act, and was transmitted to the Civil Aeronautics Board by letter dated November 8, 1978.

DATES: Adopted: November 30, 1978. Effective: November 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Raymond Kurlander, Director, Bureau of Accounts and Statistics, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5270.

Accordingly, the Civil Aeronautics Board amends Part 302 of its Procedural Regulations (14 CFR 302) by adding the following note at the end of Part 302:

NOTE.—The reporting requirements contained in sections 1803, 1805, 1806, 1809, and 1810 have been approved by the U.S. General Accounting Office under Number B-180226 (R0568).

This amendment is issued by the undersigned pursuant to the delegation of authority from the Board to the Secretary in 14 CFR Sec. 385.24(b). (Sec. 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; U.S.C. 1324.)

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-34034 Filed 12-5-78; 8:45 am]

[3510-25-M]

Title 15—Commerce and Foreign Trade

CHAPTER III—INDUSTRY AND TRADE ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 377—SHORT SUPPLY CONTROLS

Establishment of Supplementary Export Quota for Butane During the Fourth Quarter 1978

AGENCY: Office of Export Administration, Bureau of Trade Regulation, Industry and Trade Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: These regulations establish a supplementary export quota for the Fourth Quarter 1978 for butane to be exported from the Gulf Coast since current stocks of this commodity are more than adequate to meet domestic needs. They further establish a time

V 4 3 / 2 3 5

period during which exporters may apply for licenses under this supplementary quota and set forth the criteria which will be considered by the Department in allocating that quota.

EFFECTIVE DATE OF ACTION: December 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Converse Hettinger, Director, Short Supply Division, Office of Export Administration, Department of Commerce, Washington, D.C. 20230 (telephone 202-377-3984).

SUPPLEMENTARY INFORMATION: Supplement No. 2 to Part 377 of these Regulations sets forth the historical quarterly export quotas established for the export limitations. Ninety-five percent of each historical quota is allocated exclusively among exporters who have satisfactorily documented their participation in the export trade in that commodity during the historical base period used in calculating the particular quota; the remaining five percent of each quota is reserved for applicants who apply on grounds of unique hardship. Butane is subject to a rotating base period, with export quotas established quarterly on the basis of an exporter's actual exports during the corresponding calendar quarter of the period April 1, 1972, through March 31, 1973. The overall Fourth Quarter 1978 export quota for butane has been established at 216,299 barrels, with 10,815 barrels set aside for hardship applications.

In recent weeks, citing a build up of surplus stocks of butane in the United States, a number of companies have filed applications to export this commodity outside of quota limitations. The Department has consulted with the Department of Energy as to the butane supply and demand situation and the Department of Energy has advised this Department that, under current supply conditions in addition to historical quota exports, the export of 1,250,000 barrels of butane from the U.S. Gulf Coast during the period of October 1978 through March 1979 would not impact the supply of butane to domestic consumers.

Accordingly, the Department has determined that the short supply controls over exports of butane from the Gulf Coast area of the United States may be temporarily relaxed. The Department has further decided to establish a supplementary export quota for butane for the Fourth Quarter 1978 of 1,250,000 barrels and to make this quota available to applicants without regard to whether or not they are historical exporters of butane.

Exporters seeking to participate in this supplementary export quota should file applications so as to be physically received by the Office of Export Administration no later than close of business on December 18, 1978. Those applications to export butane from the Gulf Coast which have been submitted under the unique hardship provisions of the Regulations and which are now pending with the Office of Export Administration will be considered, together with the new applications filed during this time period.

While the Department will attempt to accommodate all applicants, because of the limited size of the supplementary quota it is likely that not all applicants can be accommodated and that not all applications will be licensed in the full quantity requested.

Following expiration of the time period for submission of applications to participate in this supplementary export quota, as noted above, the Department will weigh the relative merits of all such applications under the criteria set forth below and will allocate the available quota accordingly. Criteria to be considered by the Department in reviewing these applications will include:

(1) The nature and extent of any unique hardship which the applicant may have demonstrated pursuant to Section 377.3 of the Regulations;

(2) The extent to which the butane proposed for export is needed to supply domestic customers within the particular marketing area from which it will be exported or, if purchased for export, within the particular marketing area where located at time of purchase;

(3) The extent to which the proposed export would not be detrimental to attainment of the basic objectives of the short supply program; and

(4) The extent to which the proposed export would serve any foreign policy interest of the United States and the extent to which it would otherwise be in the national interest.

Accordingly, the Export Administration Regulations (15 CFR Part 377) are amended as follows:

(1) A new § 377.6(d)(1) is established to read as follows:

§ 377.6 Petroleum and petroleum products.

• • • • •

(12) Group K: Non-Historical Supplementary Quota for Butane in Fourth Quarter 1978.

An application for a validated license to export butane under the non-historical export quota established for the Fourth Quarter 1978 will be considered without regard to the applicant's past history of exports provided: (i) the butane is to be exported from the U.S. Gulf Coast, (ii) the application is submitted by the date specified in Supplement No. 2, and (iii) it is accompanied by supporting documentation required by Section 377.6(e)(2). In allocating this supplementary quota among competing applicants, the Department will consider all reasons advanced by the applicant as to why his application deserves consideration, including:

(i) The nature and extent of any unique hardship which the applicant may have demonstrated pursuant to Section 377.3 of the Regulations;

(ii) The extent to which the butane proposed for export is needed to supply domestic customers within the particular marketing area from which it will be exported or, if purchased for export, within the particular marketing area where located at time of purchase;

(iii) The extent to which the proposed export would not be detrimental to attainment of the basic objectives of the short supply program; and

(iv) The extent to which the proposed export would serve any foreign policy interest of the United States and the extent to which it would otherwise be in the national interest.

(2) The table entitled SUBMISSION DATES in Supplement No. 2 to Part 377 is revised to read as follows:

• • • • •

SUBMISSION DATES: Applications against historical quotas: Not prior to the beginning of the applicable quarter and received in the Office of Export Administration not later than the close of business on the tenth day prior to the end of the applicable quarter.

Applications against non-historical quotas for butane (Commodity Group K) for Fourth Quarter 1978: Not later than close of business December , 1978.

Applications for hardship and all other commodities subject to validated licensing but not historical quotas: At any time.

• • • • •

(3) At the end of Supplement No. 2 to Part 377 the following table is added:

NON-HISTORICAL SUPPLEMENTARY QUOTA FOR GROUP K

(in barrels)

(SCHEDULE B NO. 475.1545, BUTANE)

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. C-2935]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE, CORRECTIVE ACTIONS

National Fire Hose Corp. et al.

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violation of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, among other things, requires a Compton, Calif., manufacturer and seller of fire hose and accessories to cease, in connection with the sale and distribution of their products, from entering into agreements, or taking any other action that would impose territorial or customer restrictions on their distributors.

DATE: Complaint and order issued November 1, 1978. [1]

FOR FURTHER INFORMATION CONTACT:

Paul W. Turley, Regional Director, 3R, Chicago Regional Office, Federal Trade Commission, 55 East Monroe St., Suite 1437, Chicago, Ill. 60603, 312-353-4423.

SUPPLEMENTARY INFORMATION: On Thursday, August 24, 1978, there was published in the FEDERAL REGISTER, 43 FR 37712, a proposed consent agreement with analysis In the Matter of National Fire Hose Corp., a corporation, and Raymond L. Pepp and Dudley H. Pepp, individually and as officers or directors of National Fire Hose Corp., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Coercing and Intimidating: § 13.358 Distributors. Subpart—Combining or Conspiring: § 13.388 To control allocations and solicitation of customers; § 13.395 To control marketing practices and conditions; § 13.470 To restrain or monopolize trade; § 13.497 To terminate or threaten to terminate contracts, dealing, franchises, etc. Subpart—Cutting Off Access To Customers or Market: § 13.560 Interfering with distributive outlets. Subpart—Cutting Off Supplies or Service: § 13.610 Cutting off supplies or service; § 13.655 Threatening disciplinary action or otherwise.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45).)

[Docket No. 8978]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Borden, Inc.

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: This order, among other things, requires a New York City firm to cease attempting to hinder, restrain or eliminate competition in the processed lemon juice market by granting improper price reductions and promotional allowances to its customers; or by selling its product, ReaLemon, below cost or at unreasonably low prices.

DATES: Complaint issued July 2, 1974. Decision issued November 7, 1978. [1]

FOR FURTHER INFORMATION CONTACT:

John M. Peterson, Attorney, 3R, Chicago Regional Office, Federal Trade Commission, 55 East Monroe St., Suite 1437, Chicago, Ill. 60603. (312) 353-8522.

SUPPLEMENTARY INFORMATION: In the Matter of Borden, Inc., a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart-Cutting Prices Arbitrarily: § 13.665 Cutting prices arbitrarily, to stifle competition. Subpart-Discriminating Between Customers: § 13.685 Discriminating between customers; 13.685-10 Federal Trade Commission Act. Subpart-Offering Unfair, Improper And Deceptive Inducements To Purchase Or Deal: § 13.2090 Undertakings, in general. Subpart-Selling Below Cost: § 13.2180 Selling below cost.

(Sec. 6, 38 Stat. 721; (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45))

The final order, including further order requiring report of compliance therewith, is as follows:

FINAL ORDER

This matter having been heard by the Commission upon the appeal of respondent from the initial decision, and upon briefs and oral argument in support thereof and opposition thereto, and the Commission for the reasons stated in the accompanying Opinion having determined to sustain the initial decision with certain modifications:

It is ordered, That the initial decision of the administrative law judge, pages 1-162, be adopted as the Findings of Fact and Conclusions of Law of the Commission, except to the extent indicated in the accompanying Opinion.

Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further ordered, That the following Order to Cease and Desist be, and it hereby is, entered:

ORDER

It is ordered, That Borden, Inc., and its successors and assigns, officers, agents, representatives and employees, directly or indirectly, or through any corporation, subsidiary, affiliate, division or other device, in connection with the production, marketing and sale of processed lemon juice in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

(1) Granting price reductions, directly or indirectly, which result in different net prices among Borden's ReaLemon customers, whether or not such customers compete in the same geographic area, which differences in price are not attributable to differing cost of manufacture, sale or delivery, and the effect of which is to hinder, restrain or eliminate competition be-

tween respondent Borden and its competitors in the production, marketing and sale of processed lemon juice;

(2) Selling ReaLemon lemon juice below its cost or at unreasonably low prices, the effect of which is to hinder, restrain or eliminate competition between respondent Borden and its competitors in the production, marketing and sale of processed lemon juice;

(3) Granting promotional allowances or payments of any kind for customers' promotional services, the effect of which is to hinder, restrain or eliminate competition between respondent Borden and its competitors in the production, marketing and sale of processed lemon juice.

It is further ordered, That Borden, Inc., shall, within sixty (60) days from the date this order becomes final, and every year thereafter for a period of ten (10) years, submit a detailed written report of its actions, plans and progress in complying with the provisions of this order, and fulfilling its objectives.

By the Commission.

CAROL M. THOMAS,
Secretary.

Title 38—Pensions, Bonuses, and Veterans' Relief

CHAPTER I—VETERANS ADMINISTRATION

PART 17—MEDICAL

Former Members of the Armed Forces of Poland and Czechoslovakia

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: This regulation provides authority for furnishing hospital care, domiciliary care, and medical services to those former members of the Armed Forces of Poland and Czechoslovakia who: (1) Served during World War I or World War II in armed conflict against an enemy of the United States, and (2) served during the same period in or with the Armed Forces of France or Great Britain and (3) have been citizens of the United States for 10 years, and (4) are not entitled to payment for equivalent care and services under a program established by the foreign government concerned for persons who served in its Armed Forces in World War I or World War II. This regulation implements legislation (Pub. L. 94-491).

EFFECTIVE DATE: October 14, 1976.

FOR FURTHER INFORMATION CONTACT:

Joseph L. Erwin, Chief, Policies and Procedures, Medical Administration Service, Department of Medicine and Surgery, Veterans Administration, Washington, D.C. 20420, 202-389-3785.

SUPPLEMENTARY INFORMATION: On page 38046 of the FEDERAL REGISTER of August 25, 1978, there was published a notice of proposed regulatory development to amend § 17.55 which permits the furnishing of hospital care, domiciliary care, and medical services by the Veterans Administration within the United States to specified former members of the Armed Forces of Poland and Czechoslovakia. This regulation implements section 109(c), title 38, United States Code, as added by Pub. L. 94-491.

Interested persons were given 30 days in which to submit comments, suggestions or objections regarding the proposed regulation. Eighty-three comments were received. Sixty-three commentators objected to providing benefits to Polish and Czechoslovakian veterans. Eleven favored providing benefits and nine were not responsive to the issue. One commentator suggested a clarification of the language to show the limits within which benefits may be provided. However, both the law and the proposed regulation provide for the furnishing of those benefits specified to the same extent as if service had been performed in the Armed Forces of the United States.

The proposed regulation is hereby adopted without change and is set forth below.

Approved: November 29, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

A new center title and § 17.55 are added to read as follows:

MEDICAL CARE FOR CZECHOSLOVAKIAN AND POLISH VETERANS

§ 17.55 Medical care for certain former members of Czechoslovakian and Polish Armed Forces.

Hospital, domiciliary care, and medical services may be furnished to former members of the Armed Forces of Poland or Czechoslovakia if they:

(a) Served during World War I or World War II in armed conflict against an enemy of the United States, and

(b) Served during the same period in or with the Armed Forces of France or Great Britain, and

(c) Have been citizens of the United States for 10 years, and

(d) Are not entitled to payment for equivalent care and services under a program established by the foreign government concerned for persons who served in its Armed Forces in World War I or World War II. Such care or services may be furnished those individuals to the same extent as if they had served in the U.S. Armed Forces. Qualifying service may be established through an authenticated certification from the French Ministry of Defense or the British War Office which clearly indicates such military service, or otherwise through satisfactory evidence, under guidelines prescribed by the Chief Medical Director, of having served in the Czechoslovakian or Polish Armed Forces and in or with the Armed Forces of France or Great Britain while in armed conflict against an enemy of the United States during World War I or World War II.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

PART 2650—ALASKA NATIVE SELECTIONS

Reservation of Public Easements

Correction

In FR Doc. 78-33185 appearing on page 55326 in the issue of Monday, November 27, 1978, on page 55331, the date in the last paragraph was inadvertently omitted and should have appeared as follows:

As stated in the proposed rulemaking, Secretarial Order 2982 was to be revoked upon promulgation of final rulemaking. Final rulemaking was published in the FEDERAL REGISTER on November 27, 1978, and, accordingly, Secretarial Order 2982 is hereby revoked.

Section 2. *Effective Date.*
This order is effective immediately.

Dated: November 20, 1978.

CECIL D. ANDRUS,
Secretary of the Interior.

[4910-57-M]

Title 49—Transportation

CHAPTER VI—URBAN MASS TRANSPORTATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket Number 78-B]

PART 660—BUY AMERICA REQUIREMENTS

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Final rule.

SUMMARY: This regulation implements procedures required under § 401, "Buy America" of the Surface Transportation Assistance Act of 1978 (Act), which provides, with exceptions, that funds authorized may not be obligated for urban mass transportation projects unless materials and supplies are of United States origin.

EFFECTIVE DATE: November 6, 1978.

DATES: Comments must be received by February 15, 1979.

ADDRESS: Comments on these regulations are invited and should be sent to UMTA Docket No. 78-B, Urban Mass Transportation Administration, Room 9320, UCC-10, 400 7th Street SW., Washington, D.C. 20590. All comments and suggestions received will be available for examination at the above address between 8:30 am and 5:00 pm, Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

John Collins, Office of the Chief Counsel, Urban Mass Transportation Administration, 400 7th Street SW., Washington, D.C. 20590, Phone: (202) 426-1909.

SUPPLEMENTARY INFORMATION: On November 6, 1978, the President signed into law the Surface Transportation Assistance Act of 1978 (Pub. L. 95-599). The provisions of Section 401, "Buy America", are effective immediately and require immediate implementation.

The Administrator has determined that the required implementation of Section 401 will have a major impact on many UMTA programs.

Since Section 401 was effective on November 6, 1978, these regulations must be effective immediately to meet the short statutory deadline. UMTA has determined that these regulations constitute emergency regulations as defined in the Department of Transportation Order implementing E.O. 12044, and that under 5 U.S.C. 553 it is in the public interest to publish them without notice and comment at this time. However, UMTA invites public comment on the regulations and will consider amendents to the regulations based on the comments.

This document does contain a significant proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044.

DISCUSSION

These regulations contained in a new Part 660 are divided into four subparts:

1. Subpart A—General—sets out the applicability of the regulations and definitions used in the Part.

2. Subpart B—Implementation—sets out grantee responsibility and the requirements of determining the origin of products for compliance with the "Buy America" provision

3. Subpart C—Waivers—sets out waivers to the "Buy America" provision, the procedures for obtaining a waiver, and the effect of waivers.

4. Subpart D—Enforcement—sets out the methods of enforcement of the "Buy America" certification.

It should be noted that the "Buy America" requirements in these regulations *do not* apply to direct Federal procurements. It is anticipated that this subject will be addressed in a separate rulemaking.

These regulations establish the only type of local or domestic preference that is authorized in third party contracts which receive UMTA financial assistance. If a grantee imposes local or domestic preference provisions in a third party contract that differ from these regulations, then that third party contract is not eligible for UMTA financial assistance.

The legislative history of the Buy America provision indicates that Congress intended it to be interpreted in the light of the Buy American Act of 1933, 41 U.S.C. §§ 10a-10d, to the extent that Act is applicable.

The Secretary of Transportation has delegated to the Administrator the authority to grant the statutory waivers of the Buy America provision with respect to UMTA programs.

Appendix A to Subpart C of the new Part 660 lists those general waivers which the Administrator has granted at this time. Comments are specifically requested as to whether or not any other general class waiver should be granted, and whether origin and traceability problems exist concerning construction materials, including general stock items.

Accordingly, Title 49 of the Code of Federal Regulations is amended by adding a new Part 660 to read as follows:

PART 660—BUY AMERICA REQUIREMENTS

Subpart A—General

Sec.
§ 660.10 Purpose.
§ 660.11 Applicability.
§ 660.13 Definitions.

Subpart B—Implementation

§ 660.20 Purpose.
§ 660.21 Grantee responsibility.
§ 660.22 Determination of origin.

Subpart C—Waivers

§ 660.30 Purpose.
§ 660.31 Application for waiver.
§ 660.32 Types of waivers.
§ 660.33 Relationship of waivers to bid process.
§ 660.34—Effect of waiver.

APPENDIX A—COMPILATION OF WAIVERS ISSUED UNDER § 660.33(a)

Subpart D—Enforcement

§ 660.40 Purpose.
§ 660.41 Initiation.
§ 660.42 Investigation.
§ 660.43 Failure to comply with certification.
§ 660.44 Sanctions.
§ 660.45 Rights of third parties.

(Section 401, Pub. L. 95-599 (92 Stat. 2689); 49 CFR 1.51)

Subpart A—General

§ 660.10 Purpose.

The purpose of this subpart is to define the terms and procedures guiding the application of section 401, "Buy America", of the Surface Transportation Assistance Act of 1978, Pub. L. 95-599.

§ 660.11 Applicability.

(a) These regulations apply to all federally-assisted procurements under grants, loans, and cooperative agreements made pursuant to the Urban Mass Transportation Act of 1964, as amended, and sections 103(e)4 and 142 of Title 23 United States Code, for equipment and construction of facilities in which a third party contract exceeds $500,000 and is financed by funds administered by UMTA that have been obligated after November 6, 1978.

(b) Only domestic unmanufactured articles, materials and supplies and manufactured articles, materials and supplies that have been manufactured in the United States substantially all from domestic articles, materials, and supplies may be procured with assistance provided by UMTA unless the Administrator waives the application of these requirements as set forth in Subpart C of this Part.

(c) Because a domestic preference requirement, rather than an absolute "Buy America" requirement, has been established, materials of foreign origin should be considered for UMTA-assisted procurements.

(d) "Buy America" requirements do not apply to the procurement of services.

(e) A determination of the origin of end products to be procured must be made as set out in § 660.22 of this Part.

(f) The nationality of suppliers or the employees of these suppliers does not affect the origin of end products or components to be procured.

America provision. Such specifications

quired to substitute sufficient domes-

DATES: The emergency regulations

V 4 3 / 2 3 5

§ 660.13 Definitions.

As used in this Part:

(a) "Act" means the Surface Transportation Assistance Act of 1978 (Pub. L. 95-599).

(b) "Administrator" means the Administrator of the Urban Mass Transportation Administration (UMTA).

(c) "Component" means any article, material, or supply, whether manufactured or unmanufactured, directly incorporated into an end product.

(d) "Domestic end product" means an unmanufactured end product that has been mined or produced in the United States, or a manufactured end product determined to be domestic under § 660.22 of this Part.

(e) "End product" means an article, material or supply, whether manufactured or unmanufactured, that is to be acquired by the grantee, with financial assistance derived from UMTA, and that is to be delivered to the grantee, as specified by the third party contract.

(f) "Foreign end product" means an end product other than a domestic end product.

(g) "Grantee" means any entity that is a recipient of UMTA grants or loans under the Urban Mass Transportation Act of 1964, as amended, or under section 103(e)4 or section 142 of Title 23, United States Code.

(h) "Overall project contract" means each individual third party contract for a discrete portion of the overall project.

(i) "United States" means the several States, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, the Virgin Islands, and the Commonwealth of Northern Mariana Islands.

Subpart B—Implementation

§ 660.20 Purpose.

The purpose of this subpart is to prescribe the implementation of section 401 of the Act.

§ 660.21 Grantee responsibility.

(a) The grantee shall adhere to the Buy America clause set forth in its grant contract with UMTA. The clause directly affects any third party contract utilizing financial participation awarded by UMTA after November 6, 1978. These requirements do not apply to any third party contract financed without UMTA funds or to any procurement or construction third party contract not exceeding $500,000. The Buy America clause will be included in any grant or loan made by UMTA that exceeds $500,000.

(b) The grantee shall include in its bid specifications for procurement of equipment and construction of facilities within the scope of these regulations an appropriate notice of the Buy America provision. Such specifications shall require, as a condition of responsiveness, that the bidder or offeror submit with the bid a completed Buy America certificate, as set forth below:

BUY AMERICA CERTIFICATE

The bidder or offeror hereby certifies that each end product, except the end products listed below, is a domestic end product, as defined in 49 CFR 660.13(d); and that components of unknown origin have been considered to have been mined, produced, or manufactured outside the United States.

Excluded end products (show country of origin for each excluded end product):

§ 660.22 Determination of origin.

(a) In order for a manufactured end product to be considered a domestic end product—(1) the cost of the domestic components must exceed 50 percent of the cost of all its components; and (2) the final assembly of the components to form the end product must take place in the United States.

(b) In determining the origin of components, each component must be treated as either entirely domestic or entirely foreign, based on the place where the component is mined, produced, or manufactured. Components of unknown origin must be treated as foreign. The origin of subcomponents of components is immaterial.

(c) Transportation costs to the place of incorporation into the end product and, in the case of foreign components, applicable duties, must be considered in determining component cost under paragraph (a) of this section.

Subpart C—Waivers

§ 660.30 Purpose.

The purpose of this subpart is to describe the procedure for obtaining waivers to Section 401 of the Act, the types of statutory waivers that exist, when in the bid process waivers can be issued, and the effect of the waiver on bidding procedures.

§ 660.31 Application for waiver.

(a) A bidder who seeks to establish grounds for any waiver described in § 660.32 must seek the waiver, in a timely manner, through the grantee.

(b) Only a grantee may request a waiver. The request must be in writing and include facts and justification to support the granting of the waiver.

(c) A waiver may be granted by the Administrator on his own initiative.

§ 660.32 Types of waivers.

(a) Section 401(b) of the Act provides for four instances wherein a waiver of the "Buy America" provision may be granted. A waiver of the "Buy America" provisions will be granted if:

(1) Their application would be inconsistent with the public interest;

(2) In the case of acquisition of rolling stock, their application would result in unreasonable cost (after granting appropriate price adjustments to domestic products based on that portion of project cost likely to be returned to the United States and to the States in the form of tax revenues);

(3) Supplies of the class or kind to be used in the manufacture of articles, materials, supplies are not mined, produced, or manufactured in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or

(4) Inclusion of domestic material will increase the cost of the overall project contract by more than 10 per centum.

(b) In determining whether the waiver described in paragraph (a)(1) will be granted, the Administrator considers all appropriate factors including, but not limited to, the cost, "red tape," and delay that would be imposed if the provision were not waived. In granting this waiver, the Administrator will issue a written determination setting forth the reasons for the granting of the waiver.

(c) In determining whether the waiver described in paragraph (a)(2) will be granted, only taxes paid by the bidder will be considered.

(d) In determining whether the waiver in paragraph (a)(3) will be granted, a domestic end product will be presumed unavailable if no responsive and responsible domestic bid has been received.

(e) In determining whether the waiver in paragraph (a)(4) will be granted in cases where the apparent low bid offers foreign end products, the lowest responsive and responsible bid offering foreign end products will be multiplied by 1.1. If this number is less than the lowest responsive and responsible bid offering all domestic end products (including end products considered domestic under the provision of § 660.34(b)) then the waiver will be granted.

(f) The statutory waiver provisions of section 401 of the Act are mutually exclusive. End products and components of end products may be granted different waivers.

§ 660.33 Relationship of waivers to bid process.

(a) Waivers may be issued that apply to broad classes of grants or particular types of end products, materials or supplies. A compilation of these waivers is listed in Appendix A.

(b) Waivers may be issued for a particular contract based on information available to UMTA—(1) prior to bid opening; or (2) after bids are opened by the grantee.

§ 660.34 Effect of waiver.

(a) If a waiver has been granted for an entire grant from UMTA or for an overall project contract planned to be advertised by a grantee, the bid process may proceed without any requirement that bidders make the certification required by § 660.21.

(b) If a waiver or waivers do not encompass all of the articles, materials, and supplies scheduled to be delivered or constructed under the contract, then the computation of the domestic component required under §§ 660.21 and 660.22 shall treat as domestic the articles, materials, and supplies for which waivers have been given.

APPENDIX A—COMPILATION OF WAIVERS ISSUED UNDER § 660.33(a).

(a) The provision has been waived for all operating assistance grants under Sections 5 and 17 of the UMT Act, and for any operating assistance portions of grants under Section 6 of the UMT Act.

(b) All waivers published in 41 CFR § 12-6.105 which established excepted articles, materials, and supplies for the Buy American Act of 1933, (41 U.S.C. 10a-d) as the waivers may be amended from time to time, are incorporated by reference.

Subpart D—Enforcement

§ 660.40 Purpose.

The purpose of this subpart is to describe the procedures that will be used by UMTA to enforce the provision of Section 401 of the Act. This subpart also defines the rights of third parties.

§ 660.41 Initiation.

(a) It is presumed that a bidder who has submitted the certification required by § 660.21 of this Part is complying with the Buy America provision. A false certification is a criminal act in violation of 18 U.S.C. § 1001.

(b) Any party may petition UMTA to investigate the compliance of a successful bidder with the bidder's certification. If UMTA determines that evidence indicates that the presumption of paragraph (a) of this section has been overcome, UMTA will require the grantee to initiate an investigation as described in § 660.42.

§ 660.42 Investigation.

When an investigation is initiated under § 660.41(b), the grantee shall require the successful bidder to document its compliance with its Buy America certification. The successful bidder has the burden of proof to establish to the grantee and to UMTA that it is in compliance with its certification and this Part.

§ 660.43 Failure to comply with certification.

If a successful bidder fails to demonstrate that it is in compliance with its certification or this Part, it will be required to substitute sufficient domestic materials, articles, and supplies to meet the terms of the original certification without revision of the original contract terms. Failure to comply will be a breach of contract and will be actionable under the terms of the contract and state law.

§ 660.44 Sanctions.

A willful refusal to comply with certification by a successful bidder may lead to the initiation of debarment proceedings under 29 CFR 5.6.

§ 660.45 Rights of third parties.

The sole right of any third party under the Buy America provision is to petition UMTA under the provisions of § 660.41(b). No third party has any additional right, at law or equity, for any remedy including, but not limited to, injunctions, damages, or cancellation of the Federal grant or contracts of the public body.

Dated: December 4, 1978.

RICHARD S. PAGE,
Urban Mass Transportation Administrator.

Title 50—Wildlife and Fisheries

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 227—THREATENED FISH AND WILDLIFE

Amendment to Emergency Regulations Declaring the Port Canaveral Navigation Channel a Restricted Fishing Area and Notice of Hearing

AGENCY: National Marine Fisheries Service.

ACTION: Amendment to Temporary Emergency Regulations and Notice of Public Hearing.

SUMMARY: The National Marine Fisheries Service (NMFS) promulgated emergency temporary regulations under section 4(f)(2)(C) of the Endangered Species Act designating the Port Canaveral Navigation Channel, Cape Canaveral, Florida, as a restricted fishing area, effective November 22, 1978, for a period of 120 days as published at 43 FR 54639. This notice amends the temporary regulations, and advises the public of a hearing on the regulations.

DATES: The emergency regulations are effective on November 22, 1978, for a period of 120 days. This amendment does not affect the effective date of the regulations or the period of effectiveness. Written comments on the regulations and this amendment may be made on or before January 22, 1979. A hearing will be held on December 12, 1978, at 10 a.m. in Cape Canaveral, Florida.

ADDRESSES: Comments may be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, 3300 whitehaven Street, N.W., Washington, D.C. 20235. The hearing will be held at the Canaveral Port Authority Building, George King Boulevard, Cape Canaveral, Florida.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C. 20235, telephone: 202-634-7461.

SUPPLEMENTARY INFORMATION: Regulations were published on November 22, 1978, 43 FR 54639, which added a new subpart D to part 222, and amended 227.72(e)(2) which designated a restricted fishing area.

. . . . . .

Section 227.72 is amended to read:

§ 227.72 [Amended]

(e) * * * (2) Restricted fishing areas. (i) During the period beginning November 22, 1978, and ending March 21, 1979, the use of any commercial trawl gear is prohibited in those parts of the Port Canaveral Navigation Channel, Cape Canaveral, Florida, known as the turning basin, the inner reach, the middle reach, and that part of the dredged channel beyond the outer reach to a point 1.5 nautical miles beyond buoys "B7" and "R8" (latitude 28°22'48" N., and longitude 80°32'10" N.), C. & G.S. Chart 11484.

Dated: December 1, 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 611—FOREIGN FISHING REGULATIONS

1979 Fee Schedule for Foreign Fishing

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Publication of 1979 fee schedule for foreign fishing.

SUMMARY: This document sets forth the fee schedule for the calendar year 1979 for fishing by foreign vessels in fisheries under the exclusive fishery management authority of the United States. This schedule establishes fees which must be paid by the owner or operator of any foreign fishing vessel wishing to fish within the United States fishery conservation zone (FCZ) before actually engaging in any fishing activity, except as otherwise noted.

EFFECTIVE DATE: January 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Denton R. Moore, Acting Chief, Permits and Regulations Division, National Marine Fisheries Service, Washington, D.C. 20235, Telephone: (202) 634-7454.

SUPPLEMENTARY INFORMATION: Section 201(d) of the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., as amended, (the Act), provides that foreign fishermen may be allowed to fish for "* * * that portion of the optimum yield of such fishery which will not be harvested by vessels of the United States * * *." Section 204(b)(10) of the Act further provides that reasonable fees shall be paid by the owner or operator of any foreign fishing vessel for which a permit is issued. Fishing vessels are defined by section 3(11) of the Act to include several types of vessels in addition to those actually engaged in harvesting fish. This includes any vessel "* * * aiding or assisting one or more vessels at sea in the performance of any activity relating to fishing, including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing * * *." Section 204(b)(10) of the Act further provides, in part: "In determining the level of such fees, the Secretary may take into account the cost of carrying out the provisions of this Act with respect to foreign fishing, including, but not limited to, the cost of fishery conservation and management, fisheries research, administration, and enforcement." This schedule of fees amends the 1978 schedule which was published in the FEDERAL REGISTER on October 7, 1977 (42 FR 54588) and which was amended and codified as 50 CFR 611.22 on May 4, 1978 (43 FR 19232).

CRITERIA FOR ESTABLISHING FEE SCHEDULE

The following criteria, identical to those used in 1977, were considered in developing the fee schedule for foreign fishing in 1979.

1. Fees will not be used as a management tool to restrict foreign fishing. Foreign fishing effort will be controlled by management plans and associated regulations.

2. The fees will not be so high as to prevent nations from utilizing the allocated surplus solely because of the fee level. The fees must be reasonable.

3. Fees will recover an appropriate part of the management costs related to foreign fishing.

4. The same rate must apply to all foreign nations and the rate will not change within a given calendar year.

5. Fees will be simple to compute and collect. Fees shall be paid as provided in the Act.

6. Every vessel, by law, must pay a fee and obtain a permit, but the fee varies with the size and function of the vessel.

NOTE.—This amendment does not constitute a major Federal action within the meaning of the National Environmental Policy Act of 1969, as amended. It has been determined that this action does not require the preparation of an economic impact analysis.

Signed at Washington, D.C., this 1st day of December 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

50 CFR 611.22 is hereby amended to read:

§ 611.22 Fee schedule for foreign fishing permits.

(a) The fee charges for fishing by foreign flag vessels for fish over which the United States exercises exclusive fishery management authority required by section 204(b)(10) of the Act and § 611.3(c)(3) are specified as follows:

(1) *Permit fees.* The owners and operators of all foreign vessels engaging in fishing, as defined in § 611.2(r), are required to pay appropriate fees as specified in the following table. In the case of vessels described in more than one category, the highest applicable fee will be charged. Permit fees must be paid in advance and are not refundable. However, on a case-by-case basis, the Assistant Administrator for Fisheries may allow the substitution of like vessels when the original vessel has become disabled or otherwise cannot participate in the fishery.

TABLE I

Vessel activity	Permit fee
Catching (activities described in § 611.2(r) (1) or (2)) with an applicable national allocation (per gross registered ton)	$1.00
Catching (activities described in § 611.2(r) (1) or (2)) without an applicable national allocation, i.e., a nonretention fishery (per vessel)	200.00
Processing (activities described in § 611.2(r)(3)(i)) (per gross registered ton) (up to $2,500)	.50
Other support (activities described in § 611.2(r)(3)(ii) or (iii)) (per vessel)	200.00

(2) *Poundage fees.* (i) The poundage fee for each allocated species is calculated at 3.5 percent of the actual landed value per metric ton of the species to U.S. fishermen where U.S. landing data are available in 1977, the most recent year for which such data are available.

(ii) This fee must be paid in advance on the entire national allocation if the nation receiving the allocation chooses to accept it.

(3) *Method of payment.* (i) All payments received must be drawn in U.S. dollars, payable at a bank in the United States, and be made payable to the U.S. Department of Commerce, NOAA. In addition, payments from private firms or individuals should be in the form of a certified check.

(ii) Remittances should be sent to the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street NW., Washington, D.C. 20235, Attention: F3. To facilitate processing, each remittance should be accompanied by a copy of the applicable bill for identification purposes.

(iii) Refunds of poundage fees will be made only upon written application to the address mentioned in paragraph (a)(3)(ii) of this section. Refund requests must contain the following information:

(A) A statement that the amount involved is more than $100.

(B) An explanation of the difference between the amount of actual catch and the amount authorized, and the reasons for the difference.

(b) The following ex-vessel prices to be used for computing fees are based on U.S. commercial landings in 1977, except where noted:

Average Ex-Vessel Values per Metric Ton

Species	Values
Butterfish	$626
Cod, Pacific	359
Crab, tanner (snow)	[1]661
Flounders, Pacific	407

Average Ex-Vessel Values per Metric Ton—Continued

Species	Values
Hake, Pacific	[1]176
Hake, red	199
Hake, silver (whiting)	205
Herring, Atlantic	[2]200
Herring, Pacific—roeless	100
Herring, Pacific—with roe	991
Herring, river (alewives)	100
Mackerel, atka	[3]223
Mackerel, Atlantic	385
Mackerel, jack	110
Other billfish, Pacific	664
Other finfish, Atlantic	382
Other groundfish, Pacific	49
Pacific Ocean perch	[4]356
Pollock, Alaska	176
Rockfishes	358
Sablefish—longline caught	1,477
Sablefish—trawl caught	551
Seamount groundfish	[5]397
Sharks, Atlantic (except dogfish)	210
Sharks, Pacific (except dogfish)	396
Snails (meat)	[6]1,657
Squid, Atlantic—Illex	472
Squid, Atlantic—Loligo	938
Squid, Pacific	[7]458
Striped marlin, Pacific	2,346
Swordfish	5,875

PART 671—TANNER CRAB OFF ALASKA

Final Regulations

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Final regulations.

SUMMARY: These final regulations govern vessels of the United States fishing for Tanner crab in the Fishery Conservation Zone (FCZ) off Alaska and implement the Fishery Management Plan for Tanner crab off Alaska (FMP) which was adopted by the North Pacific Fishery Management Council (Council), and approved by the Secretary of Commerce on April 18, 1978. Proposed regulations governing foreign fishing for Tanner crab were published on November 24, 1978 (43 FR 54964) for an additional public comment period and do not appear as final regulations at this time.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Harry L. Rietze, Director, Alaska Region, National Marine Fisheries Service, Box 1668, Juneau, Alaska 99802, telephone: (907) 586-7221.

SUPPLEMENTARY INFORMATION:

A. HISTORY OF THE FMP

The FMP for Tanner crab off Alaska contains conservation and management measures applicable to foreign and U.S. vessels fishing for Tanner crab off Alaska. The FMP has been subject to extensive analysis and comment by representatives of the fishing industry, interested agencies of State and Federal government, governments of foreign nations, and members of the general public. During formulation of the FMP, the Council conducted public hearings at the following locations and times to solicit public input: (a) Petersburg, Alaska, August 3, 1977; (b) Seattle, Washington, August 5, and 6, 1977; (c) Anchorage, Alaska, August 22, 1977; (d) Sand Point, Alaska, August 23, 1977; and (e) Kodiak, Alaska, August 24, 1977.

Copies of a draft FMP were widely distributed to government agencies, organizations, and individuals for comment, and the Council received oral comments on the FMP at several Council meetings during 1977 and 1978.

In December, 1977, the Council submitted the FMP to the Secretary of Commerce for approval. Review at that time indicated that the FMP: (1) Did not adequately define optimum yield; and (2) did not indicate how the specified optimum yield provided the greatest overall benefit to the nation.

On March 2, 1978, the Council submitted: (1) Changes in appropriate sections of the FMP; and (2) an additional appendix to the FMP, entitled "Development of OY and TALFF for Tanner Crab North of 58° North in the Bering Sea." (OY and TALFF are acronyms for "optimum, yield" and "total allowable level of foreign fishing"). This material adequately addressed the problem areas in the previous FMP submission, and, accordingly, the Secretary of Commerce approved the plan on April 18, 1978.

The FMP and proposed regulations applicable to vessels of the U.S. and foreign nations were published as proposed rulemaking for public comment on May 16, 1978 (43 FR 21170). Comments were received on the proposed regulations until June 30, 1978. The final regulations published here reflect comments received during that period.

Considerable comment was received on proposed rulemaking from the Council and potentially affected foreign fishermen. Implementation of the FMP was delayed because of the need to fully assess these comments and the several innovative management techniques made necessary by the nature of the fishery. One such technique is the adjustment of some fishing restrictions during the season by the NMFS Alaska Regional Director. This is discussed below under "In Season Adjustments".

The delay in plan implementation has not affected fishing operations. Fishing has begun in several registration areas but, because domestic vessels currently fishing are licensed and registered in Alaska, the management system presently employed by the State of Alaska effectively controls the fishery. The Japanese fishing fleet (the only foreign participants in this fishery) is adequately regulated by regulations implementing the existing Preliminary Fishery Management Plan (PMP) for Tanner crab in the Bering Sea (see 43 FR 10566; March 14, 1978).

The regulations published here implement the management measures in the FMP which apply to vessels of the United States. (See 43 FR 54964 for proposed regulations to implement measures in the FMP governing the foreign fishery for Tanner crab off Alaska). A subsequent amendment to the FMP which will extend the FMP through October 31, 1979, has been published as a proposed amendment for public comment at the request of the North Pacific Management Council (see 43 FR 52034; November 8, 1978).

B. IN SEASON ADJUSTMENTS

An important feature of the management system of the FMP is the ability to manage and conserve the Tanner crab resource by allowing in-season adjustment of the areas which may be fished and the times during which fishing may occur. This permits the Regional Director to act in a timely fashion to prevent damage to the resource if new data reveal that the condition of the Tanner crab stocks in any registration area is substantially different than was originally anticipated at the beginning of the fishing year.

The determination that such adjustments are necessary in order to achieve the conservation and management objectives of the FMP will be based on data concerning the following factors: (1) The effect of overall fishing effort within the registration area; (2) the catch per unit of effort and rate of harvest; (3) the relative abundance of Tanner crab within the area in comparison with pre-season prediction; (4) the proportion of immature or softshell Tanner crab being handled; (5) general information on the condition of Tanner crab within the area; and (6) any other factors relevant to the conservation and management of the Tanner crab resource.

Because of the dynamics of fishery management, decisions on these ad-

30th day of November 1978.

(1) Any commissioned, warrant, or

Person means any individual (wheth-

under the terms of an agreement with

V 4 3 / 2 3 5 DEC 6 78 UMI

justments may have to be made quickly and without normal opportunity for notice and comment. Field orders by the Regional Director implement an in-season adjustment. In such decisions, informal rulemaking procedures will be followed pursuant to the Administrative Procedures Act (5 U.S.C. Sec. 553). In cases where normal notice and public comment procedures are to be waived for good cause shown, the regulations establish an alternate public comment procedure which provides for: (1) A 15-day comment period after the effective date of the field order; (2) the full availability for public inspection of the aggregate data upon which the field order is based; and (3) following the public comment period, publication in the FEDERAL REGISTER of either a notice announcing the continued effectiveness of the field order, or a notice modifying or rescinding the field order based on the comments received. Furthermore, field orders by the Regional Director implementing an in-season adjustment must be published in the FEDERAL REGISTER and must be posted, broadcast, and otherwise made available to the public in advance of their effective date.

Previously, the authority to issue regulations implementing fishery management plans was delegated from the Administrator of NOAA to the Assistant Administrator for Fisheries. Redelegation from the Assistant Administrator of authority to make in-season adjustments (as provided for in § 671.27 of the regulations) to the Director, Alaska Region, NMFS was approved on October 23, 1978.

C. PUBLIC COMMENTS

Issues and concerns raised by commenters during the review period, which ended June 30, 1978, and responses to those comments, are as follows:

(1) Several Japanese interests requested that the optimum yield and Japanese allocation of Tanner crab be increased.

Response. Both *C. bairdi* and *C. opilio* occupy much the same place in U.S. and foreign markets. The Council has determined that any substantial increase in catch of either species by foreign nations would adversely affect the expanding U.S. Tanner crab fishery. The quota of Tanner crab allowed to Japan in 1976 was 10,200 metric tons; in 1977, 12,500 metric tons; and under the 1978 PMP, 15,000 metric tons. Thus, the U.S. has increased quotas cautiously. Future requests for changes in optimum yields and allocatons will be fully considered; however, the requirements of U.S. fishermen and the need to provide for an orderly development of the fishery are primary considerations. At this time, these needs and requirements preclude any change in the optimum yield and level of foreign fishing.

The final regulations for the domestic fishery as published here differ only in minor ways from proposed regulations as published on May 16, 1978 (43 FR 21170). (Proposed regulations governing foreign fishing for Tanner crab were also published on May 16. The foreign fishing regulations were published again in their entirety on November 24, 1978 (43 FR 54964) for an additional public comment period and do not appear as final regulations at this time). Most changes in the regulations for the domestic fishery are of an editorial nature only, and none of the changes in the final regulations are substantive enough to require an additional comment period. Several of the changes are:

(1) The final regulations have been rearranged into a general subpart (Subpart A) and a series of specific management measures (Subpart B).

(2) The North Pacific Fishery Management Council submitted numerous comments on the proposed regulations which were incorporated.

(3) The optimum yield (OY) table was changed to correct the erroneous listing of optimum yield of Tanner crab for the Bering Sea North of 58° North latitude as 2,269 metric tons. That figure is actually the estimated U.S. capacity for that area, and the correct figure for optimum yield is 17,268 metric tons.

(4) The optimum yield table was also changed to delete the lower limit of the ranges listed for optimum yield in some areas. This change clarifies the maximum level of catch of Tanner crab.

NOTE: The appropriate amended environmental impact statement has been filed with the Environmental Protection Agency. The National Marine Fisheries Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Orders 11821 and 11949, and OMB Circular A-107.

Domestic fishing for Tanner crab begins during the month of November. In order to minimize disruption to the fishing industry these regulations should be effective immediately. As such, this agency has determined that good cause requires a waiver of 5 U.S.C. 553(d).

Signed at Washington, D.C., this 30th day of November 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

Part 671 is added to Title 50 CFR to read as follows:

PART 671—TANNER CRAB OFF ALASKA

Subpart A—General

Sec.
671.1 Purpose and scope.
671.2 Definitions.
671.3 Relation to other laws.
671.4 Reporting requirements.
671.5 General prohibitions.
671.6 Enforcement.
671.7 Penalties.

Subpart B—Management Measures

671.21 Optimum yield table.
671.22 Size and sex restrictions.
671.23 Vessel registration.
671.24 Vessel inspection.
671.25 Landing requirements.
671.26 Season and gear restrictions.
671.27 Time and area closures.

AUTHORITY: Sec. 305, Fishery Conservation and Management Act of 1976, as amended; 16 U.S.C. 1801 *et seq.*

Subpart A—General

§ 671.1 Purpose and scope.

(a) This part regulates fishing for Tanner crab by vessels of the United States within that portion of the Bering Sea and Gulf of Alaska over which the United States exercises exclusive fishery management authority. These regulations implement the Tanner crab fishery management plan developed by the North Pacific Fishery Management Council.

(b) For regulations governing fishing for Tanner crab in the Gulf of Alaska and Bering Sea by fishing vessels other than vessels of the United States see 50 CFR 611.91.

§ 671.2 Definitions.

In addition to the definitions in the Act, and unless the context requires otherwise, the terms used in this part shall have the following meanings (some definitions in the Act have been repeated here to aid understanding of the regulations):

Act means the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 *et seq.*, as amended.

ADF&G means the Alaska Department of Fish and Game.

Assistant Administrator means the Assistant Administrator for Fisheries, National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce, or an individual to whom appropriate authority has been delegated.

Authorized Officer means:

(1) Any commissioned, warrant, or petty officer of the United States Coast Guard;

(2) Any certified enforcement agent or special agent of the National Marine Fisheries Service;

(3) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary of Commerce or the Commandant of the Coast Guard to enforce the provisions of the Act; or

(4) Any Coast Guard personnel accompanying and acting under the direction of any person described in paragraph (1) of this definition.

Fishery Conservation Zone (FCZ) means that area adjacent to the United States which, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal States to a line on which each point is 200 nautical miles from the baseline from which the territorial sea of the United States is measured.

Fishing means any activity, other than scientific research, which involves:

(1) The catching, taking or harvesting of fish;

(2) The attempted catching, taking or harvesting of fish;

(3) Any other activity which can reasonably be expected to result in the catching, taking or harvesting of fish; or

(4) Any operations at sea in support of, or in preparation for, any activity described in paragraphs (1), (2), or (3) of this definition.

Fishing Vessel means any vessel, boat, ship, or other craft which is used for, equipped to be used for, or of a type which is normally used for (1) fishing or (2) aiding or assisting one or more vessels at sea in the performance of any activity relating to fishing, including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing.

Landing means off-loading fish (including Tanner crab).

Operator, with respect to any vessel, means the master or other individual on board and in charge of that vessel.

Owner, with respect to any vessel, means:

(1) Any person who owns that vessel in whole or in part;

(2) Any charterer of the vessel, whether bareboat, time or voyage;

(3) Any person who acts in the capacity of a charterer, including but not limited to parties to a management agreement, operating agreement, or any similar agreement that bestows control over the destination, function or operation of the vessel; or

(4) Any agent designated as such by any person in subparagraph (1), (2), or (3).

Person means any individual (whether or not a citizen or national of the United States), corporation, partnership, association, or other entity (whether or not organized or existing under the laws of any State), and any Federal, State, local, or foreign government or any entity of any such government.

Regional Director means the Director, Alaska Region, National Marine Fisheries Service, Box 1668, Juneau, Alaska, 99802 or an individual to whom appropriate authority has been delegated.

Registration Area A (Southeastern Alaska-Yakutat) is that portion of the FCZ in the Gulf of Alaska east of 143°53'36" W. longitude (Cape Suckling).

Registration Area E (Prince William Sound) is that portion of the FCZ between 143°53'36" W. longitude (Cape Suckling) and 148°53' W. longitude (Cape Fairfield).

Registration Area H (Cook Inlet) is that portion of the FCZ lying west of 148°53' W. longitude (Cape Fairfield) and north of 58°52' N. latitude (Cape Douglas).

Registration Area J (Westward) includes the FCZ in the Bering Sea, and that part of the FCZ in the Gulf of Alaska between 148°53' W. longitude (Cape Fairfield) and 172° E. longitude south of 58°52' N. latitude (Cape Douglas).

Ring Net means a bag-shaped net suspended from a circular or rectangular frame.

Tanner Crab means all species of the genus *Chionoecetes* including *C. bairdi* and *C. opilio.*

Tanner Crab Pot means a portable structure designed and constructed to capture and retain fish and shellfish alive in the water. The Tanner crab pot has rigid tunnel eye openings which individually are a maximum of five (5) inches (13 cm) in one dimension, and tunnel eye opening perimeters which individually are larger than thirty (30) inches (76 cm); or the pot tapers inward from its base to a top consisting of one horizontal opening of undescribed size.

Vessel of the United States means:

(1) A vessel documented or numbered by the Coast Guard under United States law; or

(2) A vessel, under five net tons, which is registered under the laws of any State.

§ 671.3 Relation to other laws.

(a) *Delegation.* The Assistant Administrator has delegated to the Regional Director authority to make in-season adjustments pursuant to § 671.27.

(b) *Other Agreements.* Certain responsibilities relating to the administration of this Part will be performed by personnel of the State of Alaska under the terms of an agreement with NOAA/NMFS and the United States Coast Guard.

§ 671.4 Reporting requirements.

(a) The operator of any fishing vessel subject to this Part whose port of landing is in the United States is responsible for the submission of an accurately completed State of Alaska fish ticket for each sale or delivery of any Tanner crab covered by this part.

(b) At the election of the vessel operator, the fish ticket shall be either: (1) Submitted by the vessel operator directly to the ADF&G within 72 hours after such Tanner crab are sold or delivered; or (2) prepared, at the request of the operator, by the purchaser (i.e., any person who receives Tanner crab for a commercial purpose from a fishing vessel subject to this part) and submitted by the purchaser to the ADF&G within 72 hours after such Tanner crab are received by the purchaser.

(c) In addition to the requirements of paragraphs (a) and (b) of this section, each operator (or purchaser, if the fish ticket is submitted in accordance with paragraph (b)(2) of this section) shall also accurately state on each such fish ticket: (1) Total time fished; (2) total number of pot lifts; and (3) quantity and type of gear used.

(d) The operator of any fishing vessel subject to this part whose port of landing is outisde the State of Alaska shall submit a completed State of Alaska fish ticket, or an equivalent document containing all of the information required on an Alaska fish ticket and in § 671.4(c), to the ADF&G within 72 hours after the date of each sale or delivery of any Tanner crab. (Sample alternative document reserved.)

§ 671.5 General prohibitions.

It is unlawful for any person to:

(a) Fish for, take, or retain Tanner crab in violation of the Act, this part, or any regulation or permit issued under the Act, including but not limited to the following: During closed seasons or in closed areas specified in Subpart B of this part; after closure of an area when a catch limitation is reached, or as otherwise announced by a field order issued under this part; or by means of gear or methods prohibited by this part;

(b) Take and retain Tanner crab in violation of § 671.22;

(c) Possess, have custody or control of, ship, transport, offer for sale, sell, purchase, import, land or export any Tanner crab taken in violation of the Act, this part, or any other regulation or permit issued under the Act;

(d) Refuse to permit an Authorized Officer to board a fishing vessel subject to such person's control for pur-

istration year. Registration for any

and by these regulations for Federal

cense number of the fishing vessel

V 4 3 / 2 3 5

poses of conducting any search or inspection in connection with the enforcement of the Act, this part, or any other regulation or permit issued under the Act;

(e) Forcibly assault, resist, oppose, impede, intimidate or interfere with any Authorized Officer in the conduct of any search or inspection described in paragraph (d) of this section;

(f) Resist a lawful arrest for any act prohibited by this part; or

(g) Interfere with, delay, or prevent, by any means, the apprehension or arrest of another person knowing that such other person has committed any act prohibited by this part.

§ 671.6 Enforcement.

(a) *General.* The owner or operator of any fishing vessel subject to this part shall immediately comply with instructions issued by an Authorized Officer to facilitate safe boarding and inspection of the fishing vessel, its gear, equipment, and catch for purposes of enforcing the Act and this part.

(b) *Signals.* Upon being approached by a Coast Guard cutter or aircraft, or other vessel or aircraft authorized to enforce the Act, the operator of a fishing vessel shall be alert for signals conveying enforcement instructions. The following signals extracted from the International Code of Signals are among those which may be used:

(1) "L" meaning "You should stop your vessel instantly,"

(2) "SQ3" meaning "You should stop or heave to; I am going to board you," and

(3) "AA AA AA etc." which is the call to an unknown station.

(c) *Boarding.* A fishing vessel signalled to stop or heave to for boarding shall:

(1) Stop immediately and lay to or maneuver in such a way as to permit the Authorized Officer and his party to come aboard;

(2) If requested, provide a safe ladder for the Authorized Officer and party;

(3) When necessary to facilitate the boarding, provide a man rope, safety line and illumination for the ladder; and

(4) Take such other actions as necessary to ensure the safety of the Authorized Officer and party and to facilitate the boarding.

§ 671.7 Penalties.

Any person or fishing vessel found to be in violation of this part will be subject to the civil and criminal penalty provisions and forfeiture provisions prescribed in the Act, and 50 CFR Parts 620 (Citations) and 621 (Civil Procedures), and other applicable law.

Subpart B—Management Measures

§ 671.21 Optimum yield.

(a) *Table.* The optimum yield for Tanner crab for each Federal registration area is set forth in Table I. These specifications of optimum yield are effective for the fishing year beginning on January 1 and ending on December 31, 1979.

TABLE I

Registration area	Optimum yield (in metric tons) [1]	Species
Registration Area A (Southeast-Yakutat).	2,495	All.
Registration Area E (Prince William Sound).	3,175	All.
Registration Area H (Cook Inlet).	2,404	All.
Registration Area J:		
Kodiak district	11,340	All.
South Peninsula district	13,608	All.
Aleutian district	907	All.
Bering Sea district:		
South of 58°	40,381	*C. bairdi.*
	110,000	*C. opilio.*
North of 58°, west of 164°..	17,268	All.

[1] Catches of Tanner crab in State of Alaska registration areas will be counted as part of the optimum yield specified for the contiguous Federal registration area.

(b) *Limitation.* The optimum yield for Tanner crab in each of the eight geographic areas in Table I is the maximum amount of Tanner crab which may be caught or harvested by fishing vessels subject to this Part in each respective area.

(c) *Field Orders.* If the Regional Director determines that the optimum yield in any geographic area specified in Table I will be reached, he shall issue a field order pursuant to § 672.27(a) prohibiting fishing for Tanner crab in that geographic area. Fishing for Tanner crab by vessels of the United States in the applicable geographic area is prohibited from the effective date of the field order.

§ 671.22 Size and sex-restrictions.

(a) *Female Tanner crabs.* No female Tanner crab may be retained.

(b) *Male Tanner crabs.* No male Tanner crab of the species *C. bairdi* measuring less than 5½ inches (140 mm) across the greatest width of the carapace may be retained, except that male Tanner crabs of the species *C. bairdi* in Federal registration area E (Prince William Sound) may be retained if they measure 5.3 inches (135 mm) or greater, across the greatest width of the carapace. The width measurement of Tanner crab is determined by measuring the greatest straight line distance across the carapace, including the spines, perpendicular to an imaginary line drawn between a point midway between the eyes and the midpoint of the posterior portion of the carapace.

(c) *General.* All female and undersized male Tanner crabs of the species *C. bairdi* must be returned to the sea immediately with a minimum of injury, regardless of their condition.

§ 671.23 Vessel registration.

(a) *Requirement.* Any vessel of the United States fishing for Tanner crab in any Federal registration area must be registered for fishing in such area pursuant to this section.

(b) *Applications.*

(1) The owner (or the owner's authorized agent) of a fishing vessel desiring to fish for Tanner crab in a Federal registration area, not registered for a State of Alaska registration area contiguous with such Federal registration area must submit to the Regional Director, within 30 days prior to the scheduled opening of fishing in the Federal registration area, a completed State of Alaska registration form to be used as a Federal form.

(2) A fishing vessel registered for a State of Alaska registration area will be deemed to be registered for the contiguous Federal registration area.

(c) *Registration certificate.* The registration certificate shall be signed by the owner (or the owner's authorized agent), shall be kept onboard by the operator at all times during fishing operations, and shall be shown by the operator upon request to any Authorized Officer.

(d) *Registration validation.* A registration certificate is not valid until the fishing vessel has complied with the inspection requirements contained in § 671.24. A valid registration certificate becomes invalid:

(1) Upon landing Tanner crab in a Federal registration area other than the area for which the vessel is registered (or other than the contiguous State of Alaska registration area); or

(2) Seventy-two (72) hours after the close of the season for the applicable Federal registration area, whichever occurs first.

(e) *Late registration.* The late registration of any fishing vessel may be permitted by the Regional Director in the case of the loss of a registered fishing vessel. For purposes of this paragraph, "loss of a registered fishing vessel" means that the fishing vessel is incapable of being used to take Tanner crab during the open Tanner crab season in the area for which it is registered. An application for late registration under this paragraph shall be documented by submission of adequate proof, in writing, concerning the loss of the vessel. The late registration shall be for the Federal registration area in which the lost fishing vessel was registered.

(f) *Expiration.* A registration certificate expires on the last day of the registration year. Registration for any subsequent year shall be obtained by re-application in accordance with the procedure set forth in this section.

(g) *Registration year.* The registration year shall be August 1 through July 31.

(h) *Exclusive registration areas.* (1) Federal registration areas E and H are exclusive registration areas. No fishing vessel registered for an exclusive Federal registration area may be registered for any other Federal registration area (exclusive or non-exclusive) during a registration year.

(2) A fishing vessel registered for an exclusive State of Alaska registration area may register only in the contiguous Federal exclusive registration area during that registration year.

(3) No operator of a fishing vessel registered for an exclusive Federal registration area may operate any other fishing vessel registered for any other exclusive Federal registration area.

(i) *Non-exclusive registration areas.* Federal registration areas A and J are non-exclusive registration areas. A fishing vessel may be registered for any or all of the non-exclusive Federal registration areas during any registration year.

§ 671.24 Vessel inspection.

(a) *Inspection.* (1) Within 72 hours prior to fishing for Tanner crab for the first time during an open season, each registered fishing vessel must have its holds and live tanks, if any, inspected by an Authorized Officer at an inspection point specified in paragraph (b) of this section.

(2) *Requirement.* A registration certificate will not be validated if there are Tanner crab on board the fishing vessel at the time of inspection.

(3) *Certificate.* No fishing vessel will be issued an inspection certificate unless a current registration certificate for the contiguous Federal registration area is displayed to the Authorized Officer conducting the inspection. The inspection certificate shall be signed by the current fishing vessel operator, shall be kept onboard by the operator at all times during fishing operations, and shall be shown by the operator upon request to any Authorized Officer.

(4) *Landings.* The operator of a fishing vessel landing Tanner crab in a Federal registration area other than the area for which the fishing vessel is registered (or other than in the contiguous State of Alaska registration area) must attach the inspection certificate to the back of the ADF&G copy (yellow copy) of the State of Alaska fish ticket at the time the Tanner crab are landed.

(b) *Inspection points.* Inspection points are those established by the ADF&G for State of Alaska purposes and by these regulations for Federal purposes. Additional inspection points may be authorized by the Regional Director if the Regional Director finds that:

(1) Existing inspection points are imposing an unusual and material hardship which affected fishermen cannot themselves mitigate; or

(2) The ADF&G has no practical means of making special administrative accommodations regarding existing inspection points; and

(3) Authorization of additional inspection points would not result in a significant likelihood of unauthorized fishing or other management or enforcement problems.

§ 671.25 Landing requirements.

(a) Except as provided in paragraph (b) of this section, all Tanner crab must be landed in the State of Alaska registration area contiguous to a Federal registration area for which the fishing vessel is registered.

(b) The operator of a fishing vessel who desires to land Tanner crab outside the State of Alaska, or in a State registration area other than the State registration area contiguous to a Federal registration area for which the fishing vessel is registered, shall contact, by radio or other means, an Authorized Officer prior to leaving the Federal registration area for which the fishing vessel is registered, and shall state to the Authorized Officer the amount of Tanner crab onboard at the time. A fishing vessel operator acting pursuant to this paragraph shall submit the vessel to inspection at such location as the Authorized Officer may require. The operator shall not land an amount of Tanner crab which is more than one hundred and ten (110) percent or less than ninety (90) percent of the amount stated to be present onboard upon leaving the Federal registration area, or observed to be present onboard at the time of any inspection.

(c) *Certificate validity.* If a fishing vessel lands Tanner crab pursuant to paragraph (b) of this section, the registration certificate of the fishing vessel becomes invalid. To again become validly registered for a Federal registration area, the fishing vessel must be reinspected pursuant to the procedures of § 671.24.

§ 671.26 Season and gear restrictions.

(a) *Season dates.* All season dates in this section are inclusive. Time periods begin at 12:01 a.m. and end at 11:59 p.m. on the dates specified, based on local zone time, unless otherwise specified.

(b) *General requirements.* (1) At least one buoy on each Tanner crab pot or ring net shall be legibly marked with the permanent ADF&G vessel license number of the fishing vessel using the gear or, if a fishing vessel does not have a permanent ADF&G vessel license number, with the official documentation number of the fishing vessel operating the gear. Identification numbers shall be painted on the top one-third of the buoy in numerals at least 4 inches in height and ½ inch in width in contrasting color to that of the buoy. The buoy markings shall be legible and visible on the buoy above the water surface when attached to the Tanner crab pot, and maintained in a legible condition.

(2) All Tanner crab pots shall contain an opening in the webbing of a side wall of the pot which has been laced, sewn or secured together by untreated cotton twine or other natural fiber no larger than 120 thread, which upon deterioration or parting of the twine produces an opening in the web with a perimeter equal to or exceeding one half of the tunnel eye opening perimeter.

(3) During a closed season for Tanner crab in any Federal registration area, Tanner crab pots shall either be removed from the water or stored in less than 25 fathoms (46 m) of water, with all doors secured fully open and all bait and bait containers removed, with the following exceptions:

(i) In the Kamishak Bay and Southern districts of the Cook Inlet area, the maximum pot storage depth is 15 fathoms (27 m);

(ii) Tanner crab pots with all doors secured fully open and with all bait and bait containers removed may be stored in water depth greater than the maximum permissible storage depth for 72 hours prior to the opening of the Tanner crab season, and for 72 hours after the season closure where the pots are fished;

(iii) Tanner crab pots may be stored in waters deeper than 25 fathoms (46 m) if specifically allowed by this section.

(c) *Registration Area A.* Tanner crab may be taken in Registration Area A from September 1 through May 1 only, subject to adjustment by the Regional Director pursuant to § 671.27.

(d) *Registration Area E—(1) Districts.* The following districts within Federal Registration Area E are established:

(i) *Western District:* All waters east of the longitude of Cape Fairfield (148°53' W. longitude) south of line from the southern entrance of Port Nellie Juan at 60°36' N. latitude to Point Eleanor (60°34'42" N. latitude, 147°34'6" W. longitude) to the eastern tip of Smith Island (60°31'54" N. latitude, 147°19' W. longitude) to Montague Point (60°22'16" N. latitude, 147°06'0" W. longitude), west of a line

DEC 6 1978 UMI

V 4 3 / 2 3 5 D E 6 7 8 UMI

from Zaikof Point (60°18'12" N. latitude, 146°55'42" W. longitude) to Seal Rocks (60°10' N. latitude, 146°50' W. longitude) and west of the longitude of Seal Rocks.

(ii) *Eastern District:* All waters east of the longitude of Seal Rocks (60°10' N. latitude, 146°50' W. longitude), east of a line from Seal Rocks, to Cape Hinchinbrook (60°15'54" N. latitude, 146°37'18" W. longitude), south of a line from Point Bentinck (60°23'24" N. latitude, 146°05'36" W. longitude) to Point Whitshed (60°26'36" N. latitude, 145°53'12" W. longitude), and west of the longitude of Cape Suckling (51°59' N. latitude, 143°53'36" W. longitude).

(iii) *Hinchinbrook District:* All waters east of a line from Montague Point to the eastern tip of Smith Island, south of a line from the eastern tip of Smith Island to Johnstone Point (60°28'48" N. latitude, 146°37'18" W. longitude), north and east of a line from Cape Hinchinbrook to Seal Rocks (60°10' N. latitude, 146°50' W. longitude), and east of a line from Seal Rocks to Zaikof Point.

(2) *Seasons.* Tanner crab may be taken in Registration Area E from November 15 through May 31 only, subject to adjustment by the Regional Director pursuant to § 671.27.

(3) *Gear.* (i) Only Tanner crab pots may be used to fish for Tanner crab. Tanner crab taken by any other means must be returned immediately to the sea, with a minimum of injury, regardless of their condition.

(ii) Two escape rings, 4¾ inches (121 mm) in minimum inside diameter, so located on the vertical plane to permit the escape of undersized crabs, shall be provided for each Tanner crab pot.

(e) *Registration Area H*—(1) *Districts.* The following districts within Registration area H are established:

(i) *Central District.* All waters between a line extending from Boulder Point at 60°46'23" N. latitude, to Shell Platform C (60°45'50" N. latitude, 151°30'08" W. longitude), then to a point on the west shore at 60°46'23" N. latitude, and the latitude of Anchor Point Light (59°40'12" N. latitude, 151°52' W. longitude).

(ii) *Southern District.* All waters within a line from Anchor Point Light west to 59°46'15" N. latitude, 152°20' W. longitude, then south to 59°04'15" N. latitude, 152°20' W. longitude, then in a northeasterly direction to Cape Elizabeth (59°9'12" N. latitude; 151°53'18" W. longitude), then from Cape Elizabeth to Point Adam (59°15'12" N. latitude; 151°58'48" W. longitude), including Kachemak Bay.

(iii) *Kamishak Bay District.* All waters within a line from 59°46'15" N. latitude, 153°00'30" W. longitude, then east to 59°46'15" N. latitude, 152°20" W. longitude, then south to 59°04'15" N. latitude, 152°20" W. longitude, then southwesterly to Cape Douglas (58°50'54" N. latitude, 153°16'24" W. longitude), including Kamishak Bay.

(iv) *Barren Islands District.* All waters within a line from Cape Douglas to Cape Elizabeth, then south to 58°52' N. latitude, 151°53' W. longitude, then west to Cape Douglas.

(v) *Outer District.* All waters with a line from Point Adam to Cape Elizabeth, then south to 58°52' N. latitude, 151°53' W. longitude, then east to the longitude of Aligo Point (149°44'33" W. longitude), then north to the mainland of Alaska.

(vi) *Eastern District.* All waters east of the longitude of Aligo Point (149°44'33" W. longitude), west of the longitude of Cape Fairfield (148°53' W. longitude), and north of 58°52' N. latitude.

(2) *Seasons.* (i) Tanner crab may be taken in the Southern district from December 1 through April 30 only, subject to adjustment by the Regional Director pursuant to § 671.27.

(ii) Tanner crab may be taken in the Central, Kamishak Bay, Barren Islands, and Outer and Eastern Districts from December 1 through May 31 only, subject to adjustment by the Regional Director pursuant to § 671.27.

(3) *Gear.* During any king crab season established by the State of Alaska an aggregate of not more than 75 king and Tanner crab pots (including Tanner crab pots used in State waters) may be fished in Registration Area H from any registered tanner crab vessel.

(f) *Registration Area J*—(1) *Districts.* The following districts within registraton area J are established:

(i) *Kodiak District.* South of 58°52' N. latitude, west of 150° longitude and east of the longitude of Cape Kumlik (157°27' W. longitude).

(ii) *South Peninsula District.* Between the longitude of Cape Kumlik and the longitude of Scotch Cap Light (164°44'6" W. longitude).

(iii) *Aleutian District.* Between the longitude of Scotch Cap Light (164°44'6" W. longitude) and 172° E. longitude, and south of 54°36' N. latitude.

(iv) *Bering Sea District.* Bering Sea waters north of 54°36' N. latitude. The following subdistricts within the Bering Sea District are established:

(A) *Southeastern Subdistrict.* East of 168° W. longitude, and south of the latitude of Cape Newenham (58°39' N. latitude), and all Bristol Bay waters.

(B) *Pribilof Subdistrict.* West of 168° W. longitude and south of the latitude of Cape Newenham (58°39' N. latitude).

(C) *Northern Subdistrict.* North of the latitude of Cape Newenham (58°39' N. latitude). The following sections within the Northern Subdistrict are established:

(1) *Nome Section.* All waters of Norton Sound between the longitude of Penny River and the longitude of Tophok Head.

(2) *General Section.* All other waters of the northern subdistrict.

(3) *Seasons.* Subject to adjustment by the Regional Director pursuant to § 671.27, Tanner crab may be taken in Federal Registration Area J:

(i) In the Kodiak district from January 5 through April 30 only, except that in that portion of the Kodiak district between 156°20'13" W. longitude (Kilokak Rocks) to 157°27' W. longitude (Cape Kumlik) Tanner crab may be taken from January 5 through May 15 only.

(ii) In the South Peninsula district from November 1 to 12:00 noon, May 15 only;

(iii) In the Aleutian district from November 1 to 12:00 noon, June 15 only; and

(iv) In the Bering Sea district from 12:00 noon November 1 to 12:00 noon June 15 only, except that Tanner crab other than *C. bairdi* may be taken or possessed from 12:00 noon November 1 to 12:00 noon September 3 only.

(4) *Storage of Gear.* During the closed season for Tanner crab in the applicable geographic area, Tanner crab pots may be stored in the water only if stored:

(i) In the waters which are both west of 172° W. longitude and 30 fathoms (55 meters) or less in depth; or

(ii) In the Southeastern Subdistrict, in the waters which are bounded on the north by 58° N. latitude, on the south by 57° N. latitude, on the east by 164° W. longitude and on the west by 166° W. longitude.

§ 671.27 Time and area closures.

(a) *Field orders.* (1) Field orders issued by the Regional Director under this part shall include the following information: (i) A description of the area to be opened or closed; (ii) the effective date and any termination date of such opening or closure; and (iii) the reason for the opening or closure.

(2) No field order issued under this section shall be effective until:

(i) It is filed for publication with the FEDERAL REGISTER;

(ii) It has been posted and otherwise made available to the public, in accordance with procedures customarily used by the ADF&G for posting and publicizing of similar notices of closure for 48 hours prior to its effective date; and

(iii) It has been broadcast, at those time intervals, channels and frequencies customarily used by the ADF&G to broadcast similar notices of closure, for 48 hours prior to its effective date.

(3) Field orders issued pursuant to this section shall remain in effect until the earlier of the following dates: (i) Any expiration date stated in the field order; or (ii) the effective date of any field order which modifies, rescinds, or supersedes the initial field order.

(b) *In-season adjustments*—(1) *General.* The Regional Director may, following consultation with the ADF&G, adjust the opening and closing dates for the Federal registration areas, districts, subdistricts, and sections specified in § 671.26.

(2) *Determinations.* Any adjustment under this section shall be based on a determination by the Regional Director that (i) the condition of Tanner crab stocks in any such geographic area is substantially different from the condition anticipated at the beginning of the fishing year, and (ii) such differences reasonably support the need for in-season conservation measures to protect such Tanner crab stocks.

(3) *Data.* Fishery data reported in-season which relate to one or more of the following factors may be considered in making this determination:

(i) The effect of overall fishing effort within the area;

(ii) Catch per unit of effort and rate of harvest;

(iii) Relative abundance of Tanner crab within the area in comparison with pre-season prediction;

(iv) The proportion of immature or softshell Tanner crab being handled;

(v) General information on the condition of Tanner crab within the area; and

(vi) Any other factors relevant to the conservation and management of Tanner crab.

(4) *Procedures.* (i) The Regional Director shall publish proposed adjustments in the FEDERAL REGISTER for public comment before they are made final, unless the Regional Director finds for good cause that such advance notice and public procedure are impracticable, unnecessary, or contrary to the public interest.

(ii) If the Regional Director decides, for good cause, that any in-season adjustment is to be made without affording a prior opportunity for public comment, public comments on the necessity for, and extent of, the adjustment will be received by the Regional Director for a period of 15 days after the effective date of the adjustment.

(iii) During any such 15-day period, the Regional Director shall make available for public inspection, during business hours, the aggregate data upon which the adjustment was based. (Address: National Marine Fisheries Service, Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802).

(iv) If comments are received during the 15-day period, the Regional Director shall reconsider the necessity for the adjustment and, as soon as practicable after that reconsideration, shall either: (A) Publish in the FEDERAL REGISTER a notice of continued effectiveness of the adjustment, responding to comments received; or (B) modify or rescind the adjustment.

(5) *Notice of adjustments.* The Regional Director shall give notice of in-season adjustments by issuance of field orders in accordance with the procedures in paragraph (a) of this section.

(c) *Optimum yield.* No action which has the effect of raising the optimum yield for Tanner crab in any geographic area as specified in Table I of § 671.21(a) is authorized under this section.

(d) *Prohibition.* Any fishing for Tanner crab contrary to a field order issued under this section is prohibited.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-02-M]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 910]

HANDLING OF LEMONS GROWN IN CALIFORNIA AND ARIZONA

Proposed Amendment of Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice proposes amending the rules and regulations to permit the optional use of upward adjustments by handlers in Districts 1 and 3, during the balance of the 1978-79 season, of not to exceed 100 percent of their average weekly pick. This would allow such handlers the option of receiving a larger proportion of their allotment earlier in the season, and enable them to use their proportionate share of the marketing opportunity more advantageously.

DATES: Comments must be received by December 21, 1978. Proposed effective dates: January 1, 1979, through July 31, 1979.

ADDRESSES: Send two copies of comments to the Hearing Clerk, U.S. Department of Agriculture, Room 1077 South Building, Washington, D.C. 20250, where they will be made available for public inspection during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: The rules and regulations (Subpart—Rules and Regulations; 7 CFR 910.100-910.180) are effective pursuant to the applicable provisions of the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The proposed amendment of said rules and regulations was recommended by the Lemon Administrative Committee, established under the order as the agency to administer its terms and provisions.

Under the order the prorate base of each handler is based upon his average weekly pick (the average weekly amount of lemons harvested and delivered to such handler's pickinghouse during a specified number of weeks preceding the computation date). In recognition of the fewer number of weeks during which lemons are harvested in Districts 1 and 3, the order provides that the handlers in such districts may request and be granted an upward adjustment in their average weekly pick to accelerate their receipt of allotment during the first half of their season, subject to payback during the last half of their season of the extra allotment received. The order provides in § 910.53(h) that the percentage of adjustment, currently set at not to exceed 50 percent in §§ 910.53(f)(1) and 910.153(e)(3), may be changed.

The committee reports that, due to the conditions expected to prevail during the balance of the 1978-79 season, the percentage of adjustment permitted should be changed to permit the optional use of upward adjustments by handlers in Districts 1 and 3 of not to exceed 100 percent of their average weekly pick. This would allow such handlers the option of receiving a larger proportion of their allotment earlier in the season, and enable them to use their proporationate share of the marketing opportunity more advantageously.

This added flexibility would be provided by an amendment to § 910.153(e)(3) Subpart—Rules and Regulations (7 CFR Part 910.100-910.180). As proposed to be so amended, § 910.153(e)(3) would read as follows:

§ 910.153 Prorate bases and allotments.

* * * * * *

(e) * * *

(3) *Granting of upward adjustment for Districts 1 and 3 applicants.* Upon receiving a duly filed application for an upward adjustment by a District 1 or 3 handler pursuant to § 910.53(f)(1) the committee shall adjust the average weekly pick of such handler by increasing such picks in the amount requested, but not in excess of 50 percent of his average weekly pick: *Provided, however,* That during the period January 1, 1979, through July 31, 1979, upon request of any such handler, the committee shall adjust such handler's average weekly pick in the amount requested but not in excess of 100 percent. * * *

* * * * *

Dated: December 1, 1978.

Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and to Order

Correction

In FR Doc. 78-32809 appearing on page 54642 in the issue of Wednesday, November 22, 1978, the following corrections should be made:

1. On page 54643 in the 3rd column, the 1st paragraph, the 1st word in the last sentence should begin with "They . . ." instead of "The . . .".

2. On page 54644 in the 3rd column, the 3rd paragraph, the 14th line should read, ". . . form price at the Lebanon plant would . . .".

3. On page 54645, in the 1st column, the 3rd full paragraph, the 13th line, the last word should be "proceeding".

4. In the 2nd column, the 3rd line should read, "under the St. Louis-Ozarks order as a result of having greater sales in the St. Louis-Ozarks market for [only one month.]".

5. On page 54646 in the middle column, the 2nd paragraph, the 5th line, the 1st word, should read, "producers" instead of "procedures".

6. On page 54647 in the 1st column, the 4th paragraph, the 7th line should read, ". . . each producer. This change will pro-[vide]".

7. In the middle column, the 5th paragraph should read, "Kraft proposed that during each of the months of September through February at least one day's production of milk of a dairy farmer must be . . .".

8. On page 54647 in the middle column, the 4th paragraph, the 2nd and 3rd sentences should read, "The witness stated that Kraft plans to divert milk from its pool supply plant at Springfield, Mo., to its nonpool plants at Bentonville, Berryville and Springfield beginning in the fall months of 1978. Under the present order provisions, milk diverted to Bentonville and Berryville from Springfield would be priced at Springfield because these two locations are within 120 miles of Springfield."

9. On page 54648 in the 1st column, the 4th paragraph should read, "One of proponent's concerns was that milk which is diverted to its plants at Bentonville and Berryville be priced at the same level. The present provisions provide that milk diverted to nonpool plants within 120 miles of Springfield or St. Louis shall be priced at the plant from which diverted. Since the Bentonville and Berryville plants are within 120 miles of Springfield, any milk diverted by Kraft from the Springfield plant to such locations will receive the same price."

10. In the middle column, the 1st paragraph, the 15th and 21st lines, the words, "producers" and "previous" should replace, "procedures" and "provious", respectively.

11. The middle column, the 2nd sentence should read, "The money is deducted by the market administrator in the computation of the blend price and is turned over to an agency composed of pro-[ducer representatives.]".

12. In the 3rd column, the 2nd paragraph, the 1st sentence should read, "At the request of the cooperative, a representative of the United Dairy Industry Association presented data in support of the cooperative's position that additional funds are needed by the agency."

13. Also, in the 3rd column, the 4th paragraph, the 2nd sentence should read, "He stressed that while he was not opposed to advertising and promotion he felt that the higher assessment to producers would be passed on to Kroger through the price that producers charge Kroger for milk.".

14. On page 54649 in the 1st column, the 1st full paragraph, the last sentence should read, "The funding rate adopted herein is in line with these costs increases for newpaper and radio advertising."

15. Also, in the 3rd full paragraph, the 8th line should read, "equal to .72 percent of the weighted . . ."

16. On page 54650 in the middle column, § 1062.7(d)(3), the word, "plan" should read, "plant".

17. Also, the last sentence in that column should read, "2. Section 1062.13 is revised to read as follows:".

[7590-01-M]

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 50]

DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Acceptance Criteria for Emergency Core Cooling Systems for Light-Water-Cooled Nuclear Power Plants

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The U.S. Nuclear Regulatory Commission is considering amending its regulations to change certain technical as well as nontechnical requirements within the existing emergency core cooling system rule. Modifications under consideration would take into account (1) experience gained in the licensing process, (2) new research information, and (3) operating experience. This notice is to invite advice and recommendations on several questions concerning the acceptance criteria for emergency core cooling systems in light-water-cooled nuclear power plants. There will be a later opportunity for public comment in connection with any proposed rules that may be developed by the Commission.

DATES: Comment period expires February 5, 1979.

ADDRESSES: Interested persons are invited to submit written comments and suggestions to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received by the Commission may be examined in the Commission's Public Document Room at 1717 H Street, N.W., Washingon, D.C.

FOR FURTHER INFORMATION CONTACT:

Mr. James A. Norberg, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, phone 301-443-5921.

SUPPLEMENTARY INFORMATION:

HISTORICAL BACKGROUND

Emergency core cooling systems (ECCS) were recognized in 1966 as important engineered safety features for mitigating the consequences of a postulated loss-of-coolant-accident (LOCA) in light-water-cooled nuclear power plants. During the period 1966 to 1971 extensive research programs were initiated to better understand the LOCA and several comprehensive reviews were made to evaluate the adequacy of ECCS. ECCS designs submitted for licensing safety evaluation were reviewed on a case-by-case basis.

By 1971, much significant research information on the LOCA/ECCS had been obtained, and the Regulatory staff had acquired extensive experience in its licensing review of over 50 ECCS designs. Included in this experience was the large amount of staff time spent in individual ECCS-related licensing reviews. In some cases new evaluation models, assumptions, and parameters were proposed for each successive plant.

To alleviate this situation, an Interim Policy Statement (IPS) providing specific guidance on ECCS evaluations and based on the then current state of knowledge of LOCA/ECCS was developed. The IPS was issued by the Commission immediately effective on June 29, 1971. However, following public comment, the Commission announced its decision on November 30, 1971, to hold a rulemaking hearing to determine whether the IPS should be retained as issued or whether different criteria should be adopted.

A rulemaking hearing, convened in January 1972, generated an extensive record of discussion and evaluation of the available evidence (i.e., experimental results and analytical models) pertinent to LOCA/ECCS. The complete hearing record was certified to the Commission for the Commission's use in making its determination of policy on ECCS. Based on this record, the Commission Opinion of December 28, 1973 (CLI-73-39, 6 AEC 1085) was issued, providing the basis for the ECCS rule 10 CFR § 50.46, "Acceptance Criteria for Emergency Core Cooling Systems for Light Water Nuclear Power Reactors," and Appendix K, "ECCS Evaluation Models," to 10 CFR Part 50 (published in the FEDERAL REGISTER January 4, 1974).

In its Opinion, the Commission carefully considered the different views produced by the record and decided on the criteria and the required and acceptable features of the ECCS evaluation models. The Commission stated its belief that the margin provided by these criteria and their inherent conservative features would be adequate to assure core cooling should a design basis LOCA ever occur.

The Commission in its Opinion also stated its intent to provide latitude for change when new research information became available.

For many years, the Commission (and its predecessor agency, the Atomic Energy Commission) have had programs of experimental and theoretical research related to ECCS performance. The rulemaking Opinion noted the ongoing research programs of the Commission and the nuclear industry, and their potential for improved knowledge (6 AEC 1085, 1088,

identified since the promulgation of

For the Nuclear Regulatory Com-

the United States law on diplomatic

V 43/235 DEC 6 78 UMI

1094, 1103, 1120, 1124, 1129). The government and industry ECCS research programs have produced significant new information in the years since the rulemaking. Furthermore, the Commission has acquired significant experience in using the ECCS rule, through its review of many ECCS evaluation models and licensing of ECCS designs.

In order to utilize new technical information and experience in the licensing process, the Commission is considering modifying the ECCS rule with both procedural changes and technical changes. The procedural changes provide improvements to the rule which would eliminate difficulties previously encountered in applying the rule. The technical changes would be in the direction of improving the realism of ECCS licensing evaluation in the light of present knowledge, while preserving a level of conservatism consistent with that knowledge.

Summary of Proposed Rule Changes

The Commission is considering the intiation of rulemaking in two phases, as follows:

PHASE 1 (SHORT TERM)

Initiate rulemaking for procedure-oriented and certain specific technical changes in the ECCS rule. These rule changes are expected to have little impact on the overall conservatism of the rule, and such changes are anticipated to require a minimum of time and effort to implement.

PHASE 2 (LONG TERM)

In parallel with Phase 1, initiate development of the bases for a more comprehensive rulemaking action to incorporate new knowledge and operating experience into the ECCS rule. This effort would include assessing the impact of proposed changes on the overall conservatism of the rule. As part of the overall assessment of conservatism, a systematic review of all relevant information will be performed to ensure that it is appropriately considered. Ne information on decay heat and zirconium-water reaction would be considered together with all other new information, including any adverse results (for example, discrepancies in the pretest prediction of significant research test results, uncertainties associated with the prediction of counter-current flow phenomena and core spray distribution, and the possibility of steam generator tube failures). If, during this review, it is determined that any information requires more specific treatment than is presently provided in Appendix K or in present licensing practices, appropriate rulemaking action will be taken.

The Commission staff is presently assessing the impact on the overall conservatism of the rule of the proposed Phase 1 changes. Concurrently, the staff is developing the methodology for assessing the technically complex Phase 2 changes. It is expected that the Phase 1 assessment will be completed within six months. A completion time for the Phase 2 assessment has not been established, but this assessment is expected to take several years to complete. In each case, the drafting of the proposed rule could begin with the end of the assessment.

Specific Considerations

The following specific areas are under consideration by the Commission for proposed rulemaking:

PHASE 1 (SHORT TERM) PROCEDURE-ORIENTED AND CERTAIN SPECIFIC TECHNICAL RULE CHANGES

1. *Reanalysis Requirements.* a. *Reanalysis Requirements for Construction Permit Applications.* Changes to 10 CFR § 50.34 would allow for certain corrections to be made to vendor ECCS computer analysis codes during the construction permit review or during construction of the plant without a complete reanalysis of ECCS performance in compliance with 10 CFR § 50.34 until the operating license review. Criteria would be provided to define the bounds within which the corrections could be accepted without plant specific reanalysis.

b. *Reanalysis Requirements for Operating License Applications and Licensed Plants.* The changes to 10 CFR § 50.34 would dispense with ECCS performance recalculations in the event of corrections to vendor ECCS computer analysis codes if it is demonstrated, on a generic basis, that the model changes reduce the peak cladding temperature and if no change in plant technical specifications is involved.

2. *Return to Nucleate Boiling.* The changes would allow an assumption of a return to nucleate boiling during the blowdown phase of the LOCA when supported by applicable data. This change would involve modifications to 10 CFR Part 50, Appendix K, paragraph I.C.4.e. The objective of this change is to allow use of recent data on rewetting.

3. *Steam Cooling Requirements for Flooding Rates Below One Inch Per Second.* The changes would delete the requirement [Appendix K, paragraph I.D.5] that heat transfer calculations be based on the assumption that cooling is only by steam for flooding rates below one inch per second and replace it with a requirement that heat transfer calculations be based on applicable experimental data appropriately accounting for flow blockage if it is predicted to occur.

4. *Transition Boiling Correlation Reference.* This change would replace the reference to the transition boiling correlation in Appendix K, paragraph I.C.5. with an improved reference in a later publication by the same authors.

Items 2 and 3 above constitute certain specific technical changes to the present rule. However, recent assessments strongly indicate that these changes do not significantly affect the overall conservatism of the rule. Therefore, these changes will be considered along with the procedural changes of items 1 and 4 above. The results of the assessment which show that these changes have a negligible impact on the overall conservatism of the rule will be made available as part of the rule making process.

PHASE 2 (LONG TERM) RULE CHANGES BASED ON NEW INFORMATION FROM RESEARCH AND OPERATING EXPERIENCE

The following changes to the ECCS rule based on new information from research and operating experience are being considered by the Commission;

1. *Research Information.* a. *Fission Product Decay Heat Rate.* The changes would involve revising paragraph I.A.4 of Appendix K which assumes a heat generation rate from radioactive decay of 1.2 times the October 1971 ANS Proposed Standard[1] to another specified decay heat rate consistent with present knowledge. Consideration will be given to the combination of uncertainties in decay heat with uncertainties in initial heat rate.

b. *Zircaloy Oxidation Rate.* The changes would involve revising paragraph I.A.5. of Appendix K from the Baker-Just equation[2] of May 1962 to a calculation method based on present knowledge and needed conservatism. In addition, the basic performance requirement set forth in § 50.46(b)(2) that "the calculated total oxidation of the cladding shall nowhere exceed 0.17 times the total cladding thickness before oxidation" would also be reexamined to ensure consistency with the new data on strength and ductility of partially oxidized zircaloy.

c. *Additional Data.* The changes will include any changes to the ECCS rule needed to take into account new information that indicates the present rule is less conservative than previously believed, such as (1) the delay of emergency coolant injection caused by heat transfer to the coolant from hot walls and (2) less favorable distribution of BWR ECCS core spray.

2. *Operating Experience.* The changes will include any revisions to the ECCS rule needed to account for phenomena not specifically identified at the time the rule was promulgated but that have since been identified through operating experience as having a significant effect on ECCS performance. Such revisions will be identified during the development of the proposed rule.

During the development of the proposed rule changes, an assessment will be made of the impact of the proposed changes on the overall conservatism of the ECCS rule. The impact assessment will include a reassessment of the requirements presently specified in Appendix K in light of current information (e.g., statistical combination of heat sources) as well as consideration of other phenomena of importance to ECCS performance that have been identified since the promulgation of Appendix K (e.g., new semiscale and LOFT test results, steam generator tube ruptures, countercurrent flow phenomena, BWR core spray distribution, subcooled break flow). A methodology will be developed for assessing the impact of proposed technical changes on the overall conservatism of the rule.

Advice and recommendations on the proposed areas of revision to the acceptance criteria for emergency core cooling systems in light-water-cooled nuclear power plants are invited from all interested persons. Specifically, comments are requested on the following questions:

1. Under what circumstances should corrections to ECCS models be used during licensing review without necessitating complete reanalysis of a given plant or an entire group of plants?
2. What would be the impact of the proposed procedure-oriented and certain specific technical rule changes?
3. How should safety margins be quantified and how can acceptable safety margins best be specified?
4. What phenomena have been identified since promulgation of the ECCS rule that are significant to ECCS performance and that are not adequately considered in the existing ECCS rule, in light of current knowledge and experience, or in current licensing practices?
5. How should the ECCS rule provide for the inclusion of new research information and operating experience? Can or should this be done on a continuing basis? How should provision of acceptable margins be handled in such a process?

The Commission has concluded preliminarily that the procedure-oriented and certain technical changes (Phase 1) to the emergency core cooling system rule would not constitute a major Federal action significantly affecting the quality of the human environment and as such will not require the preparation of an environmental impact statement pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA).

In view of the uncertainty regarding the possible technical changes to the ECCS rule based on new information from research and operating experience (Phase 2), the Commission cannot make a determination at this time concerning the possible need for an environmental impact statement. Any proposal for rulemaking action along these lines will include a Commission determination whether or not an environmental impact statement should be prepared for that action.

DEPARTMENT OF STATE

[22 CFR PART 151]

[Docket No. SD—140]

COMPULSORY LIABILITY INSURANCE FOR DIPLOMATIC MISSIONS AND PERSONNEL

Notice of Proposed Rulemaking

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State proposes to add new regulations to 22 CFR as Subchapter P—Diplomatic Privileges and Immunities. These regulations specify the insurance required of all diplomatic missions, members of missions and their families, and officials of the United Nations entitled to diplomatic immunity, including the limits of liability, and describe the evidence of insurance necessary before the Department of State endorses applications for diplomatic automobile license plates or exemptions from registration fees.

DATES: Written comments must be received by February 2, 1979. In addition, interested persons may offer comments orally at a public meeting to be held at 10 a.m., February 5, 1979, at Room 1912, Department of State, 2201 C Street NW., Washington, D.C. 20520. Written notification of intent to offer oral comments at this public meeting must be received by February 2, 1979.

ADDRESS: Written comments and written intention to attend the meeting and offer oral comments should be sent to David P. Stewart, Special Assistant, Office of the Legal Adviser, Room 6423, 2201 C Street NW., Washington, D.C. 20520.

FOR FURTHER INFORMATION CONTACT:

David P. Stewart, Department of State, Washington, D.C., telephone 202-632-2149.

SUPPLEMENTARY INFORMATION: The Diplomatic Relations Act, Pub. L. 95-393, September 30, 1978 (22 U.S.C. 254a et seq., 28 U.S.C. 1364 will become effective December 29, 1978. As of that date, previous statutes on diplomatic immunity dating from the eighteenth century will be repealed and the privileges and immunities provisions of the 1961 Vienna Convention on Diplomatic Relations (23 UST 3227, 500 UNTS 95), will be established as the United States law on diplomatic immunity.

Section 6 of the Act requires diplomatic missions, members of missions, their families, and senior officials of the United Nations who are entitled to diplomatic immunity to have and maintain liability insurance against risks arising from their operation of motor vehicles, vessels, or aircraft. The President is directed to establish the requirements for this liability insurance by regulation. Executive Order 12101 (43 FR 54195) delegates to the Secretary of State the authority to prescribe these regulations.

In consideration of the foregoing, it is proposed to amend Chapter I of 22 CFR, by adding a new Subchapter P, to read as follows:

SUBCHAPTER P—DIPLOMATIC PRIVILEGES AND IMMUNITIES

PART 151—COMPULSORY LIABILITY INSURANCE FOR DIPLOMATIC MISSIONS AND PERSONNEL

Sec.
151.1 Purpose.
151.2 Definitions.
151.3 Types of insurance coverage required.
151.4 Minimum limits for motor vehicle insurance.
151.5 Recommended limits for motor vehicle insurance.
151.6 Authorized insurer.
151.7 Policy terms consistent with the Act.
151.8 Evidence of insurance for motor vehicles.
151.9 Evidence of insurance required for diplomatic license plates and waiver of fees.
151.10 Minimum limits of insurance for aircraft and/or vessels.
151.11 Notification of ownership, maintenance, or use of vessel and/or aircraft; evidence of insurance.

AUTHORITY: Sec. 4, 63 Stat. 111 (22 U.S.C. 2658); Sec. 6 Pub. L. 95-393 (92 Stat. 809, 22 U.S.C. 254c); E.O. 12101 (43 FR 54195).

§ 151.1 Purpose.

This part establishes regulations required under section 6 of the Diplomatic Relations Act (Pub. L. 95-393; 22 U.S.C. 254c). These regulations require all missions, members of missions and their families, and those officials of the United Nations who are entitled to diplomatic immunity to have and maintain liability insurance against the risks of bodily injury, including death, and property damage, including loss of use, arising from the ownership, maintenance, or use in the United States of any motor vehicle, vessel, or aircraft.

§ 151.2 Definitions.

(a) "Act" means the Diplomatic Relations Act, Pub. L. 95-393 (22 U.S.C. 254a et seq., 28 U.S.C. 1364).

(b) "Persons subject to the Act" means the members of missions who

[4910-22-M]

Federal agencies. The following is a

9. The extent to which the noise standards do not apply to certain

V 4 3 / 2 3 5 DEC 6 78 UMI

are entitled to diplomatic immunity and their families as defined in section 2 of the Act, and senior United Nations officials.

(c) "Missions" means missions as defined in Section 2 of the Act.

(d) "Senior United Nations official" means a United Nations official entitled to diplomatic immunity as provided in § 19 of the Convention on Privileges and Immunities of the United Nations of February 13, 1946 (21 UST 1418; 1 UNTS 16).

(e) "Insurance" means insurance as required by the Act and these regulations.

§ 151.3 Types of insurance coverage required.

(a) Every person subject to the Act and every mission shall have and maintain with respect to any motor vehicle, vessel or aircraft owned by, leased to, or furnished for the regular use of every such person or mission liability insurance in accordance with the form, terms, and conditions provided for in these regulations.

(b) The insurance shall provide coverage against the following risks to third parties arising from the ownership, maintenance, or use in the United States of any motor vehicle, vessel, or aircraft:

(1) Bodily injury, including death;

(2) Property damage, including loss of use; and

(3) Any additional coverage required to be included in liability insurance policies by the jurisdiction where the motor vehicle, vessel or aircraft is principally garaged, berthed, or kept, such as uninsured motorist coverage or first party no-fault coverage.

§ 151.4 Minimum limits for motor vehicle insurance.

The insurance shall provide not less than the minimum limits of liability specified in the financial responsibility, compulsory insurance or other law of the jurisdiction where the motor vehicle is principally garaged.

§ 151.5 Recommended limits for motor vehicle insurance.

Every person subject to the Act and every mission should have and maintain insurance adequate to afford reasonable compensation to accident victims. Minimum limits of liability of $100,000 per person and $300,000 per incident for bodily injury, including death, and $50,000 per incident for property damage, including loss of use, are recommended to meet this objective.

§ 151.6 Authorized insurer.

The insurance must be issued by an insurer licensed to do business in the jurisdiction where the motor vehicle, vessel or aircraft is principally garaged, berthed or kept.

§ 151.7 Policy terms consistent with the Act.

The insurance shall be construed in conformity with the Act. In particular, no effect shall be given to any policy terms which are inconsistent or in conflict with those provisions of the Act stating that any suit against the insurer under the policy shall not be subject to any of the following defenses:

(a) That the insured is immune from suit;

(b) That the insured is an indispensable party; or

(c) In the absence of fraud or collusion, that the insured has violated a term of the contract, unless the contract was canceled before the claim arose.

§ 151.8 Evidence of insurance for motor vehicles.

(a) Every mission must periodically furnish evidence satisfactory to the Department of State that the required insurance is in effect for the mission, its members and their families.

Every senior United Nations official must also periodically furnish evidence satisfactory to the Department of State that the required insurance is in effect.

(b) The Department of State will accept as satisfactory evidence that the required insurance is in effect:

(1) A written statement of self-certification signed by the Chief of Mission, indicating that the mission, its members and their families have and will maintain insurance throughout the period of registration of all vehicles owned or leased or otherwise regularly used, and showing the name of the insurance company or companies and identifying each policy by number and name of insured; and

(2) A written statement of self-certification signed by a senior United Nations official, indicating that the official has and will maintain insurance throughout the period of registration on all motor vehicles owned or leased or otherwise regularly used, and showing the name of the insurance company or companies and identifying each by number and name of insured.

(c) A certificatin under paragraph (b) of this section by a Chief of a Mission to the United Nations or by a senior United Nations official shall be delivered to the Counselor for host country affairs of the United States Mission to the United Nations. All other certifications shall be delivered to the Chief of Protocol, Department of State.

§ 151.9 Evidence of insurance required for diplomatic license plates and waiver of fees.

The Department of State will not endorse on behalf of any person subject to the Act or any mission any application for diplomatic motor vehicle license plates or any application for waiver of motor vehicle registration fees without prior receipt of satisfactory evidence that the required insurance is in effect.

§ 151.10 Minimum limits of insurance for aircraft and/or vessels.

Insurance in respect of vessels and/or aircraft shall provide limits of liability adequate in light of reasonably foreseeable risks from the ownership, maintenance, or other regular use of vessels and/or aircraft.

§ 151.11 Notification of ownership, maintenance or use of vessel and/or aircraft; evidence of insurance.

(a) Each person subject to the Act and each mission must notify the Department of State in writing of the ownership, maintenance or other regular use of a vessel or aircraft in the United States by such mission or person.

(b) Notices under paragraph (a) of this section shall identify the vessel and/or aircraft with specificity, including model and manufacturer's name, and serial and registration numbers. Each notification shall be accompanied by a copy of the insurance policy or policies issued in respect of the vessel and/or aircraft. Such policy or policies need not be issued by the insurer providing liability insurance for motor vehicles.

(c) With regard to senior United Nations officials, missions to the United Nations and members of such missions as have diplomatic status and their families, notices and evidence of insurance under this section shall be delivered to the Counselor for Host Country Affairs of the United States Mission to the United Nations. All other notices under this section shall be delivered to the Chief of Protocol, Department of State.

EDITH J. DOBELLE,
Chief of Protocol
Department of State.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[23 CFR Part 772]

[FHWA Docket No. 78-33]

PROCEDURES FOR ABATEMENT OF HIGHWAY TRAFFIC NOISE AND CONSTRUCTION NOISE

Advance Notice of Proposed Rulemaking

AGENCY: Federal Highway Administration, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Federal Highway Administration (FHWA) is issuing this advance notice to request comments on existing noise abatement procedures and suggestions for improvement of these procedures.

DATES: Comments must be received on or before February 5, 1979.

ADDRESS: FHWA Docket No. 78-33, Federal Highway Administration, HCC-10, Room 4205, 400 Seventh Street SW., Washington, D.C. 20590. It would be appreciated if comments were sent in triplicate. All comments received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. ET, Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Mr. Jerry Reagan, Environmental Quality Division, Office of Environmental Policy (202-426-4836), or Mr. Stanley H. Abramson, Office of the Chief Counsel (202-426-0791), Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: The FHWA's current procedures for abatement of highway traffic noise and contruction noise were published on April 23, 1976 (41 FR 16936), and appear in Part 772 of 23 CFR § 772.25, which deals with traffic noise level prediction methods, was revised on October 4, 1978 (43 FR 45838).

The Federal Highway Administrator has directed that a review be made of such regulations in order to determine their effectiveness and judge their current applicability and necessity. The FHWA is issuing this advance notice to solicit public comments and suggestions on Part 772 as part of the agency's review of that regulation.

During the past two years several informal comments have been received on the requirements contained in Part 772. These comments have come from private citizens, State and local officials, FHWA field offices, and other Federal agencies. The following is a summary of the comments received:

1. Requirements for coordination with local officials (§ 772.17), analysis and abatement of construction noise (§ 772.23), and other measures not specifically included in Federal-aid highway legislation (23 U.S.C. 109(h),(i)) should be eliminated.

2. There is too little flexibility in the regulation. The detailed procedures such as those contained in §§ 772.11 and 772.25 should be reduced in order to recognize the technical skills of State and local agencies, allow more flexibility and reduce paperwork requirements.

3. The exception process provided in § 772.15 should be deleted. If abatement is found to be feasible along Type IB projects (uncontrolled access) the regulation requires that it be undertaken. However, on Type IA projects (partial and full control of access), where the most serious noise problems generally occur, a procedure is provided that allows exceptions to the design noise levels even if abatement is practical and feasible.

4. The design noise levels provided in § 772.13 are maximum levels above which abatement must be considered. However, these same levels are also used to indicate the existence of a noise impact. The FHWA has indicated that these levels are higher than desirable but reflect what is reasonably possible. The FHWA admits that traffic noise impacts can exist below these levels. Therefore, in addition to leading to decisions on the need to employ feasible abatement measures, the regulation should provide criteria for assessing impacts on health and welfare such as those issued by the Environmental Protection Agency (EPA) ("Information on Levels of Environmental Noise Requisite to Protect Public Health and Welfare with an Adequate Margin of Safety," EPA 550/9-74-004, March 1974).

5. In the evaluation of benefits and adverse social, economic and environmental effects (e.g., §§ 772.13(a), 772.15), the regulation does not specify that the cost of abatement measures should be included as an economic effect. If this is the intent, more appropriate wording would be "adverse social, economic and environmental effects and the cost of abatement."

6. The regulation should specifically provide for Federal participation in the costs of noise insulation for private residencies as a routine abatement measure (§ 772.21).

7. The regulation contains too many definitions (§ 772.5).

8. The list of factors which a State may want to consider in developing Type II projects (specifically for noise abatement) is unnecessary (§ 772.11(e)).

9. The extent to which the noise standards do not apply to certain types of projects should be clarified (§ 772.5(w)).

Comments on the foregoing suggestions and criticisms and on any other aspects of the current regulation are invited.

NOTE.—The Federal Highway Administration has determined that this document does not contain a major regulation according to the criteria established by the Department of Transportation pursuant to E.O. 12044. (23 U.S.C. 109(i), 315; 49 CFR 1.48(b)).

Issued on: November 28, 1978.

KARL S. BOWERS,
Federal Highway Administrator.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Montana Sulfur Oxides Control Strategy—Change of Public Hearing Date

AGENCY: U.S. Environmental Protection Agency.

ACTION: Ammouncement of postponement of public hearing.

SUMMARY: Notice is hereby given that the public hearing scheduled to receive comments on proposed regulations to control deficiencies in Montana's Implementation Plan on Wednesday, November 29, 1978 at 9:00 a.m. in the Civic Center Auditorium, Butte, Montana, has been postponed indefinitely due to progress by the State of Montana in correcting control deficiencies in its State Implementation Plan. Should a public hearing on the proposed EPA regulation be necessary in the future, the hearing will be rescheduled.[1]

DELAYED COMPLIANCE ORDERS

Proposed Approval Of Five Administrative Orders Issued By the State of Washington, Department of Ecology To Boise Cascade Corp. (2) Nanome Aggregates, Inc., Vaagen Brothers Lumber Co., Matney Lumber Co.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve five administrative orders issued by the State of Washington, Department of Ecology (DOE). The order requires these companies to bring air emissions from their facilities in Washington into compliance with certin regulations contained in the Federally-approved Washington State implementation Plan (SIP) by July 1, 1979. Because the orders have been issued to major sources and permits a delay in compliance with provisions of the SIP, they must be approved by EPA before they become effective as delayed compliance orders under the Clean Air Act (the Act). If approved by EPA, these orders will constitute additions to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment of EPA's proposed approval of these orders as delayed compliance orders.

DATE: Written comments must be received on or before January 5, 1979.

ADDRESS: Comments should be submitted to Director, Enforcement Division, EPA, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101. The State orders, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Kenneth D. Brooks, Environmental Protection Agency M/S 513, 1200 Sixth Avenue, Seattle, Washington 98101, Telephone: (206) 442-1387

SUPPLEMENTARY INFORMATION: The Boise Cascade Corporation operates a sawmill at Kettle Falls, Washington. The orders under consideration address emissions from the wigwam burner, the hog fuel boiler and veneer drier at the facility, which are subject to Washington Administrative Code (WAC) 18-04-040. The regulation limits the emissions of particulate matter, and is part of the federally approved Washington State Implementation Plan. The orders require final compliance with the regulation by July 1, 1979 through discontinuing use of the wigwam burner, derating the existing boiler and installation of a new fluid bed combuster. The source has consented to the terms of the orders and has satisfied particular due increments contained in these orders.

Matney Lumber Company operates a sawmill at Kettle Falls, Washington. The order under consideration addresses emissions from the wigwam burner at the facility which are subject to WAC 18-04-040. The regulation limits the emissions of particulate matter, and is part of the federally approved Washington State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979 through installation of a new wood fired boiler and elimination of the wigwam burner. The source has consented to the terms of the order and has satisfied particular due increments contained in the order.

Vaagen Brothers Lumber Company operates a sawmill at Colville, Washington. The order under consideration addresses emissions from the wigwam burner at the facility which are subject to WAC 18-04-040. The regulation limits the emissions of particulate matter, and is part of the federally approved Washington State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979 through installation of a new wood fired boiler and elimination of the wigwam burner. The source has consented to the terms of the order and has satisfied particular due increments contained in the order.

Nanome Aggregates, Inc. operates a limestone crushing and sacking operation at Valley, Washington. The order under consideration addresses emissions from crushing equipment at the facility which are subject to WAC 18-04-040. The regulation limits the emissions of particulate matter, and is part of the federally approved Washington State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979 through installation of a new baghouse, repair of duct work, and addition of new collection points and hooding. The source has consented to the terms of the order and has satisfied particular due increments contained in the order.

Because these orders have been issued to major sources of particulate emissions and permits a delay in compliance with the applicable regulation, they must be approved by EPA before they become effective as delayed compliance orders under section 113(d) of the Clean Air Act (the Act). EPA proposes to approve these orders because they satisfy the appropriate requirements of this subsection. The elements of the appropriate paragraphs of subsection 113(d) are met in these orders.

If these orders are approved by EPA, source compliance with the terms would preclude federal enforcement action under Section 113 of the Act against these sources for violations of the regulations covered by the orders during the period the orders are in effect. Enforcement against the sources under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the orders would also constitute additions to the Washington SIP. All interested persons are invited to submit written comments on the proposed orders. Written comments received by the date specified above will be considered in determining whether EPA may approve these orders. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order on 40 CFR Part 65.

(42 U.S.C. 7413, 7601.).

Dated: November 17, 1978.

DONALD P. DUBOIS,
Regional Administrator, Region X

DEPARTMENT OF ECOLOGY

In the matter of the compliance by Matney Lumber Company with Chapter 70.94 RCW and the Rules and Regulations of the Department of Ecology.

Delayed Compliance Order Docket No. DE 78-441

To: Mr. Frank Matney, Owner, Matney Lumber Co., Route 2, Box 307, Kettle Falls, WA 99141.

Matney Lumber Co. operates a wigwam burner at their sawmill in Kettle Falls, Washington. Emissions from the burner do not comply with provisions of the Washington State Air Quality Implementation Plan (S.I.P.).

The Department of Ecology has reviewed plans and schedules submitted by Matney Lumber Co. for the correction of this problem. Matney Lumber Co. will install a new wood fired boiler and eliminate the use of the wigwam burner.

In accordance with provisions of Section 113(d) of the Federal Clean Air Act, as amended, and after public notice, the Department of Ecology makes the following findings and issues the following order:

FINDINGS

1. The present wigwam burner is unable to comply with emission stahdards, Washington Administrative Code (WAC) 18-04-040 recodified as 173-400-040 (part of S.I.P.).
2. The proposed equipment is the best practicable and will provide for continuous compliance, WAC 18-04-040 recodified as 173-400-040.
3. The proposed schedule is as expeditious as practicable.
4. The proposed interim requirements are reasonable and practicable. The methods of control will provide the best practicable system for emission reduction and will prevent imminent and substantial endangerment to the health of persons.

RCW 70.94.332 reads in part: Whenever the department has reason to believe that any provision of this chapter or any rule or regulation adopted thereunder relating to the control or prevention of air pollution has been violated it may cause written notice to be served upon the alleged violator or violators and may include an order that necessary corrective action be taken within a reasonable time.

In view of the foregoing and in accordance with the provisions of RCW 70.94.332:

It is ordered That Matney Lumber Co. shall, upon receipt of this Order, take appropriate action in accordance with the following instruction:

The methods and equipment as described in submitted plans, specifications, schedules and other correspondence be installed according to the following schedule:

1. Begin construction of new boiler by June 1, 1978.
2. Complete construction of boiler by February 28, 1979.
3. Discontinue use of wigwam burner by June 1, 1979.
4. Source in compliance by July 1, 1979.

Matney Lumber Co. shall comply with the following interim requirements to reduce present emissions:

1. Maintain and operate wigwam burner with recognized good practice. This includes regular cleaning and repair of underfire grates. Underfire air blowers should be checked for proper operation weekly. Overfire air vents should be maintained in operating condition. Shell condition should be checked weekly and leaks fixed when found.
2. All precautions should be taken to reduce fugitive dust emissions. This includes, but is not limited to:
   a. Proper disposition of ash from burner;
   b. Reduced traffic speed at sawmill and in log yard;
   c. Road pallative should be used under extreme dry conditions.

Matney Lumber Co. shall comply with the following reporting requirements:

1. No later than five (5) working days after the completion of each step in the schedule, the Department of Ecology, Eastern Regional Office, will be notified in writing by Matney Lumber Co.
2. All notification or reports will be submitted to:
   Department of Ecology
   Eastern Regional Office
   E. 103 Indiana Avenue
   Spokane, WA 99207
   Attn: Carl J. Nuechterlein
3. Source test will be completed as required by Notice of Construction on new source. Interim monitoring is not required.

Matney Lumber Co. is hereby notified that failure to achieve final compliance by July 1, 1979 may result in a requirement to pay noncompliance penalties as stated in 113(e) of the Federal Clean Air Act.

Nothing in this order is to be construed in any way as to prevent enforcement and/or abatement action for any violation of any applicable law, rule, or regulation.

Dated at Olympia, Washington this 21st day of September 1978.

BRUCE A. CAMERON,
Assistant Director, Department of Ecology, State of Washington.

[FRL 1021-2; Docket No. VII-78-DCO-17]

DELAYED COMPLIANCE ORDERS

Proposed Delayed Compliance Order for City of Independence Power and Light Department, Independence, Mo.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to issue an administrative order to the City of Independence Power and Light Department. The order requires the company to bring air emissions from its Blue Valley Station in Independence, Missiouri into compliance with certain regulations contained in the federally-approved Missouri State Implementation Plan (SIP). Because the company is unable to comply with these regulations at this time, the proposed order would establish an expeditious schedule requiring final compliance by June 30, 1979. Source compliance with the Order would preclude suits under the federal enforcement and citizen suit provision of the Clean Air Act for violation of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on EPA's proposed issuance of the order.

DATES: Written comments must be received on or before January 5, 1979, before December 21, 1978. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If it is determined there will be significant public benefit in holding a hearing, it will be held after twenty-one days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESS: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, EPA, Region VII, 1735 Baltimore, Kansas City, Missouri 64108. Material supporting the order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Peter J. Culver or Rennelle Rae, EPA, Region VII, 1735 Baltimore, Kansas City, Missouri 64108, telephone 816-374-2576.

SUPPLEMENTARY INFORMATION: The City of Independence Power and Light Department operates an electric power generating plant at Independence, Missouri. The proposed order addresses emissions from Blue Valley Station, Units 1, 2 and 3 at this facility, which are subject to Missouri Air Quality Standards and Air Pollution Control Regulations for the Kansas City Metropolitan Area, Regulation III (10CSR10-2.040). The regulation limits the emissions of particulates, and is part of the federally-approved Missouri State Implementation Plan. The order requires final compliance with the regulation by June 30, 1979, and the source has consented to its terms. The source has agreed to meet the order's increments during the period of this informal rulemaking. The source has satisfied increments 1 and 2 contained in the order.

The proposed order satisfies the applicable requirements of Section 113(d) of the Clean Air Act (the Act). If the order is issued, source compliance with its terms would preclude further EPA enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether EPA should issue the order. Testimony given at any public hearing concerning the order will also be considered.

After the public comment period and any public hearing, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601)

DEC 6 1978 UMI

V 4 3 / 2 3 5

Dated: November 20, 1978.

DAVID R. ALEXANDER,
Acting Regional Administrator,
Region VII.

In consideration of the foregoing, it is proposed to amend 40 CFR Chapter I, as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By amending the table in § 65.300 to reflect approval of the following Federal delayed compliance order issued under Section 113(d)(1) of the Act.

[Docket No. VII-78-DCO-17]

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

In the matter of City of Independence Power and Light Department, Blue Valley Station, Independence, Mo., Docket No. VII-78-DCO-17.

This ORDER is issued this date pursuant to Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.* (the Act). this ORDER contains a schedule for compliance, interim requirements, and monitoring and reporting requirements. Public notice, opportunity for a public hearing, and thirty days notice to the State of Missouri have been provided pursuant to Section 113(d)(1) of the Act.

FINDINGS

On August 30, 1978, the United States Environmental Protection Agency (EPA) issued a notice of violation, pursuant to Section 113(a)(1) of the Act, to the City of Independence Power and Light Department, upon a finding that the Blue Valley Station Units 1, 2, and 3 are in violation of Missouri Air Quality Standards and Air Pollution Control Regulations for the Kansas City Metropolitan Area, Regulation III (10CSR10-2.040) a part of the applicable Missouri Implementation Plan as defined in Section 110(d) of the Act. This finding was based upon calculations of current emissions from the Blue Valley Station.

Said violation has extended beyond the thirtieth day after issuance of the August 30, 1978, notice of violation. This finding is based upon acknowledgement of continued violation by the City of Independence.

ORDER

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this ORDER is expeditious as practicable, and that the terms of this ORDER comply with Section 113(d) of the Act. *Therefore, it is hereby ordered:*

I. That the City of Independence Power and Light Department will comply with the Missouri Implementation Plan regulations in accordance with the following schedule on or before the dates specified therein.

A. Blue Valley Station Units 1, 2 and 3

1. September 25, 1978—Award contracts for erection of control equipment (Increment met).

2. November 1, 1978—Commence construction (Incerement met).

3. May 2, 1979—Complete construction on electrostatic precipitator No. 1.

4. May 16, 1979—Complete construction on electrostatic precipitator No. 2.

5. June 4, 1979—Complete construction on electrostatic precipitator No. 3.

6. June 30, 1979—Complete shakedown adjustments and debugging of control equipment and achieve final compliance with Regulation III (10CSR10-2.040).

II. That City of Independence Power and Light Department shall comply with the following interim requirements which are determined to be the best reasonable and practicable interim system of emission reduction (taking into account the requirement for which compliance is ordered in Section I, above) and are necessary to avoid an imminent and substantial endangerment to the health of persons and to assure compliance with Regulation III insofar as City of Independence Power and Light Department is able to comply during the period this ORDER is in effect:

1. The City of Independence Power and Light Department shall continue to operate Blue Valley Station Units 1, 2 and 3 with the full use of the existing mechanical collectors until such time as the boilers are taken off-line to tie in to the new pollution control equipment. These existing collectors shall be maintained and operated according to the manufacturer's recommendation, consistent with good engineering practice to achieve optimal collection efficiency.

2. In the event that additional natural gas becomes available, it shall be used in place of coal for boiler fuel.

III. That the City of Independence Power and Light Department shall comply with the following reporting requirements on or before the dates specified below:

Reporting requirements

1. No later than five days after any date for achievement of an incremental step or final compliance, specified in this ORDER, the City of Independence shall notify EPA in writing of its compliance, or noncompliance and reasons therefor, with the requirement. If delay is anticipated in meeting any requirement of this ORDER, the City of Independence shall immediately notify EPA in writing of the anticipated delay and reasons therefor. Notification to EPA of any anticipated delay does not excuse the delay.

2. All submittals and notifications to EPA pursuant to this ORDER shall be made to the Director, Enforcement Division, EPA, Region VII, 1735 Baltimore, Kansas City, Missouri 64108, telephone 816/374-2576.

IV. Nothing herein shall affect the responsibility of the City of Independence to comply with State or local regulations.

V. The City of Independence is hereby notified that your failure to achieve final compliance by July 1, 1979 (*or other applicable date specified in accordance with section 120(a)(2)(B) of the Act*) will result in a requirement to pay a noncompliance penalty under Section 120. In the event of such failure, the City of Independence will be formally notified, pursuant to section 120(b)(3) and any regulations promulgated thereunder, of its noncompliance.

VI. This ORDER shall be terminated in accordance with Section 113(d)(8) of the Act if the Administrator (*or his delegatee, as appropriate*) determines on the record, after notice and hearing, that an inability to comply with Regulation III above no longer exists.

VII. Violation of any requirement of this ORDER shall result in one or more of the following actions:

A. Enforcement of such requirement pursuant to Sections 113 (a), (b), or (c) of the Act, including possible judicial action for an injunction and/or penalties and in appropriate cases, criminal prosecution.

B. Revocation of this ORDER, after notice and opportunity for a public hearing, and subsequent enforcement of Regulation III above in accordance with the preceding paragraph.

C. If such violation occurs on or after July 1, 1979, notice of noncompliance and subsequent action pursuant to Section 120 of the Act.

VIII. This ORDER is effective immediately.

Date——

Administrator,
U.S. Environmental Protection Agency.

WAIVER OF RIGHTS TO CHALLENGE ORDER

City of Independence Power and Light Department, by the duly authorized undersigned, hereby acknowledges that Blue Valley Station, Units 1, 2, and 3 are in violation of Missouri Air Quality Standards and Air Pollution Control Regulations for the Kansas City Metropolitan Area, Regulation III (10CSR10-2.040), consents to the issuance of this Order and waives any and all rights under any provision of law to challenge this ORDER.

Date:

City of Independence.

DELAYED COMPLIANCE ORDERS

Proposed Delayed Compliance Order for Indiana Farm Bureau Cooperative Association, Inc.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to issue an Administrative Order to Indiana Farm Bureau Cooperative Association, Inc. The Order requires the Company to bring the gasoline loading and storage facility at Westfield, Indiana, into compliance with APC-15, Sections 3 and 4, a part of the federally approved Indiana State Implementation Plan (SIP). Because the Company is unable to comply with this regulation at this time, the proposed Order would establish an expeditious schedule requiring final compliance by July 1, 1979. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provision of the Clean Air Act (the

Act) for violation of the SIP regulations covered by the Order.

The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on U.S. EPA's proposed issuance of the Order.

DATES: Written comments must be received on or before January 5, 1979, and requests for a public hearing must be received on or before December 21, 1978. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after twenty-one days' prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. Material supporting the Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Arthur E. Smith, Jr., Attorney, Enforcement Division, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, at 312-353-2082.

SUPPLEMENTARY INFORMATION: Indiana Farm Bureau Cooperative Association, Inc. owns a gasoline loading and storage facility at Westfield, Indiana. The proposed Order addresses emissions from the gasoline loading and storage facility, which is subject to APC-15, Sections 3 and 4 of the Indiana Implementation Plan. The regulation limits the emissions of volatile organics (hydrocarbons) and is part of the federally approved Indiana State Implementation Plan. The Order requires final compliance with the regulations by July 1, 1979, and the source has consented to its terms. The source has agreed to meet the Order's increments during the period of this informal rulemaking.

The proposed Order satisfies the applicable requirements of Section 113(d) of the Clean Air Act. If the Order is issued, source compliance with its terms would preclude further U.S. EPA enforcement action under Section 113 of the Act against the source for violations of the regulations covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether the U.S. EPA should issue the Order. Testimony given at any public hearing concerning the Order will also be considered. After the public comment period and any public hearing, the Administrator of U.S. EPA will publish in the FEDERAL REGISTER the Agency's final action on the Order in 40 CFR Part 65.

Dated: November 24, 1978

JOHN MCGUIRE,
Regional Administrator,
Region V.

In consideration of the foregoing, it is proposed to amend 40 CFR Chapter I, as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By adding an entry to the table in § 65.190, Federal Delayed Compliance Orders under Section 113(d)(1), (3), and (4) of the Act, to reflect approval of the following order:

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION V

In the Matter of: Indiana Farm Bureau Cooperative Association, Inc., Westfield, Ind., proceeding pursuant to Section 113(d) of the Clean Air Act, as Amended [42 U.S.C. Section 7413(d)]

The Order is issued this date pursuant to Sections 113(a), 113(d) and 114 of the Clean Air Act, as amended, 42 U.S.C. Section 7401 *et seq.* (Act. This Order contains a schedule for compliance, interim control requirements, and reporting requirements. Public notice, opportunity for a public hearing, and thirty (30) days' notice to the State of Indiana have been provided pursuant to Section 113(d)(1) of the Act.

FINDINGS

1. On May 15, 1978, the United States Environmental Protection Agency (U.S. EPA) issued a Notice of Violation, pursuant to Section 113(a)(1) of the Act, to Indiana Farm Bureau Cooperative Association, Inc. (Indiana Farm), upon a finding that the Westfield, Indiana, gasoline loading and storage facility, was in violation of Indiana APC-15, Sections 3 and 4, a part of the applicable implementation plan defined in Section 110(d) of the Act. This finding was based upon emission factor calculations derived from data submitted to U.S. EPA by the subject facility.

2. In satisfaction of Section 113(a)(4) of the Act, opportunity to confer with the Administrator's delegate was given to Indiana Farm, and on June 7, 1978, an enforcement conference was held.

3. It has been determined that Indiana Farm is unable to immediately comply with the applicable implementation plan.

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this Order is as expeditious as practicable, and that the terms of this Order comply with Section 113(d) of the Act. Therefore, it is hereby ordered:

ORDER

I. Indiana Farm shall comply with the Indiana Implementation Plan regulations APC-15, Sections 3 and 4, as approved by U.S. EPA on May 14, 1973, including a vapor collection and disposal/recovery system, in accordance with the following schedule on or before the dates specified therein.

A. In regard to the gasoline loading and storage facility at Westfield, Indiana:

1. *September 6, 1978*—Indiana Farm shall submit preliminary control plans to U.S. EPA.

2. *December 1, 1978*—Indiana Farm shall submit final control plans to the U.S. EPA.

3. *December 1, 1978*—Indiana Farm shall award contracts for the control equipment.

4. *December 1, 1978*—Indiana Farm shall complete on-site construction for the control equipment.

5. *June 15, 1979*—Indiana Farm shall complete on-site construction.

6. *July 1, 1979*—Indiana Farm shall achieve final compliance with the Indiana Implementation Plan regulation APC-15, Sections 3 and 4, as approved by the U.S. EPA on May 14, 1973.

7. After July 1, 1979, Indiana Farm shall implement operation and maintenance procedures to maximize the control efficiency of the pollution control equipment.

II. Indiana Farm, Westfield, Indiana, gasoline loading and storage facility shall use the best practicable interim system of emission reduction so as to minimize hydrocarbon emissions; avoid any imminent and substantial endangerment to the health of persons; comply with the requirements of the applicable implementation plan insofar as it is able to; and, comply with the following interim requirements:

A. Indiana Farm shall insert fill-pipes to the bottom of the loading compartment in a vertical position. Indiana Farm shall control flow rate so as to minimize hydrocarbon emissions.

B. Indiana Farm shall minimize product spillage.

C. Indiana Farm shall fill storage tanks so as not to cause emissions of hydrocarbons through the venting system.

III. Indiana Farm, Westfield, Indiana, storage and gasoline loading facility, shall comply with the following emission monitoring and reporting requirements on or before the dates specified below:

A. *Emission Monitoring.* Indiana Farm shall maintain a record of the amount of gasoline which travels through the loading facility. This shall include the volume and vapor pressure of the gasoline.

B. *Reporting Requirement.* 1. No later than fifteen (15) days after any date for achievement of an incremental step of final compliance, specified in this Order, Indiana Farm shall notify U.S. EPA in writing of its compliance, or noncompliance and reasons therefore, with the requirement. If delay is anticipated in meeting any requirement of this Order, Indiana Farm shall immediately notify U.S. EPA in writing of the anticipated delay and reasons therefore.

2. A quarterly report shall be sent to the U.S. EPA reporting the progress of the program for installation of the control equipment and information required by paragraph I.A.

3. All submittals and notifications to U.S. EPA pursuant to this Order shall be made to Mr. Eric Cohen, Chief, Compliance Section, Enforcement Division, U.S. EPA, 230

V 4 3 / 2 3 5 DEC 6 78 UMI

South Dearborn Street, Chicago, Illinois 60604.

IV. Nothing herein shall affect the responsibility of Indiana Farm to comply with State or local regulations, or other Federal regulations.

V. Indiana Farm is hereby notified that its failure to achieve final compliance by July 1, 1979, at the Westfield, Indiana, storage and loading facility may result in a requirement to pay a noncompliance penalty under Section 120. In the event of such failure, Indiana Farm will be formally notified, pursuant to Section 120(b)(3) and any regulations promulgated thereunder, of its noncompliance.

VI. This Order is effective immediately.

Date ——

Administrator,
U.S. Environmental Protection Agency.

WAIVER OF RIGHTS TO CHALLENGE ORDER

Indiana Farm, by the duly authorized undersigned, hereby consents to the provisions of this Order and waives any and all rights under any provisions of law to challenge this Order.

Date ——

(Signature of authorized representative of source)

MEDICARE AND MEDICAID PROGRAMS

Automatic Extinguishment Systems for Long-Term Care Facilities

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice of intent to reconsider regulations.

SUMMARY: This notice sets forth alternatives and discusses the legal and program aspects of requiring sprinkler systems in all skilled nursing facilities (SNFs) and intermediate care facilities (ICFs) that participate in Medicare and Medicaid.

The purpose of the Notice is to obtain comments, suggestions, and pertinent information from all who are concerned with, or would be affected by, such requirements.

DATES: Consideration will be given to written comments recieved by January 30, 1979.

ADDRESS: Please address your comments to:

Janice M. Caldwell, Director, Division of Long Term Care, Department of Health, Education, and Welfare, Room 12A-52, 5600 Fishers Lane, Rockville, Md. 20857.

In commenting, please refer to file code HSQ-56-NI. Institutions and organizations are requested to submit comments in duplicate.

Comments will be available for public inspection, beginning approximately 2 weeks from today, at the address given above.

FOR FURTHER INFORMATION, CONTACT:

Janice M. Caldwell (301) 443-3346

SUPPLEMENTARY INFORMATION:

WHAT THE CURRENT LAW AND REGULATIONS REQUIRE

Section 1861(j)(13) of the Social Security Act requires that SNFs meet the requirements of the 1973 edition of the Life Safety Code (the Code) of the National Fire Protection Association (NFPA). There is no comparable statutory requirement for ICFs, but our regulations 42 CFR 449.12, require them to comply with the 1967 edition of the Code.

With respect to automatic extinguishment systems, the 1967 and 1973 editions of the Code are nearly identical. Under these codes, automatic extinguishment systems are required in all long-term care health facilities except those that are of fire resistant construction or are of protected noncombustible construction and not more than one story high. (NFPA LSC 1967 edition, section 10-2341) (NFPA LSC 1973 edition, section 10-2352)

CURRENT SITUATION

Under the requirements discussed above, approximately two thirds of all SNFs and ICFs that participate in the Medicare and Medicaid programs have automatic extinguishment systems. Concern over fire fatalities in long-term care facilities has led members of Congress and advocacy groups to recommend that we extend the requirement to all facilities.

DISCUSSION

A Presidential Commission study estimated that approximately 500 patients die in all health care institutions (including hospitals) by fire and smoke year. Of these 500 fatalities, approximately 25 occur in multi-death fires. A multi-death fire is defined by the NFPA as one resulting in three or more deaths. The consensus of fire protection experts, including those within the Department, is that automatic extinguishment systems would not save the lives of patients who are in the room of fire origin or near the fire source because sprinklers are not activated until the ambient temperture at the sprinkler head is between 135 and 165 degrees Fahrenheit for one or more minutes. By the time these temperatures are reached, it may be too late to save the lives of patients at or near the source of the fire.

Automatic extinguishment systems would, however, contain the fire and keep it from spreading to the rooms of other patients and to other parts of the building. They would undoubtedly prevent large scale fires (those that result in three or more deaths). Statistics compiled by the NFPA indicate that perhaps as many as 25 lives might be saved each year if automatic extinguishment systems were installed in all health care facilities in the country. Since, however, the Department could mandate sprinklers only in facilities that participate in Medicare or Medicaid, the number of lives saved by such action on our part may be less than the NFPA estimate.

ALTERNATIVES

It is our view that the following are the most practical alternatives available for consideration.

(1) Require automatic extinguishment systems in all long-term care facilities participating in Medicare or Medicaid.

(2) Require automatic extinguishment systems in all newly constructed long-term care facilities participating in Medicare or Medicaid and in existing structures that are converted into long-term care facilities after the effective date of the final regulations.

(3) Require automatic extinguishment systems in all newly constructed long-term care facilities participating in Medicare or Medicaid, and in existing structures that are converted into long-term care facilities after the effective date of the final regulations, except when those buildings are of fire resistive construction.

(4) Retain present automatic extinguishment system requirements: Continue to require automatic extinguishment systems in accordance with the NFPA's Life Safety Code.

(5) In facilities not required by the Code to have automatic extinguishment systems, require other measures (such as smoke detectors, special patient evacuation plans, staff emergency training, higher staff-patient ratios) if HCFA determines that the facility's fire safety protection is not adequate.

COST ESTIMATES

We estimate that the cost of implementing Alternative (1) would be between $400-$500 million.

Cost estimates are not possible for Alternatives (2) and (3) because it is difficult to estimate what the costs of new construction will be five or ten years from now and there is no way to predict how many new nursing homes will be built in the next few years.

The cost of implementing Alternative (4) would not substantially differ from what we are presently spending.

Alternative (5) might involve some increased administrative costs.

REQUEST FOR COMMENTS

We request comments, suggestions, and pertinent information to help us decide whether or not to propose amendments to our current regulations.

The Secretary particularly requests comments and information on the costs and the benefits of the options listed in this Notice. We seek comment on what the costs of each option would be. We seek comments on exactly how effective the different altenatives set out will be in preventing fires and saving lives. We also seek guidance on how to weigh the costs versus the benefits of alternative methods of controlling fire hazards in nursing homes—a difficult judgment that affects life and safety.

The first option proposed in the Notice, requiring sprinkler systems in all nursing homes, would significantly increase the costs of care in many nursing homes. We particularly seek comment on the cost-effectiveness of this option, on how expensive it will be, on the benefits it would produce, and on how cost effective it would be compared to other alternatives.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[43 CFR Part 8370]

USE AUTHORIZATIONS

Special Recreation Permits—Allocations and Transfers

AGENCY: Bureau of Land Management.

ACTION: Notice of intent to develop proposed rulemaking.

SUMMARY: The Bureau of Land Management is studying use allocations for river areas requiring limited use or river areas of scarce recreation resources, including development of procedures which will prevent the buying or selling of privileges conferred by a special recreation use permit. These are situations which must be closely controlled or use allotted in order to protect and/or enhance the resource and users' recreation experiences.

DATES: Written comments should be received on or before February 8, 1979.

ADDRESS: Send written comments to: Mr. William Brown, Bureau of Land Management (D-370), Denver Federal center, building 50, Denver Colorado 80225.

FOR FURTHER INFORMATION CONTACT EITHER:

Mr. William Brown, Bureau of Land Management (D-370), Denver Federal Center, building 50, Denver, Colorado 80225, telephone 303-234-5094; or Mr. Larry R. Young, Bureau of Land Management (WO-370), Interior Building, 18th and C Street, N.W., Washington, D.C. 20240, telephone 202-343-9353.

SUPPLEMENTARY INFORMATION: Recreational use of the public lands has been increasing tremendously over the past several years. Use of river areas of the public lands has been one of the fastest growing uses. Because of this greatly increased use, it has become apparent that some public land river areas are not capable of unlimited use, and a standard system of limiting or allotting certain uses is desirable. Many public land river areas have reached this condition. Other special areas managed by the BLM are approaching or have reached this state also.

It has also come to our attention that some commercial river runners may be buying and selling passenger day privileges allotted to them through special recreation permits. The BLM will not and cannot condone permittees selling privileges conferred to them by special recreation permits. Therefore, procedures are to be developed to eliminate this practice.

The BLM is therefore soliciting the public's help to devise a system which will equitably allot recreational river area use, and provide for orderly transfers of commercial recreation privileges in river areas. The BLM desires substantive, well-thought-out suggestions on this matter.

All comments and recommendations received will be considered when drafting proposed regulations. When developed, the proposed regulations will be published in the FEDERAL REGISTER as proposed rules, allowing the public further opportunity to comment before final regulations are adopted. Resolution of conflicting public comments and/or rejecting of comments on policy or legal grounds is the prerogative of the Secretary of the Interior.

Discussion papers concerning this matter shall be available in all BLM District and State Offices for 30 days beginning December 11, 1978.

GERALD E. PETTY,
Acting associate Director.

DEPARTMENT OF AGRICULTURE

Forest Service

COLVILLE NATIONAL FOREST

Precommercial Thinning; Availability of Environment Assessment Report

An Environmental Assessment Report that discusses precommercial thinning on approximately 1,180 acres of National Forest lands in Stevens County, Washington, is available for public review in the Forest Service Office in Colville, Washington.

Although this project involves application of the herbicide MSMA, the Environmental Assessment Report does not indicate that there will be any significant effect upon the quality of the human environment. Therefore, it has been determined that an environmental statement will not be prepared.

This determination was based upon consideration of the following factors, which are discussed in the Environmental Assessment Report: (1) Application of the herbicide MSMA in accordance with Federal, State, and local government regulations and requirements is not expected to have any unanticipated effects on the ecosystem (2) there will be no irretrievable or irreversible resource commitments on the proposed project areas; (3) physical and chemical effects of MSMA, when properly applied, have proven to be acceptable based on the best scientific evidence available; and (4) no known unique or rare resources within the proposed project areas.

Use of MSMA in accordance with Federal and State regulations provides controls which guarantees protection of human health and welfare.

No action will be taken prior to January 5, 1979.

The responsible official is Robert B. Terrill, Forest Supervisor, Colville National Forest, 695 So. Main, Colville, Washington, 99114.

Dated: November 21, 1978.

ROBERT B. TERRILL,
Forest Supervisor.

[3410-11-M]

ROADLESS AREA REVIEW AND EVALUATION

RARE II

A RARE II update was published in the FEDERAL REGISTER on Wednesday, September 13, 1978, which discussed the availablity of data. The purpose of this notice is to announce that Item 3, RPA Relationships, has been completed and is available at Regional Offices and Forest Supervisor's Offices. The RPA relationship was developed by determining the minimum acreage of the roadless areas needed to meet mid-level output goals for the year 2015, as

[1] New terminus.

V

men form attached, subject to the dis-

SPECIMEN PERMIT

assumed in Agreement CAB 18900, and

V 4 3 / 2 3 5 D E 6 7 8 UMI

set forth in the 1975 RPA Program. This baseline calculation shows that 1.054 roadless area containing 29.4 million acres would need to be allocated to nonwilderness to meet the mid-range goals for timber and developed recreation site visitor use. The remaining 997 roadless area contain 20 million acres.

The output aggregated to the National Level for the 1.054 areas as nonwilderness and 997 areas as wilderness are:

Resource	RPA goal from RARE II lands	Baseline output calculated October 1976
Sawtimber (potential yield in million board feet)	2,412	2,448
Timber products (potential yield in million cubic feet)	96.6	256.0
Developed recreation sites (visitor use in million recreation visitor days)	5.83	19.81
Dispersed recreation (visitor use in million visitor days)	19.5	36.0
Grazing use (million animal unit months)	1.93	2.53

This information was developed only as an intermediate step to display the relationship between RARE II roadless areas and the Resource Planning Act program goals. It does not represent an alternative being considered nor an allocation that is likely to be recommended in the final environmental statement for RARE II.

Dated: November 29, 1978.

JOHN R. MCGUIRE,
Chief.

[6320-01-M]

CIVIL AERONAUTICS BOARD

LAKER AIRWAYS LIMITED

Statement of Tentative Findings and Conclusions and Order to Show Cause

[Docket No. 33616; Order No. 78-11-143]

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 30th day of November, 1978.

Application of LAKER AIRWAYS LIMITED for amendment of its foreign air carrier permit under section 402 of the Federal Aviation Act of 1958, as amended.

By application filed October 5, 1978, Laker Airways Limited requests amendment of its foreign air carrier permit to consolidate the two route segments now authorized into a single route permitting it to operate scheduled service between London, England, on the one hand, and New York; New York, and Los Angeles, California, on the other hand.

Laker's existing permit, issued by Order 78-9-100, authorizes it to engage in foreign air transportaion of persons and their accompanied baggage between London and New York and between London and Los Angeles.[1] The application for consolidation of these two segments was accompanied by a diplomatic note from the British Embassy advising that the Route Schedules annexed to Bermuda II specifically provide for the carriage of transit traffic by a United Kingdom airline between two points in United States territory for which that airline is designated.[2]

In granting Laker its existing route authority to the United States, we determined that the carrier was substantially owned and effectively controlled by nationals of the United Kingdom; that it was fit, willing, and able to perform the air transportation; and that it was in the public interest to grant the carrier authority to serve New York and Los Angeles.[3] We believe these findings are equally applicable to the case at hand and warrant our approval of the permit amendment.[4]

Laker merely seeks to consolidate on one route segment traffic rights which, until now, were authorized on two, and which, we already have found to be in the public interest. The route consolidation, furthermore, would provide Laker increased scheduling flexibility, which ultimately would inure to the benefit of the traveling public by enabling the carrier to operate more efficiently and, consequently, offer its customers low fares. Finally, the authority we are proposing to grant Laker is specifically provided for in the United States-United Kingdom Air Services Agreement (Bermuda II). Thus, our decision is consistent with that agreement.

We, therefore, tentatively find and conclude that:

1. It is in the public interest to amend the foreign air carrier permit issued to Laker Airways Limited;

2. The public interest requires that the exercise of the privileges granted by the amended permit shall be subject to the terms, conditions, and limitations contained in the specimen permit attached to this order, and to such other reasonable terms, conditions, and limitations required by the public interest as may be prescribed by the Board.

3. Laker is fit, willing, and able to perform properly the foreign air transportation described in the specimen permit, and to conform to the provisions of the Federal Aviation Act of 1958, as amended, and the rules, regulations, and requirements of the Board:

4. The public interest does not require an oral evidentiary hearing on the application;[5] and

5. This amendment of Laker Airways Limited's foreign air carrier permit would not constitute "a major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(c) of the National Environmental Policy Act of 1969 and would not constitute a "major regulatory action" under the Energy Policy and Conservation Act of 1975, as defined in Part 313 of the Economic Regulations;[6]

Accordingly, 1. We direct all interested persons to show cause why we should not (1) make final our tentative findings and conclusions; and (2) issue an amended foreign air carrier permit to Laker Airways Limited in the specimen form attached, subject to the disapproval of the President;

2. Any interested persons having objections to the issuance of an order making final our tentative findings and conclusions and issuing the attached specimen permit shall, no later than December 11, 1978, file with the Board and serve on the persons named in paragraph 5 below, a statement of objections specifying the part or parts of the tentative findings or conclusions objected to, together with a summary of testimony, statistical data, and concrete evidence expected to be relied upon in support of the objections. If an oral evidentiary hearing is requested, the objector should state in detail why such a hearing is considered necessary and what relevant and material facts he or she would expect to establish through such hearing that cannot be established in written pleadings. Any interested person who wishes to answer these objecions shall file such answers not later than December 21, 1978;

3. If timely and properly supported objections are filed, we will give further consideration to the matters and issues raised by the objections before we take further action, *Provided,* that we may proceed to enter an order in accordance with our tentative findings and conclusions set forth in this order, if we determine that there are no factual issues presented that warrant the holding of an oral evidentiary hearing;[7]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Secretary shall enter an order which (1) shall make final our tentative findings and conclusions set forth in this order, and (2) subject to the disapproval of the President, shall issue an amended foreign air carrier permit to the applicant in the specimen form attached; and

5. We are serving this order upon Laker Airways Limited, the Ambassador of the United Kingdom of Great Britain and Northern Ireland in Washington, D.C., the U.S. Departments of State and Transportation, the Governors of the States of New York and California, and upon all U.S. certificated carriers.

We shall publish this order in the FEDERAL REGISTER and shall transmit a copy to the President of the United States.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

All Members concurred.

[1] The permit also authorizes it to perform charter trips in foreign air transportation subject to the terms, conditions, and limitations in Part 212 of our Economic Regulations.

[2] The carrier would not, and under sections 402 and 1108(b) of the Act could not, be authorized to carry local New York-Los Angeles "cabotage" traffic.

[3] See Order 78-9-44, making final the tentative findings and conclusions set forth in Order 78-6-61; and Order 78-9-100, making final the tentative findings and conclusions in Order 78-8-177.

[4] We know of no information to indicate that Laker's corporate structure or operations have changed, in the short period of time since our last authorizations, which would cast doubt upon the accuracy or validity of our previous findings.

[5] Any interested persons having objections to the issuance of an order making final the Board's tentative findings and conclusions, and issuing the attached permit, shall be allowed ten days in which to respond from the date of service of this order. Answers to objections shall be filed not later than ten days thereafter.

[6] Our tentative findings follow from the fact that this amendment will not significantly alter Laker's existing flight frequencies at New York or Los Angeles.

[7] Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

SPECIMEN PERMIT

UNITED STATES OF AMERICA, CIVIL AERONAUTICS BOARD, WASHINGTON, D.C., PERMIT TO FOREIGN AIR CARRIER (AS AMENDED)

Laker Airways Limited is authorized, subject to the provisions set forth, the provisions of the Federal Aviation Act of 1958, and the orders, rules and regulations of the Board, to engage in foreign air transportation with respect to persons and their accompanied baggage, as follows:

Between the terminal point London, England, and the coterminal points New York, New York, and Los Angeles, California.

The holder shall be authorized to engage in charter trips in foreign air transportation, subject to the terms, conditions, and limitations prescribed by Part 212 of the Board's Economic Regulations.

The initial tariff filed by the holder shall not set forth rates, fares and charges lower than those that may be in effect for any U.S. air carrier in the same foreign air transportation; *However,* this limitation shall not apply to a tariff filed after the initial tariff regardless of whether this subsequent tariff is effective before or after the introduction of the authorized service.

The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of the United Kingdom of Great Britain and Northern Ireland for British international air service.

The holder shall not operate any aircraft under the authority granted by this permit, unless the holder complies with the operational safety requirements at least equivalent to Annex 6 of the Chicago Convention.

This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and the United Kingdom of Great Britain and Northern Ireland shall be parties.

By accepting this permit, as amended, the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit, as amended.

The holder shall keep on deposit with the Board a signed counterpart of Agreement CAB 18900, an agreement relating to liability limitations of the Warsaw Convention and The Hague Protocol approved by Board Order E-23680, May 13, 1966, and a signed counterpart of any amendment or amendments to such agreement which may be approved by the Board and to which the holder becomes a party.

The holder (1) shall not provide foreign air transportation under this permit unless there is in effect thrid-party liability insurance in the amount of $1,000,000 or more to meet potential liability claims which may arise in connection with its oprations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation with respect to persons unless there is in effect liability insurance sufficient to cover the obligations assumed in Agreement CAB 18900, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request, the Board may authorize the holder to supply the name and address of an insurance syndicate in lieu of the names and address of the member insurers.

The exercise of the privileges granted shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall become effective on— .

Unless otherwise terminated at an earlier date pursuant to the terms of any applicable treaty, convention, or agreement, this permit shall terminate (1) upon the effective date of any treaty, convention, or agreement or amendment which shall have the effect of eliminating the route or routes authorized by this permit from the routes which may be operated by airlines designated by the Government of the United Kingdom of Great Britain and Northern Ireland (or in the event of the elimination of any part of the authorized route, the authority granted shall terminate to the extent of such elimination); or (2) upon the effective date of any permit granted by the Board to any other carrier designated by the Government of the United Kingdom of Great Britain and Northern Ireland in lieu of the holder, or (3) upon the termination or expiration of the Air Services Agreement between the Government of the United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland effective July 23, 1977 (Bermuda II) as amended: *However,* clause (3) of this paragraph shall not apply if, prior to the occurrence of the event specified in clause (3), the operation of the foreign air transportation authorized becomes the subject of any treaty, convention, or agreement to which the United States of America and the United Kingdom of Great Britain and Norther Ireland are or shall become parties.

The Civil Aeronautics Board, through its Secretary, has executed this permit and affixed its seal on

Secretary.

[6320-01-M]

[Order No. 78-11-152; Docket Nos. 33889 and 33764]

UNITED AIR LINES, ET AL.

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 30th day of November 1978.

Processing of further applications for unused authority under Section 401(d)(5) of the Federal Aviation Act as added by the Airline Deregulation Act of 1978.

On October 18, 1978, in anticipation of the President's signature of the Airline Deregulation Act of 1978, the Board by Regulation PR-80 issued

rules governing applications for

first-to-file requirement of the Act.

tion 401(d)(5)(G).) If thereafter a car-

data for that area by age, race, and

pleted between November 1, 1978 and

ment Act of 1976 (Pub. L. 94-265), and

V 4 3 / 2 3 5

rules governing applications for unused authority under new section 401(d)(5) of the Federal Aviation Act, as added by the Deregulation Act. By Order 78-10-73 of the same date the Board delegated functions under the unused authority provision of the Act to the Director, Bureau of Pricing and Domestic Aviation. Also on the same day, the Acting Manager Director issued a notice entitled "Processing Applications for Unused Authority", which in essence called for a queue on the sidewalk outside the Board's offices composed of representatives of carriers either applying under section 401(d)(5) for other carrier's unused authority or giving notice under section 401(d)(5)(G) of their intent to reactivate their own unused authority.

The queue called for by this notice duly formed, and continued until October 25, 1978, the day following the President's signature of the Deregulation Act, when the applicants were admitted to the Docket Section and filed their respective applications and notices. The Director of BPDA issued a number of orders exercising his delegated authority to rule on disputes concerning positions in the queue and suggestions by various parties for changes in the filing procedures. After the first queue had been admitted to the Docket Section, the Director observed that a new queue was already forming, apparently to establish priority for future applications for unused authority in markets where the first applicant failed to commence service within the time required by the new law. To avert the establishement of a perpetual queue outside the Board's offices, the Director undertook to promise in Order 78-10-119, October 26, 1978, that no such new queue would be recognized, and that new procedures would be adopted for processing future applications and notices under section 401(d)(5) which did not involve the necessity for a physical queue.

The purpose of this order is to establish such new procedures. Because some important authority is about to become "used" in the statutory sense, we are acting immediately by order; the procedures described here will, however, subsequently be proposed as amendments to new Subpart R of our Rules of Practice. At that time we will solicit comments on the procedures established here and on possible variants.

An initial study of the new Deregulation Act disclosed no ready alternative to the first-to-file principle, embodied in the clear language of the Act, whch appeared to mandate the use of a queue or some equivalent procedure. Thus in Order 78-10-111, the Bureau Director rejected the use of a lottery as being inconsistent with the first-to-file requirement of the Act. Further legal research, however, has brought to light judicial authority for procedures under "first-to-file" statutes which involve treating filings within a defined short period of time, *e.g.*, a day, as essentially simultaneous, and using a system of drawings or other random distributions to allocate the property or authority applied for among simultaneous applicants. The leading authority is *Thor-Westcliffe Development Co.* v. *Udall*, 314 F. 2d 257 (C.A.D.C. 1963), *cert. denied*, 373 U.S. 951, involving applications for mineral leases on federal lands.

We have accordingly decided to establish the following rules for processing future applications and notices under the unused authority provision of the Act.[1]

1. As between applications filed on different days, the first filed prevails.[2]

2. Applications filed on the same day will be treated as essentially simultaneous. Any unused authority applied for by only a single applicant (or by no more applicants than there are carriers with unused authority in the market) shall, if awarded, be awarded to that applicant. Where more carriers apply for unused authority in a market than there are carriers holding such unused authority, a drawing [3] will be held with respect to each such market to determine which carrier or carriers will have priority to receive the authority.

3. If a winning carrier in a market amends its application to delete that market before the application is granted, the next applicant as determined by the drawing will have priority to receive the authority.

4. When available unused authority in a market is granted, all other applications for that authority will be denied. (Here, "application" does *not* include a notice of intent under section 401(d)(5)(G).) If thereafter a carrier awarded such authority fails to commence service within the time specified by the Act, or gives notice that it does not intend so to serve, the market will again be open for new applications.[4]

5. The Director will make any necessary subsidiary rules to carry out the foregoing system of dealing with applications.

Accordingly, 1. We order that the procedures described above be used to process applications and notices under section 401(d)(5) of the Deregulation Act filed on or after December 4, 1978.

2. We dismiss all applications pending at the close of business on December 1, 1978, for authority awarded to another carrier or carriers.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[5]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 70-34037 Filed 12-5-78; 8:45 am]

[1] In the rules which follow, "application" includes a notice of intent to reinstitute service in a carrier's own market, "applicant" includes a carrier filing such as a notice of intent, and the "grant" of an application includes recognition of the effectiveness of such a notice of intent to preclude lower-ranking applications for the same authority. In Order 78-10-111, the Bureau Director held that the Act gives notices of intent no automatic priority over applications, a ruling we affirm.

[2] Telegraphic applications will not be recognized.

[3] Initially the drawings will be conducted at weekly intervals by the Director using traditional procedures. We contemplate shifting to a system of computer-generated random numbers which the Board's computer will assign to each application in each market as the applications are fed into the computer, with the lowest-numbered applications in each market being granted. This shift will take place only after a detailed computer protocol is published and the procedure receives general approval of applicants.

[4] This differs from the procedure the Bureau Director has followed to date, which has been to award such authority to the next applicant in the existing queue. The Director's procedure was necessitated by the absence of settled procedures for reapplying for authority already awarded. For the long haul, however, it seems undesirable to allow stale applications for unused authority to remain on the books. In implementation of the new procedure, all existing applications for authority already awarded to another carrier will be dismissed as of the close of business on December 1, 1978. Since a notice of intent to resume service in a market can be filed only once, and must be implemented within 30 days of the date of filing, outstanding notices will not be included in the dismissal.

[5] Appendix filed as part of original.

DEPARTMENT OF COMMERCE

Bureau of the Census

SPECIAL CENSUSES

The Bureau of the Census conducts a program whereby a local or State government can contract with the Bureau to conduct a special census of population. The content of a special census is ordinarily limited to questions on household relationship, age, race, and sex, although additional items may be included at the request and expense of the sponsor. The enumeration in a special census is conducted under the same concepts which govern the decennial census.

Summary results of special censuses are published semiannually in the *Current Population Reports*—Series P-28, prepared by the Bureau of the Census. For each area which has a special census population of 50,000 or more, a separate publication showing

data for that area by age, race, and sex is prepared. If the area has census tracts, these data are shown by tracts.

The data shown in the following table are the results of special censuses conducted since December 31, 1977, for which tabulations were completed between November 1, 1978 and November 30, 1978.

Dated: December 1, 1978.

MANUEL D. PLOTKIN,
Director,
Bureau of the Census.

National Oceanic and Atmospheric Administration

NORTH PACIFIC FUR SEALS

Notice Regarding Draft Environmental Impact Statement

Notice is hereby given that the National Marine Fisheries Service in cooperation with the Department of State is beginning preparation of a draft environmental impact statement on the Interim Convention on Conservation of North Pacific Fur Seals which will terminate on October 14, 1980, unless extended, renegotiated, or replaced with a new agreement. Any comments or expressions of interest by affected Federal, State, or local agencies, or any interested parties on issues to be covered in the environmental impact statement should be addressed to the National Marine Fisheries Service (F6), National Oceanic and Atmospheric Administration, Department of Commerce, Washington, D.C. 20235.

Dated: November 30, 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

[3510-22-M]

PACIFIC FISHERY MANAGEMENT COUNCIL SCIENTIFIC AND STATISTICAL COMMITTEE BILLFISH ADVISORY SUBPANEL AND JACK MACKEREL ADVISORY SUBPANEL

Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of Public Meeting with Partially Closed Session.

SUMMARY: The Pacific Fishery Management Council and its Scientific and Statistical Committee, Billfish Advisory Subpanel and Jack Mackerel Advisory Subpanel will conduct a series of meetings January 10-12, 1979.

DATES: January 10-12, 1979.

ADDRESS: The meetings will take place at the Shelter Island Inn, located at 2501 Shelter Island Drive, San Diego, California.

FOR FURTHER INFORMATION CONTACT:

Mr. Lorry M. Nakatsu, Executive Director, Pacific Fishery Management Council, 526 S.W. Mill Street, Second Floor, Portland, Oregon 97201, Telephone: (503) 221-6352

SUPPLEMENTAL INFORMATION: The Pacific Fishery Management Council and its Scientific and Statistical Committee were established by the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), and the Council has established a Billfish Subpanel and Anchovy/Jack Mackerel Subpanel to its Advisory Panel to assist in carrying out its responsibilities.

Meeting Agendas follow:

Billfish Advisory Subpanel (open meeting)—January 10, 1979 (9:00 a.m. to 5:00 p.m.).

Agenda: Consideration of the First Draft of the Billfish Fishery Management Plan.

Jack Mackerel Subpanel (open meeting)—January 10, 1979 (9:00 a.m. to 5:00 p.m.).

Agenda: Consideration of the First Draft of the Jack Mackerel Fishery Management Plan.

Scientific and Statistical Committee (open meeting) January 10, 1979, (9:00 a.m. to 5:00 p.m.); January 11 1979, (10:00 a.m. to 5:00 p.m.).

Agenda: Development of fishery management plans: Comprehensive Salmon; Ocean Salmon for 1979; Squid; Groundfish; Billfish; Dungeness Crab; Jack Mackerel, Pink Shrimp and Anchovy. Operational and procedural matters of the Council, including advisory panel and management plan development team activities. Public comment period beginning at 3:30 p.m. on January 10, 1979, and other committee business.

Council (partially closed meeting)—January 11-12, 1979 (8:00 a.m. to 5:00 p.m. on both days; NOTE: meeting will be closed to the public from 8:00 a.m. to 10:00 a.m. on January 11, 1979).

Agenda: January 11, 1979, (8:00 a.m. to 10:00 a.m.). The closed session is being held to discuss security classified material on the status of current maritime boundary and resource negotiations between the United States and Canada. Personnel matters including appointments to possible vacancies on subpanels and teams, will be discussed. Only those Council members, SSC members and related staff having security clearances will be allowed to attend this closed session.

Agenda: January 11, 1979 Following the closed session, the rest of the meeting will be open to the public for consideration of the First Draft of the Billfish FMP; First Draft of the Jack Mackerel FMP; consideration of reports from ad hoc committees; review of communications from other agencies and organizations, public comment period beginning at 4:00 p.m.

Agenda: January 12, 1979. Consideration of amendments to the Trawl PMP for 1979; operational and procedural matters of the Council, including its staff, advisory panels, and committee

D E 6 7 8 UMI

V 4 3 / 2 3 5

activities; consideration of reports from other agencies and organizations. Status of other Fishery Management Plans. The Council, Scientific and Statistical Committee, Billfish Advisory Subpanel, and Jack Mackerel Advisory Subpanel expect to address each of the items of their respective agendas above. Time restraints may require that some items be deferred to a later meeting. In addition, there is a possibility that late items of importance may be added to the agenda after the appearance of this announcement. Interested parties should contact the Executive Director as mentioned above to obtain a more detailed agenda.

The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of its General Counsel, formally determined on November 30, 1978, pursuant to Section 19(d) of the Federal Advisory Committee Act, that the agenda items covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein, because items will be concerned with matters that are within the purview of 5 U.S.C. 552B (c)(1) as information which is properly classified pursuant to Executive Order 11652, and disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 5317, Department of Commerce).

Dated: December 1, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

WEATHER MODIFICATION ADVISORY BOARD

Termination

AGENCY: National Oceanic and Atmospheric Administration.

ACTION: Termination notice.

SUMMARY: Notice is hereby given of the termination of the Weather Modification Advisory Board. The Board was established by the Secretary of Commerce, as noted in the FEDERAL REGISTER (42 FR 4512), to provide independent, expert advice on various aspects of weather modification, including recommendations for a national policy and a research and development program. The Board's work has been completed, and the Board is hereby terminated,

DATE: The date of termination was September 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. Ronald L. Lavoie, Director Science and Academic Affairs Office, National Oceanic and Atmospheric Administration, Rockville, Maryland 20852, telephone 301-443-8721.

Dated: November 28, 1978.

Office of the Secretary

[Department Organization Order 25-1; Transmittal 398]

UNITED STATES TRAVEL SERVICE

Organization Order

Effective date: May 23, 1978.

This order effective May 23, 1978 supersedes the material appearing at 41 FR 5859 of February 10, 1978

Section 1. Purpose

.01 This order prescribes the organization and assignment of functions within the United States Travel Service (USTS). The scope of authority and funcitons of USTS are set forth in Department Organization Order 10-7.

.02 This revision, reflecting a major reorganization and assignment of functions:

a. Renames the Office of Program Services and Development as the Office of Market Development, the Office of State-City Affiars as the Office of Governmental Affairs, the Office of Policy Analysis as the Office of Policy and Research, the Office of Marketing and Field Operations as the Office of International Operations, and the Field Offices as the Regional Offices.

b. Abolishes the Visitor Services Division and assigns its functions to the Office of Governmental Affairs (Section 10.).

c. Transfers the Research and Analysis Division to the Office of Policy and Research (Section 5.).

d. Transfers the Advertising and Promotion Division to the Office of Market Development and combines it with the former Media Services Division to form the Advertising and Media Services Division (paragraph 8.02).

e. Transfers the Marketing Programs Division to the Office of Market Development and combines it with part of the former Conventions and Expositions Division to form the Marketing and Conventions Division (paragraph 8.03).

f. Establishes the Expositions Staff (Section 7.).

g. Reassigns responsibility for coordination of the domestic tourism program to the Office of Governmental Affairs (Section 10.).

h. Established the Management and Policy Council (Section 4.).

i. Places the Regional Offices and the International Congress Office under the Office of International Operations (Section 9.).

Section 2. Organization Structure

The principal organization structure and lines of authority shall be as depicted on the attached organization chart. A copy of the organization chart is on file with the original of this document in the Office of the FEDERAL REGISTER.

Section 3. Office of the Assistant Secretary

.01 The *Assistant Secretary for Tourism* (hereinafter the "Assistant Secretary") has overall responsibility for the policies and direction of USTS. The incumbent establishes its basic policies and objectives, chairs the Department's Travel Advisory Board, establishes and maintains relations with government and industry officials at all levels to facilitate tourism policies and programs, provides U.S. representation with the Bureau of International Expositions, and advises the Secretary and the Under Secretary on all matters related to toursim.

.02 The *Deputy Assistant Secretary for Tourism* (hereinafter the "Deputy Assistant Secretary") serves as the principal advisor to the Assistant Secretary and performs the duties of the Assistant Secretary in the latter's absence or disability, or in the event of a vacancy in that office; supervises and directs day-to-day operations of USTS including Congressional liaison, provides policy guidance for programs and projects developed within USTS, makes recommendations to the Assistant Secretary on all matters related to tourism, and carries out other responsibilities as assigned by the Assistant Secretary.

Section 4. Management and Policy Council

The *Management and Policy Council* consists of the Assistant Secretary, the Deputy Assistant Secretary, and the Directors of the Offices of Policy and Research, Administration, Market Development, International Operations and Governmental Affairs; and provides a management forum for the Assistant Secretary and the Deputy Assistant Secretary to plan, coordinate, and manage the principal activities of USTS. The Council provides a forum for the clarification of policies, the discussion of issues, planning functions as required, the expression of alternative view-points and options, and the assignment of responsibilities for carrying out policy and program decision made by the Assistant Secretary.

Section 5. Office of Policy and Research

The *Office of Policy and Research* assists the Office of the Assistant Secretary in the development of policies, legistive positions, and strategies in the area of international and domestic tourism; provides options for negotiations on international agreements; and represents the Department as official participants in international tourism meetings; maintains liaison with policy staffs of other Federal agencies and organizations; provides the economic marketing and statistical data necessary to effectively plan and evaluate policies and programs; collects and analyzes industry and government economic and tourism data; develops and conducts trade/consumer research studies; develops, coordinates and administers joint research projects with industry and government; develops and implements forecasting and other types of econometric models; assists in establishing overall performance goals, develops program evaluation studies to determine individual program effectiveness; maintains the USTS Measurement System; provides specific data and *ad hoc* analyses as needed; reviews and recommends action and research projects proposed in markets abroad; maintains a data bank on international and domestic tourism; and serves on the Matching Grants Committee.

Section 6. Office of Administration

The *Office of Administration* advises and assists the Office of the Assistant Secretary in developing and implementing overall policies in the areas of administrative, personnel and financial matters; ensures that proper administrative and financial procedures are carried out by USTS offices and divisions; performs budget formulation and execution functions; provides administrative evaluations and management analyses to assist the Office of the Assistant Secretary in assuring that effective management practices are utilized throughout USTS; provides administrative services as required to execute policy and program operations; conducts internal administrative and management evaluations; and serves on the Matching Grants Committee. In addition, the Director is responsible for assisting the Deputy Assistant Secretary in carrying out the day-to-day operations of USTS.

Section 7. Expositions Staff

The *Expositions Staff* administers, for the Office of the Assistant Secretary, Federal recognition of, and participation in, exposition to be held in the United States, and at the direction of the Assistant Secretary, participates as necessary in meetings of the Bureau of International Expositions.

Section 8. Office of Market Development

.01 The *Office of Market Development* plans and develops marketing programs based on international and domestic tourism promotion policies as approved by the Assistant Secretary and develops specific program plans and procedures for implementation, supervises the Advertising and Media Services Division and the Marketing and Conventions Division, and serves on the Matching Grants Committee.

.02 The *Advertising and Media Services Division* participates in the development coordination, and evaluation of international advertising, media relations, and trade and consumer product information campaigns; participates in the selection of advertising and communications contractors after evaluation of their proposals and presentations; reviews and recommends action on specific advertising and information projects proposed for the markets abroad; reviews and recommends reference materials for the Regional Offices and provides these materials for use by the Offices abroad; plans and implements domestic advertising and media information programs; develops and coordinates production and distribution of all printed materials including brochures, films, and booklets used in USTS programs; maintains and distributes supplies of photographs and films, plans and prepares information support materials for distribution to domestic and foreign media; has responsibility for public affairs; and generates positive media coverage on USTS activities through direct media contact. These functions shall be performed in close cooperation with the Departmental Office of Public Affairs.

.03 The *Marketing and Conventions Dvision* reviews and recommends action on market development projects proposed for markets abroad; assists in planning and implementing market development support programs; supervises development by the Regional Offices of contracts with foreign tour operators designed to increase the number of tour offerings to the United States; develops, coordinates and processes all familiarization and inspection tours for representatives of the travel trade, associations and the media; develops and supervises joint USTS/industry promotion programs; plans and develops programs to motivate and persuade U.S. Associations to host International Congresses and to increase foreign attendance at international expositions, conventions, trade shows, and other events to be held in the U.S.; develops incentive travel programs for implementation by USTS offices abroad; and maintains working relationships with the U.S. travel industry for development of international programs.

Section 9. Office of International Operations

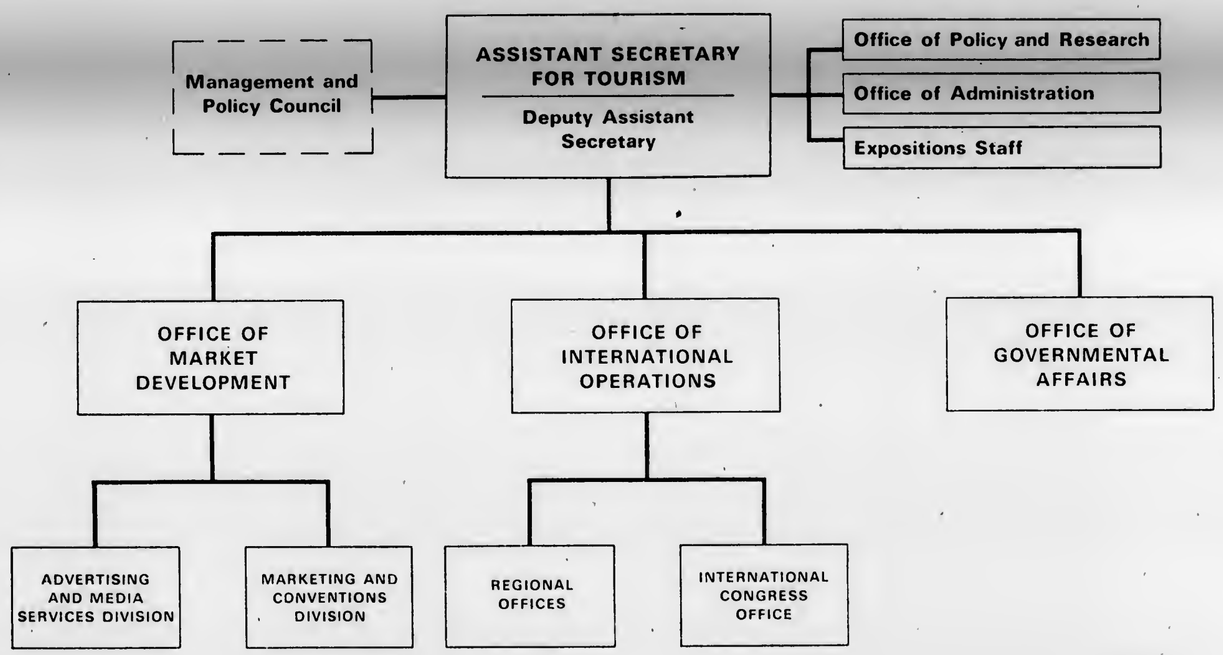
.01 The *Office of International Operations* directs the implementation of approved programs, projects, and procedures to promote international travel to the United States from USTS-designated markets abroad. This includes: supervision of the Regional Offices and the International Congress Office; representation of the Regional Offices in headquarters; development and coordination of all operational plans for the markets abroad; and recommendations on and reviews of operation budgets of the Regional Offices and International Congress Office. The Office also monitors progress against plans, including the direction of corrective actions as required in order to meet program goals; conducts program reviews in cooperation with the Office of Market Development in each foreign market to ensure optimum use of available resources; coordinates communications between headquarters and the Regional Offices; and serves on the Matching Grants Committee.

.02 *Regional Offices* perform the primary role in implementing programs of USTS in their respective markets, and are responsible for travel information and services to be provided to the foreign travel trade, and to the consumer. Regional Offices develop marketing strategies for their markets and prepare annual marketing plans for approval by headquarters. They are responsible for implementing and monitoring all travel promotion programs such as research, market development, consumer information, sales promotion, advertising, and product information in their primary and special markets.

.03 The *International Congress Office* is responsible for implementing the International Conventions Program is countries abroad. The Office identifies international conventions and congresses which are prime prospects for selecting the U.S. as a site for their meetings; motivates and persuades those prospects to hold congresses in the U.S.; promotes foreign attendance at national U.S. conventions; and collects, analyzes, and furnishes International Association profile data for sales follow-up by headquarters.

Section 10. Office of Governmental Affairs

The *Office of Governmental Affairs* provides information, advice and assistance to the Office of the Assistant



DEC 6 1978 UMI

Secretary by establishing and maintaining relations with governmental officials at all levels, particularly those of tourism offices in regions, States, territories and local governments; develops, coordinates and implements cooperative programs with these entities; provides other USTS offices with advice and information on programs and activities taking place in the tourism field; and in cooperation with other offices as necessary, develops and implements domestic tourism policies and objectives as they pertain to Federal, regional, State, and local governments in the planning of tourism programs as part of economic development. This office is responsible for international and domestic visitor facilitation programs such as international gateway reception services, facility planning and development, and domestic telephone information services. It administers a matching grants program by developing rules and criteria, providing instructions and technical assistance to applicants, coordinating internal review and approval of applications, monitoring the progress and funding of awarded grants, and evaluating completed grants. The office also chairs the Matching Grants Committee.

GUY W. CHAMBERLAIN,
Acting Assistant Secretary for Administration.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

BRAZIL, JAPAN AND MACAU

Soliciting Public Comment on Bilateral Negotiations Concerning Textile Products

NOVEMBER 30, 1978.

On April 21, 1974, the Committee for the Implementation of Textile Agreements published a notice in the FEDERAL REGISTER (39 FR 13307) conveying the Committee's intention to announce, and solicit comment on, U.S. Government actions implementing the GATT Arrangement Regarding International Trade in Textiles and the bilateral textile agreements entered into under its terms.

Pursuant to the terms of the Arrangement and the bilateral agreements between the Government of the United States and the Governments of Brazil and Japan and Portugal (Macau) the Committee anticipates holding bilateral negotiations with these governments before June 30, 1979. Any party wishing to express a view or provide data or information with regard to the treatment of any product under the bilateral agreements and any other aspects thereof, or comment on production or availability of domestic textile products, is invited to submit such in ten copies to Mr. Robert E. Shepherd, Chairman of the Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development, U.S. Department of Commerce, 14th and Constitution Avenue NW., Room 3826, Washington, D.C. 20230.

Views, data or information submitted under this procedure will be available for public inspection in the Office of Textiles, Room 2815, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230, and may be obtained upon written request. Whenever practicable, public comment may be invited concerning views, comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments on any negotiation, consultation, market disruption or any other matter pursuant to this notice is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) and 554(a)(4) relating to matters which constitute "a foreign affairs function of the United States."

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

[3510-25-M]

REPUBLIC OF CHINA

Announcing Additional Import Controls on Certain Man-Made Fiber Textile Products From the Republic of China

NOVEMBER 30, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Controlling imports of man-made fiber gloves in Category 631, produced or manufactured in the Republic of China and exported to the United States during the agreement year which began on January 1, 1978. (A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 3421), and September 5, 1978 (43 FR 39408)).

SUMMARY: Under the terms of paragraph 15 of the Bilateral Cotton, Wool and Man-Made Textile Agreement of June 8, 1978, between the Governments of the United States and the Republic of China, the Government of the United States has decided to control imports of man-made fiber textile products in Category 631, produced or manufactured in the Republic of China and exported to the United States during the twelve-month period which began on January 1, 1978, at the level established for the period.

EFFECTIVE DATE: December 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5423)

SUPPLEMENTARY INFORMATION: On June 16, 1978, there was published in the FEDERAL REGISTER (43 FR 26102) a letter dated June 15, 1978 from the Chairman of the Committee for the Implementation of Textile Agreement to the Commissioner of Customs which established levels of restraint for certain specified categories of cotton, wool and man-made fiber textile products, produced or manufactured in the Republic of China, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1978 and extends through December 31, 1978. In accordance with the terms of the bilateral agreement, the United States Government has decided also to control imports of man-made fiber textile products in Category 631, during the agreement year which began on January 1, 1978 at the designated level. When the data become available, the level of restraint will be adjusted to reflect imports during the period beginning on January 1, 1978 and extending through the effective date of this action.

ROBER E. SHEPHARD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

NOVEMBER 30, 1978.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive issued to you on June 15, 1978 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufatured in the Republic of China.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 8, 1978, between the Governments of the United States and the Republic of China; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on December 5, 1978 and for the twelve-month period beginning on January 1, 1978 and extending through December 31, 1978, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Category 631, produced or manufactured in the Republic of China, in excess of 2,109,286 dozen pairs.[1]

Man-made fiber textile products in Category 631 which have been exported to the United States prior to January 1, 1978 shall not be subject to this directive.

Man-made fiber textile products in Category 631 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) prior to the effective date of this directive shall not be denied entry under this directive.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 3421), and September 5, 1978 (43 FR 39408).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of China and with respect to imports of man-made fiber textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHARD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Domestic Business Development.

[FR Doc. 78-33974 Filed 12-5-78; 8:45 am]

[1] The level of restraint has not been adjusted to reflect any entries after December 31, 1977.

DEPARTMENT OF DEFENSE

Department of the Navy

THE NAVY'S COSO GEOTHERMAL DEVELOPMENT PROGRAM, NAVAL WEAPONS CENTER, CHINA LAKE, KERN COUNTY, CALIF.

Public Hearing and Availability of the Draft Environmental Impact Statement (DEIS)

Notice is hereby given pursuant to the National Environmental Policy Act of 1969 (NEPA). Pub. L. 91-100 (42 U.S.C. 4321 *et seq.*); the Council on Environmental Quality Guidelines. (40 CFR Part 1500); and Department of Defense Regulations, "Environmental Considerations in Department of Defense Actions," (32 CFR Part 214), that a public hearing will be held for providing the public with relevant information concerning the Draft Environmental Impact Statement (DEIS) prepared for the Navy's Coso Geothermal Development Program, and to afford the public an opportunity to present their views on this matter. The hearing will be held on the following date, at the location and time specified:

DECEMBER 21, 1978

Burroughs High School Lecture Center, Ridgecrest, California. The hearing will commence at 7:00 p.m. and run until its conclusion.

The proposed action is the award of a contract to develop geothermal energy resources on Navy fee-acquired land as a secure, self-sufficient energy alternative to conventional electricity supply at the Naval Weapons Center (NAVWPNCEN), China Lake, California. The development program will be subject to well defined constraints that are designed to allow development of the geothermal resource without degrading NAVWPNCEN'S national defense mission.

The major environmental issue is the potential alteration of the character of Coso Hot Springs, a National Register of Historic Places site, by either surface development impacts or by extraction of geothermal fluids. The alteration of hot spring activity is a controversial issue according to Native Americans who attribute spiritual and medicinal values to Coso Hot Springs.

Other impacts will result from the ground disturbance that will accompany geothermal development in the relatively undisturbed environment on Navy fee-acquired land. These include increased erosion, loss of productive soil, biotic habitat losses and possible impacts to locally significnt faunal species. Short-term human population fluctuations produced by geothermal development will place demand on the limited services and housing facilities currently available in this rural portion of Inyo County. Adverse impacts to the local social and economic systems could occur if mitigation efforts are unsuccessful.

The public hearing is being held in order that all persons, governmental agencies, organizations, and groups who so desire are afforded the opportunity to comment on the proposed action.

The hearing will be conducted by Captain R. B. Wilson, United States Navy, and will include a presentation of the Navy's proposed Coso Geothermal Development Program and the expected environmental impact.

The following procedures will be followed during the public hearing. For record purposes, all persons attending the hearing will be asked to provide their names you entering the hearing. Oral comments at the hearing will be limited to ten minutes and all lengthy or technical comments should be accompanied by a written submittal. Further, all speakers will identify themselves and any organization they may be representing.

Individuals and organizations wishing to submit written statements to be included in the hearing record are encouraged to do so by December 15, 1978, or such statements may be presented to the Hearing Officer, Captain Wilson, during the hearing. Pre-registration of speakers is desired and should be made in person or writing. Speakers may also register at the attendance desk at the hearing. The names and title of speakers for organizations should be included in the pre-registration.

Any organization desiring to make a formal presentation in excess of the foregoing time limit is requested to contact the Hearing Officer prior to December 15, 1978, so that appropriate arrangements may be made. The closing date for including additional written statements in the Navy hearing record is ten calendar days after the date of the hearing. Speaker pre-registrations and submission of written statements should be addressed to: Captain R. B. Wilson, United States Navy, Public Works Officer (Code 26), Naval Weapons Center, China Lake, CA 93555.

The DEIS was prepared by the NAVWPNCEN, Public Works Department, China Lake, California, and it was submitted and filed with the Environmental Protection Agency (EPA) on November 24, 1978. Notice of the DEIS appeared at page 55281 in the FEDERAL REGISTER of November 27, 1978, (43 Fed. Reg. 55281). The DEIS evaluates the potential broad scope environmental impacts that could result from development of geothermal resources on Navy fee-acquired land at NAVWPNCEN by contract with private industry. Copies of the DEIS have been furnished to various Federal, State, and local agencies, conservation groups and other interested private parties. Moreover, the DEIS may be reviewed at the following locations:

Environmental Protection Agency, Room 537 West Tower, Waterside Mall, Washington, D.C.
Kern County Library, Ridgecrest Branch, Ridgecrest, California
Inyo County Library, Bishop Branch, Bishop, California
Beale Memorial Library, Bakersfield, California
Naval Weapons Center, Public Works Department, China Lake, California

Members of the public are encouraged to comment on the DEIS and all comments should be forwarded to Captain R. B. Wilson on or before January 19, 1979.

For further information concerning this notice captain R. B. Wilson, United States Navy, Public Works Office (Code 26), Naval Weapons Center, China Lake, California, telephone number (714) 939-2382.

Dated: December 1, 1978

P. B. WALKER,
Captain, JAGC, U.S. Navy, Deputy Assistant Judge Advocate General (Administrative Law).

given of the proposed "Subsequent Arrangement" under the Additional Agreement for Cooperation Between the Government of the United States and the European Atomic Energy Community (Euratom) Concerning the Peaceful Uses of Atomic Energy and the Agreement for Cooperation Between the Governments of the United States and Switzerland Concerning Civil Uses of Atomic Energy.

The Subsequent Arrangement to be carried out under the above mentioned agreements involves the transfer of one defective fuel element from Switzerland to Euratom for repair and the return of the element from Euratom to Switzerland for use in the Goesgen nuclear power station. The fuel element contains approximately 405 kilograms of uranium enriched to 1.9% U-235.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the Subsequent Arrangement will not be inimcal to the common defense and security of the United States.

This subsequent arrangement will take effect no sooner than 15 days after the date of publication of this notice.

For the Department of Energy.

Dated: November 30, 1978.

ROBERT N. SLAWSON,
Acting Director for Nuclear Affairs International Programs.

Economic Regulatory Administration

[ERA Docket No. SWPA 78-2, Supplement No. 1]

SOUTHWESTERN POWER ADMINISTRATION

Conditional Extension of Existing System Rates and Notice of Intent to Confirm and Approve Extension

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Conditional extension of existing system rates and Notice of Intent to exercise final confirmation and approval authority with respect to the requested extension.

SUMMARY: On November 16, 1978, the Assistant Secretary for Resource Applications (Assistant Secretary) requested the Administrator of the Economic Regulatory Administration (ERA or the Administrator) to extend confirmation and approval of certain system rates of the Southwestern Power Administration (SWPA) from December 1, 1978, through March 31, 1979. The purpose of this Notice is to advise the public that: (1) the Administrator of ERA has conditionally extended the SWPA system rates through March 31, 1979, and (2) the Administrator of ERA intends to exercise final confirmation and approval authority with respect to the requested extension and to invite interested parties to submit written comments. An opportunity for an oral presentation will be afforded upon request.

DATES: Written comments must be received no later than January 17, 1979. Requests for an oral presentation must be made by December 22, 1978. If a public hearing is requested it will be held on January 4, 1979. Speakers may submit written copies of their oral presentation at the hearing.

ADDRESSES: Requests for an oral presentation and/or ten copies of written comments shall be submitted to: Office of Public Hearing Management, Box WF, Department of Energy, 2000 M Street, NW., Room 2313, Washington, D.C. 20461.

The public hearing, if held, will be in Room 2105, Department of Energy, 2000 M Street, NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Jerry Nicholas, Office of Utility Systems, Economic Regulatory Administration, 2000 M Street, NW., Vanguard Building 527F, Washington, D.C. 20461, Phone 202-254-8470, or Richard W. Manning, Office of the General Counsel, 12th & Pennsylvania Avenue, NW., Room 6146, Washington, D.C. 20461, Phone 202-633-8653.

SUPPLEMENTARY INFORMATION: Pursuant to Section 301(b) of the Department of Energy Organization Act, 42 U.S.C. § 7101 *et seq.*, the function to confirm and approve power rates for the Southwestern Power Administration was transferred to the Secretary of Energy. By Delegation Order No. 0204-4, effective October 1, 1977, 42 F.R. 60725-27 (November 29, 1977), the Secretary of Energy delegated confirmation and approval authority to the Administrator of ERA. The Administrator has delegated this authority to the Assistant Administrator for Utility Systems, Economic Regulatory Administration.

On May 19, 1978, the Assistant Secretary, on behalf of SWPA, requested ERA to extend confirmation and approval of the existing SWPA system rates through December 1, 1978, in order to allow SWAP additional time to develop new rates. In an order dated July 31, 1978, ERA granted the Assistant Secretary's request, after notice and an opportunity for comment, 43 FR 34523 (August 4, 1978).

On November 16, 1978, the Assistant Secretary requested ERA to extend the existing system rates through March 31, 1979, in order to allow his staff additional time "to review [SWPA's] proposed new rates and supporting data which will be furnished by SWPA by November 22, 1978." The rates which the Assistant Secretary has requested to be extended are contained in the following rate schedules:

Rate Schedule F-1 (Firm Power)
Rate Schedule P-2 (Revised) (Peaking Power)
Rate Schedule EE (Excess Energy)
Rate Schedule IC (Interruptible Capacity)
Contract No. 14-02-001-864 (with Tex-La Electric Cooperative, Inc.)

Pending final action on the requested extension, ERA has determined that the public interest would best be served by immediately extending on a conditional basis SWPA's system rates through March 31, 1979, as requested.

The public is invited to submit comments, as set forth in this Notice, relative to the requested rate extension. At the conclusion of the comment procedure the Administrator of ERA will take final action on the Assistant Secretary's request.

COMMENT PROCEDURES: Interested persons are invited to submit comments with respect to the subject matter set forth in this Notice to: Public Hearing Management, Box WF, Room 2313, Department of Energy, 2000 M Street, NW., Washington, D.C. 20461. Such written comments may be mailed or hand delivered and should be received by 4:30 p.m., e.s.t., on January 17, 1979.

Any person who has an interest in this matter or is a representative of a group or class of persons that has an interest in it may make a written request for an opportunity to make an oral presentation at a public hearing. Such a request can be mailed or hand delivered to: Public Hearing Management, Box WF, Department of Energy, Room 2313, 2000 M Street, NW., Washington, D.C. 20461 and must be received before 4:30 p.m., e.s.t. on December 22, 1978.

The request shall state the name of the person making the request, identify the interest represented and if appropriate state why he or she is a proper representative of a group or class of persons that has an interest, give a concise summary of the proposed oral presentation, and give a telephone number where the person may be contacted.

DOE reserves the right to select the persons to be heard, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited based on the number of persons requesting to be heard.

The public hearing, if any, will not be adjudicative in nature. A DOE official will be designated to preside at the hearing, if one is held. Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding official.

The hearing, if held, will begin at 9:30 a.m., on January 4, 1979, in Room 2105, Department of Energy, 2000 M Street NW., Washington, D.C.

Public comments, if any, and the hearing record, if any, will be available for inspection at the DOE Freedom of Information Office, Room GA152, James Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585 between the hours of 8:00 a.m., and 4:30 p.m., Monday through Friday.

Issued in Washington, D.C., on November 20, 1978.

JERRY L. PFEFFER,
Acting Assistant Administrator for Utility Systems, Economic Regulatory Administration, Department of Energy.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20690; FCC 78-807]

AMERICAN TELEPHONE & TELEGRAPH CO.

In the matter of American Telephone & Telegraph Co., Revisions to Tariff F.C.C. Nos. 258 and 267, Transmittal No. 12478; Revisions to Tariff F.C.C. No. 268, Revisions to Tariff F.C.C. No. 267, Transmittal No. 12853; Docket No. 20690.

Memorandum Opinion and Order

Adopted: November 21, 1978.

Released: November 30, 1978.

By the Commission: Commissioner Fogarty dissenting in part and issuing a separate statement.

1. By Commission Order, 57 F.C.C. 2d 956 (1976) (*Designation Order*), we instituted an investigation into the lawfulness of American Telephone and Telegraph Company's (AT&T's) tariff revisions which cancelled the offering of 1.544 Megabits per second (Mbps) Dataphone Digital Service (DDS) under AT&T's experimental tariff, F.C.C. Tariff No. 258, and simultaneously offered this service under F.C.C. Tariff No. 267.[1] By further order, 57 F.C.C. 2d 1176 (1976), we expanded this investigation to cover AT&T's F.C.C. Tariff No. 268, under which this identical service is offered to other common carriers (OCCs). DDS is a private line data communications service offering two-way transmission of digital signals at synchronous speeds of 2.4, 4.8, 9.6, 56 kilobits per second, and 1.544 Mbps. The revisions set for investigation added the 1.544 Mbps speed to AT&T's other speed offerings under F.C.C. Tariff Nos. 267 and 268. The Docket 20690 investigation is of the 1.544 Mbps speed only. This investigation is underway and an Administrative Law Judge (ALJ or Judge) is midway through taking testimony. We now have before us both a petition to enlarge the issues, filed on April 5, 1978 by the Common Carrier Bureau Trial Staff (Trial Staff), and a joint motion to delete the issues, filed on April 24, 1978 by the Trustee in Bankruptcy for the Data Transmission Company (Datran) and AT&T, and various responsive pleadings. We will consider each set of pleadings separately.

[1] See 41 FR 8100, February 24, 1976.

PETITION TO ENLARGE ISSUES

2. On November 10, 1977, during the course of the investigation, AT&T again filed revisions to its Tariff F.C.C. No. 267, Transmittal No. 12853, effective February 8, 1978, making certain changes to its intra-DSA 1.544 Mbps offering.[a] No action was taken on this transmittal by the Commission. relying on information obtained during discovery, the Trial Staff now claims that before the filing of Transmittal No. 12853, interstate 1.544 Mbps intra-DSA service was offered in each DSA encompassing the territory of more than one state, and that this revision now limits this service to only the Washington, D.C. DSA. The Trial Staff argues that a substantial question is raised by this revision as to whether the withdrawal of this service offering in non-Washington DSAs violates Section 214(a) of the Act, 47 U.S.C. 214(a), since AT&T did not obtain a certificate permitting service withdrawal before filing the tariff revision in question. See Rule 63.62, 47 CFR 63.62. It also claims that it raises a question of unlawful discrimination under Section 202(a), 47 U.S.C. 202(a), against customers in the interstate DSAs other than Washington, D.C. who are now deprived of an opportunity for this service. The Trial Staff therefore requests that we enlarge the issues to include:

(1) Whether AT&T's F.C.C. Tariff No. 267 revision, Transmittal No. 12853, constitutes an unauthorized withdrawal and a discriminatory denial of service to customers in the DSAs affected under Sections 214 and 202 of the Act.

(2) Whether any tariff prescription, forfeiture, or other remedy is appropriate and should be ordered.

3. AT&T argues that the tariff revision under Transmittal No. 12853 does not constitute a withdrawal of service without Section 214 authority because 1.544 Mbps service was never actually provided to customers in any area outside the Washington, D.C. DSA. It also claims this revision is not unlawfully discriminatory because the Department of Defense (DOD) is the sole customer using 1.544 Mbps and that it uses this service only in the Washington, D.C. DSA. It also claims that it would not serve the public interest to designate these issues at this stage of the proceeding where the investigation of these tariffs are already underway. DOD has also filed an opposition to the Trial Staff's request claiming, *inter alia*, that because it is the sole customer for 1.544 Mbps service and because no new customers are planned or likely in the future, AT&T's tariff revision does not violate the Act. The ALJ, in a separate opinion released April 26, 1978, FCC 78M-668, commented that he considers the issues already stated in our *Designation Order* to be broad enough to include both issues requested by the Trial Staff in this petition but recognized this matter was before the Commission.

4. As to the Section 214(a) issue, we find no dispute as to the facts in this case. Before the revision, Tariff. No. 267 offered interstate 1.544 Mbps intra-DSA service in each DSA encompassing more than one state. After the revision, this service is now offered in only the Washington, D.C. DSA. The only despute relates to the applicability of Section 214(a). While the Trail Staff maintains that this section applies whether or not a service is actually provided, AT&T contends that such section applies only when service is actually provided. We find that a service offering need not be actually utilized before Section 214(a) becomes applicable. The relevant portion of Section 214(a) states:

> No carrier shall discontinue, reduce, or impair service to a community, or part of a community, unless and until there shall first have been obtained from the Commission a certificate that neither the present nor future public convenience and necessity will be adversely affected thereby * * *.

The fact that a service is offered means that such service is available to the public and therefore must comply with the mandate of this section. We explicitly stated in *Interconnection Facilities Provided to the International Record Carriers* (Docket No. 20452), 66 F.C.C. 2d 517, 540 (1977), that "we do not agree, as AT&T seems to imply, that the mere fact a carrier has no orders for service, excuses it from the need to acquire Section 214 discontinuance authority" (footnote omitted). We have adopted detailed procedures in Part 63 of our rules, 47 CFR 63.60 *et seq.*, for a carrier to follow if it proposes a service discontinuance.

[a] Intra-DSA service provides for the transmission of digital signals within a Digital Serving Area (DSA). A DSA is a specific geographic area served in and around a Digital City. A Digital City is a city in which a principal telephone company central office is located which handles DDS.

finding of lawfulness or unlawfulness

order by certified mail, return receipt

pursuant to section 15 of the Shipping

V 43/235 DEC 6 78 UMI

Consequently, we must find AT&T's revisions to Tariff No. 267, Transmittal No. 12853, to be null and void, insofar as it discontinues service to intra-DSA's other than Washington, D.C., because this revision violates Section 214(a) and Part 63 of our rules.[2] This in no way, however, prejudices AT&T from refiling a tariff revision after obtaining a proper Section 214 certificate to do so.[3]

5. We do not find it necessary to include any forfeiture issue for AT&T's violation of Section 214 for consideration by the ALJ. Historically, we have generally not considered a forfeiture remedy when we have found a Section 214(a) violation. However, Section 503(b) was recently amended by the Communications Act Amendments of 1978, Pub. L. No. 95-234, Section 2 (to be codified in 47 U.S.C. 503(b)), and became effective March 23, 1978.[4] This section now applies to the type of violation found unlawful here. However, this section is discretionary with the Commission[5] and mitigating factors also may be taken into account.[6] In this case, where the violation initially occurred before this amendment became applicable, where there has been no actual disruption of service to any customer, and where we are, in effect, rejecting the tariff filing, we will not apply this provision. Therefore, we shall designate no further issues with respect to this matter.[7] However, if AT&T does not fully comply with the requirements of Section 214 in this regard in the future, we may impose forfeitures or take such other action as necessary to insure compliance.

MOTION TO DELETE ISSUES

6. We next address the motion, filed jointly by Datran and AT&T, requesting that we delete without prejudice those issues specified in para. 3 and incorporated into Issue (5) of our *Designation Order*, 57 F.C.C. 2d 956 (1976), insofar as they apply to Tariff 268. Those issues are as follows:

> Included among the unresolved issues and subissues are whether the proposed rates unlawfully discriminate between 1.544 Mbps users and lower speed users by giving mileage discounts to users of 1.544 Mbps while charging lower speed users on a flat per mile basis; whether the proposed rates unlawfully discriminate by charging 1.544 Mbps short mileage users higher rates per mile than those charged longer mileage users; whether the switch from point-to-point pricing to rate center to rate center pricing is unlawfully discriminatory; whether the rates are unjust or unreasonable because the percentage discount per Kilobit decreases as the speed of the service increases; whether the rates are unjust or unreasonable in that the ratio of price to alleged cost of service is greater for 1.544 Mbps than for the lower speeds; whether the tariff is unlawfully discriminatory in providing error performance standards for the lower speeds but omitting them from 1.544 Mbps service; what impact the offering of this service will have upon the market projections submitted in Docket No. 20288; whether identical pricing for both OCCs and the public, as proposed by AT&T, is unlawfully discriminatory because the costs in serving the two are allegedly different; and whether competitive necessity would justify lower rates to the OCCs.
>
> 57 F.C.C. 2d at 957. When we designated these issues, at Datran's request, for investigation in 1976, Datran was the only OCC requesting service under Tariff 268, the tariff offering 1.544 Mbps to OCCs. Since then Datran has filed for bankruptcy and no longer offers service to the public. The motion claims that since Datran was the sole OCC taking service under Tariff 268, no other carrier is presently taking service, and no market is presently forecasted for such service, it would be in the public interest, by conserving the Commission's time and resources, to delete these specific issues from further inquiry.[8] The Trial Staff, in its comments, agrees that circumstances now warrant deletion of these particularized issues raised by Datran,[9] but cautions that we not delete any other remaining issues stated in our *Designation Order* as they relate to Tariff 268, *e.g.*, the justness and reasonableness of Tariff 268 rate levels. Because of the similarity of the rate structures of Tariffs 267 and 268, and in the absence of any evidence that costs for Tariff 268 differ from Tariff 267, the Trial Staff argues that any finding of unlawfulness of Tariff 267's rate level should remain freely applicable by Commission order to Tariff 268.[10]

7. Since no one is presently taking service under Tariff 268, we can understand AT&T's, Datran's, and the Trial Staff's concern in not wanting to spend inordinate time and resources regarding this tariff's lawfulness. We also wish to conclude this proceeding expeditiously. Nevertheless, since AT&T has filed identical rate levels and rate structures for Tariffs 267 and 268, we do not want to preclude ourselves from applying, to the extent appropriate, any findings regarding the lawfulness of Tariff 267 to both tariffs at the conclusion of the investigation. In this regard, we fail to see how we can delete all the specific subissues mentioned in para. 3 of our *Designation Order* as they apply to Tariff 268 without possibly precluding full consideration of the remaining general issues as they relate to Tariff 268 since some of the issues set forth in para. 3 are merely subissues of the generalized issues. For instance, the first two issues stated in para. 3 which inquire into whether the rate structure of Tariff 268 is unlawfully discriminatory either between and among speeds or over distance, seem to be directly related to general Issue (2) of our *Designation Order*.[11] Accordingly, since a

---

[2] We may find a tariff revision null and void if, as here, it patently conflicts with a provision of the Communications Act. *See, e.g., Pacific Telatronics, Inc.*, 68 F.C.C. 2d 67 (1978).

[3] While the above finding makes the requested Section 202(a) discrimination issue technically moot, because this tariff revision is now null and void, AT&T is still free to refile. In passing on AT&T's Section 214 request we will consider the existence or non-existence of customers for this service to the extent relevant.

[4] This amendment was approved February 21, 1978. However, Section 7 states that it "shall take effect on the thirtieth day after the date of enactment of this Act," or March 23, 1978. Section 503(b) now states that:

> Any person who is determined by the Commission, in accordance with paragraph (3) or (4) of this subsection, to have—
>
> (A) Willfully or repeatedly failed to comply substantially with the terms and conditions of any license, permit, certificate, or other instrument of authorization issued by the Commission;
>
> (B) Willfully or repeatedly failed to comply with any of the provisions of this Act or of any rule, regulation, or order issued by the Commission under this Act • • •.
>
> • • • • • • •
>
> • • • shall be liable to the United States for a forfeiture penalty • • •.

[5] *See* amended section 503(b)(3)(A), which states that "[a]*t the discretion of the Commission*, a forfeiture penalty may be determined against a person under this subsection after notice and an opportunity for a hearing before the Commission or an administrative law judge • • •." (Emphasis added.)

[6] *See* amended Section 503(b)(2)(B), as well as our recently amended Rule 1.80(b)(3), *Implementation of Pub. L. 95-234*, FCC 78-709, (released October 17, 1978) (to be codified in 47 CFR 1.80(b)(3)), which implements this section of the Act. *See also* Section 504(b) of the Act, 47 U.S.C. 504(b).

[7] We wish to note that contrary to the ALJ's conclusion, FCC 78M-668, slip op. at 2, the existing issues in our *Designation Order* were not broad enough to encompass either the Section 214 issue or any related forfeiture issue. The statutory authority under which we designated this proceeding did not include Section 214 of the Act and, accordingly, the issues cannot be read so broadly.

[8] The last two subissues in para. 3 are connected with the question of whether a different cost basis exists for Tariffs 267 and 268, respectively.

[9] The Trial Staff argues that if we do delete these issues, however, that we should delete them with prejudice since Datran does not now want to litigate them in this proceeding where they have already been designated for hearing.

[10] DOD also filed comments objecting to any deletion of the issues in para. 3 of our *Designation Order* as they relate to Tariff 267. Since no party has even suggested that these issues be deleted as to Tariff 267, we find these comments need no further discussion.

[11] Issue (2) of our *Designation Order*, 57 F.C.C. 2d at 958, states:

Footnotes continued on next page

finding of lawfulness or unlawfulness regarding the overall Tariff 268 rate structure or rate levels under the generalized issues may be predicated on the findings obtained regarding the specific subissues stated in para. 3, we do not see how we could delete these specific issues without possibly undercutting the applicability of the generalized issues. However, since the specific subissues will be investigated as they relate to Tariff 267 in any event (the tariff offering this service to the general public under identical rates and rate structure), we do not see a need to devote substantial additional time and resources to the proceeding to determine their applicability to Tariff 268 (the tariff offering this service to the OCCs). Therefore, we shall leave it to the discretion of the Judge to consider, as appropriate, the issues specified in para. 3 and elsewhere in our *Designation Order* in determining the applicability of any findings regarding the lawfulness of the Tariff 267 rate structure and rate levels to Tariff 268. This does not mean that the Judge must make a finding on each issue designated, but rather, should only consider the issues to the extent relevant to resolving the applicability questions.[12]

ORDER

8. *Accordingly, it is ordered*, That AT&T's revision to its Tariff F.C.C. No. 267, Transmittal No. 12853, IS DECLARED NULL AND VOID to the extent indicated herein;

9. *It is further ordered*, That the petition to enlarge the issues, filed by the Trial Staff, is declared moot;

10. *It is further ordered*, That the joint motion to delete issues, filed by Datran and AT&T, is denied, but that the Judge shall consider the designated issues in the manner set forth herein; and

11. *It is further ordered*, That the Secretary shall send a copy of this order by certified mail, return receipt requested, to American Telephone and Telegraph Company, the Trustee in Bankruptcy for the Data Transmission Company, the Department of Defense, shall serve the Common Carrier Bureau Trail Staff and the Administrative Law Judge, and shall cause copy to be published in the FEDERAL REGISTER.

FEDERAL COMMUNICATIONS COMMISSION,[13]
WILLIAM J. TRICARICO,
Secretary.

SEPARATE STATEMENT OF COMMISSIONER JOSEPH R. FOGARTY DISSENTING IN PART

In Re: Discontinuance of Service Offering, Docket No. 20690

The Commission item states that a carrier must obtain a certificate pursuant to Section 214(a)[14] prior to discontinuing a service offering to a community, even if no customer exists for the service, I disagree. If no demand exists for a service, it is incomprehensible to me how service can be discontinued, reduced, or impaired if, in fact, no service was ever provided.

In the present case, I believe AT&T was entirely correct in filing a tariff to discontinue its. 1.544 Mbps service offering to points for which no customer exists for the service. Therefore, I would deny the Trial Staff's request for additional issues.

[FR Doc. 78-33980 Filed 12-5-78; 8:45 am]

Footnotes continued from last page

Whether such revisions will make an unjust or unreasonable discrimination or will subject any person or class of persons to undue or unreasonable prejudice or disadvantage, or will give any undue or unreasonable preference or advantage to any person or class of persons, within the meaning of Section 202(a) of the Communications Act.

This general issue necessarily requires investigation of the Tariff 268 rate structure. Similarly, some of the para. 3 subissues may be relevant to general Issue (1), concerning the justness and reasonableness of the Tariff 268 rate levels under Section 201(b).

[12] Considerable testimony regarding Tariff 267 has already been taken in this proceeding. We note that Tariffs 267 and 268 have near identical rate structures. We leave it to the presiding Judge's discretion to determine whether it will be necessary and to what extent, if at all, additional evidence need be taken on any of the generalized issues or subissues as they pertain to Tariff 268.

[13] See attached Separate Statement of Commissioner Joseph R. Fogarty Dissenting in Part.

[14] "No carrier shall discontinue, reduce, or impair service to a community, or part of a community, unless and until there shall first have been obtained from the Commission a certificate that neither the present nor future public convenience and necessity will be adversely affected thereby;"

[6730-01-M]

FEDERAL MARITIME COMMISSION

[Docket No. 78-52; Agreement No. 10346]

CARGO REVENUE POOLING AND SAILING AGREEMENT—ARGENTINA/UNITED STATES GULF TRADE

Order of Investigation and Hearing and Approval Pendente Lite

Agreement No. 10346, between Empresa Lineas Maritimas Argentinas S.A., A Bottacchi S.A. de Navegacion C.F.I.I. and Delta Steamship Lines, Inc., as the national-flag lines, and the Northern Pan-America Line, A/S, Cia. de Navegacao Lloyd Brasileiro, Cia. Maritima Nacional, Montemar S.A. Comercial y Maritima and Navimex S.A. de C.V., as the non-national flag lines, has been filed with the Federal Maritime Commission for approval pursuant to section 15 of the Shipping Act, 1916.

The Agreement establishes a cargo revenue pooling and sailing arrangement in the northbound trade from Argentine ports within the La Plata/Rosario range, both inclusive, to ports on the United States Gulf Coast.

Notice of the filing of the Agreement appeared in the FEDERAL REGISTER on July 31, 1978. In response, protests were filed by the United States Department of Justice, Reefer Express Lines (REL) and Transportacion Maritima Mexicana, S.A. (TMM).

The Agreement is one which limits service competition between the parties, and as such, is contrary to the antitrust laws of the United States. The Agreement, therefore, cannot be approved by the Commission unless it can be demonstrated that it is required by a serious transportation need, necessary to secure important public benefits, or in furtherance of a valid regulatory purpose of the Shipping Act, 1916, i.e., justified. *Federal Maritime Commission* v. *Aktiebolaget Svenska Amerika Linien*, 390 U.S. 238 (1968).

All of the protestants allege that the Agreement has not been justified. In addition, REL and TMM allege that it is unjustly discriminatory and unfair in that it will preclude them from entering the trade.

Despite the protests and requests for hearing, we are of the opinion that Agreement No. 10346 may be approved *pendente lite*. Agreement No. 10346 implements an international agreement between the Governments of the United States and Argentina which is designed to avoid the conflict that could arise as a result of the cargo preference laws of Argentina. As the Commission stated in *Agreement No. 10066—Cooperative Working Arrangement*, No. 74-5, slip op. at 21-22 (F.M.C., November 17, 1978):

> Because these measures [cargo preference laws] affect the imports and exports of the United States—insofar as our trade with a given country is concerned—they in and of themselves, are a source of "inter-governmental conflict." This "conflict" can only be resolved either through a commercial arrangement or resort to retaliatory measures such as those permitted under section 19 of the Merchant Marine Act, 1920. [footnote omitted]
>
> We believe that a commercial arrangement which avoids potential inter-governmental conflict is clearly preferable to disruptive retaliatory action. The avoidance of such potential "inter-governmental conflict" and the maintenance of international harmony is a legitimate public interest objective to be derived from the approval of a bilateral agreement.

The allegations of discrimination which have been raised by REL and TMM, while requiring hearing are not, in and of themselves, sufficient to deny *pendente lite* approval of the

that it is required by a serious trans-

Pooling, Sailing and Equal Access to

of Administrative Law Judges at a

V 4 3 / 2 3 5 D E 6 7 8 UMI

Agreement. In *Agreement No. 9939—Pooling, Sailing and Equal Access to Government-Controlled Cargo Agreement*, 16 F.M.C. 293, 305-306 (1973), Westfal Larsen and Company A/S (WL), a third flag carrier in the Peruvian trade asserted that the Agreement there would drive it from the trade and that its departure would create such detriment to commerce as would warrant disapproval of the Agreement. The Commission disagreed stating:

"Detrimental to the commerce of the United States" is but one of the criteria of section 15. While a contrary finding under any one of the four criteria of section 15 can support disapproval, all of the parts make a legislative whole and must be considered. 16 F.M.C. at 306.

The Agreement there was approved because the interest in intergovernmental harmony outweighed any possible detriment to WL.

In weighing the Agreement's potential impact on the two carriers involved against the need to prevent a possible disruption of commerce and international harmony, we find that approval of Agreement No. 10346 serves the public interest. Therefore, we will approve the Agreement while the allegations of REL and TMM are being explored. However, this *pendente lite* approval shall expire on December 31, 1979, or until a final decision is reached in the proceeding ordered herein, whichever comes first.

Now, therefore, it is ordered, That pursuant to sections 15 and 22 of the Shipping Act, 1916, a proceeding is hereby instituted to determine whether or not Agreement No. 10346 shall be approved, disapproved or modified under the provisions of section 15;

It is further ordered, That this proceeding be limited to consideration of the following issue: whether Agreement No. 10346 is unjustly discriminatory or unfair to the protesting carriers, REL and TMM;

It is further ordered, That Agreement No. 10346 is approved as of November 22, 1978, *pendente lite*, which approval shall expire on December 31, 1979 or until a final decision is reached in this proceeding, whichever comes first;

It is further ordered, That the carriers listed in the Appendix attached hereto are hereby made Proponents and Protestants as so designated in the Appendix;

It is further ordered, That, in accordance with the Commission's rules of practice and procedure (46 CFR 502.42), Hearing Counsel shall be a party to this proceeding;

It is further ordered, That a public hearing be held in this proceeding and that the matter be assigned for hearing and decision by an Administrative Law Judge of the Commission's Office of Administrative Law Judges at a date and place to be hereafter determined by the Presiding Administrative Law Judge, but no later than May 30, 1979.

The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That notice of this Order be published in the FEDERAL REGISTER, and a copy thereof be served upon proponents and protestants as listed in the Appendix below and the Commission's Bureau of Hearing Counsel;

It is further ordered, That any person other than proponents, protestants, and the Bureau of Hearing Counsel having an interest and desiring to participate in this proceeding shall file a petition for leave to intervene in accordance with Rule 72 (46 CFR 502.72) of the Commission's rules of practice and procedure;

It is further ordered, That all future notices, orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be mailed directly to all parties of record;

It is further ordered, That all documents submitted by any party of record in this proceeding shall be filed in accordance with Rule 118 of the Commission's rules of practice and procedure (46 CFR 502.118), as well as being mailed directly to all parties of record.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[Docket No. 78-51; Agreement No. 10349]

CARGO REVENUE POOLING AND SAILING AGREEMENT—ARGENTINA/UNITED STATES ATLANTIC TRADE

Order of Investigation and Hearing and Approval Pendente Lite

Agreement No. 10349, between Empresa Lineas Maritimas Argentinas S.A., Moore-McCormack Lines, Incorporated and Sea-Land Service, Inc., as the national-flag lines, and Cia. de Navegacao Lloyd Brasileiro, Cia. de Navegacao Maritima Netumar, A/S Ivarans Rederi, Van Nievelt, Goudriaan & Co., B.V. and Montemar S.A. Comercial y Maritima as the non-national flag lines, has been filed with the Federal Maritime Commission for approval pursuant to section 15 of the Shipping Act, 1916.

The Agreement establishes a cargo revenue pooling and sailing arrangement in the northbound trade from Argentine ports within the La Plata/Rosario range, both inclusive, to ports on the United States Atlantic Coast.

Notice of the filing of the Agreement appeared in the FEDERAL REGISTER on August 22, 1978. In response, protests were filed by the United States Department of Justice, Reefer Express Lines (REL) and A/S Ivarans Rederi (Ivarans). The United States Department of State has requested a hearing. The Norwegian Embassy submitted an Aide Memoire through the Department of State.

The Agreement is one which would tend to limit service competition between the parties, and as such, is contrary to the antitrust laws of the United States. The Agreement, therefore, cannot be approved by the Commission unless it can be demonstrated

that it is required by a serious transportation need, necessary to secure important public benefits, or in furtherance of a valid regulatory purpose of the Shipping Act, 1916, i.e., justified. *Federal Maritime Commission v. Aktiebolaget Svenska Amerika Linien*, 390 U.S. 238 (1968).

All of the protestants allege that the Agreement has not been justified. In addition, REL alleges that it will preclude it from entering the trade. Ivarans claims that the Agreement is unjustly discriminatory and unfair because its share is not commensurate with its past share of the trade and its requirements to provide a viable service. The comments of the Norwegian Embassy oppose approval on the grounds that the Agreement would make it impossible for Ivarans, a Norwegian flag line, to remain in the Trade.

The Department of State, along with other protestants, asks for a hearing relative to the possibility that there is an unfiled and unapproved agreement between the Argentine flag line and the Brazilian flag lines regarding the participation of these lines in the Argentina/U.S. and Brazil/U.S. trades. Since this allegation will be handled as a separate matter, it will not be dealt with in connection with this Order.

Despite the protests and requests for hearing, we are of the opinion that Agreement No. 10349 may be approved *pendente lite*. Agreement No. 10349 implements an international agreement between the Governments of the United States and Argentina which is designed to avoid the conflicts that could arise as a result of the cargo preference laws of Argentina. As the Commission stated in *Agreement No. 10066—Cooperative Working Arrangement*, No. 74-5, slip op. at 21-22 (F.M.C., November 17, 1978):

Because these measures [cargo preference laws] affect the imports and exports of the United States—insofar as our trade with a given country is concerned—they in and of themselves, are a source of "inter-governmental conflict."

This "conflict" can only be resolved either through a commercial arrangement or resort to retaliatory measures such as those permitted under section 19 of the Merchant Marine Act, 1920. [footnote omitted]

We believe that a commercial arrangement which avoids potential inter-governmental conflict is clearly preferable to disruptive retaliatory action. The avoidance of such potential "inter-governmental conflict" and the maintenance of international harmony is a legitimate public interest objective to be derived from the approval of a bilateral agreement.

The allegations of discrimination which have been raised by REL and Ivarans, while requiring hearing, are not, in and of themselves sufficient to deny *pendente lite* approval of the Agreement. In *Agreement No. 9939—Pooling, Sailing and Equal Access to Government-Controlled Cargo Agreement*, 16 F.M.C. 293, 305-306 (1973), Westfal Larsen and Company A/S (WL), a third flag carrier in the Peruvian trade asserted that the Agreement there would drive it from the trade and that its departure would create such detriment to commerce as would warrant disapproval of the Agreement. The Commission disagreed stating:

"Detrimental to the commerce of the United States" is but one of the criteria of section 15. While a contrary finding under any one of the four criteria of section 15 can support disapproval, all of the parts make a legislative whole and must be considered. 16 F.M.C. at 306.

The Agreement there was approved because the interest in intergovernmental harmony outweighed any possible detriment to WL.

In weighing the Agreement's potential impact on the two carriers involved against the need to prevent a possible disruption of commerce and international harmony, we find that approval of Agreement No. 10349 better serves the public interest. Therefore, we will approve the Agreement while the allegations of REL and Ivarans are being explored. However, this *pendente lite* approval shall expire on December 31, 1979, or until a final decision is reached in the proceeding ordered herein, whichever comes first.

Now, therefore, it is ordered, That pursuant to sections 15 and 22 of the Shipping Act, 1916, a proceeding is hereby instituted to determine whether or not Agreement No. 10349 shall be approved, disapproved or modified under the provisions of section 15;

It is further ordered, That this proceeding be limited to consideration of the following issue: whether Agreement No. 10349 is unjustly discriminatory or unfair to the protesting carriers, REL and Ivarans;

It is further ordered, That Agreement No. 10349 is approved as of November 22, 1978, *pendente lite*, which approval shall expire on December 31, 1979, or until a final decision is reached in this proceeding, whichever comes first;

It is further ordered, That the carriers listed in the Appendix attached below are hereby made Proponents and Protestants as so designated in the Appendix;

It is further ordered, That in accordance with the Commission's rules of practice and procedure (46 CFR 502.42), Hearing Counsel shall be a party to this proceeding;

It is further ordered, That a public hearing be held in this proceeding and that the matter be assigned for hearing and decision by an Administrative Law Judge of the Commission's Office of Administrative Law Judges at a date and place to be hereafter determined by the Presiding Administrative Law Judge, but no later than May 30, 1979.

The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That notice of this Order be published in the FEDERAL REGISTER, and a copy thereof be served upon proponents and protestants as listed in the Appendix below and the Commission's Bureau of Hearing Counsel;

It is further ordered, That any person other than proponents, protestants, and the Bureau of Hearing Counsel having an interest and desiring to participate in this proceeding shall file a petition for leave to intervene in accordance with Rule 72 (46 CFR 502.72) of the Commission's rules of practice and procedure;

It is further ordered, That all future notices orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be mailed directly to all parties of record;

It is further ordered, That all documents submitted by any party of record in this proceeding shall be filed in accordance with Rule 118 of the Commission's rules of practice and procedure (46 CFR 502.118), as well as being mailed directly to all parties of record.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

Independent Ocean Freight Forwarder License No. 1002R]

CARIBE SHIPPING CO.

Order of Revocation

On November 20, 1978, Caribe Shipping Company, Inc., Pier No. 9, San Juan, Puerto Rico 00904, requested the Commission to revoke its Independent Ocean Freight Forwarded License No. 1002R.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(c), dated August 8, 1977;

It is ordered, That Independent Ocean Freight Forwarder License No. 1002R, issued to Caribe Shipping Company, Inc., be and is hereby revoked effective November 20, 1978 without prejudice to reapplication for a license in the future.

It is further ordered, That Independent Ocean Freight Forwarder License No. 1002R issued to Caribe Shipping Company, Inc. be returned to the Commission for cancellation.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Caribe Shipping Company, Inc.

[Docket No. 78-49]

EMILE BERNAT & SONS CO. v. UNITED STATES LINES, INC., ET AL.

Filing of Complaint

Notice is hereby given that a complaint filed by Emile Bernat & Sons Co. against United States Lines, Peabody & Lane, Atlantic Container Lines, Ltd., Farrell Lines, Inc., Dart Containerline, Inc., Trans Freight Lines, Inc., and North Atlantic Westbound Freight Association was served November 28, 1978. Complainant alleges that it was assessed charges for ocean transportation in violation of section 18(b)(3) of the Shipping Act, 1916 in excess of those provided in respondents' tariff schedules.

Hearing in this matter, if any is held, shall commence on or before May 28, 1979. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate reocrd.

GERALD T. BOYLE & ASSOCIATES, GERALD T. BOYLE D.B.A.

Order of Revocation

On November 17, 1978, Gerald T. Boyle & Associates, Gerald T. Boyle d/b/a/, 2801 East Colfax Avenue, Denver, Colorado 80206, requested the Commission to revoke its Independent Ocean Freight Forwarder License No. 1233.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(c), dated August 8, 1977;

It is ordered, That Independent Ocean Freight Forwarder License No. 1233, issued to Gerald T. Boyle & Associates, Gerald T. Boyle d/b/a, be and is hereby revoked effective November 17, 1978, without prejudice to reapplication for a license in the future.

It is further ordered, That Independent Ocean Freight Forwarder License No. 1233, issued to Gerald T. Boyle & Associates, Gerald T. Boyle d/b/a, be returned to the Commission for cancellation.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Gerald T. Boyle & Associates, Gerald T. Boyle d/b/a.

ROBERT G. DREW,
Director, Bureau of Certification & Licensing.

VERNON FORWARDING CO., INC.

Order of Revocation

On October 28, 1978, Vernon Forwarding Company, Inc., 6212 Lankershim Boulevard, North Hollywood, California 91606, requested the Commission to revoke its Independent Ocean Freight Forwarder License No. 937R.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(c), dated August 8, 1977;

It is ordered, That Independent Ocean Freight Forwarder License No. 937R, issued to Vernon Forwarding Company, Inc., be and is hereby revoked effective October 28, 1978, without prejudice to reapplication for a license in the future.

It is further ordered, That Independent Ocean Freight Forwarder License No. 937R, issued to Vernon Forwarding Company, Inc. be returned to the Commission for cancellation.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Vernon Forwarding Company, Inc.

ROBERT G. DREW,
Director, Bureau of Certification & Licensing.

[Independent Ocean Freight Forwarder License No. 134]

W. M. COOK & CO., INC.

Order of Revocation

On November 6, 1978, W. M. Cook & Co., Inc., 42 Broadway, New York, New York 10004, requested the Commission to revoke its Independent Ocean Freight Forwarder License No. 134 effective November 30, 1978.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), § 5.01(c), dated August 8, 1977:

It is ordered, That Independent Ocean Freight Forwarder License No. 134 issued to W. M. Cook & Co., Inc. be returned to the Commission for cancellation.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon W. M. Cook & Co., Inc.

ROBERT G. DREW,
Director, Bureau of Certification & Licensing.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on November 28, 1978 (CAB and NRC) and November 29, 1978 (NRC). See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed CAB and NRC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before December 26, 1978, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

CIVIL AERONAUTICS BOARD

CAB has requested clearance on an extension without change basis of CAB Form 298—A Registration, Reregistration and Amendments under Part 298 of the Economic Regulations. This form is filed by every taxi operator who plans to commence operations under Part 298 of the Board's Economic Regulations. Submission of Form 298-A is mandatory under the Federal Aviation Act of 1958, as amended. CAB estimates that 4,000 air taxi operators will file this form which must be submitted every two years and that the respondent burden for completing the form is one-half hour.

NUCLEAR REGULATORY COMMISSION

The NRC has requested clearance on an extension without change basis of Form NRC/DOE-742 (w/supplements), "Material Status Report". This report serves as a confirmation document pertaining to the location, composition, and status of special nuclear material inventories in the possession of NRC licensees. The information submitted on the forms is needed to enable the Commission to assure that special nuclear materials are adequately safeguarded in the interest of the common defense and security of the United States. Respondents are NRC special nuclear material licensees. NRC estimates that approximately 500 licensees fill out a total of 1,000 forms annually and the burden for completing one form is 1 hour.

The NRC also has requested clearance for a new Form NRC-313(I), "Application for Byproduct Material License-Industrial." This is a revision in the 313 series designed to facilitate rapid processing of license applications for industrial usage of Byproduct Material. According to NRC, the new form should benefit both applicants and the agency. NRC estimates that 220 respondents will apply for new licenses annually with an average burden per respondent of 24 hours, 2,070 respondents will apply for license amendments annually with an average burden per respondent of 2 hours, and 510 respondents will apply for license renewals annually with an average burden per respondent of 8 hours.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

TRANSPORTATION AND MOTOR VEHICLES

Fuel Economy Mileage Information for Use in Preparing Fiscal Year 1979 Vehicle Acquisition Forecasts

DECEMBER 1, 1978.

1. *Purpose.* This bulletin announces the vehicle miles per gallon ratings to be used by Federal agencies in preparing their fiscal year (FY) 1979 vehicle acquisition forecasts for passenger automobiles (sedans and station wagons) and light trucks (6,000 pounds gross vehicle weight rating (GVWR) and under).

2. *Expiration date.* This bulletin expires September 30, 1979.

3. *Background.* a. To implement the provisions of Public Law 94-163 and Executive Orders 11912 (dated April 13, 1976) and 12003 (dated July 20, 1977) GSA added Subpart 101-38.13 to the Federal Property Management Regulations (FPMR) and issued FPMR Temporary Regulation G-39 (43 FR 54632). These regulations established policy and procedures governing, respectively, the acquisition by Federal agencies of passenger automobiles (sedans and station wagons) and light trucks (6,000 pounds GVWR and under).

b. In accordance with FPMR 101-38.13 and FPMR Temporary Regulation G-39, Federal agencies that will require vehicles during the fiscal year shall furnish GSA a separate forecast of their total passenger automobile and light truck acquisition requirements, based on the latest applicable fuel economy information issued by the Environmental Protection Agency.

c. Attachment A to this bulletin provides class miles per gallon (mpg) ratings for use in the preparation of agency acquisition forecasts of passenger automobiles. Additionally, it lists examples of the mpg ratings for individual vehicles in each class. Attachment B provides similar information for each item of light trucks.

4. *Suggested action.* Each agency should use the attached miles per gallon rating information in preparing its acquisition forecast for both pasenger automobiles and light trucks.

5. *Inquiries and assistance.* Assistance or information regarding vehicles not listed in the attachments to this bulletin may be obtained by calling GSA, telephone number 703-557-1327.

WILLIAM P. KELLY, Jr.,
Commissioner,
Federal Supply Service.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of December 1978:

ALCOHOL TRAINING REVIEW COMMITTEE, December 15, 8:00 a.m.—OPEN MEETING, Conference Room L, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857. Contact: Ms. Jeanne Trumble, Room 14C-17, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-1056.

Purpose. While the principal function of the Alcohol Training Review Committee is to provide professionally competent merit review of grant applications, members are also expected to bring to the attention of the national Institute on Alcohol Abuse and Alcoholism particular problems, issues and needs of the field which are timely and of major importance. The committee members have proposed this special workshop to address issues in the field of alcohol manpower and training which directly affect their review of applications.

Agenda. From 8:00 a.m. to 5:00 p.m. on December 15, the meeting will be open for discussion of issues and needs in the field of alcohol training and manpower development. Substantive information may be obtained from the contact person listed above.

This notice was delayed because of delays in planning and obtaining approval for this meeting.

The NIAAA Information Officer who will furnish upon request summaries of the meeting and roster of the committee members is Mr. Harry Bell, Associate Director, Office of Public Affairs, NIAAA, Room 11A-17, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3306.

Dated: November 30, 1978.

ELIZABETH A. CONNOLLY,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Health Resources Administration

TRAINING IN EMERGENCY MEDICAL SERVICES

Application Announcement for Grants

The Bureau of Health Manpower, Health Resources Administration, is pleased to announce the availability of fiscal year 1979 application materials for Grants for Training in Emergency Medical Services as authorized by section 789, Title VII, of the Public Health Service Act.

Section 789 authorizes grants to educational entities to assist in meeting the cost of training programs providing instruction in the techniques and methods of emergency medical services, including the skills required in connection with the provision of ambulance services. Eligible entites include schools of medicine, dentistry, osteopathy and nursing, training centers for allied health professions, hospitals, and other appropriate educational and public entities. Funds are to assist in meeting the costs of training programs in techniques and methods for providing emergency medical services. Programs covered within this authority include projects for the training of emergency medical technicians-ambulance, emergency medical technicians-paramedic, emergency nursing personnel, and projects for the residency training of emergency physicians.

In determining the priority for funding of approved applications, additional funding preference will be accorded projects in which the following are demonstrated.

For all projects: (1) Those affording clinical experience in emergency medical services systems receiving assistance under Title XII of the Public Health Service Act.

(2) Those providing substantial portions of the training program in a health manpower shortage areas(s) as defined in section 332 of the Public Health Service Act.

(3) Those providing education emphasizing interdisciplinary approaches to emergency care.

For Projects in Specific Disciplines: (1) *EMT-Paramedic:* Those projects sponsored by educational entities granting a degree or diploma. (This does not apply to a degree or diploma in EMS but applies to the institution).

(2) *Medicine:* Those projects designed to train emergency physicians while developing general emergency medical training resources. As evidence that the program is so designed, the applicant must:

(a) Be a school of medicine or osteopathy with an administrative unit which is responsible for educational programs in emergency medicine and involved in more than one of the following phases of emergency medical education: undergraduate, graduate or continuing education; or

Be affiliated with a school of medicine or osteopathy as described in the preceding paragraph.

Applications which do not address these preferences will be reviewed and given full consideration for funding. However, each preference which is met will enhance the competitive position of an approved applicant in determining the order of funding of approved applications.

Approximately $2,000,000 is expected to be available for competitive grant awards in fiscal year 1979 under section 789.

Application materials for fiscal year 1979 are based on Interim-Final regulations published in the FEDERAL REGISTER on September 16, 1977 (42 FR 46523). Therefore, application materials, including the various requirements, are subject to change when final regulations are issued under section 789.

Fiscal year 1979 application materials for Grants for Training in Emergency Medical Services will be forwarded *only upon request.* Completed applications are due on January 25, 1979.

Requests for application materials and requests regarding grants policy should be directed to: Grants Management Officer—A(18), Grants for Training in Emergency Medical Services, Bureau of Health Manpower, HRA, Center Building, Room 4-27, 3700 East-West Highway, Hyattsville, Maryland 20782, Phone: (301) 436-6098.

Should additional programmatic information be required, please contact: Division of Medicine, Bureau of Health Manpower, HRA, Center Building, Room 4-50, 3700 East-West Highway, Hyattsville, Maryland 20782, Phone: (301) 436-7350.

Dated: November 24, 1978.

HENRY A. FOLEY,
Administrator, Health Resources Administration.

[4110-02-M]

APPLICATIONS FOR PINPOINT DISASTER ASSISTANCE

Applications no Longer Accepted

Notice is hereby given that the U.S. Commissioner of Education will no longer accept applications for pinpoint disaster assistance. This notice if effective December 6, 1978. Authority for this program is contained in section 7(a)(1)(B) of Pub. L. 81-874 (assistance for current school expenditures in cases of certain disasters; 20 U.S.C. 241-1(a)(1)(B) and section 16(a)(1)(B) of Pub. L. 81-815 (school construction assistance in cases of certain disasters; 20 U.S.C. 646(a)(1)(B)).

This action is necessary because funds are unavailable for pinpoint disaster assistance at this time.

The regulations applicable to this program include the Office of Education General Provisions Regulations (45 CFR Parts 100 and 100a) published in the FEDERAL REGISTER on November 6, 1973 (38 FR 30654) and Parts 112 and 113 of 45 CFR published in the FEDERAL REGISTER on November 17, 1976 (41 FR 50776).

Office of Education

NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION

Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Governmental Relations and Legislation Committee of the National Advisory Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92-463, section 10(a)(2)).

DATE: December 28, 1978, 9:00 a.m. to 3:30 p.m.

ADDRESS: National Advisory Council on Adult Education, 425 13th Street NW., Suite 323, Washington, D.C. 20004.

FOR FURTHER INFORMATION CONTACT:

Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th St. NW., Washington, D.C. 20004 (202/376-8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 313 of the Adult Education Act (80 Stat. 1216.20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the admininstration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services. The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee shall be open to the public.

The proposed agenda includes:

Analysis of Comments on Notice of Intent to Regulate Issues.
Structure for Proposed Rule Making Hearings.
Supplemental Appropriation—Adult Education Act.
Committee Budget.

Records shall be kept of all Council proceedings, and shall be available for public inspection at the Office of the National Advisory Council on Adult Education, 425 13th St. NW., Suite 323, Washington, D.C.20004.

Signed at Washington, D.C. on November 30, 1978.

GARY A. EYRE,
Executive Advisory Council on Adult Education.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

COLORADO

Availability of Northwest Colorado Coal Report

The Department of the Interior, Bureau of Land Management (BLM) has prepared a report on the potential development of coal resources in Northwest Colorado.

The report, entitled *Northwest Supplemental Report: A Supplement to the Northwest Colorado Coal Regional Environmental Statement,* presents an overview of potential coal development through 1990 in the Northwest Colorado Region which consists of Moffat, Routt, and Rio Blanco counties north of the White River. The report updates coal development projections on existing Federal leases and private coal holdings, and provides an updated assessment of impacts that reflects new laws and regulations that have become effective since the original environmental statement (FES 77-1) was published in January 1977. There were no site-specific actions proposed within this region that were not covered by the injunction on new Federal coal leasing in the case *Natural Resources Defense Council, Inc. et al.* v. *Royston C. Hughes et al.* Therefore, no site-specific proposals are assessed in this supplemental report.

Single copies of the report are available from the:

BLM District Manager, Craig District Office, P.O. Box 248, 455 Emerson Street, Craig, Colorado 81625, telephone (303) 824-3417;
BLM State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202, telephone (303) 837-4481.

Copies of the report are available for inspection at the following locations:

BLM State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202, telephone (303) 837-4481;
BLM Craig District Office, P.O. Box 248, 455 Emerson Street, Craig, Colorado 81625, telephone (303) 824-3417;
Washington Office of Public Affairs, Bureau of Land Management, Room 5627, 18th and C Streets, NW., Washington, D.C. 20240, telephone (202) 343-5717;

PUBLIC LIBRARIES

Conservation Library, Denver Public Library, 1357 Broadway Denver, Colorado 80206;
Craig-Moffat County Library, 651 Yampa Avenue, Craig, Colorado 81625;
Hayden Public Library, 153 West Jefferson, Hayden, Colorado 81639;
Meeker Public Library, 200 Main Street, Meeker, Colorado 81641;
Rangely Public Library, 109 East Main, Rangely, Colorado 81648;
Werner Memorial Library, 1289 Lincoln Avenue, Steamboat Springs, Colorado 80477.

No public hearings are scheduled concerning this report since there is no specific action proposed by the Bureau of Land Management at this time.

Written comments on the report will be accepted, and may be submitted to the BLM District Manager, Craig District Office, at the address given above. These comments will be taken into consideration in future environmental assessments that may be done by the Bureau of Land Management concerning potential coal development in the Northwest Colorado Region.

ARNOLD E. PETTY,
Acting Associate Director, Bureau of Land Management.

Approved: December 1, 1978.

GARY J. WICKS,
Deputy Assistant Secretary of the Interior.

WESTERN LEG OF ALASKA NATURAL GAS TRANSMISSION SYSTEM WILDERNESS INVENTORY (CALIFORNIA ONLY)

Proposed Decision

BACKGROUND

Pursuant to Section 603 of the Federal Land Policy and Management Act of 1976 (Pub. L. 94-579) and the Wilderness Inventory Handbood (September 27, 1978); the BLM State Director of California has made an initial proposed decision on four wilderness inventory units in Northern California in accordance with FR, Vol. 43, No. 218, November 9, 1978. Inventories in these four units have been conducted in advance of the statewide inventory in order to meet time commitments that have been previously established for the special project identified as the Western Leg of the Alaska Natural Gas Transmission System.

The Alaska Natural Gas Transmission System from its point of entrance into California at the Oregon State line to its proposed termination point at Antioch, California is approximately 281.6 miles in length. The proposed pipeline through California parallels an existing 36 inch pipeline for its total length and will result in a 50 ft. additional right-of-way width.

The R/W crosses 15.21 miles of Modoc National Forest, 16.94 miles of Shasta-Trinity National Forest, 1.85 miles of Lassen National Forest and approximately 2.53 miles of public lands administered by the Bureau of Land Management.

The respective National Forests have previously determined that the proposed pipeline will not have any significant adverse impacts upon any wilderness areas or lands which have wilderness values within their boundaries.

PROPOSED DECISION

The California State Director's proposed decision on the wilderness inventory of the four inventory units containing public lands is as follows:

CA-030-001—Bryant Mtn. Unit—The public lands contained within this unit clearly and obviously do not meet the criteria for identification as a wilderness study area.

CA-030-002—Pit River Unit—The public lands contained within this unit clearly and obviously do not meet the criteria for identification as a wilderness study area.

CA-030-003—Meridian Unit—The public lands contained within this unit clearly and obviously do not meet the criteria for identification as a wilderness study area.

CA-030-004—Sacramento River Unit—The public lands contained within this unit clearly and obviously do not meet the criteria for identification as a wilderness study area.

DECISION SUMMARY AND RATIONALE

The above inventory units contain public lands that are nearby or are traversed by the proposed pipeline. The lands do not meet the established criteria for identification as wilderness study areas primarily due to the scattered nature and small size of the inventoried lands, which range from less than 40 acres to a maximum of approximately 2300 acres of contiguous public land. In addition, numerous intrusions, such as roads or structures are present throughout many of the parcels. It has therefore been determined that there are no public lands containing wilderness values that will be impacted by the proposed pipeline.

PUBLIC REVIEW

A 60 day formal public review of this proposed decision will begin November 30, 1978, and will be terminated on January 29, 1979. A public meeting will be held on this proposed decision at 7:30 p.m., January 3, 1979, at the BLM Redding District Office, located at 355 Hemsted Drive, Redding, CA 96001. Written comments may be sent to the Redding District Office in care of the District Manager.

SUPPLEMENTARY INFORMATION

Additional information concerning this proposed decision can be obtained from the Wilderness Coordinator at the Redding District Office.

ED HASTEY,
State Director.

National Park Service

CHESAPEAKE AND OHIO CANAL NATIONAL HISTORICAL PARK COMMISSION

Meeting

Notice is hereby given in accordance with Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held Saturday, December 16, 1978, at 1 p.m. at the Grace Episcopal Church 1041 Wisconsin Avenue NW., Washington, D.C.

The Commission was established by Pub. L. 91-664 to meet and consult with the Secretary of the Interior on general policies and specific matters relating to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

The members of the Commission are as follows:

Mr. Donald R. Frush, Chairman, Hagerstown, Maryland
Mrs. Bonnie Troxell, Cumberland, Maryland
Miss Nancy Long, Glen Echo, Maryland
Mrs. Constance Morella, Bethesda, Maryland
Mr. Kenneth S. Rollins, Brookmont, Maryland
Mr. Vladimir A. Whabe, Baltimore, Maryland
Mr. Edwin F. Wesely, Jr., Brookmont, Maryland
Mr. John D. Miller, Cumberland, Maryland
Mr. James B. Coulter, Annapolis, Maryland
Mrs. Dorothy Grotos, Arlington, Virginia
Mrs. Minnie Pohlmann, Dickerson, Maryland
Miss Margaret Dietz, Lovettsville, Virginia
Dr. James H. Gilford, Frederick, Maryland
Mr. Lorenzo W. Jacobs, Jr., Washington, D.C.
Mr. Siles F. Starry, Shepherdstown, West Virginia
Mr. Rockwood H. Foster, Washington, D.C.
Mr. R. Lee Downey, Williamsport, Maryland
Mr. John C. Frye, Gapland, Maryland

Matters to be discussed at this meeting include:

1. Talk by D.C. City Planning on the Georgetown area
2. National Park Service overview of C&O Canal National Historical Park
3. National Park Service talk on rebuilding canal in the Georgetown area
4. Williamsport Basin status
5. Harpers Ferry Road Improvements
6. Access to Town of Brunswick campground
7. Palisades wayside interpretive exhibit plan
8. Great Falls development concept plan
9. Restoration Team activities report
10. Future status of Commission (terms)
11. Relocation of Lander Maintenance shop
12. Redecking of bridge on Route 11, Williamsport

The meeting will be open to the public. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact William R. Failor, Superintendent, C&O Canal National Historical Park, P.O. Box 4, Sharpsburg, Maryland 21782, telephone 301-948-5641 or 301-432-2231. Minutes of the meeting will be available for public inspection 4 weeks after the meeting at Park Headquarters, Sharpburg, Maryland.

Dated: November 22, 1978.

MANUS J. FISH, Jr.,
Regional Director
National Capital Region.

REVISED RANGE MANAGEMENT PROGRAM FOR THE CHALLIS GRAZING UNIT, CUSTER COUNTY, IDAHO

Notice of Availability of Final Supplement Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final supplemental statement for the Challis Grazing Unit. The proposal involves implementing an improved range management program on public lands within the Challis Planning Unit of the Salmon District in east central Idaho.

A limited number of copies are available upon request at the Idaho State Office and Salmon District Office:

Idaho State Office, Bureau of Land Management, Federal Building, Box 042, 550 W. Forth Street, Boise, Idaho 83724, Telephone 208-384-1770.

Salmon District Office, Bureau of Land Management, Highway 93 South, Salmon, Idaho 83467, Telephone 208-756-2201.

Public reading copies wil be available for review at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Streets, N.W., Washington, D.C. 20240, Telephone 202-343-5717.

Idaho State Office, Bureau of Land Managements, Federal Building, Box 042, 550 W. Fort Street, Boise, Idaho 83724, Telephone 208-384-1770.

Salmon District Office, Bureau of Land Management, Highway 93 South, Salmon, Idaho 83647, Telephone 208-756-2201.

Dated: December 1, 1978.

LARRY E. MEIEROTTO,
Deputy Assistant
Secretary of the Interior.

DEPARTMENT OF JUSTICE

NOTICE OF PROPOSED CONSENT JUDGMENT IN ACTION TO ENJOIN DISCHARGE OF WATER POLLUTANTS

In accordance with Departmental Policy, 28 CFR § 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree in *United States* v. *City of St. Petersburg Beach and the State of Florida*, Civil Action No. 76-694-CIV, has been lodged with the District Court for the Middle District of Florida. The proposed decree imposes a moratorium on connections to the existing City of St. Petersburg Beach sewer system until such time as a new original sewage treatment plant is completed and the City has connected to that system. In addition the decree establishes certain interim effluent limitations that will apply to the operation of the existing City system. With respect to penalties the decree would impose a $10,000 per day fine on the City if it does not connect into the regional system thirty days after that facility can accept its wastes. In addition the decree imposes certain other penalty provisions for violations of its provisions as well as requiring the City to pay $6,000 for its past violations.

The Department of Justice will receive written comments relating to the proposed judgment for thirty days from the date of publication of this notice. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530 and refer to *"United States* v. *City of St. Petersburg Beach, et al.," D.J. Ref. No. 90-5-1-1-632.*

The proposed decree may be examined at the office of the United States Attorney, 311 West Monroe Street, Jacksonville, Florida 32201; at the Region IV Office of the Environmental Protection Agency, Enforcement Division, 345 Courtland Street, N.E., Atlanta, Georgia 30308; and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2625, Washington, D.C. 20503. A copy of the proposed decree may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice.

JAMES W. MOORMAN,
Assistant Attorney General,
Land and Natural Resources Division.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-261]

CAROLINA POWER AND LIGHT CO.

Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 34 to Facility Operating Licencse No. DPR-23, issued to the Carolina Power and Light Company, (the licensee), which revised Technical Specifications for operation of the H. B. Robinson Steam Electric Plant Unit No. 2 (the facility) located in Darlington County, Hartsville, South Carolina. The amendment is effective as of the date of its issuance.

The amendment revises Technical Specifications 4.5.2.4 and 4.5.2.6 concerning testing requirements of the containment spray additive valves and the refueling water storage tank outlet valves. These changes are consistent with NRC guidance for meeting the requirements of 10 CFR 50.55a(g).

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendement.

For further details with respect to this action, see (1) the licensee's submittals dated December 2, 1977, (2) Amendment No. 34 to License No. DPR-23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this

[Docket No. 50-261]

CAROLINA POWER AND LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 33 to Facility Operating License No. DPR-23, issued to the Carolina Power and Light Company (the licensee), which revised Technical Specifications for operation of the H. B. Robinson Steam Electric Plant Unit No. 2 (the facility located in Darlington County, Hartsville, South Carolina. The amendment is effective as of the date of its issuance.

This amendment provides for the reissuance of the Technical Specifications in a retyped format. Some minor changes in the retyped Technical Specifications were made which were administrative or clarification. Also included in the amendment was an organization change which did not reduce any safety functions.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the licensee's submittals dated August 13, 1976 and September 1, 1977, and application for amendment dated August 14, 1978, and (2) Amendment No. 33 to License No. DPR-23. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina. A copy of item (2) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

NORTHERN STATES POWER CO.

Issuance of Amendments To Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 32 and 26 to Facility Operating License Nos. DPR-42 and DPR-60, issued to the Northern States Power Company (the licensee), which revised Technical Specifications for operation of Unit Nos. 1 and 2 of the Prairie Island Nuclear Generating Plant (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of their date of issuance.

These amendments change the Technical Specifications that relate to the pressurizer heatup rate, the reactor vessel pressure-temperature operating limits, and the part length rods.

The application for amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the applications for amendments dated December 9, 1977 and September 8, 1978, (2) Amendment Nos. 32 and 26 to License Nos. DPR-42 and DPR-60, respectively, and (3) the Commission's related Safety Evaluation. ARIZONA PUBLIC SERVICE COMPANY, ET AL PALO VERDE NUCLEAR GENERATING STATION, UNITS 4 AND 5

Notice of Receipt of Additional Antitrust Information: Time for Submission of Views on Antitrust Matters

Arizona Public Service Company, pursuant to section 103 of the Atomic Energy Act of 1954, as amended, filed on July 28, 1978, information requested by the Attorney General for Antitrust Review as required by 10 CFR Part 50, Appendix L. The information concerns additional ownership participants, Nevada Power Company, San Diego Gas and Electric Company, Los Angeles Department of Water & Power, and the Cities of Anaheim, Burbank, Glendale, Pasadena, and Riverside, California, for the Palo Verde Nuclear Generating Station, Units 4 and 5 located in Maricopa County, Arizona.

This additional Antitrust information was filed in connection with the Arizona Public Service Company's applications for construction permits and operating licenses for the Palo Verde Nuclear Generating Station, Units 4 and 5.

The original "Notice of Receipt of Antitrust Information and Application for Construction Permits and Operating Licenses; Time for Submission of Views and Antitrust Matters" was published in the FEDERAL REGISTER on May 8, 1978 (43 FR 19729).

A copy of the Arizona Public Service Company letter, dated July 28, 1978 and the above stated documents are available for public examination and copying for a fee at the Commission's Public Document Room at 1717 H Street, NW. Washington, D.C. 20555 and at the Phoenix Public Library, Science and Industry Section, 12 East McDowell Road, Phoenix, Arizona 85004.

Information in connection with the antitrust review of this application can be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. ATTN: Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

Any person who wishes to have their views on the antitrust matters with respect to the Nevada Power Company, San Diego Gas and Electric Company, Los Angeles Department of Water & Power, and the Cities of Anaheim, Burbank, Glendale, Pasadena, and Riverside, California presented to the Attorney General should submit such views for consideration to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Chief, Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation, on or before January 22, 1979.

Dated at Bethesda, Maryland, this 13th day of November, 1978.

[Docket No. 50-368]

ARKANSAS POWER & LIGHT CO., ARKANSAS NUCLEAR ONE, UNIT 2

Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 6 to Facility Operating License No. NPF-6 to Arkansas Power and Light Company for operation of Arkansas Nuclear One, Unit 2 (the facility) located at the licensee's site in Pope County, Arkansas. The amendment is effective as of the date of its issuance.

The amendment provides one-time relief from Technical Specification 3.8.1.1.b to allow non-nuclear heat up operation with only one deisel generator and two offsite power systems available before repairs are completed on the second diesel generator which experienced mechanical failure on November 9, 1978. The basis of granting relief is that the plant has not yet gone critical and so there are no fission products requiring decay heat removal from the reactor core. The relief expires when the Commission has made a written determination that both diesel generators are operable but not later than three weeks from the date of issuance of this license amendment.

The amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action see (1) the licensee's application for amendment dated November 13, 1978 and submittal of additional information in a letter dated November 15, 1978, (2) Amendment No. 6 to License No. NPF-6, and (3) the Commission's related Safety Evaluation supporting Amendment No. 6 to License No. NPF-6. All of these items are available for public inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D. C. 20555 and the Arkansas Polythechic College, Russellville, Arkansas 72801.

Dated at Bethesda, Maryland, this 18th day of November 1978.

PHILADELPHIA ELECTRIC COMPANY, ET AL, PEACH BOTTOM UNITS NOS. 2 AND 3

Notice of Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 49 and 48 to Facility Operating License No. DPR-44 and DPR-56, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company and Atlantic City Electric Company, which revised the Technical Specifications for operation of the Peach Bottom Atomic Power Station Units Nos. 2 and 3, located in York County, Pennsylvania. The amendments are effective as of the date of issuance.

These amendments revise the Technical Specifications to increase the total storage capacity of the spent fuel pools at Peach Bottom Atomic Power Station Units Nos. 2 and 3 from 2220 to 5623 fuel assemblies.

The applications for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Notice of Proposed Issuance of Amendments to Facility Operating Licenses in connection with this action was published in the FEDERAL REGISTER on February 23, 1978 (43FR7490). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has prepared an environmental impact appraisal for this action and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action other than that which has already been predicted and described in the Commission's Final Environmental Statement for the Facility dated April 1973.

For further details with respect to this action, see (1) applications for amendments dated January 18, April 12, May 19, June 12 and September 19, 1978, (2) Amendments Nos. 49 and 48 to License Nos. DPR-44 and DPR-56, (3) the Commission's related Safety Evaluation, and (4) the Commission's related Enrionmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. and at Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 30th day of November 1978.

The Commission has made appropri-

[Docket Nos. STN 50-556 and STN 50-557]

PUBLIC SERVICE COMPANY OF OKLAHOMA BLACK FOX STATION, UNIT NOS. 1 AND 2

Notice of Issuance of Amendment to Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Public Service Company of Oklahoma to conduct certain site activities in connection with the Black Fox Station, Unit Nos. 1 and 2, prior to a decision regarding the issuance of construction permits. Notice of the Limited Work Authorization was published in the FEDERAL REGISTER on August 11, 1978 (43 FR 35762).

Since that time, the Director of Nuclear Reactor Regulation has determined that additional activities may be authorized under the Limited Work Authorization. The additional activities that are authorized are within the scope of those authorized by 10 CFR 50.10(e)(1) and include excavation and pouring of the excavation seal for Unit 2. Excavation was previously authorized only for Unit 1.

Any activities undertaken pursuant to this authorization are entirely at the risk of the Public Service Company of Oklahoma and the grant of the authorization has no bearing on the issuance of construction permits with respect to the requirements of the Atomic Energy Act of 1954, as amended, and rules, regulations, or orders of the Commission promulgated pursuant thereto.

A copy of (1) the Atomic Safety and Licensing Board's Partial Initial Decision Authorizing Limited Work Authorization and the Order Granting Applicants' Motion for Reconsideration and Clarification; (2) the applicant's Preliminary Safety Analysis Report and amendments thereto; (3) the applicant's Environmental Report and amendments thereto; (4) the staff's Final Environmental Statement dated February 1977; (5) the Commission's letters of authorization dated July 26, 1978 and September 6, 1978, and (6) the Commission's letter amending the authorization dated November 30, 1978, are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C., and at the Tulsa City County Library, 400 Civic Center, Tulsa, Oklahoma.

Dated at Bethesda, Maryland, this 30th day of November 1978.

For the Nuclear Regulatory Commission.

JAN A. NORRIS, ACTING CHIEF,
Environmental Projects Branch 2 Division of Site Safety and Environmental Analysis.

[Docket Nos. 50-361 and 50-362]

SOUTHERN CALIFORNIA EDISON COMPANY SAN DIEGO GAS AND ELECTRIC COMPANY

Notice of Availability of Draft Environmental Statement for San Onofre Nuclear Generating Station, Units 2 and 3

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Draft Environmental Statement (NUREG-0490) prepared by the Commission's office of Nuclear Reactor Regulation related to the proposed operation of the San Onofre Nuclear Generating Station, Units 2 and 3, in San Diego County, California, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N. W., Washington, D. C. and in the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, California. The Draft Statement is also being made available at the Office of the Governor, Office of Planning and Research, 1400 Tenth Street, Sacramento, California, and at the San Diego County Comprehensive Planning Organization, Security Pacific Plaza, 1200 Third Avenue, San Diego, California. Requests for copies of the Draft Environmental Statement should be addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C., Attention: Director, Division of Site Safety and Environmental Analysis.

The Applicant's Environmental Report, as supplemented, submitted by Southern California Edison Company and San Diego Gas and Electric Company is also available for public inspection at the above-designated locations. Notice of availability of the Applicant's Environmental Report was published in the FEDERAL REGISTER on April 7, 1977 (42 F. R. 18460).

Pursuant to 10 CFR Part 51, interested persons may submit comments on the Applicant's Environmental Report, as supplemented, and the Draft Environmental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the Applicant's Environmental Report and the Draft Environmental Statement (local agencies may obtain these documents upon request). Comments are due by January 22, 1979. Comments by Federal, State, and local officials, or other persons received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D. C. and the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, California. Upon consideration of comments submitted with respect to the Draft Environmental Statement, the Commission's staff will prepare a final Environmental Statement, the availability of which will be published in the FEDERAL REGISTER.

Comments on the Draft Environmental Statement from interested persons of the public should be addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Bethesda, Maryland, this 28th day of November 1978.

For the Nuclear Regulatory Commission

[Docket Nos. STN 50-566 and STN 50-567]

TENNESSEE VALLEY AUTHORITY, YELLOW CREEK NUCLEAR PLANT, UNITS 1 AND 2

Notice of Issuance of Construction Permits

Notice is hereby given that, pursuant to the Partial Initial Decision, dated February 3, 1978, and the Initial Decision, dated November 24, 1978 of the Atomic Safety and Licensing Board, the Nuclear Regulatory Commission (the Commission) has issued Construction Permit Nos. CPPR-172 and CPPR-173 to the Tennessee Valley Authority for construction of two pressurized water reactors at the applicant's site in Tishomingo County, Mississippi. The proposed reactors, known as the Yellow Creek Nuclear Plant, Units 1 and 2 are designed to operate at a core power level of 3800 megawatts thermal with a net electrical output of approximately 1300 megawatts.

The Initial Decision is subject to review by an Atomic Safety and Licensing Appeal Board prior to its becoming final. Any decision or action taken by an Atomic Safety and Licensing Appeal Board in connection with the Initial Decision may be reviewed by the Commission.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations in 10 CFR Chapter I, which are set forth in the construction permits. The application for the construction permits complies with the standards and requirements of the Act and the Commission's regulations.

The construction permits are effective as of their date of issuance. The earliest date for the completion of Unit 1 is February 1, 1984, and the latest date for completion is May 1, 1985. The earliest date for completion of Unit 2 is February 1, 1985 and the latest date for completion is May 1, 1986. The permits shall expire on the latest dates for completion of the facilities.

A copy of: (1) the Partial Initial Decision, dated February 3, 1978; (2) the Initial Decision, dated November 24, 1978; (3) the Construction Permits Nos. CPPR-172 and CPPR-173; (4) the report of the Advisory Committee on Reactor Safeguards, dated January 13, 1978; (5) the Commission's staff Safety Evaluation Report, dated December 1, 1977 and Supplement No. 1 thereto, dated June 1978; (6) the Preliminary Safety Analysis Report and amendments thereto; (7) the applicant's Environmental Report, dated July 1976; (8) the Draft Environmental Statement, dated June 1977; and (9) the Final Environmental Statement, dated November 1977, are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. and at the Corinth Public Library, 1023 Fillmore Street, Corinth, Mississippi 38834. A copy of the construction permits may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Managment, Office of Nuclear Reactor Regulation.

Copies of the Safety Evaluation Report and Supplement No. 1 (Document No. NUREG-0347) and the Final Environmental Statement (Document No. NUREG-3065) may be purchased at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161.

Dated at Bethesda, Maryland this 29th day of November, 1978

For the Nuclear Regulatory Commission.

OLAN D. PARR,
Chief, Light Water Reactors Branch No. 3, Division of Project Management.

[Docket No. 50-29]

YANKEE ATOMIC ELECTRIC COMPANY

Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 53 to Facility Operating License No. DPR-3, issued to Yankee Atomic Electric Company (the licensee), which revised the Technical Specifications for operation of the Yankee Nuclear Power Station (Yankee-Rowe) (the facility) located in Rowe, Franklin County, Massachusetts. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specifications by reducing the neutron detector thimbles required to be operable from 75 percent (17 thimbles) to 12 thimbles and by increasing the assigned nuclear measurement uncertainty from 5 percent to 6.8 percent if less than 17 detector thimbles are operable when the incore detection system is used for power distribution measurements.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. the Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 14, 1977, and supplements thereto dated April 6, 1978, May 11, 1978, June 15, 1978, and October 4, 1978, (2) Amendment No. 53 to License No. DPR-3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public document Room, 1717 H Street, N.W., Washington, D.C., and at the Greenfield Comunity College, 1 College Drive, Greenfield, Massachusetts 01301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 24th day of November, 1978.

For the Nuclear Regulatory Commission.

RICHARD D. SILVER,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

STATE AND LOCAL GRANTEE PROCUREMENT STANDARD

Invitation for Public Comment and Notice of Public Hearing

AGENCY: Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Notice of public hearing on a proposed guideline governing state and local grantee procurement standards, Attachment O of OMB Circular A-102.

SUMMARY: This proposed revision would amend the Attachment O to OMB Circular A-102. (1) It reaffirms the maximum reliance on state and local government grantee management of their own procurement; (2) Rescinds non-confroming provisions of current agency subordinate regulations; and (3) creates a grantee procurement review certification program to further reduce the Federal Government's preaward review of individual procurements and burdensome duplicative reviews of grantee procurement procedures. This policy, it is anticipated, will reduce administrative cost, paperwork, and other such factors which contribute to inefficiency, waste, and delay in implementing programs.

DATE: Comments must be received on or before January 30, 1979. The public meeting will be held on January 16, 1979 in Room 2010, NEOB at 10:00 a.m. Statements for the public hearing should be received prior to January 12, 1979.

ADDRESSES: Comments and requests to be scheduled to make statements at the public hearing should be addressed to the Administrator for Federal Procurement Policy, Office of Management and Budget, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT:

Mr. Jack Nadol, Assistant for Intergovernmental Affairs, Telephone 202-395-6166.

D E C 6 7 8 UMI

V 4 3 / 2 3 5 D E C 6 7 8 UMI

SUPPLEMENTARY INFORMATION: Under Pub. L. 93-400, authority for procurement policies governing procurement under Federal assistance programs is vested in the Administrator for Federal Procurement Policy. All executive agency procurement policies, for procurement under such programs, are subject to those prescribed by the Administrator. The Office of Federal Procurement Policy, Office of Management and Budget is considering the adoption of amendments to the current procurement standards, Attachment O to OMB Circular A-102.

ANALYSIS OF PROPOSED REVISIONS

Section 4. Proposed that grantor agencies conduct grantee procurement system reviews and that when a grantee procurement system meets the standards of this attachment it may be certified by the grantor agencies, thus reducing individual pre-award contract reviews by that agency or other agencies making grants.

Section 5. Limits grantor agencies' authority to review protests. This is properly the responsibility of the grantee.

Section 6. Limits grantor review of grantee procurements to non-competitive procurements, brand name procurements, and procurements by grantees that do not meet Attachment O standards.

Section 7. Expands the code of conduct from merely prohibiting the acceptance of gifts and gratuities to prohibiting the participation in the award of contracts to firms in which the employee has some financial interest.

Section 8B. Expands the section requiring affirmative steps to ensure minority and small business participation in contracting under Federal grant programs.

Section 9A. Encourages the use of functional specifications.

Section 10. Explains when it is appropriate to use one of the following four methods of procurement, small purchase, competitive sealed bids, competitive negotiations, and noncompetitive negotiations.

Section 11. Prohibits the use of a percentage of construction cost method of contracting, requires either a cost or price analysis of all procurement, and states cost will be allowed if consistant with Federal cost principles.

LESTER A. FETTIG,
Administrator.

PROCUREMENT STANDARDS

1. APPLICABILITY

a. This Attachment establishes standards and guidelines for the procurement of supplies, equipment, construction, and other services with Federal grant funds. These standards are furnished to ensure that such materials and services are obtained efficiently and economically and in compliance with the provisions of applicable Federal law and Executive orders. No additional requirements or subordinate regulations shall be imposed upon grantees by Executive agencies unless specifically required by Federal law or Executive orders or authorized by the Administrator for Federal Procurement Policy.

b. Provisions of current subordinate regulations not conforming to this attachment are rescinded unless approved by the Office of Federal Procurement Policy (OFPP).

2. GRANTEE/GRANTOR RESPONSIBILITY

a. These standards do not relieve the grantee of any contractual responsibilities under its contracts. The grantee is responsible, for the settlement of all contractual and administrative issues arising out of procurements entered into in support of a grant. These include but are not limited to: Source evaluation, protest, disputes, and claims. Executive agencies shall not substitute their judgment for that of the grantee unless the matter is of primary Federal concern. Violations of law are to be referred to the local, State, or Federal authority having proper jurisdiction.

b. Grantees shall use their own procurement procedures which reflect applicable State and local laws and regulations: *Provided*, That procurements made with Federal grant funds conform to the standards set forth in the following paragraphs.

3. GRANTEE PROCUREMENT IMPROVEMENT

Executive agencies awarding Federal grants or other assistance which require or allow for procurement by the recipients are encouraged to assist recipients in improving their procurement capabilities by providing them with technical assistance, training, publications, and other aid.

4. PROCUREMENT SYSTEM REVIEWS

a. Executive agencies are encouraged to perform reviews of their grantees' procurement systems if a continuing relationship with the grantee is anticipated or a substantial amount of the Federal assistance is to be used for procurement and review of individual contracts is anticipated. The purpose of the review shall be to determine: (1) Whether a grantee's procurement system conforms to the standards prescribed by this Attachment or other criteria acceptable to the OFPP, such as provisions of the model procurement code for State and local government and (2) whether the grantee's procurement system should be certified by the reviewing agency. Such a review will also give an agency an opportunity to give technical assistance to a grantee to remedy its procurement system if it does not fully comply. In addition, such a review will provide a firm basis for deciding whether the grantee's contracts and related procurement documents should be subject to the grantor's prior approval, as provided by Section 6.

b. In conducting procurement system reviews, grantor agencies will evaluate a grantee's procurement system in terms of whether it complies with the standards prescribed by this Attachment and represents a fair, efficient and effective procurement system. To the maximum extent feasible, reviewors will rely upon State or local evaluations and analyses performed or by agencies or organizations independent of the grantee contracting activity.

c. When a Federal grantor agency completes a procurement review, it shall furnish a report to the grantee, with a copy to OFPP.

The reviews authorized by Section 6 are waived if a grantee's procurement system is certified.

d. All agencies should normally rely upon the resultant findings or certification for a period of 24 months before another review is performed.

5. DISPUTES PROCEDURES

Grantor agencies may develop an administrative procedure to handle complaints or protests regarding grantee contractor selection actions. The procedure shall be limited as follows:

(a) No protest shall be accepted by the grantor agency until all administrative remedies at the grantee level have been exhausted.

(b) Review is limited to:

(i) Violations of Federal law or regulations. Violations of State or local law shall be under the jurisdiction of State or local authorities.

(ii) Violations of grantee procedure for review of complaints or protest.

6. GRANTOR REVIEW OF PROPOSED CONTRACT

Federal grantor pre-award review and approval of the grantee's proposed contracts and related procurement documents, such as requests for proposals and invitations for bids, may be required only under the following circumstances:

a. The procurement is expected to exceed $10,000 and is to be awarded without competition or only one bid or offer is received in response to solicitation.

b. The procurement specifies a "brand name" product; or

c. The grantee's procurement system fails to comply with one or more significant aspects of this Attachment. The grantor agency shall notify the grantee of such deficiencies in writing, with a copy of such notification to the OFPP.

7. CODE OF CONDUCT

Grantees shall maintain a written code or standards of conduct which shall govern the performance of their officers, employees or agents engaged in the award and administration of contracts supported by Federal funds. No employee, officer or agent of the grantee shall participate in selection, or in the award or administration of a contract supported by Federal funds if a conflict of interest, real or apparent, would be involved. Such a conflict would arise when:

a. The employee, officer or agent;

b. Any member of his immediate family;

c. His or her partner; or

d. An organization which employs, or is about to employ, any of the above,

has a financial or other interest in the firm selected for award.

The grantee's and contractor's officers, employees or agents shall neither solicit nor accept gratuities, favors or anything of monetary value from contractors, potential contractors, or parties to subagreements.

To the extent permitted by State or local law or regulations, such standards of conduct shall provide for penalties, sanctions, or other disciplinary actions for violations of such standards by the grantee's officers, employees, or agents, or by contractors or their agents.

8. PROCUREMENT PROCEDURES

The grantee shall establish procurement procedures which provide for, the following minimum requirements:

a. Proposed procurement actions shall be reviewed by grantee officials to consider consolidation of requirements to obtain a more economical purchase and to avoid unnecessary or duplicative items. Where appropriate, an analysis shall be made of lease versus purchase alternatives, in-house or contracting out, and any other appropriate area of analysis to determine which approach would be the most economical. To foster greater economy and efficiency grantees are encouraged to enter into State and local intergovernmental agreements for procurement and/or use of common goods and services.

b. Affirmative steps must be taken to assure that small and minority businesses are utilized when possible as sources of supplies and services. Affirmative steps shall include but not limited to the following:

(1) Include qualified small and minority businesses on solicitation lists.

(2) Assure that small and minority businesses are solicited whenever they are potential sources.

(3) When economically feasible, divide total requirements into smaller tasks or quantities so as to permit maximum small and minority business participation.

(4) Establish delivery schedules which will encourage participation by small and minority business.

(5) Use the services and assistance of the Small Business Administration, the Office of Minority Business enterprize of the Department of Commerce and the Community Service Administration.

(6) If any subcontracts are to be let, require the prime contractor to take the affirmative steps in 1 through 5 above.

9. SELECTION PROCEDURES

The grantee shall have written selection procedures which shall provide, as a minimum, the following procedural requirements:

All procurement transactions, regardless of whether by sealed bids or by negotiation and without regard to dollar value, shall be conducted in a manner that provides maximum open and free competition consistent with this attachment. Procurement procedures shall not restrict or eliminate competition. Examples of what is considered to be restrictive of competition include, but are not limited to: (1) Placing unreasonable requirements on firms in order for them to qualify to do business, (2) noncompetitive practices between firms, and (3) organizational conflicts of interest.

a. Solicitations of offers, whether by competitive sealed bids or competitive negotiation, shall:

(1) incorporate a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. The description may include a statement of the qualitative nature of the material, product or service to be procured, and when necessary, may set forth those minimum essential characteristics and standards to which it must conform if it is to satisfy its intended use. Detailed product specifications should be avoided if at all possible. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a "brand name ore equal" description may be used as a means to define the performance or other salient requirements of a procurement. The specific features of the named brand which must be met by offerors shall be clearly specified.

2. Clearly set forth all requirements which bidders must fulfill and all other factors to be used in evaluating bids or proposals.

b. Awards whall be made only to responsible contractors that possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, and financial and technical resources.

10. METHOD OF PROCUREMENT

Procurement under grants shall be made by one of the following methods, as described herein: a. small purchase procedures; b. Competitive sealed bids; c. competitive negotiation; d. noncompetitive negotiation.

a. Small purchase procedures are those relatively simple and informal procurement methods that are sound and appropriate for a procurement of services, or supplies or other property, costing in the aggregate not more than $10,000. (State or local small purchase limits under $10,000 shall be binding on grantees.) If small purchase procedures are used for a procurement under a grant, price or rate quotations shall be obtained from an adequate number of qualified sources.

b. In formal advertising, sealed bids are publicly solicited and a firm-fixed price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming exactly with all the material terms and conditions of the invitation for bids, is lowest in price.

(1) In order for formal advertising to be feasible, appropriate conditions must be present, including, as a minimum, the following:

(a) A complete adequate and realistic specification or purchase description is available.

(b) Two or more responsible suppliers are willing and able to compete effectively for the grantee's business.

(c) The procurement lends itself to a firm-fixed-price contract, and selection of the successful bidder can appropriately be made principally on the basis of price.

(2) If formal advertising is used for a procurement under a grant, the following requirements shall apply:

(a) Within a sufficient time prior to the date set for opening of bids, bids shall be solicited from an adequate number of known suppliers. In addition, the invitation shall be publicly advertised. The invitation for bids including specifications and pertinent attachments, shall clearly define the items or services needed in order for the bidders to properly respond to the invitation.

(b) All bids shall be opened publicly at the time and place stated in the in-

vitation for bids. A firm-fixed-price contract (lump sum or unit price) or cost-reimbursement contract, whichever is appropriate, shall be used. Fixed-price contracts shall be used in procuring construction. In using cost-reimbursement contracts, the cost plus a percentage of cost and percentage of construction cost methods shall not be used.

(c) The invitation for bids will set forth all criteria to be used in evaluating bids, including any criteria for determining responsibility of prospective contractors. The invitation for bids will set forth any contract terms and conditions, including warranties, bonding or other financial arrangements required in connection with every procurement action in excess of $2,000 for supplies or services or $2,000 for construction contracts in excess of $2,000

garding rights to inventions, and materials generated under the contract or subcontract. Contracts shall contain suitable provisions for termination by the grantee including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(d) Open bids shall be tabulated at or soon after the time specified therefor in the invitation for bids, and the award shall be made with reasonable promptness by appropriate notice to the responsible bidder whose bid, conforming to the invitation for bids, will be most advantageous to the grantee, price and other factors considered. Any or all bids may be rejected when it is in the grantee's interest to do so.

c. In competitive negotiation:

(1) Proposals shall be requested from an adequate number of qualified sources;

(2) The grantee shall have written procedures for conducting technical evaluations of the proposals received and for selecting recipients;

(3) Awards shall be made to the responsible firm whose proposal is most advantageous to the grantee's program with price and other factors considered; and

(4) The grantee may utilize competitive negotiation procedures for procurement of A-E services, but to the extent applicable must conform to procedures established by Public Law 92-582 for procurement of A-E services.

d. Noncompetitive negotiation may be used only when the award of a contract is infeasible under small purchase procedures, competitive sealed bids or competitive negotiation and one of the following circumstances applies:

(1) The item is available only from a single source;

(2) The public exigency or emergency for the requirement will not permit a delay resulting from competitive solicitation;

(3) The grantor agency authorizes noncompetitive negotiation; or

(4) After solicitation of a number of sources, competition is determined inadequate.

11. PROHIBITION AGAINST PERCENTAGE OF CONSTRUCTION COST METHOD OF CONTRACTING

The percentage of construction cost method of contracting shall not be used.

12. COST OR PRICE ANALYSIS

Cost or price analysis shall be made in connection with every procurement action including contract modifications. The method and degree of analysis is dependent on the facts surrounding the particular procurement situation, but as a starting point, grantees must make independent estimates before receiving bids or proposals. A cost analysis must be performed when the offeror is required to submit the elements of his estimated cost, e.g., under professional, consulting, and architectural engineering services contracts. A price analysis will be used in all other instances to determine the reasonableness of the proposed contract price.

13. CONTRACT TYPE

The type of contract used by the grantee should be determined on a case-by-case basis depending on the circumstances surrounding the procurement, the nature of the procurement, and the extent of competition available. The grantee may use any type of contract which will promote the best interests of the program involved. However, the grantee must avoid undue risk to its contractors. The use of a cost-plus-a-percentage-of-cost or percentage of construction cost method of contracting shall not be used.

14. AWARDS TO RESPONSIBLE CONTRACTORS

Contracts shall be awarded only to responsible contractors possessing the ability to perform successfully under the terms and conditions of the proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources or accessibility to other necessary resources. In certain circumstances, contracts with certain parties are restricted by agencies' implementation of Executive Order 12549 and 12689, "Debarment and Suspension". See 24 CFR Part 24 for the HUD implementation of these Executive Orders.

15. ACCESS TO RECORDS

Grantees agree to provide the grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives, access to any books, documents, papers and records of the contractor which are directly pertinent to a specific grant program for the purpose of making audit, examination, excerpts and transcriptions.

16. RETENTION OF RECORDS

Grantees agree to retain all books, records, and other documents relative to this contract for three years after final payment and all other pending matters are closed.

17. COMPLIANCE WITH FEDERAL LAWS, REGULATIONS, AND EXECUTIVE ORDERS

Grantees will comply with all Federal laws, regulations, and executive orders applicable to the grant agreement.

18. PATENT RIGHTS

Grantees agree that the Federal awarding agency has the right to a royalty-free nonexclusive and irrevocable license to reproduce, publish, or otherwise use, and to authorize others to use, for Federal purposes, any publication or copyrighted material developed under a grant, subgrant, or contract under a grant or subgrant or any rights of copyright to which a grantee, subgrantee or a contractor purchases ownership with grant support.

19. SMALL AND MINORITY FIRMS

Grantees will take affirmative steps to assure that small and minority firms are used when possible as sources of supplies, equipment, construction, and services. Affirmative steps shall include but not limited to the following:

(1) Include qualified small and minority businesses on solicitation lists.

(2) Assure that small and minority businesses are solicited whenever they are potential sources.

(3) When economically feasible, divide total requirements into smaller tasks or quantities so as to permit maximum small and minority business participation.

(4) Establish delivery schedules which will encourage participation by small and minority business.

(5) Use the services and assistance of the Small Business Administration, the Office of Minority Business enterprize of the Department of Commerce and the Community Service Administration.

(6) If any subcontracts are to be let, require the prime contractor to take the affirmative steps in 1 through 5 above.

20. CLEAN AIR AND WATER

Contracts in excess of $100,000 shall contain a provision that requires the grantee to agree to comply with all applicable standards, orders or requirements issued under section 306 of the Clean Air Act (42 U.S.C. 1857(h)), section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and Environmental Protection Agency regulations (40 CFR Part 15). Violations shall be reported to the grantor agency and the Regional Office of the Environmental Protection Agency.

21. ENERGY CONSERVATION

Grantees will comply with mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94-163).

[FR Doc. 78-33911 Filed 12-5-78; 8:45 am]

Strasser, A., 395-6132

V 43/235 DEC 6 78 UMI

vitation for bids. A firm-fixed-price contract award shall be made by written notice to that responsible bidder whose bid, conforming to the invitation for bids, is lowest. Where specified in the bidding documents, factors such as discounts, transportation costs and life cycle costs shall be considered in determining which bid is lowest. Any or all bids may be rejected when there are sound documented business reasons in the best interest of the program.

c. In competitive negotiation, proposals are requested from a number of sources and the Request for Proposal is publicized, negotiations are normally conducted with more than one of the sources submitting offers, and either a fixed-price or cost-reimbursable type contract is awarded, as appropriate. If competitive negotiation is used for a procurement under a grant, the following requirements shall apply:

(1) Proposals including price, shall be solicited from an adequate number of qualified sources to permit reasonable competition consistent with the nature and requirements of the procurement. The Request for Proposals shall be publicized and reasonable requests by other sources to compete shall be honored to the maximum extent practicable.

(2) Grantees shall provide for evaluation of the proposals, written or oral discussions as required, and selection for contract award.

(3) Award may be made to the responsible offeror whose proposal will be most advantageous to the procuring party, price and other factors considered. Unsuccessful offerors should be notified promptly.

d. Noncompetitive negotiation is procurement through solicitation of a proposal from only one source, or after solicitation of a number of sources, competition is determined inadequate. Noncompetitive negotiation may be used when the award of contract is infeasible under small purchase competitive bidding or competitive negotiation procedures. Circumstances under which a contract may be awarded by noncompetitive negotiation are limited to the following:

(1) The item is available only from a single source;

(2) Public exigency or emergency when the urgency for the requirement will not permit a delay incident to competitive solicitation; or

(3) The Federal grantor agency authorizes noncompetitive negotiation.

11. CONTRACT PRICING

The cost-plus-a-percentage-of-cost and percentage of construction cost method of contracting shall not be used. Grantees shall perform some form of cost or price analysis in connection with every procurement action including contract modifications. Costs or prices based on estimated costs for contracts under grants shall be allowed only to the extent that costs incurred or cost estimated included in negotiated prices are consistent with Federal cost principals.

12. GRANTEE PROCUREMENT RECORDS

Grantees shall maintain records sufficient to detail the significant history of a procurement. These records shall include, but are not necessarily limited to, information pertinent to the following: Rationale for the method of procurement, selection of contract type, contractor selection, and the basis for the cost or price negotiated.

13. CONTRACT PROVISIONS

In addition to provisions defining a sound and complete procurement contract, any recipient of Federal grant funds shall include the following contract provisions or conditions in all procurement contracts:

a. Contracts shall contain provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate.

b. All contracts in excess of $10,000 shall contain suitable provisions for termination by the grantee including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

c. All contracts awarded in excess of $10,000 by grantees and their contractors or subgrantees shall contain a provision requiring compliance with Executive Order 11246, entitled "Equal Employment Opportunity," as amended by Executive Order 11375, and as supplemented in Department of Labor regulations (41 CFR Part 60).

d. All contracts and subgrants for *construction* or repair shall include a provision for compliance with the Copeland "Anti-Kick-Back" Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR, Part 3). This Act provides that each contractor or subgrantee shall be prohibited from including, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The grantee shall report all suspected or reported violations to the grantor agency.

e. When required by the Federal grant program legislation, all *construction* contracts in excess of $2,000 awarded by grantees and subgrantees shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a-7) as supplemented by Department of Labor regulations (29 CFR Part 5). Under this Act contractors shall be required to pay wages to laborers and mechanics at a rate not less than the minimum wages specified in a wage determination made by the Secretary of Labor. In addition, contractors shall be required to pay wages not less often than once a week. The grantee shall place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation and the award of a contract shall be conditioned upon the acceptance of the wage determination. The grantee shall report all suspected or reported violations to the grantor agency.

f. Where applicable, all contracts awarded by grantees and subgrantees in excess of $2,000 for *construction* contracts and in excess of $2,500 for other contracts which involve the employment of mechanics or laborers shall include a provision for compliance with sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-330) as supplemented by Department of Labor regulations (29 CFR Part 5). Under section 103 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work day of 8 hours and a standard work week of 40 hours. Work in excess of the standard workday or workweek is permissible: *Provided*, That the worker is compensated a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 8 hours in any calendar day or 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his health and safety as determined under construction, safety and health standards promulgated by the Secretary of Labor. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

g. Contracts or agreements, the principal purpose of which is to create, develop, or improve products, processes or methods; or for exploration into fields which directly concern public health, safety, or welfare; or contracts in the field of science or technology in which there has been little significant experience outside of work funded by Federal assistance, shall contain a notice to the effect that matters regarding rights to inventions, and materials generated under the contract or agreement are subject to the regulations issued by the Federal grantor agency and the grantee. The contractor shall be advised as to the source of additional information regarding these matters.

h. All contracts (except those of $10,000 or less) awarded by grantees shall include a provision to the effect that the grantee, the Federal grantor agency, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to a specific grant program for the purpose of making audit, examination, excerpts, and transcriptions.

Grantees shall require contractors to maintain all required records for three years after grantees make final payments and all other pending matters are closed.

i. Contracts and subgrants of amounts in excess of $100,000 shall contain a provision which requires the recipient to agree to comply with all applicable standards, orders, or requirements issued pursuant to section 306 of the Clean Air Act of 1970 and Section 508 of the Federal Pollution Control Act. Violations shall be reported to the grantor agency and the Regional Office of the Environmental Protection Agency.

j. Contracts shall recognize mandatory standards and policies relating to energy efficiency which are contained in the State Energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94-165).

14. CONTRACT ADMINISTRATION

Grantees shall maintain a contract administration system insuring that contractors perform in accordance with the terms, conditions, and specifications of the contract or purchase orders.

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on November 29, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

POSTAL RATE COMMISSION

[Docket No. MC79-1]

MINIMUM HEIGHT FOR CARRIER-ROUTE PRESORTED MAIL

Order Instituting Proceedings

Issued November 30, 1978.

The proceeding under section 3623 of the Postal Reorganization Act (39 U.S.C 3623) which we are instituting by this Order is designed to examine an issue suggested by the proceedings in Docket No. MC77-2—proceeding dealing generally with minimum size prohibitions, in which we are concurrently forwarding an Opinion and Recommended Decision to the Governors of the Postal Service. The present docket will be devoted to the question whether the 3½-inch minimum height which we are recommending be continued in effect [1] should be modified by reducing it to 3¼ inches where the mail pieces involved are presorted to carrier route.

Certain parties in Docket No. MC 77-2 suggested modifications to the existing (though not yet effective) Domestic Mail Classification Schedule provision in the interest of presorted mail, but none directly addressed the question of mail presorted to carrier route. The closest approach to such a proposal was made by one public utility participant, which proposed a 3¼-inch minimum height to be applicable where the mail was sufficiently presorted to bypass machine processing in normal Postal Service operations. In our Opinion in Docket M77-2 (pp. 60-61), we explain why a strict carrier-presort category is a more practical and desirable ground for potential distinction between applicable minima.

We are led to believe that the question of a 3¼-inch minimum height limit to carrier-route presorted mail needs exploration by two factors. First, it appears that a substantial number of firms, particularly including public utilities, may be using a billing card of that height. This was asserted by several parties in Docket No. MC77-2 and appears to be uncontroverted. Secondly, a statement made by

[1] The 3½-inch minimum height was announced in Docket MC73-1, where it formed part of the classification schedule stipulated to by the parties. It was not to go into effect until a subsequent time, however; and in Docket No. MC77-2 it was examined afresh. *See generally* PRC Op. MC77-2 (November 30, 1978).

ings or other procedural stages. If pro-

who shall be separately served with

3. To determine eligibility of busi-

2. To take all necessary actions in

V 4 3 / 2 3 5

the Postal Service in the course of those proceedings suggests that when mail is presorted to carrier route it in fact does bypass mechanical processing.[a]

Accordingly, we have decided to institute proceedings to determine whether the 3½-inch height minimum should be modified in the manner described above. Because the issues in this proceeding appear susceptible to strict limitation, we are issuing, as an attachment hereto, a preliminary Notice of Inquiry presenting the issues as they appear to us initially. Participants are asked to respond to these questions, and may, of course, suggest additional issues they believe are necessary to the case.

As an additional aid to the focusing of issues, we have prepared the following specimen language illustrating the potential change in the DMCS:

Not before November 30, 1978, present regulations on the minimum sizes for mail matter shall be expanded to all classes of mail and types of service, and shall be amended to prohibit (1) all items which are less than .007 inches thick, and (2) all items, other than keys and identification devices, which are .25 inches thick or less and (a) are not rectangular, and/or (b) are less than 3.5 inches in height, and/or (c) are less than 5 inches in length; Provided, however,

(1) that photo post cards (defined as post cards consisting of a print produced by photographic means on photographic printing paper and imprinted on the reverse side with post card indicia) shall, until November 30, 1982, be mailable if they are not less than 4.5 inches in length and comply with the other requirements of this section; *and*

(2) *that mail pieces presorted to carrier route shall be mailable if they are not less than 3.25 inches in height and otherwise comply with the requirements of this section.*

The new matter to be considered in this proceeding is represented by the underscored portion of the above illustrative sample. We emphasize that this provision is not put forward as a proposal of the Commission. Participants in this proceeding may, of course, adopt it as their own if they believe it meritorious; they are equally free to propose modifications of it. In either case, the proposal will remain that of the participant in question. Proposals will be due at the same time as responses to the Notice of Inquiry questions attached hereto.

If no proposals are received by the date specified (January 12, 1979) we contemplate terminating this proceeding by Order without scheduling hearings or other procedural stages. If proposals are received which are responsive to the basic issue raised herein, we will issue further Orders prescribing appropriate procedures.

The Commission orders:

(A) Each person (including the Postal Service) who participated as an intervenor or limited participator in Docket No. MC77-2 is hereby an intervenor or limited participator, respectively, in this proceeding, subject to the provisions of paragraph (B), below.

(B) The participation of the intervenors and limited participators provided for by paragraph (A) is subject to the rules and regulations of the Commission. Their participation shall be limited to matters affecting rights and interests specifically set forth in their initial petitions to intervene and requests to become limited participators in Docket No. MC77-2, and shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(C) Persons made participants by paragraph (A) hereof who do not desire to participate in these proceedings may by motion request leave to withdraw.

(D) The participants shall serve copies of all documents, including prepared direct evidence, upon representatives of the Postal Service, the OOC, intervenors, and limited participators. For purposes of such service, where service upon more than one representative has been requested in a petition to intervene or in a request for leave to be heard as a limited participator, including those petitions and requests filed jointly and severally by two or more persons (whether filed in Docket No. MC77-2 or initially in this proceeding), only the first two named representatives in the petition need be served.

(E) The participants (whether made participants by paragraph (A) hereof or by Commission order upon an initial petition to intervene or for leave to be heard as a limited participator) may file responses to the attached Notice of Inquiry by January 12, 1979. Proposals for modification of the Domestic Mail Classification Schedule shall also be filed by that date. Reply comments are due January 22, 1979.

(F) The Commission will sit en banc, with Commissioner Kieran O'Doherty as presiding officer.

(G) Stephen L. Sharfman, Assistant General Counsel (Litigation) (Acting), is hereby designated as the Officer of the Commission to represent the interests of the general public in this proceeding. Service of documents on the Commission shall not constitute service on the Officer of the Commission, who shall be separately served with three copies of all documents.

By the Commission.

DAVID F. HARRIS,
Secretary.

Docket No. MC79-1

MINIMUM HEIGHT FOR CARRIER-ROUTE PRESORTED MAIL

NOTICE OF INQUIRY

The following questions are directed to the Postal Service, the Officer of the Commission, and all other participants in the instant docket. Any participant is free to respond to any of the questions; however, Questions 1 through 5 are particularly directed to the Postal service, and the remaining questions to mailer participants.

1. In response to the Presiding Officer's August 23, 1978, Information Request, in Docket No. MC77-2, the Postal Service states that "unless fully presorted to carrier route, first-class mail is sorted by letter sorting machines at a large and growing number of destination post offices." [b] Are there any occasions when carrier route presorted mail is required to be machine processed at any point in the mail processing operation?

2. Compared to the 3.5 inch minimum height requirement, are there any carrier functions or other mail processing functions which could be adversely affected if carrier route presorted cards 3.25 inches in height were permitted to be mailed?

3. Would the Postal Service enjoy any potential cost benefits if cards 3.25 inches in height were permitted to be mailed providing these cards were presorted to carrier route?

4. Would a minimum number of pieces per mailing, with a minimum number of separately addressed pieces bundled to each carrier, be required to achieve cost benefits, if any, for carrier route presorted cards which are 3.25 inches in height?

5. Assuming that the minimum height standard of 3.5 inches were reduced to 3.25 inches for presorted carrier route mail, would the administration of this exemption from the minimum size standard create any significant problems?

6. What percentage of that number of letters and cards which you mail annually consists of pieces 3.25 or 3.5 inches in height and 5 inches or more in length?

7. What specific types of mail pieces—including particularly those associated with a specific business system—do you now use which are less than 3.5 inches in height?

8. Would you presort letters or cards to carrier route in order to take advantage of a reduction in the permitted height from 3.5 inches to 3.25 inches?

9. What percentage of the cards that you mail annually would be inserted in envelopes for the purpose of complying with (a) *minimum* height requirements of 3.5 inches and (b) *minimum* height requirements of 3.25 inches?

[FR Doc. 78-33984 Filed 12-5-78; 8:45 am]

[a] Postal Service Response to Presiding Officer's Information Request, Docket No. MC77-2, September 6, 1978, p. 1. The Postal Service was intent principally on explaining why mail presorted to five-digit ZIP codes *not* bypass machine processing—which was the subject of the Presiding Officer's inquiry. The Response suggests, however, that the same may not be true if the mail is presorted to carrier route.

[b] Response of the Postal Service, dated September 6, 1978, p. 1.

[8025-01-M]

SMALL BUSINESS ADMINISTRATION

[Delegation of Authority No. 12-A; (Revision 2)]

DIRECTOR, OFFICE OF FINANCING

Redelegation of Financial Assistance

Delegation of Authority No. 12-A (Revision 1) (38 FR 18595), as amended (40 FR 6395, 40 FR 10522, 41 FR 46665, and 42 FR 12507) is hereby superseded by Delegation of Authority No. 12-A (Revision 2). This revision reflects the organizational change made by the abolishment of the Office of Community Development and the establishment of the Office of Neighborhood Business Revitalization and the Office of Special Guarantees. It also deletes the authority previously delegated for lease guarantees since no appropriation for this program has been made since FY 1976.

Delegation of Authority No. 12-A (Revision 2) reads as follows:

I. Pursuant to the authority delegated by the Administrator to the Associate Administrator for Finance and Investment in Delegation of Authority No. 12 (Revision 1) (38 FR 13063), as amended (38 FR 16001, 38 FR 26509, 40 FR 8398, 40 FR 18054, 41 FR 42994, and 42 FR 10083), the following authority is hereby delegated to the specific positions as indicated herein:

DIRECTOR, OFFICE OF FINANCING

1. To approve or decline applications for business, economic opportunity, disaster, handicapped assistance, energy loans, and all other types of loans authorized to be made by the Agency, including reconsiderations thereof, and to execute authorizations and amendments pertaining to such loans, except that action on economic injury loans are limited to those not in excess of $2,000,000.

2. To cancel, reinstate, modify and amend authorizations for fully or partially undisbursed loans.

3. To determine eligibility of business, economic opportunity, disaster, handicapped assistance and all other types of loan applicants.

CHIEF, PROGRAM OPERATIONS DIVISION

1. To approve or decline applications for business, economic opportunity, disaster, handicapped assistance, energy loans, and all other types of loans authorized to be made by the Agency, including reconsiderations thereof, and to execute authorizations and amendments pertaining to such loans, except that actions on economic injury loans are limited to those not in excess of $1,000,000.

2. To cancel, reinstate, modify and amend authorizations for fully or partially undisbursed loans.

3. To determine eligibility of business, economic opportunity, handicapped assistance, disaster and all other types of loan applicants.

C. DIRECTOR, OFFICE OF PORTFOLIO MANAGEMENT

1. To take all necessary action in connection with the servicing, administration, collection and liquidation of all loans, direct lease guarantees (including automatic terminations provided for within the Policy), other obligations and acquired property, with the exception of those loans classified as in litigation, but is *not* authorized:

a. To sell any primary obligation or other evidence of indebtedness, exclusive of property acquired, owed to the Agency for a sum less than the total amount due thereon.

b. To accept or reject a compromise settlement of an indebtedness owed to the Agency for a sum less than the total amount thereon.

C. To deny liability of the Small Business Administration under the terms of a participation or guaranty agreement, or the initiation of suit for recovery from a participating bank under any alleged violation of a participation or guaranty agreement.

2. To take all necessary actions in connection with the liquidation of SBIC's and EDA loans for the Department of Commerce.

3. To take all necessary actions in connection with the servicing (financial aspects) of certificates of competency and, as appropriate, financial aspects of contracts let by SBA under Section 8(a) of the Small Business Act, as amended.

D. CHIEF, OPERATIONS ASSISTANCE DIVISION

1. To take all necessary action in connection with the servicing, administration, collection and liquidation of fully disbursed loans not in litigation, direct least guarantees (including automatic terminations provided for within the Policy), and other obligations and acquired property within all loan programs of the Small Business Administration, but is *not* authorized:

a. To sell any primary obligation or other evidence of indebtedness, exclusive of property acquired, owed to the Agency for a sum less than the total amount due thereon.

b. To accept or reject a compromise settlement of an indebtedness owed to the Agency for a sum less than the total amount due thereon.

c. To deny liability of the Small Business Administration under the terms of a participation or guaranty agreement, or the initiation of suit for recovery from a participating bank under any alleged violation of a participating or guaranty agreement.

2. To take all necessary actions in connection with the liquidation of SBIC's and EDA loans for the Department of Commerce.

3. To take all necessary actions in connection with the servicing (financial aspects) of certificates of competency and, as appropriate, financial aspects of contracts let by SBA under Section 8(a) of the Small Business Act, as amended.

E. DIRECTOR, OFFICE OF NEIGHBORHOOD BUSINESS REVITALIZATION

1. To approve or decline development company (sections 501 and 502) loan applications, including reconsiderations thereof, and to execute authorizations and modifications pertaining to such loans.

2. To cancel, reinstate, modify and amend authorizations for fully undisbursed loans.

3. To determine eligibility of development company loan applicants.

F. CHIEF, DEVELOPMENT COMPANY LOAN DIVISION

1. To approve or decline development company (sections 501 and 502) loan applications, including reconsiderations thereof, and to execute authorizations and modifications pertaining to such loans.

2. To cancel, reinstate, modify and amend authorizations for fully undisbursed loans.

3. To determine eligibility of development company loan applicants.

G. DIRECTOR, OFFICE OF SPECIAL GUARANTEES

1. To guarantee sureties of small business against portions of losses resulting from the breach of bid, payment, or performance bonds on contracts up to the statutory limit.

To approve or decline all claim reimbursement requests from participating surety companies on contract defaults bonded with SBA guarantees.

3. To approve or decline applications for pollution control financing guarantees authorized to be made by the Agency including reconsiderations thereof and to execute commitments and modifications thereto and guarantees pertaining to such financings.

4. To determine eligibility and make size determinations of applicants for pollution control financing guarantees and surety bond guarantees.

5. To take all necessary actions in connection with the servicing, administration, collection and payment of claims arising under the guarantees upon default of the small business.

6. To enter into participation agreements with qualified surety or other qualified companies and to revise such agreements when necessary.

7. To approve the investment of funds in the pollution control guaran-

tee fund not for payment of operating expenses or payment of claims arising under the pollution control financing program in bonds or other obligations of, or other obligations guaranteed as to principal and interest by, the United States.

8. To take all necessary actions in connection with the servicing, administration, collection and payment of claims arising under reinsurance lease guarantee agreements except compromise settlements.

H. CHIEF, POLLUTION CONTROL FINANCING DIVISION

1. To approve or decline applications for pollution control financing guarantees authorized to be made by the Agency including reconsiderations thereof and to execute commitments and modifications thereto and guarantees pertaining to such financings.

2. To take all necessary actions in connection with the servicing, administration, collection and payment of claims arising under pollution control financing guarantees upon default of the small business.

3. To determine eligibility and make size determinations of applicants for pollution control financing guarantees.

I. CHIEF, SURETY BOND GUARANTEES DIVISION

1. To guarantee sureties of small business against portions of losses resulting from the breach of bid, payment or performance bonds on contracts up to $500,000.

2. To approve or decline all claim reimbursement requests from participating surety companies on contract defaults bonded with SBA guarantees.

3. To determine eligibility of surety bond applicants.

J. DIRECTOR, OFFICE OF PROGRAM DEVELOPMENT

1. To take all necessary actions in connection with determinations of eligibility for lending institutions to participate in SBA lending and financial assistance programs.

2. To take all necessary actions in connection with the regulation of lending institutions participating in SBA lending and financial assistance programs, in accordance with the Small Business Act, as amended, and the Regulations thereunder as amended from time to time.

K. CENTRAL OFFICE CLAIMS REVIEW COMMITTEE

1. This committee shall consist of the Director, Office of Portfolio Management, acting as chairman; Director, Office of Financing; and Associate General Counsel, Office of Litigation.

2. This committee shall meet and consider reasonable and properly supported compromise proposals, including compromise proposals for lease guarantees, and make the final decision to accept or reject such proposals, provided the decision of the committee is unanimous.

II. The authority delegated herein may not be redelegated.

III. All authority delegated herein may be exercised by any Small Business Administration employee designated as acting in that position.

Effective date: December 6, 1978.

Dated: November 29, 1978.

JOHN M. TRASK, JR.,
Associate Administrator for Finance and Investment.

VERDE CAPITAL CORP.

Issuance of a License To Operate as a Small Business Investment Company

On October 3, 1978, a notice was published in the FEDERAL REGISTER (43 FR 45662) stating that Verde Capital Corporation, located at 255 Alhambra Circle, Coral Gables, Florida 33134, has filed an application with the Small Business Administration pursuant to 13 CFR 107.102 (1978) for a license to operate as a small business investment company under the provisions of section 301(d) of the Small Business Investment Act of 1958, as amended.

Interested parties were given until the close of business October 18, 1978, to submit their comments to SBA. No comments were received.

Notice is hereby given that having considered the application and other pertinent information, SBA has issued license No. 04/04-5156 to Verde Capital Corporation on November 22, 1978.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: November 28, 1978.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 78-481]

NOTICE THAT FINAL COURT DECISIONS ADVERSE TO THE CUSTOMS SERVICE WILL BE GIVEN GENERAL EFFECT UNLESS A LIMITING RULING IS PUBLISHED WITHIN 180 DAYS; MODIFICATION AND CLARIFICATION OF T.D. 78-302

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: The Customs Regulations provide that the Customs Service, with certain exceptions, may limit the application of an adverse decision of the Customs Court or the Court of Customs and Patent Appeals to the particular merchandise, circumstances, or entries which were the subject of the litigation by publication of a limiting ruling. A recent Customs Service Notice established a procedure to inform Customs officers and the public that the general application of adverse decisions would be delayed until a notice of acquiescence or limiting ruling is published in the Customs Bulletin, not later than 180 days after the adverse decision. It has been determined that a notice of acquiescence is not required; that in the unusual circumstances in which it is decided to limit the application of a court decision, a limiting ruling will be published in the Customs Bulletin not later than 180 days after the adverse decision; and that in the absence of the publication of a limiting decision, the adverse decision will be given general application after the period for publication has expired. The previous Notice is modified accordingly.

DATES: The procedures set forth in this notice shall be effective with respect to all transactions or protests pending on, or arising on or after, December 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Salvatore E. Caramagno, Director, Classification and Value Division, Office of Regulations and Rulings, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5868).

SUPPLEMENTARY INFORMATION:

BACKGROUND

DISCUSSION OF APPLICABLE CUSTOMS REGULATIONS

Section 176.31, Customs Regulations (19 CFR 176.31), provides that entries which are the subject of litigation which has been concluded with a decision of the U.S. Customs Court or the U.S. Court of Customs and Patent Appeals shall be reliquidated in accordance with that decision.

However, § 152.16(e), Customs Regulations (19 CFR 152.16(e)), provides that the Customs Service:

1. May limit the application of the principles of any adverse decision, except a decision upholding a petition of an American manufacturer, producer, or wholesaler, under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), to the specific entries which were the subject of the decision, and

2. May provide for the application of the decision, in a manner which it considers appropriate, to unliquidated entries and protested entries that have not been denied, in whole or in part, which involve the same issue as that decided by the court.

Section 177.10(d), Customs Regulations (19 CFR 177.10(d)), similarly provides that the Customs Service may limit the application of an adverse judicial decision to the particular merchandise, circumstances, or entries which were the subject of the litigation by publication of a limiting ruling. No time frame within which the limiting ruling must be published is provided.

TREASURY DECISION 78-302

Treasury Decision 78-302, published in the FEDERAL REGISTER on August 31, 1978 (43 FR 38817), established a uniform procedure under which no action would be taken on unliquidated entries and pending protests not specifically the subject of the adverse decision, but to which the principles of the decision would apply, until the Customs Service published, in the alternative, a notice of acquiescence in the decision or a ruling limiting the application of the decision.

The purpose of T.D. 78-302 was to establish a procedure requiring the Customs Service to announce within restrictive time constraints its infrequent determination to limit the application of an adverse decision to the specific article under litigation, or to an article of a specific class or kind of such or similar merchandise, or to the particular circumstances or entries which were the subject of the litigation.

The limiting ruling, which would be made under the authority in §§152.16(e) and 177.10(d), Customs Regulations, would remain in effect until the legal principle or issue involved could be reconsidered by the courts on the basis of a more complete presentation of evidence.

Neither T.D. 78-302 nor the Customs Regulations intended in any way to question the binding effect of a final adverse judicial decision, or the obligation of the Customs Service to abide by that decision, in respect to the entries which are the subject of the case before the court. In this respect, as noted previously, § 176.31, Customs Regulations, provides specifically that entries which are the subject of the litigation which has been concluded with a decision of the U.S. Customs Court or the U.S. Court of Customs and Patent Appeals shall be reliquidated in accordance with that decision.

In those relatively rare and unusual circumstances in which a determination to limit an adverse decision is made, usually in cases in which the Customs Service believes that the specific evidence available for judicial evaluation has not provided to the courts an adequate basis for establishing a universally applicable rule of law, T.D. 78-302 set maximum time constraints on the announcement by the Customs Service of its determination to limit the application of the decision. The absence of such a time constraint had created a vacuum in the past with respect to adverse judicial decisions in which Customs field officers were unable to determine whether other entries of merchandise of the class or kind involved in the adverse adjudication should be liquidated, or action on protests taken, in accordance with the court decision; and the liquidation of entries often was delayed without justification, or liquidations at different ports lacked uniformity of treatment.

Although the procedure for implementing judicial decisions was established primarily for the guidance of Customs field officers, T.D. 78-302 was published in the FEDERAL REGISTER and the Customs Bulletin to provide formal notice of its time constraints to the public as well. To clarify the ambiguities arising from the publication of T.D. 78-302, it has been decided to reformulate the procedures set out therein.

The requirement that the Customs Service publish a notice of acquiescence in those cases in which it is not intended to publish a limiting ruling is withdrawn. As a result, absent publication of a limiting ruling within 180 days after the adverse judicial decision, the principles on which that decision is based will be considered of general applicability. Of course, the adverse decision will continue to be applied immediately to entries or protests which are the subject of the litigation.

T.D. 78-302 MODIFIED—PROCEDURES RESTATED

To clarify the scope and intent of T.D. 78-302, effective on the December 6, 1978, the procedures set out in that Treasury decision are modified to provide as follows:

1. Entries which are the subject of an unappealed adverse judicial decision will be reliquidated immediately, in accordance with the decision, as provided for in § 176.31, Customs Regulations (19 CFR 176.31).

2. The Customs Service will not publish notices of acquiescence in adverse judicial determinations.

3. To assure uniformity in the liquidation of entries not involved in specific adverse judicial decisions, liquidation of entries or action on protested entries pending when the adverse decision is issued, and which may be affected by the decision, will be suspended for a period of 180 days following the date. If a limiting ruling is not issued within that 180-day period, pursuant to §§ 152.16(e) and 177.10(d), Customs Regulations (19 CFR 152.16(e), 177.10(d)), and the adverse decision has become final, its principles will be applied immediately for the purpose of liquidating all entries, or acting on all protests, action on which may have been suspended in accordance with this paragraph, and as a binding interpretation of the applicable law with respect to all subsequent entries or protests.

4. In those unusual instances in which the binding effect of a final adverse decision of the U.S. Customs Court or the U.S. Court of Customs and Patent Appeals which has not been appealed may be the subject of a ruling published in accordance with §§ 152.16(e) and 177.10(d), Customs Regulations, which would limit the binding effect of the decision to the specific article involved in the litigation, or to an article of a specific class or kind of such or similar merchandise, or to the particular circumstances or entries which were the subject of the litigation, the limiting ruling shall be published as soon as practicable, but not later than 180 days after issuance of the adverse decision.

T.D. 78-302 is modified and superseded to the extent that it is inconsistent with the procedures set forth herein.

Dated: November 29, 1978.

R. E. CHASEN,
Commissioner of Customs.

VETERANS ADMINISTRATION

CENTRAL OFFICE EDUCATION AND TRAINING REVIEW PANEL

Rescheduled Meeting

The Veterans Administration gives notice pursuant to Pub. L. 92-463 that

DEC 6 1978 UMI

and 11502 is instituted to determine

Dated at Washington, DC, this 27th

February 8, 1979 (2 days), at New York,

MC 114273 (Sub-368F), CRST, Inc., now

for forwarding are received from the

V 4 3 / 2 3 5 D E 6 7 8 UMI

a meeting of the Central Office Education and Training Review Panel authorized by section 1790(b), title 38, United States Code, will be held in Room A-53, Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C., on January 3, 1979, at 10 a.m. The meeting will be held for the purpose of reviewing the decision of the Director, Veterans Administration Regional Office, Columbia, South Carolina, that benefits to all eligible persons enrolled in Southeastern Business College, 560 King Street, Charleston, South Carolina 29403, be discontinued.

This meeting was originally scheduled for November 14, 1978 (43 FR 47633 October 16, 1978). The school's representative, Mr. Steven J. Metalitz, requested a postponement by letter of November 6, 1978. The request was granted and the meeting is now to be held on January 3, 1979.

The meeting will be open to the public up to the seating capacity of the conference room. Because of the limited seating capacity, it will be necessary for those wishing to attend to contact Mr. Larry R. Stockmoe, Education and Rehabilitation Service, Veterans Administration Central Office (phone (202) 389-2850) prior to December 26, 1978.

Dated: November 29, 1978.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

INTERSTATE COMMERCE COMMISSION

[Decision No. 37043]

ARKANSAS INTRASTATE FREIGHT RATES AND CHARGES—1978

By joint petition filed October 2, 1978, petitioners, 6 common carriers by railroad[1] operating in intrastate commerce in Arkansas intrastate freight rates and charges, under 49 USC 11501 and 11502; section 13 of the former Interstate Commerce Act. They seek an order authorizing them to increase such rates and charges in the same amounts approved for interstate application by this Commission in Ex Parte No. 349 effective June 17, 1978. Petitioners have stated grounds sufficient to warrant instituting an investigation.

It is ordered: The petition is granted. An investigation, under 49 USC 11501 and 11502 is instituted to determine whether the Arkansas intrastate rail freight rates in any respect cause any unjust discrimination against or any undue burden on interstate or foreign commerce, or cause undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce and persons or localities in interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full increases authorized for interstate application by this Commission in Ex Parte No. 349. In the investigation we shall also determine if any rates or charges, or maximum or minimum charges, or both, should be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist.

All common carriers by railroad operating in Arkansas subject to the jurisdiction of the Commission are made respondents in this proceedings.

All persons who wish to participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, room 4342, Interstate Commerce Commission, Washington, DC 20423, on or before 15 days from the FEDERAL REGISTER publication date. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. This Commission desires participation of only those who intend to take an active part in this proceeding.

As soon as practicable after the last day for indicating a desire to participate in this proceeding, this Commission will serve a list of names and addresses on all persons upon whom service of all pleadings must be made. Thereafter, this proceeding will be assigned for oral hearing or handling under modified procedure.

A copy of this order shall be served upon each of the petitioners and respondents herein. Arkansas shall be notified of the proceeding by sending copies of this order by certified mail to the Governor of Arkansas. Further notice of this proceeding shall be given to the public by depositing a copy of this order in the Office of the Secretary of the Interstate Commerce Commission at Washington, DC, and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

This is not a major Federal action significantly affecting the quality of the human environment. Furthermore, this decision is not a major regulatory action under the Energy Policy and Conservation Act of 1975.

Dated at Washington, DC, this 27th day of November, 1978.

By the Commission, Alan Fitzwater, Director, Office of Proceedings.

H. G. HOMME, Jr.,
Secretary.

[Exception No. 6]

CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO.

Exception Under Section (a), Paragraph (1), Part (v) Second Revised Service Order No. 1332

Decided November 28, 1978.

By the Board

The Vermont Railway, Inc. (VTR), has purchased new boxcars which will be delivered to Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) at Portland, Oregon, for movement to the VTR. VTR has allowed MILW to load these cars on the west coast for movement to the VTR. Reduced loadings of these cars on the MILW to destinations as directed by VTR means the MILW will hold some of the cars beyond the 60-hours permitted in Section (a)(2)(ii) of this order prior to placing of cars for loading.

Order. Pursuant to the authority vested in the Railroad Service Board by Section (a)(1)(v) of Second Revised Service Order No. 1332, Chicago, Milwaukee, St. Paul and Pacific Railroad Company is authorized to assemble and hold new Vermont Railway, Inc. boxcars for loading as directed by Vermont Railway, Inc., regardless of the provisions of Section (a)(2)(ii) of this order.

These cars shall become fully subjected to all provisions of Second Revised Service Order No. 1332 when loading is completed and instructions for forwarding are received from the shipper.

Effective November 20, 1978.

Expires December 31, 1978.

ROBERT S. TURKINGTON,
Acting Chairman,
Railroad Service Board.

COMMISSION ISSUANCES

AGENCY: Interstate Commerce Commission.

ACTION: Notice.

SUMMARY: For many years the procedures which were followed by the Commision in its own internal operations were described in part in a document known as the "Internal Minutes." The Commission has decided to eliminate the Internal Minutes and to reorganize and restate the materials which they contained in a series of "Issuances." This document contains materials related to the way in which the Commission conducts its day-to-day business, together with certain instructions and delegations of responsibility to the staff. As revisions are made, appropriate notice will be given through further publication in the FEDERAL REGISTER. Because the provisions of this document govern the internal operations and procedures of the Commission, it is being issued in final form, and public comments are not being requested.

EFFECTIVE DATE: November 7, 1978.

FOR FURTHER INFORMATION CONTACT:

George M. Chandler 202-275-7513.

COMMISSION ISSUANCES

GENERAL

1. *Scope.*—This document contains descriptions of internal Interstate Commerce Commission procedures and assignments of responsibility which govern or affect the way in which the Commission itself, its divisions, and employee boards carry out their functions. It includes guidelines and procedures to be followed by the staff in preparing items for the Commissioner's consideration, in carrying out the Commission's directives, and in otherwise working with the Commission and the individual Commissioners. It also includes certain delegations of authority and responsiblity to staff units or employees.

2. *Authority.*—Unless otherwise noted, the contents of this document were adopted by the Commission on November 7, 1978, under the authority of 49 U.S.C. 10301(f) and 10321(a). The

[1] Chicago, Rock Island and Pacific Railroad Company; The Kansas City Southern Railway Company; Louisiana & Arkansas Railway Company; Missouri Pacific Railroad Company; St. Louis-San Francisco Railway Company; and St. Louis Southwestern Railway Company.

source of, and authority for, all subsequent changes in the Commission's internal operations and procedures.

3. *Purpose.*—The purpose of this document is to provide a single source for the Commission's internal operations and procedures. Its purpose is to provide a single source for the Commission's internal operations and procedures. Its purpose is to provide a single source for the Commission's internal operations and procedures. Its purpose

V 4 3 / 2 3 5 D E 6 7 8 UMI

source of, and authority for, all subsequent changes or additions will be indicated in future compilations of the issuances.

CONFERENCES AND VOTING

11. *Conferences.*—(a) *General*—The scheduling and conduct of conferences and other meetings of the Commission, divisions, and committees of the Commission, the provision of public notice of their scheduling, and the keeping and issuance of transcripts and minutes are governed by regulations appearing at 49 CFR part 1012. The convener is the Chairman of the Commission, division, or committee who calls the meeting, upon his or her own initiative or at the request of another member of the Commission.

(b) *Regular Commission conference.*—(1) A Commissioner having an item to list for a regular conference shall, no later than noon on the second Thursday preceding the conference date, notify in writing the Commission, the Secretary, and the General Counsel of that item and shall indicate whether it is proposed that the item be considered in open or closed conference. The listing shall also be accompanied by an explanation of the proposed action in closing the conference suitable for posting under the provisions of 49 CFR 1012.3(b)(4). Each Commissioner shall have until noon on the second Friday before conference to request that an item which he or she did not list be closed in whole or in part. In that instance, the requesting Commissioner shall have the burden of preparing an explanation in conformity with 49 CFR 1012.3(b)(4). Where the General Counsel's views must be submitted, they shall be returned by close of business on the second Friday before the conference.

(2) Notwithstanding the provisions of the immediately preceding paragraph, the Chairman shall control the conference agenda. The Chairman, however, shall list on the agenda of a conference, within 30 days of the request, any item requested by a member of the Commission unless a majority of the Commission votes to delay conference consideration of that item, or unless the Chairman finds that special circumstances warrant a delay. Commissioners anticipating the need to list a matter for conference should notify the Chairman as soon as possible in order to facilitate the development of a long-range conference schedule.

(3) The Chairman will prepare a conference agenda, showing the name of the listing Commissioner and, to the extent known, the name of any Commissioner requesting that particular items be closed in whole or in part, and will circulate the conference agenda no later than noon on the second Friday preceding the conference date. All items to be considered in open conference will be listed at the beginning of the conference agenda, and will be followed by those items to be considered in closed conference. If any item is to be considered in closed conference, each Commissioner will be required to vote no later than close of business on the second Monday preceding the conference date, whether he or she approves or disapproves the proposal to consider that item in closed conference.

(4) Every effort shall be made to assure circulation of conference memoranda, draft reports, and other written materials at least one week preceding the conference date.

(c) *Special Commission conferences and Division conferences.*—(1) Special Commission conferences will be convened by the Chairman whenever, in his or her opinion, any matter or the business of the Commission so requires. The Chairman shall convene a special conference for the consideration of any matter or business upon request of a member of the Commission, under the same guidelines applicable to a request made under item 11(b)(2).

(2) Division conferences will be convened by the division chairman upon his or her own initiative or at the request of any division member, under the same guidelines applicable to a request made under item 11(b)(2).

(3) The convener of a special Commission conference, division conference, or other meetings as that term is used in 49 CFR 1012.1(b) shall notify those Commissioners eligible to participate of the time, place, and subject matter of the conference and whether it is proposed that the conference be open or closed to the public.

(d) *Provisions applicable to all meetings subject to 49 CFR Part 1012.* The convener of any conference or other meeting subject to 49 CFR Part 1012, of the Chairman of the Commission, in the case of items listed for regular Commission conferences, shall—

(1) Obtain, where necessary, a recorded vote approving the calling of the conference or other meeting on short notice.

(2) Transmit to the Secretary of the Commission and the Office of Communications and Consumer Affairs, as soon as it is available, all information to be included in any public notice required to be posted under 49 CFR 1012.3. A Commission staff member may be designated to respond to requests for information about the meeting.

(3) Where it is proposed that the conference be closed, obtain:

(A) The necessary certification from the General Counsel

(B) From the commissioner making the proposal, any necessary explanation as required by 49 CFR 1012.3(b)(4)

(C) Any necessary votes required to hold a closed conference or partially to close a conference.

(4) Arrange for the preparation of a transcript of minutes, for the preparation of the presiding officer's statement required by 49 CFR 1012.5, and for the preparation for relase of parts of the transcript or minutes not subject to a statutory exemption.

(5) If any change in the scheduling of the conference or meeting or in the agenda is made subsequent to the posting of any public notice required under 49 CFR 1012.3, obtain the necessary votes approving that change.

(e) *Delayed voting.*—In cases where a majority has voted to take a particular action, a member may, with the approval of the majority, withhold his or her vote and vote by written memorandum within a time agreed to by the majority. In such a case, the date of the conference shall be the date of the action. If the member fails to vote within an allotted time, he or she shall be shown as not participating. Where voting at a conference is indecisive, and one or more members wishes to delay voting, the matter shall either be rescheduled for a future conference or, if there is no objection, transferred to the notation voting calendar.

12. *Voting by Notation.*—(a) *General.*—Voting on all matters not considered in conference shall be by notation. Notation voting by the Commission and divisions is accomplished by the circulation of the written vote of each decisionmaker. Employee boards may vote by the circulation of individual voters, by the circulation of a single voting sheet upon which the vote and date of voting by each decisionmaker is entered, or by any other means to which the board members agree and which provides a written record of the vote cast and the date of voting by each member.

(b) *Voting dates*—Where notation votes are cast on different days, the date of th decision is the date upon which the last individual vote is cast or the date of an appropriately set deadline for voting.

13. *Written Statements and Separate Expressions.*—(a) *General.* Written statements of the Commission shall indicate the official designation of the individual or group taking the action, the names of the persons participating in the action, and the vote or position of each participant. The written statement shall also indicate when a member eligible to participate in an action does not do so. Participants shall have the right to express their individual views as part of the written statement.

(b) *Definitions.*—(1) *Separate expression* means decisionmakers' own narrative written expression of differences with the majority written expression.

(2) *Separately stated vote* means a statement, no longer than two lines in length, specified by the decisionmakers which indicates how the decisionmakers voted.

(3) *Statement of position* means a short phrase specified by the decisionmakers or adopted by the clearing office which indicates the position of decisionmakers who do not join in the majority's written statement.

(c) *General rules.*—The following general rules shall apply in all situations unless the provisions of a specific rule apply.

(1) When decisionmakers differ from the majority or do not join in the majority statement, this shall be shown by separate expressions, separately stated votes, or statements of position.

(2) Decisionmakers may include a specifically designated separate expression, or specify a separately stated vote, or statement of position in their votes and, if they do, it shall be published as part of the written statement.

(3) Decisionmakers may reserve, in their votes or in supplemental vote submitted no later than the date of decision, the right to make a separate expression. To be published as part of the majority written statement, the separate expression must be delivered to the clearing office no later than the seventh working day following the date of the decision. Separate expressions received by the Clearance Unit after this deadline, or after any deadline set pursuant to subsection (d) of this section, will be published separately. At the request of a decisionmaker, a notice that a separate expression will be published separately at a later date will be included in the majority written statement.

(4) If decisionmakers who differ from the majority have not by the date of decision reserved the right to make a separate expression, submitted a separate expression, or specified how they should be shown in a separately stated vote or statement of position (or if, having reserved the right to make a separate expression, they have failed to submit an expression within seven working days of the date of decision), the Clearance Unit shall request from the office of the decisionmakers advice as to how they should be shown in the written statement. If the Clearance Unit is unable to obtain the necessary information by the end of the first working day following the date of decision (or the date the separate expression was due), it may clear the majority written statement for service showing that the other decisionmakers "concurred" or "dissented" if either position is a fair expression of his or her vote. If the Clearance Unit cannot determine what constitutes a fair expression, it shall show the other decisionmakers as "not joining" in the majority statement.

(5) Separate expressions, separately stated votes, and statements of position will be recorded at the end of the majority written statement in the following sequence.

A. Concurring in the result, no written expression.
B. Concurring, separately stated vote.
C. Concurring, separate expression.
D. Doncurring in part, separately stated vote.
E. Concurring in part, separate expression.
F. Dissenting in part, separately stated vote.
G. Dissenting in part, separate expression.
H. Dissenting, separately stated vote.
I. Dissenting, separate expression.
J. Dissenting, no written expression.
K. Not joining in the majority statement; and any statement of position not properly categorized in "A" through "J".
L. Not participating.
M. Absent and not participating.

Within each category decisionmakers shall appear in order of seniority, except when a decisionmaker joins in the written expression or separately stated vote of another.

(d) *Specific rules.*—The following specific rules shall apply in the special situations identified below and shall supercede the general rules in subsection (c) of this section:

(1) Whenever a time limit for service or publication will not permit a seven-day delay for submission of separate expressions or a one-day delay for obtaining statements of position, the circulating office may call for submission of all separate expressions, separately stated votes, or statements of position by the deadline for voting. If decisionmakers do not submit timely separate expressions, separately stated votes, or statements of position, but their votes clearly indicate that they dissent from or concur in the written statement of the majority, their positions shall be so reflected by the Clearance Unit in statements of position. If the positions are not clearly indicated in the votes, they shall be shown as "not joining" in the majority written statement.

(2) In considering proposed rates and charges at the suspension level, all separate expressions, separately stated votes, or statements of position shall be submitted by the voting deadline date. If decisionmakers who differ with the majority do not submit separate expressions or specify separately stated votes or statements of position, the Clearance Unit shall reflect in the written statement that the "dissented," "concurred," "voted to suspend," "voted not to suspend," or "voted not to suspend but to investigate," if that position or statement is clearly indicated in the votes of the decisionmakers. If the position is not clearly indicated in the votes, they shall be shown as "not joining" in the written statement of the action.

(3) In the case of a petition for a declaration that an issue of general transportation importance (GTI) is involved filed pursuant to Rule 97(h) of the Rules of Practice, all separate expressions, separately stated votes, or statements of position shall be submitted by the voting deadline. If decisionmakers who differ with the majority do not submit separate expressions, or separately stated votes, or statements of position, the Clearance Unit shall reflect in the written statement that "they voted in favor of a GTI determination," "voted against a GTI determination," or "voted against a GTI determination, but to reopen on the Commission's own motion," if the statement is clearly indicated in the votes of the decisionmakers. If the position is not clearly indicated in the vote, they shall be shown as "not joining" in the written statement of the action.

(4) In the case of proposed comments on legislation or Congressional Committee testimony, any separate expression, separately stated vote, or statement of position must be received by the clearing office no later than two full working days prior to the date the comment or testimony must be delivered or, on the date of decision, whichever is later. When decisionmakers' positions are not clear from their votes, and if the clearing office is not able to obtain prompt clarification of their positions, they shall be shown as "not joining" in the comments or testimony.

(e) *Examples of separate expressions, separately stated votes, and statements of position.*

(1) Statement of position or separately stated vote (without separate expression).

Commissioner ———— concurs, dissents, did not participate, etc., or
Commissioner ———— and ———— concur, dissent, did not participate, etc., or
Commissioner ———— voted not to suspend but to investigate, etc., or
Commissioner ———— did not join in the action taken.

(2) Separate expressions.

Commissioner ————, concurring, dissenting, etc: (written expression). or
Commissioner ———— and ———— concurring, dissenting, etc. (written expression), or
Commissioner ————, whom Commissioner ———— joins, concurring, dissenting, etc. (written expression).

PROCESSING AND PRINTING DECISIONS

21. *Assignment of Submitted Proceedings.*

(a) *Proceedings which have not been orally argued or reopened.*—Submitted proceedings are assigned to the Commission, a division, or an employee board as provided by the Organization Rules (49 CFR 1011). Assignments are made by the Office of Proceedings. Proceedings assigned to an employee board are assigned in rotation to the personal docket of a board member. Proceedings assigned to a division are assigned in rotation to the personal docket of a member of the division unless (1) the matter is routine or is likely to be disposable by a brief order or (2) the division chairman directs that the matter be handled on an institutional basis. Proceedings assigned to the Commission are assigned to the personal docket of a Commissioner by the Chairman of the Commission following a recommendation from the appropriate Office of Proceedings unit.

(b) *Orally argued or reopened cases.*—With respect to cases orally argued before the entire Commission or a division, or cases reopened by the entire Commission or a division, the decision whether the proceeding should be assigned to the personal docket of a Commissioner or handled as an institutional decision is made by the Chairman of the Commission or the respective division. Personal docket assignments are made by the Commission or the division chairman, in rotation, following a recommendation from the appropriate Office of Proceedings unit.

(c) *Rejection of a personal docket assignment.*—A Commissioner may reject a personal docket assignment.

(d) *Assignment of a decision writer.*—Upon the assignment of a submitted proceeding, one or more attorney advisers or administrative law judges will be assigned to prepare a draft decision in the matter or to recommend other appropriate action. In preparing a draft decision or making other recommendations the attorney adviser or administrative law judge will exercise independent judgment unless otherwise specifically directed by the assigned decisionmaker or decisional unit.

22. *Identification of Proceedings Involving Issues of General Transportation Importance.*

(a) *General.*—The Commission shall be informed as early as possible in the course of a pending proceeding if it appears that an issue of general transportation importance may be involved.

(b) *Staff responsibility.*—(1) Administrative law judges, attorneys, and other staff members to whom proceedings are assigned shall promptly notify the heads of their respective bureaus and offices if a party to a proceeding alleges that an issue of genral transportation importance is involved or if they believe that an issue of general transportation importance is involved. Heads of bureaus and offices will, in turn, notify the Chairman of the Commission or of the appropriate division.

(2) Should an employee board determine that an issue of general transportation importance is involved in a proceeding assigned to it, the board will certify that proceeding to the Commission.

(c) *Division proceedings.*—When a division believes that an issue of general transportation importance is involved in a proceeding assigned to it, it may certify the matter to the entire Commission or notify the Commission and withhold issuance of a decision until the Commission has decided whether an issue of general transportation importance is present. If the latter course is followed, and the Commission determines that an issue of general transportation importance is involved, it may recall the matter for disposition. If it chooses not to recall, the following statement will be inserted at the top of the first page of the division decision:

> It has been determined by the Commission that this proceeding involves an issue of general transportation importance. Thus, parties dissatisfied with the decision may file a petition for reconsideration by the Commission.

(d) *GTI petitions in non-rail proceedings.*—Petitions filed pursuant to Rule 97(h) of the Rules of Practice seeking a finding of general transportation importance in non-rail proceedings shall be circulated to the Commission without any accompanying staff recommendation or memorandum. They must be presented and finally acted upon by the Commission within 10 days of filing.

(e) *GTI petitions in rail proceedings.*—Petitions filed pursuant to Rule 98(e) of the Rules of Practice seeking discretionary review in rail proceedings solely on the ground that an issue of general transportation importance is involved shall be circulated to the Commission without an accompanying staff recommendation or memorandum. They must be presented and finally acted upon by the Commission within 20 days after the date for filing replies. Petitions under Rule 98(e) which raise issues other than, or in addition to, that of general transportation importance may be accompanied by staff recommendations and memoranda.

23. *Procedures for Handling Cases in Compliance with the National Environmental Policy Act of 1969.*

(a) *Referral of cases to the Section of energy and Environment.*—(1) All proceedings involving rail line construction or abandonment, rail mergers, controls or consolidations, water carrier certifications (passenger), and common use of rail terminals, shall be referred to the Section of Energy and Environment by the Deputy Director of the responsible Section of the Office of Proceedings, prior to designation for hearing or modified procedure.

(2) All proceedings involving commuter fare increases (bus and rail), passenger train discontinuances, and recyclable commodities, shall be referred to the Section of Energy and Environment at the time the tariff notice, petition, complaint or other pleading is accepted for filing. The referral shall be by the office or bureau charged with acceptance of the item for filing.

(3) All rulemakings and legislative proposals by the Commission directly affecting carrier operations shall be referred to the Section of Energy and Environment in sufficient time prior to the proposing of a rule by the Commission or the submission of a legislative proposal to the Congress to allow for preparation of a draft impact statement if necessary.

(4) All proceedings other than those listed in subparagraphs 1, 2, and 3 will normally be processed by the issuance of a summary environmental negative declaration (SEND) in the initial procedural order. If, however, a party or other interested person, or the Deputy Director of the responsible Section of the Office of Proceedings, identifies environmental issues of consequence, either adverse or beneficial, the case shall be referred to the Section of Energy and Environment prior to designation or assignment to an employee review board or administrative law judge. In a proceeding for which an investigation has been ordered, and environmental issues of consequence are raised, referral should be made no later than the time the order instituting the investigation is served.

(5) In determining whether a proceeding subject to subparagraph (4) above, should be referred to the Section of Energy and Environment for analysis, the following should be considered: (A) whether there is a request for the preparation of an environmental impact statement in a pleading or oral motion; (B) whether environmental issues of consequence have been raised by a party or other interested person (pursuant to 49 CFR 1108.12 (c), (d), and (e), a statement alleging a significant environmental impact or request for the preparation of an environmental impact statement must indicate with specific data the exact nature and degree of the anticipated impact); and (C) whether significant environmental controversy has been generated by a proposed action.

(b) *Consideration by the Section of Energy and Environment.*—Upon referral, the chief of the Section of Energy and Environment will either (1) assign the case to one or more members of the Section for preparation of an environmental impact statement (EIS) or threshold assessment survey (TAS), (2) transmit the case back to the responsible Section of the Office of Proceedings with a recommendation that it be cleared through the issuance of a SEND, or (3) recommend that specific additional environmental data be requested from the parties in order to determine the appropriate environmental clearance.

(c) *Consideration of environmental issues by decisionmaking officials.*—(1) If it is determined that a TAS or EIS is required for a proposed action, the Section of Energy and Environment will prepare the appropriate document in accordance with the procedure set forth in 49 CFR 1108.13 and 1108.14, respectively, and submit it for the record. The employee review board, administrative law judge, or other decisionmaking official shall fully consider the environmental issues raised along with other issues relevant to a decision on the merits.

(2) After a SEND is issued, the case will proceed through the decisionmaking process. If environmental issues are subsequently raised which necessitate consultation with the Chief of the Section of Energy and Environment, consultation must be initiated sufficiently early in the decisionmaking process to allow for timely review by the Section. The Section Chief may provide informal guidance and advice or may recommend that an EIS or TAS be prepared.

(3) Because of the need to arrange assignments and priorities carefully, an order or directive requiring the preparation of an EIS or TAS or the submission of additional environmental data from any party should not be issued without first consulting the Chief of the Section of Energy and Environment.

(4) In the event that a request for cross-examination of witnesses of the Section of Energy and Environment is made pursuant to 49 CFR 1108.17(b), an attorney from the Section of Energy and Environment will be designated as counsel by the Chief of the Section.

(5) Any request for a waiver or exemption from applicant reporting requirements received pursuant to 49 CFR 1108.5 shall be referred to the Chief of the Section of Energy and Environment, who will make a recommendation to the Chairman of the Commission or his or her designee.

24. *Clearance Procedures.*

(a) *General.*—This issuance covers the procedures to be followed in the clearance of formal and informal proceedings matters requiring determination by the Commission or a Division of the Commission, except those cases asigned to the personal docket of individual Commissioners and cases assigned to an individual Commissioner for administrative handling shall continue to be cleared by the confidential assistant to the Commissioner. Matters not involving formal or informal proceedings circulated to the entire Commission will continue to be cleared by the confidential assistant to the Chairman.

(b) *Assignment of cases to divisions.*—(1) Proceedings with odd-numbered docket numbers (or "sub-numbers" in sub-numbered proceedings) will be assigned to Division 1, and those with even-numbered docket numbers (or sub-numbers) will be assigned to Division 2. In the case of consolidated proceedings, the final digit of the earliest proceeding filed governs the assignment. Proceedings related to other previously assigned proceedings will be assigned to the same division membership. Cases reviewed under appellate procedures will be handled by the same membership as issued the prior decision.

(2) For cases reaching a division on appeal from the Suspension and Fourth Section Board (S&FS), and other employee boards handling matters which may later become a formal docket, the division which handled the appeal will also handle the ensuing formal docket regardless of the formal docket's number. For example, an odd-numbered case going to Division 1 from the S&FS Board would later go to Division 1 as an I&S case, even if the I&S docket number is even.

(c) *Security.*—Votes and clearance memoranda will be hand carried between the Clearance Unit and the Commissioners' offices. Records and files shall be maintained in secured cabinets in a secured area. Public access to the Clearance Unit will not be permitted. Requests to the Clearance Unit for information or votes will be handled as shown under (h).

(d) *Responsibilities.*—(1) Originating office.—Sections of the Office of Proceedings, Boards, Bureaus of Investigations and Enforcement, Accounts and Operations, Offices of Hearings, Rail Services Planning, General Counsel, and others will continue to prepare and circulate matters to the divisions of the Commission in accordance with the above criteria and pertinent issuances. All matters circulated for vote by a division will contain information as to any *specific* issues that must be approved, e.g., market dominance, suspension, or fitness; any controlling time limits, including the date by which a matter must be cleared in order to be served by the deadline (in setting deadlines, one day shall be allowed for clearance if at all possible); and any other information pertinent to final disposition of the matter under review. More specifically, originating offices shall develop completed packages for circulation to divisions which generally include the following numbered items. Exceptions may be made in circulations to the entire Commission and in circulations to divisions acting in an appellate capacity or where the division is already familiar with the subject matter.

(A) Prior decisions,
(B) Field reports, if any,
(C) Pleadings, applications, etc.,
(D) Recommended decision,
(E) Examiner's explanation of decision,
(F) Views of other staff, and
(G) Cover memorandum, including any time limits for service.

A copy will be sent to each of the appropriate division members based on odd-even procedure. A complete copy of the material circulated, including the original of the draft decision or other document to be served, will be sent to the Clearance Unit.

(2) *Members.*—(A) *Institutional matters.*—Matters for voting will be circulated from the originating office to those eligible to vote on the matter. Votes will be sent to the Chairman of the Commission or the respective divisions and copies will be sent to other members. The original should be sent to the Clearance Unit. Members will take the initiative on noticing minority or separate positions and contacting the Clearance Unit with a separately stated vote or written statement for inclusion as a separate expression. To the extent possible, votes will indicate agreement or disagreement with changes proposed by the members. When supplemental votes are required, they should be issued without waiting for the Clearane Unit to poll the membership.

All separate expressions should be in writing as should any statement of position which differs from the written vote and any changes of position. A request to show a Commissioner simply as "dissenting" or "concurring" or to show a Commissioner with a statement of position exactly as the vote reads may be telephoned to the Unit (i.e., the vote reads "I vote to deny the petition.") A statement at the end of an order saying "Commissioner would deny the petition" may also be telephoned to the Clearance Unit. Any comment to be included with the member's vote should clearly be indicated whether the comment is intended to be shown in the clearance.

As copies of other votes are received, staff should check the file to see if their member is in the minority and, if so, notify the Clearance Unit as to how the Commissioner should be

D E 6 7 8 UMI

clear articulations of existing policy, delay in processing the proceeding and

(c) *Qualifications.*—General qualifi-

V 4 3 / 2 3 5 D E 6 7 8 UMI

shown on the order, or other appropriate instruction given.

If division members are absent and not participating, their offices should notify the Clearance Unit in order that proceedings may be cleared on a case-by-case basis.

When clearances are received from the Clearance Unit, staff should check these against the individual member's vote to insure that his or her position has been correctly stated and promptly advise the Clearance Unit of any error. Should errors occur, this will assist the Unit to correct them before service of the report or order.

(B) *Personal docket matters.*—Votes in personal docket matters will be sent to the Commissioner to whom the matter is assigned, and his or her office will have the responsibility for the clearance. A copy of the clearances issued in personal docket cases should be forwarded to the Clearance Unit or information purposes and so that the Clearance Unit will have a record of all proceedings decided by the Commission.

(3) *Division Chairmen.*—(A) *Conference matters.*—The Chairman of the Commission or the Divisions will be responsible for notifying the Clearance Unit, in writing, of the votes when voting takes place in conference.

(B) *Vacancies and absences.*—Division Chairmen will instruct originating offices and the Clearance Unit respecting the handling of cases circulated during vacancies or absences.

(C) *Staff views.*—When voting is interrupted to obtain the views of other staff, advice regarding the suspension of voting and the date it will be completed should be furnished by memorandum to the Clearance Unit and to the originating office.

(D) *Split votes.*—When there is failure to obtain a majority vote, the Clearance Unit will immediately advise the Division Chairman and request instruction as to how to proceed.

(E) *Recirculations.*—Items redrafted and recirculated will be handled under the above-outlined procedures for circulations.

(4) *Clearance Unit.*—On receipt of the circulation from the originating office this Unit will establish control records on all Division cases and prepare a voting sheet. When all votes have been received and a majority obtained, the Unit will issue a clearance memorandum specifying:

(A) The docket number and title of the case(s).
(B) The date the clearance is issued.
(C) The originating office or person to whom the clearance is directed
(D) The identification of the body voting and the members.
(E) Whether the vote was unanimous or split.
(F) The date the voting was concluded (whether by notation or in conference).
(G) A brief, complete description of the action of the majority.
(H) A brief but complete description of the votes of Commissioners differing from the majority and an indication of any not participating in the voting.
(I) A description of any changes made or to be made in the circulated draft approved by the majority.
(J) Instruction as to how any Commissioner in the minority wishes to be shown in the served reports, etc.
(K) Instructions on any action to be taken by the originating office as a result of the voting.
(L) Identification of any attachments to the clearance.
(M) Indication if a decision is to be printed.
(N) Signature of the person preparing the clearance.
(O) Identification of persons receiving copies of the clearance.

If the votes are unclear, or if changes have been proposed by any member, all of the other members voting will be polled to determine whether there is a majority approving the proposed change when this is not already indicated in their votes.

(e) *Time limits.*—To the extent that it is possible to do so, one full day should be allowed for clearance of matters circulated. However, the Unit will work within the constraints of any time limits specified in the originating office memorandum.

(f) *Service.*—Matters will be cleared to the originating offices where there are substantive changes. All other matters will be corrected or dated by the Clearance Unit and cleard to the Secretary for service. Copies of clearances will be sent to the originating offices in either instance. Originating offices will be responsible for insuring that matters are served within the established deadlines when matters are cleared to them, as will the Secretary when matters are cleared to that office. When any matter is not served within 15 days following clearance, follow-up will be made to the office to which it was cleared.

On TA, ETA and MC-FC of other proceedings, where there is no service list on file in the Section of Dockets and Service, a service list should be attached to the circulation copy submited to the Clearance Unit. This will be forwarded to the Secretary with the report or order and the clearance memorandum. In other proceedings, the originating office must make sure that all official pleadings and the docket file are released to the Section of Dockets and Service well in advance of circulation so that accurate service lists will be on hand. These steps are intended to insure that information needed to make legal service on all parties is furnished to the Secretary either before or with the clearance.

If there is to be any deviation in service, other than to all parties, this advice should be shown in the circulation memorandum so it can be included in the clearance memorandum sent forward to the Secretary.

(g) *Corrections.*—Files will be held open until the decision has been served. The Clearance Unit will check the served copy against the clearance memorandum to insure that changes have been made. Any substantial errors will be corrected through the service of a corrected notice and the office responsible for making corrections to the original will be requested to prepare it.

(h) *Requests for information and votes.*—Requests by members of the public for copies of notation votes will be referred to and handled by the Secretary, and will be honored only after the decision has been served. Telephone requests from within the Commission, other than from a Commissioner, a member of a Commissioner's staff, or the office originating the circulation will be referred to the appropriate Section head in the Office of Proceedings or originating Bureau.

(i) *Monthly report.*—The Clearance Unit will prepare and distribute to each division member a monthly report showing the matters acted on by the division memberships and those circulated proceedings pending disposition, together with the circulation date of matters still pending.

(j) *Recorder of Minutes.*—A copy of each clearance issued by the Clearance Unit will be sent to the Recorder of Minutes for appropriate recording of the votes in the official minutes.

(k) *Retention of records.*—Records of votes and clearance memoranda issued by the Clearance Unit will be retained for two years after the case is closed and destroyed in accordance with approved records schedules.

25, *Publication of Commission Decisions.*

(a) *Series of reports.*—The Commission issues two series of official reports of its decisions.

(1) The Interstate Commerce Commission Reports, cited as "—— I.C.C. ——," include decisions relating to rates, charges, fares, and practices of all carriers subject to the Commission's jurisdiction; decisions relating to the operating authorities of water carriers and freight forwarders; and all other decisions not listed for inclusion in the series of reports described in paragraph (2) of this subsection.

(2) The reports of the Commission's Motor Carrier Cases, cited as "—— M.C.C. ——," include decisions relating to motor carriers and brokers, except those relating to rates, charges, fares, and practices.

(b) *Selection of items for publication.*—(1) Normally, only decisions which reflect changes in Commission policy, which contain particularly

clear articulations of existing policy, which involve novel legal issues, which are likely to provide helpful guidelines for future decisionmaking, or which involve matters of major importance to the national transportation system are printed in one of the permanent series of Commission decisions.

(2) A recommendation that a decision be printed should be included in the cover memo to the unit which will issue the decision. The recommendation should be supported by a brief explanation. Only cases involving changes in policy; novel legal issues, or unusually complex factual situations will be printed. The decisionmaking unit will issue instructions to print decisions, and no decision will be printed without specific direction from that unit.

(3) Employee board decisions will not normally be printed. The approval of employee board decisions for printing will be made by the director of the office or bureau in which the board is located, upon the recommendation of the chairman of the board.

(4) A decision not previously printed which becomes the subject of a court action will be printed at the request of the General Counsel.

(c) *Index of non-printed decisions.*—All decisions during a calendar year quarter, whether printed or not, shall be listed by docket number and subject matter in the *Advance Bulletin of the Interstate Commerce Act Annotated.* Access to decisions so indexed shall be available through the microform file on non-printed decisions maintained by the Reference Services Branch.

26. Monitoring the Status of Proceedings.

(a) *General.*—It is essential that all Commission proceedings be considered and disposed of as expeditiously as possible. Railroad-related proceedings are the subject of strict statutory time limits imposed by the Railroad Revitalization and Regulatory Reform Act of 1976. The Commission has set as goals for itself time limits in all non-rail proceedings.

(b) *Monitoring case status.*—The Director of the Office of Proceedings will be responsible for monitoring the status of all Commission proceedings, including those assigned to a Commissioner's personal docket, on at least a quarterly basis. A record will be made showing each proceeding which has remained at one procedural stage (for example, awaiting assignment for hearing, in hearing, awaiting completion of initial decision, submitted and awaiting appellate decision) for 90 days or more. The Director will provide the Chairman, each Commissioner and the Managing Director with a copy of this list, together with a report containing the reasons for the delay in processing the proceeding and an estimated date for completion of the current procedural stage.

(c) *Responsibilities of other bureaus and offices.*—Where other bureaus and offices of the Commission are responsible for handling a proceeding at a particular procedural stage, the bureau or office head will respond promptly to requests from the Director of the Office of Proceedings to furnish information necessary to complete the report required under paragraph (b) above.

(d) *Cases subject to statutory deadlines.*—The Director of the Office of Proceedings will be responsible for monitoring the status of all Commission proceedings, in whatever procedural stage, which are the subject of statutory deadlines. A record will be maintained of all cases subject to statutory deadlines in which the deadline will expire within 60 days. The Director will provide the Chairman, each Commissioner, and the Managing Director with a list of such cases on at least a monthly basis. Where another bureau or office of the Commission is responsible for a proceeding appearing on this list, or where such a proceeding is assigned to the personal docket of a Commissioner, the Director will also inform the appropriate Commissioner or bureau or office head. Draft decisions and staff recommendations in proceedings requiring action by the Commission, a division, or an employee board will be submitted to the decisionmaking body no less than 30 days prior to the expiration of any applicable statutory deadline, except as the Chairman of the decisionmaking body may direct in individual cases. This paragraph does not apply to rate cases at the initial suspension stage.

BOARDS

41. *Employee Boards Under Section 17.*

(a) *General.*—The employee boards established under section 17 of the Interstate Commerce Act are described in, and their jurisdiction is established by, the Organization Rules (49 C.F.R. 1011.6). Five review boards have been established designated as Review Boards Nos. 1 through 5.

(b) *Membership.*—Each employee board consists of three members appointed by the Chairman with the approval of the Commission. One of the members is designated as Board Chairman by the Chairman of the Commission, with the approval of the Commission. In the absence of the Board Chairman, the member senior in total length of service as a member of the board is acting chairman. In the event of equal seniority in service as a board member, the senior member in service with the Commission shall be the acting chairman.

(c) *Qualifications.*—General qualifications for appointment as a board member are set forth in section 17(2) of the Act. Other special qualifications are as follows:

(1) Members of review boards must possess the time-in-service and grade-level qualifications which would make them technically eligible for appointment as administrative law judges of the Commission.

(2) Among those eligible for appointment to Bureau of Traffic Boards are employees classified as "special transportation examiners, board members." The minimum qualifications for appointment as a special transportation examiner, board member, are at least 6 years of experience in progressively more responsible work in the field of traffic or transportation, including the handling of technical assignments requiring a practical working knowledge of traffic or transportation problems and activities. Three years of this experience must have been in one or more of the major fields of transportation, in such activities as classification, rates and routing, or comparable work in regulatory agencies. It must also have included substantial responsibility in the analysis of rail, motor, water, freight forwarder, or air rate adjustments and their conformity with statutory requirements. One year's experience must also have been in work comparable to that required for appointment to grade GS-11.

(d) *Current listing of employee board members.*—There follows a list of members of each of the Commission's Employee Boards appointed under section 17 of the Act, arranged by the office or bureau within which the boards are located. The Commission will provide that a publication of a listing of board members will be made in the FEDERAL REGISTER on at least an annual basis.

OFFICE OF PROCEEDINGS

Review Board No. 1—Robert P. Carleton, Chairman, Paul R. Joyce, Charles R. Jones, Jr.
Review Board No. 2—James D. Boyle, Chairman, Henry F. Eaton, Roy P. Liberman.
Review Board No. 3—William E. K. Parker, Chairman, Roger N. Fortier, Rufus S. Hill.
Review Board No. 4—James A. FitzPatrick, Chairman, Donald J. Shaw, Jr., Walter J. Fisher.
Review Board No. 5—Richard M. Krock, Chairman, Edward A. Pohest, Daniel G. Taylor.
Finance Board—John J. Mattras, Chairman, William J. McCormick, Gerald Proger.
Motor Carrier Board—Charles D. Dickerson, Jr., Chairman, John T. Hedetniemi, Sheryl B. Tillman.

BUREAU OF ACCOUNTS

Accounting and Valuation Board—Ronald S. Young, Chairman, J. Richard Berman, Bryan Brown, Jr., William T. Bono (Alter-

nate on valuation matters), William J. Ellis, Jr., Alternate.

Employee Board on Education and Practices—Robert P. Carleton, Chairman, Paul R. Joyce, Charles R. Jones, Jr.

matter as is involved in the court

nate on valuation matters), Willian J. McCormick (Alternate on accounting matters).

BUREAU OF OPERATIONS

Motor Carrier Leasing Board—Joel E. Burns, Chairman, William F. Sibbald, Jr., Robert S. Turkington.
Insurance Board—Joel E. Burns, Chairman, Leonard J. Schloer, Robert S. Turkington.
Railroad Service Board—Joel E. Burns, Chairman, Robert S. Turkington, John Michael.

BUREAU OF TRAFFIC

Suspension Board—Albert H. Fitzgerald, Chairman, Clarence S. Halvarson, John A. O'Mailey.
Special Permission Board—William P. Geisenkotter, Chairman, David R. Manning, Harry J. Sullivan.
Released Rates Board—Martin E. Foley, Chairman, Alfred S. Killelea, B. Scott Walker.
Tariff Rules Board—Martin E. Foley, Chairman, William P. Geisenkotter, B. Scott Walker.

42. *Employee Board on Education and Practice.*

(a) *Duties.*—The Employee Board on Education and Practice is responsible, under the general supervision of the Vice Chairman, for the examination of non-lawyer applicants for admission to practice before the Commission, for preparing examination questions, and for grading examinations.

(b) *Membership.*—The Board consists of two attorneys and one non-attorney appointed by the Chairman with the approval of the Commission.

(c) *Committee of Examiners.*—A seven-member Committee of Examiners, under the supervisor of the Board, will grade examination questions.

(d) *Committee Membership.*—The members of this Committee must have at least two year's experience with the Commission and are appointed for one-year terms by the Chairman with the approval of the Commission. Members may be reappointed and, to the extent possible, no more than three members of the Committee will be replaced at one time.

(e) *Availability of examination questions.*—Examination questions are made public after the examination is graded.

(f) *Qualifications for admission.*—To be eligible for admission to practice as non-lawyers, candidiates must have completed two years of postsecondary education at an intitution recognized by the United States Office of Education.

(g) *Current listing of board and committee members.*—There follows a list of members of the board and committee of examiners. The Commission will provide that a publication of a listing of the board and committee members will be made in the FEDERAL REGISTER on at least an annual basis.

Employee Board on Education and Practice—Thaddeus J. Harty, Jr., Chairman, Roy P. Liberman, Ronald S. Young.
Committee of Examiners—Jane Dixon, William P. Geisenkotter, John Mattras, B. Scott Walker, Gerald C. Wegznek, Melvin B. Werner, David B. Wuehrmann.

SPECIAL AUTHORIZATIONS

51. *Criminal Prosecutions and Civil Forfeiture and Injunction Proceedings.*

(a) *Institution of proceedings.*—The Director of the Bureau of Investigations and Enforcement is authorized to recommend to the Department of Justice or to the United States Attorneys institution of criminal proceedings, civil forfeiture penalty suits, or civil injunction proceedings for violations of the Interstate Commerce Act, related Acts, or supplementary Acts administered by the Commission, or any other Federal, civil, and criminal statutes. The Bureau is further authorized to institute civil injunction proceedings which the Commission is empowered to institute in its own name under the provisions of the Interstate Commerce Act. The Commission reserves to itself the determination of what further action, if any, should be taken in the event a Federal Court of Appeals renders the decision adverse to the Commission's position in the criminal or civil proceeding that was instituted by the Director of the Bureau of Investigations and Enforcement.

(b) *Settlement of proceedings.*—The Director of the Bureau of Investigations and Enforcement as the Commission's designee is authorized, within the framework of the Federal Claims Collection Act of 1966, the applicable standards promulgated by the Attorney General and the Comptroller General and pursuant to Commission procedures to compromise, suspend, or terminate enforcement claims arising under the civil penalty or forfeiture provisions of the Interstate Commerce Act, Elkins Act, and amendatory and supplemental legislation related to such Acts. The Director of the Bureau of Investigations and Enforcement may sub-delegate the authority to settle such claims to the various Regional Counsel.

(c) *Intervention in private party actions.*—(1) The Director of the Bureau of Investigations and Enforcement is authorized to intervene on behalf of the Commission in any civil action instituted by private persons under the provisions of section 222(b)(2) and section 417(b)(2) of the Interstate Commerce Act and to notify the court in which such an action is brought that the Commission has instituted or has pending before it a recommendation to institute an administrative proceeding which will embrace the same subject matter as is involved in the court action.

(2) Applications or complaints, with all supporting papers, filed under sections 222(b)(2) and 417(b)(2) of the Act, served upon or received by any member of the Commission's staff, either in the Washington headquarters or in the field, shall be forwarded immediately to the Director of the Bureau of Investigations and Enforcement.

(d) *Representation in the Supreme Court.*—The Office of the General Counsel will represent the Commission in the Supreme Court in cases brought by the Bureau of Investigations and Enforcement in the lower courts.

(e) *Delegation.*—Any power delegated to the Director of the Bureau of Investigations and Enforcement under this issuance may be sub-delegated to other authorized personnel under plans which meet the approval of the Chairman.

INSTRUCTIONS FOR EMPLOYEES

61. *Appearances of Employees as Expert Witnesses—Statement of Policy.*

(a) The Commission does not desire to have its employees subjected to calls for testimony as expert witnesses in private litigation and declines to authorize its employees voluntarily to appear as witnesses or to submit documents in such proceedings. No Commission employee may voluntarily appear and testify as an expert witness in transportation matters in private court or administrative agency proceedings.

(b) *Appearances at the request of Commission counsel.*—Any employee or former employee of the Commission called to testify in a Commission or court proceeding by a Commission attorney authorized to participate in that proceeding is authorized and directed to divulge any fact or information which may have come to his or her knowledge during the course of any investigation, examination, or inspection of the records or properties of carriers or other persons under authority of the Interstate Commerce Act.

(c) *Internal procedures.*—Any employee receiving a subpoena shall immediately notify, through the employee's supervisor, the director of the employee's bureau or office or, as appropriate, a regional managing director. The director shall notify the General Counsel or Director of the Bureau of Investigations and Enforcement, as appropriate under (d) below. The General Counsel and the Director of the Bureau of Investigations and Enforcement shall keep each other informed of subpoena matters and coordinate their handling of them.

(d) *The handling of subpoenas.*—(1) With respect to court cases, if a subpoena is issued in an enforcement action, including one initiated by a private party, or in any other litigation if the subpoena seeks evidence resulting from an investigation conducted by the employee, it will be handled by the Bureau of Investigations and Enforcement in consultation with other appropriate bureau of office directors. In all other instances involving court cases, subpoenas will be handled by the General Counsel, in consultation with the appropriate bureau or office head, unless the General Counsel shall determine that for cost or other considerations the matter should more appropriately be handled by the Bureau of Investigations and Enforcement, in which case he may refer the matter to that Bureau for disposition.

(2) With respect to Commission proceedings, whenever an employee is subpoenaed to testify on behalf of a party the subpoena will be handled by the Bureau of Investigations and Enforcement unless that bureau is a party, in which case the matter will be handled by the General Counsel.

H. G. HOMME, Jr.,
Secretary.

[7035-01-M]

[Sub No. 3]

DISASTER RELIEF DECISION NO.14

Decided December 1, 1978.

An application has been filed jointly by the Southern Pacific Transportation Company and the Northwestern Pacific Railroad Company (NWP) requesting authority to continue relief under Section 22 of the Interstate Commerce Act, as afforded by Disaster Relief Order No. 14 and its Sub Nos. 1 and 2. Petitioners seek to maintain allowances to provide reduced rates for persons who would normally ship via the NWP and Arcata and Mad River Rail Road Company but who cannot do so because of a fire in a tunnel on the NWP at mileage post 195 near Island Mountain, California. The outstanding relief is due to expire with December 12, 1979.

It is ordered: Authority to extend the expiration date of Disaster Order No. 14 and its Sub Nos. 1 and 2 from December 12, 1978 to March 12, 1979, is granted, including authority to make publication upon not less than one day's notice to the Commission and the public by blanket supplements. The terms of rule 9(e) of the Commission's Tariff Circular 20 [49 C.F.R. 1300.9] are waived. In all other respects, the original terms and conditions of those decisions shall remain the same.

Any tariffs or tariff provision published under this authority shall make reference to this decision by number and date.

Notice to the affected railroads and the general public shall be given by depositing a copy of this decision in the Office of the Secretary of the Commission and by filing a copy with the Director, Office of the FEDERAL REGISTER. Copies will be mailed to the Chairman of the Traffic Executive Association—Eastern Railroads, New York, N.Y.; the Chairman of the Southern Freight Association, Atlanta, Georgia; the Chairman of the Executive Committee, Western Railroad Traffic Association, Chicago, Illinois; and the Vice-President, Economics and Finance Department of the Association of American Railroads, Washington, D.C.

By the Commission, Betty Jo Christian, Vice Chairman.

H. G. HOMME, Jr.,
Secretary.

[7035-01-M]

[Amendment No. 1 To I.C.C. Order No. 9 Under Service Order No. 1344]

GRAND TRUNK WESTERN RAILROAD COMPANY

Rerouting Traffic

Upon further consideration of I.C.C. Order No. 9 (Grand Trunk Western Railroad Company), and good cause appearing therefor:

It is ordered, I.C.C. Order No. 9 is amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This order shall expire at 11:59 p.m., December 31, 1978, unless otherwise modified, changed, or suspended.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of the amendment shall be filed with the Director, Office of the FEDERAL REGISTER.

Issued at Washington, D.C., November 29, 1978.

INTERSTATE COMMERCE COMMISSION,
ROBERT S. TURKINGTON,
Agent.

[Amendment No. 1 To Exception No. 4]

MARYLAND & PENNSYLVANIA RAILROAD CO.

Exception Under Section (a), Paragraph (1), Part (v) Second Revised Service Order No. 1332

Decided November 28, 1978.

By the Board:

Upon further consideration of Exception No. 4 (Maryland and Pennsylvania Railroad Company), and good cause appearing therefor:

It is ordered, Exception No. 4 to Second Revised Service Order No. 1332 is amended to:

Expire January 31, 1979.

Issued at Washington, D.C., November 29, 1978.

ROBERT S. TURKINGTON,
Acting Chairman,
Railroad Service Board.

[7035-01-M]

[Exception No. 5]

MISSOURI PACIFIC RAILROAD CO.

Exception Under Section (a), Paragraph (1), Part (v) Second Revised Service Order No. 1332

Decided November 28, 1978.

By the Board:

The Missouri Pacific Railroad Company (MP) has been given permission to use National Railways of Mexico (NdeM) 50-foot plain boxcars account there is an available supply of these cars on the NdeM. I.C.C. Revised Exemption No. 133 authorizes MP to use certain NdeM boxcars without regard to the requirements of Car Service Rules 1 and 2. The MP is holding some of these cars beyond the 60-hours permitted in Section (a)(2)(ii) of this order prior to placing of cars for loading, and in Section (a)(4)(i) prior to forwarding of cars.

Order. Pursuant to the authority vested in the Railroad Service Board by Section (a)(1)(v) of Second Revised Service Order No. 1332, Missouri Pacific Railroad Company is authorized to hold empty National Railways of Mexico 50-foot plain boxcars listed in I.C.C. Revised Exemption No. 133 for loading, or prior to forwarding empty, regardless of the provisions of Section (a)(2)(ii), and of Section (a)(4)(i) of this order.

These cars shall become fully subject to all provisions of Second Revised Service Order No. 1332 when loading is completed and instructions for forwarding are received from the shipper.

Effective November 30, 1978.

[Docket No. AB-35 (Sub-No. 5F)]

LOS ANGELES & SALT LAKE RAILROAD CO. ABANDONMENT AND DISCONTINUANCE OF SERVICE BY UNION PACIFIC RAILROAD CO. IN JUAB COUNTY, UTAH

Notice of Findings

Notice is hereby given pursuant to Section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by a Certificate and Decision decided November 16, 1978, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.-Abandonment Goshen,* 354 I.C.C. 584 (1978), and for public use as set forth in said decision, the present and future public convenience and necessity permit the abandonment by the Los Angeles & Salt Lake Railroad Company and discontinuance of service by the Union Pacific Railroad Company over portions of a line of railroad known as the Eureka Branch extending from railroad milepost 0.00 (near Tintic) to railroad milepost 0.81 and the Silver City Branch extending from railroad milepost 0.478 to railroad milepost 2.42 (near Silver City), a total distance of 2.75 miles in Juab County, UT. The 0.00 milepost designations for both the Eureka Branch and the Silver City Branch begin at the main line and both branches consist of the same track from railroad milepost 0.00 to railroad milepost 0.478 on the Eureka Branch. A certificate of public convenience and necessity permitting abandonment and discontinuance of operation was issued to the Los Angeles & Salt Lake Railroad Company and Union Pacific Railroad Company. Since no investigation was instituted, the requirement of Section 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than December 21, 1978. The offer, as filed, shall contain information required pursuant to Section 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective on or before January 22, 1979.

H. G. HOMME, Jr.,
Acting Secretary.

[Docket No. AB-7 (Sub-No. 70F)]

STANLEY E. G. HILLMAN, TRUSTEE OF THE PROPERTY OF CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO., DEBTOR, ABANDONMENT NEAR MOREAU JUNCTION AND ISABEL IN CORSON AND DEWEY COUNTIES, S. DAK.

Notice of Findings

Notice is hereby given pursuant to Section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by a Certificate and Decision decided November 16, 1978, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.-Abandonment Goshen,* 354 I.C.C. 584 (1978), and for public use as set forth in said decision, the present and future public convenience and necessity permit the abandonment by Stanley E. G. Hillman, Trustee of the Property of Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor, of a line of railroad known as the Moreau Junction to Isabel Branch extending from railroad milepost 0.0 near Moreau Junction to railroad milepost 56.5 near Isabel, a distance of 56.5 miles, in Corson and Dewey Counties, SD. A certificate of public convenience and necessity permitting abandonment was issued to Stanley E. G. Hillman, Trustee of the Property of Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor. Since no investigation was instituted, the requirement of Section 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later December 21, 1978. The offer, as filed, shall contain information required pursuant to Section 1121.38(b)(2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective January 22, 1979.

[Docket No. AB-10 (Sub-No. 14F)]

THE WHEELING & LAKE ERIE RAILWAY CO. AND THE NORFOLK & WESTERN RAILWAY CO. ABANDONMENT IN THE CITY OF STEUBENVILLE, JEFFERSON COUNTY, OHIO

Notice of Findings

Notice is hereby given pursuant to Section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by a Certificate and Decision decided October 27, 1978, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.-Abandonment Goshen,* 354 I.C.C. 584 (1978), and for public use as set forth in said decision, the present and future public convenience and necessity permit the abandonment by the Wheeling and Lake Erie Railway Company and the Norfolk and Western Railway Company of a line of railroad. The line extends from railroad milepost 13.15 to milepost 13.63 which is a distance of approximately 2525 feet at the stub-end of the Steubenville Branch in the City of Steubenville, Jefferson County, OH. A certificate of public convenience and necessity permitting abandonment was issued to The Wheeling and Lake Erie Railway Company and the Norfolk and Western Railway Company. Since no investigation was instituted, except on the issue of employee protective conditions, the requirement of Section 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and

place mutually agreeable to the parties.

The offer must be filed and served no later than December 21, 1978. The offer, as filed, shall contain information required pursuant to Section 1121.38(b)(2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective January 22, 1979.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Community Planning and Development

SPECIAL GRANTS FOR A-95 URBAN IMPACT REVIEW

Submission of Applications

[4210-01-M]

all levels of government—Federal, State, regional, and local—to develop reliable and consistent methodologies to assess the urban impact of Federal programs and policies. Special grants will be awarded to support the development of such methodologies.

Applications for special grants will be accepted from State, regional, and local agencies which have been designated by the Governor of the State to perform A-95 review functions. Applications will be accepted from agencies in the following areas:

1. Jacksonville, Florida
2. Tampa, Florida
3. Atlanta, Georgia
4. Chicago, Illinois
5. Indianapolis, Indiana
6. Louisville, Kentucky
7. Minneapolis, Minnesota
8. Kansas City, Missouri
9. St. Louis, Missouri
10. Omaha, Nebraska
11. Albuquerque, New Mexico
12. Cincinnati, Ohio
13. Cleveland, Ohio
14. Columbus, Ohio
15. Toledo, Ohio
16. Portland, Oregon
17. Pittsburgh, Pennsylvania
18. Memphis, Tennessee
19. Nashville, Tennessee
20. Houston, Texas
21. Dallas, Texas
22. San Antonio, Texas
23. Seattle, Washington
24. Milwaukee, Wisconsin

Applications must be received by the Department of Housing and Urban Development by January 15, 1979. Applications received after that date will not be considered.

Applications will be reviewed by a panel of Federal, State, and local officials. Grants will be awarded by the Assistant Secretary for Community Planning and Development. Grants will be awarded on the basis of the following criteria:

1. Demonstrated ability to perform A-95 review functions.
2. Demonstrated ability to perform urban impact analysis.
3. Demonstrated ability to develop reliable and consistent methodologies to assess the urban impact of Federal programs and policies.
4. Demonstrated ability to coordinate with other agencies in the area.
5. Demonstrated ability to perform the work in a timely manner.

Grants will be awarded for a period of 12 months. Grants will be awarded in amounts ranging from $50,000 to $100,000.

Applications should be submitted to the Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

For further information, contact the Office of Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, telephone 202-755-6310.

and Development, U.S. Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, telephone 202-755-6310.

701 grants made for this demonstration program.

[Docket No. 1 N-78-901]

SPECIAL GRANTS FOR A-95 URBAN IMPACT REVIEW

Submission of Applications

AGENCY: Department of Housing and Urban Development.

ACTION: Submission of Applications for Grants for A-95 Urban Impact Reviews.

SUMMARY: Notice is hereby given that special Comprehensive Planning Assistance (701) Program grants will be provided to State, and metropolitan and non-metropolitan areawide comprehensive planning organizations with A-95 responsibilities to carry out a demonstration of urban impact analyses of proposed Federally aided projects. This demonstration program supports the President's National Urban Policy, announced on March 27, 1978 and also supports executive Order 12074, signed August 16, 1978 which directs Federal agencies to perform urban impact analyses on all major policy initiatives. This demonstration applies the concept of urban impact analyses to the process of A-95 reviews, conducted by State and areawide clearinghouses, of projects for which Federal aid is sought.

FOR FURTHER INFORMATION, CONTACT:

Marshall Kaplan, Deputy Assistant Secretary for Urban Policy (202) 755-3314 or Trudy McFall, Acting Director Office of Community Planning and Program Coordination, (202) 755-6240.

SUPPLEMENTARY INFORMATION: The Department will make available up to $500,000 for this demonstration program for individual grants to clearinghouses up to $50,000. The intent of the demonstration is to encourage clearinghouses to design and test methodologies for conducting urban impact analyses of projects proposed for Federal assistance and to determine the relevancy of urban impact analyses to Federal, State and local project funding decisions. The impact analyses are to be conducted in the context of the regular operation of the A-95 Project Review and Notification System by clearinghouses.

BACKGROUND

On March 27, 1978 President Carter announced a National Urban Policy to conserve America's communities. This policy calls for a "New Partnership" of all levels of government—Federal, State, county, city—as well as the private sector and neighborhood and volunteer groups. All of these entities must work together to implement the policy which is aimed at making cities and communities healthier and improving the lives of people who live and work in them. Through announcement of the urban policy, nine important objectives have been identified to conserve and strengthen communities at a time of declining resources.

These objectives are:

Encourage and support efforts to improve local planning and management capacity, and the effectiveness of existing Federal programs by coordinating these programs, simplifying planning requirements, reorienting resources, and reducing paperwork.

Encourage State to become partners in assisting urban areas.

Stimulate greater involvement by neighborhood organizations and voluntary associations.

Provide Fiscal relief to the most hard-pressed communities.

Provide strong incentives to attract private investment to distressed communities

Provide employment opportunities, primarily in the private sector, to the long-term unemployed and disadvantaged in urban areas.

Increase access to opportunity for those disadvantaged by a history of discrimination.

Expand and improve social and health services to disadvantaged people in cities, counties, and other communities.

Improve the urban physical environment and the cultural and aesthetic aspects of urban life.

The nine objectives are to serve as a guide for Federal actions in administration of programs to assist communities. As a result of the President's Urban Policy, numerous implementing actions have been undertaken including over 15 legislative initiatives, several Executive Orders and numerous administrative changes as a part of this activity. Under Executive Order 12074, all Federal agencies are required to analyze the impact of new policies and programs as they relate to the implementation of the Urban Policy.

As a counterpart to the analysis of new policies and programs at the National level, there is a need to review individual project proposals for Federal assistance from State and local governments to determine their potential impact. Even though a Federal program may generally be supportive of urban communities, an individual project may have adverse impacts.

2. PURPOSE

The purpose of the demonstration is to (a) develop appropriate and replicable methodologies to assess the urban impacts of proposed Federally aided projects in the context of the A-95 Project Notification and Review System; and (b) test the relevance of special, project-level, urban impact reviews to State and local government as well as Federal agency decisions on funding individual application.

3. ELIGIBLE APPLICANTS

Applicants may be State and areawide planning organizations which are (a) eligible for regular 701 funding and have an approved housing and land use element and are (b) designated as the A-95 clearinghouse.

4. SELECTION FACTORS

State and areawide clearinghouses will be selected from applicants based on the following criteria:

(1) Capacity of the clearinghouse to perform urban impact tasks, including past use of A-95 procedures to implement the applicant's plans and policies.

(2) Degree to which applicant's plans, policies, and programs are clearly stated and relevant to National Urban Policy and can be used as a basis for making urban impact assessments.

(3) The proposed methodology for assessing urban impacts and a means to evaluate the effectiveness of the process.

(4) Proposed procedure for involving local government and interested groups in the process.

5. SIZE OF GRANT

The amount of each demonstration grant will depend on the number of applications received and the quality of the proposals. The maximum grant, whether for a State or areawide clearinghouse, is $50,000. Applications should not exceed this amount. Applicants must provide one-third local match as required in the regular 701 Program (24 CFR Part 600).

6. PROJECT PERIOD

The demonstration grants will be awarded for a twelve month period. Up to four months of this period may be used to establish the proposed urban impact review methodology as an operating system. At least eight months of this period must be used for testing the operational feasibility of the review methodology.

7. SUBMISSION PROCEDURES

(a) Date of submission. Applications must be postmarked by January 31, 1979 in order to be considered for funding.

(b) How to submit. The application shall be submitted to the Assistant Secretary for Community Planning and Development, U.S. Department of Housing and Urban Development, 451 7th Street SW., Attention: Office of Community Planning and Program Coordination, Room 7224, Washington, D.C. 20410.

(c) Application package. The application package for the demonstration funds shall consist of the following:

(1) A letter of transmittal signed by the chief executive officer of the State or APO submitting the application.

(2) A description of the proposed urban impact review demonstration project. This shall include:

(a) The experience of the applicant with particular reference to past use of A-95 to implement plans and policies;

(b) The plans, policies, program and urban strategies that the applicant will use as one of the bases for making the reviews;

(c) The proposed methodology for assessing urban impacts as part of the A-95 review system;

(d) The proposed means for securing advisory comments of affected local governments and varied population groups, including those officials and citizen groups representing the center city and older urban areas of the clearinghouse jurisdiction.

(3) Standard Form 424, Federal Assistance, prescribed by OMB Circular No. A-102.

(4) A detailed work program which sets forth proposed use of the grant funds. The program shall include information on how the urban impact review project will be conducted for the 12 month period, and how the feasibility of the test system will be evaluated. Although an overall program design (OPD) is not required for this demonstration program, the work program must indicate how the proposed activities relate to the applicant's current HUD approved OPD.

(5) Annual work program summary (form HUD-7026.2).

(6) Annual grant budget (form HUD-7026.3).

(7) Evidence of adherence to A-95 procedures. Areawide clearinghouses shall submit the application to appropriate local governments, environmental, civil rights and coastal zone management organizations and to the State clearinghouse. State clearinghouses shall conduct their normal A-95 routing including obligatory referrals to appropriate environmental, civil rights and coastal zone management organizations.

(8) A copy of "Assurances" (form HUD-7026.4).

Since this demonstration program is being conducted under the Authority of the 701 Program, all of the regulations for the 701 Program, (contained in 24 CFR Part 600) are applicable to 701 grants made for this demonstration program.

8. SELECTION PROCESS

HUD will review and select applications for demonstration funding as follows:

(a) Applications will be reviewed by HUD in accordance with the selection factors contained in Section 4 of this notice.

(b) The selection of those who will receive the demonstraion funds will be based on the written material submitted and the proposed work program and budget. If necessary, HUD may request applicants to provide additional information needed to make final selections. HUD will select those that in its judgment best meet the selection criteria.

(c) Within 60 days after the application deadline, and after review by the Interagency Coordinating Council, HUD will select no more than 15 applicants to receive incentive funding. HUD will notify all applicants as to whether they were selected or not.

9. REPORTING REQUIREMENTS

(a) Fiscal and other reports. The reports that will be required of each recipient of incentive funds are the same as that in the regular 701 program. These requirements are detailed in HUD Handbook 6042.1, REV., "Comprehensive Planning Assistance Handbook II" (July 1973).

(b) Contents of completion report. The required annual program report (which serves as the project completion report) must include the following items:

(1) Identification of the work tasks completed through the incentive grant support; and

(2) Evaluation of how effective the methodology was to identify and review projects with significant urban impacts: and

(3) A record of disposition by Federal agencies, of the specified project applications reviewed.

(c) Assistance and National workshop attendance. As part of the grant, recipients must be prepared to attend a workshop to share experiences. Recipients must also be prepared to provide assistance to HUD in formulating recommendations for improving the tested methodologies and applying them for nationwide use. The amount of time to be devoted to these two activities will be mutually agreed upon by HUD and recipients.

Issued at Washington, D.C., November 16, 1978.

ROBERT C. EMBRY, JR.,
Assistant Secretary for Community Planning and Development.

BUDGET RESCISSIONS AND DEFERRALS

Reports

[3110-01-M]

OFFICE OF MANAGEMENT AND BUDGET

BUDGET RESCISSIONS AND DEFERRALS

Reports

To The Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose rescission of $75,000 in unneeded funds appropriated to the Foreign Claims Settlement Commission.

In addition, I am reporting four new deferrals of budget authority totalling $889 million and two revisions to previously transmitted deferrals increasing the amount deferred by $21.4 million in budget authority. These items involve the military assistance program and programs in the Departments of Commerce, Defense, Justice, and State.

The details of the rescission proposal and the deferrals are contained in the attached reports.

JIMMY CARTER

THE WHITE HOUSE, *November 30, 1978.*

[3110-01-C]

SUMMARY OF SPECIAL MESSAGES
FOR FY 1979
(in thousands of dollars)

	Rescissions	Deferrals
Second special message:		
New items	75	888,965
Changes to amounts previously submitted	---	21,365
Effect of second special message	75	910,330
Previous special messages	---	1,178,229
Total amount proposed in special messages	75 (in one rescission)	2,088,559 (in 34 deferrals)

NOTE: All amounts listed represent budget authority except for $2,404,000 in one general revenue sharing deferral of outlays only.

Rescission Proposal No. R79-1

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Foreign Claims Settlement Commission	New budget authority (P.L. 95-431 ___) $ 1,015,000
Bureau	Other budgetary resources
Appropriation title & symbol	Total budgetary resources 1,015,000
Salaries and Expenses 7990100	Amount proposed for rescission $ 75,000
OMB identification code: 79-0100-0-1-153	Legal authority (in addition to sec. 1012): [X] Antideficiency Act
Grant program [ ] Yes [X] No	[ ] Other
Type of account or fund: [X] Annual	Type of budget authority: [X] Appropriation
[ ] Multiple-year ___ (expiration date)	[ ] Contract authority
[ ] No-year	[ ] Other

Justification - The Foreign Claims Settlement Commission adjudicates the claims of American citizens against foreign countries for losses resulting from the seizure of properties, including nationalizations, expropriations, war damages, etc. During fiscal year 1979, the Commission will be engaged mainly in adjudicating the claims of Americans against the German Democratic Republic pursuant to Public Law 94-542. The State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1979, (P.L. 95-431) provided for an appropriation of $1,015,000, to be derived by transfer from available balances from the Commission's "Payment of Vietnam Prisoner of War Claims" account to cover the Commission's administrative expenses.

The Commission anticipates a reduction in the workload related to the East German claims program in fiscal year 1979 resulting from the reduced number of claims received. Staff requirements have been reduced accordingly, and $75,000 have been identified as excess to program needs. Therefore, rescission of these funds is proposed.

This action is taken in accordance with the Antideficiency Act (31 U.S.C. 665).

Estimated Effects - There is no programmatic effect resulting from this rescission proposal.

Outlay Effect: (estimated in thousands of dollars)

Comparison with the President's 1979 Budget:

1. Budget outlay estimate for 1979	930
2. Outlay savings, if any, included in the budget outlay estimate	---
Current outlay estimates for 1979:	
3. Without rescission	808
4. With rescission	733
5. Current outlay savings	70
Outlay savings for 1980	5

TITLE V - RELATED AGENCIES

Foreign Claims Settlement Commission

Salaries and Expenses

(Transfer of Funds)

Of the funds appropriated under this head in the State, Justice, and Commerce, the Judiciary and Related Agencies Appropriation Act, 1979, $75,000 are rescinded.

Deferral No: D79-31

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Funds Appropriated to the President	New budget authority (P.L. 95-481): $83,375,000
Bureau: International Security Assistance	Other budgetary resources: 127,000,000 1/
Appropriation title & symbol: Military Assistance 2/ 1191080	Total budgetary resources: 210,375,000
	Amount to be deferred: Part of year $161,875,000; Entire year ___
OMB identification code: 11-1080-0-1-052	Legal authority (in addition to sec. 1013): [X] Antideficiency Act; [ ] Other ___
Grant program: [X] Yes [ ] No	
Type of account or fund: [X] Annual; [ ] Multiple-year ___ (expiration date); [ ] No-year	Type of budget authority: [X] Appropriation; [ ] Contract authority; [ ] Other ___

Justification: Pursuant to the Foreign Assistance Act of 1961, as amended, the President is authorized to furnish military assistance "...to any friendly country or international organization, the assisting of which the President finds will strengthen the security of the U.S. and promote world peace..." Funds for this purpose were appropriated in the Foreign Assistance and Related Programs Appropriation Act of 1979 and previous years.

The Administration is reviewing the proposed program within the new constraints imposed by the Foreign Assistance and Related Programs Appropriations Act of 1979 to determine what adjustments in allocation of funds to recipient countries are necessary and will report these to Congress in accordance with Section 653 of the Foreign Assistance Act of 1961, as amended. Pending this determination and the required congressional notification, $161,875,000 of military assistance funds are deferred. This temporary deferral action is taken in accordance with the Antideficiency Act (31 U.S.C. 665) to achieve the most economical use of the appropriations.

Estimated Effect: There are no programmatic or budgetary effects resulting from this deferral.

Outlay Effect: This temporary deferral has no effect on outlays.

1/ The availability of these funds was extended until September 30, 1979, by P.L. 95-481.
2/ This account was the subject of a deferral in FY 1978.

Deferral No: D79-32

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. ___): $___
Bureau: United States Fire Administration	Other budgetary resources: 6,150,000
Appropriation title & symbol: Facilities 138/00801	Total budgetary resources: 6,150,000
	Amount to be deferred: Part of year $6,150,000; Entire year ___
OMB identification code: 13-0801-0-1-451	Legal authority (in addition to sec. 1013): [X] Antideficiency Act; [ ] Other ___
Grant program: [ ] Yes [X] No	
Type of account or fund: [ ] Annual; [X] Multiple-year September 30, 1980 (expiration date); [ ] No-year	Type of budget authority: [X] Appropriation; [ ] Contract authority; [ ] Other ___

Justification:

The Second Supplemental Appropriations Act, 1978, provided $6,150,000 for the renovation of the National Fire Academy site located at the former Marjorie Webster Junior College in Washington, D.C. However, concern about the cost of renovating the college, and possible future limitations on expansion due to local zoning laws prompted Congress to direct the United States Fire Administration to sell the present site and acquire another site for construction of a new academy.

Alternate sites for a new fire academy are now being considered. These funds are deferred pending the selection of a new site.

Estimated Effects:

This deferral has no effect on the program as currently planned for FY 1979.

Outlay Effect:

There will be no outlay effect since the funds would not be used if made available.

Deferral No: D79-33

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. 95-431) $ 157,000,000
Bureau: Maritime Administration	Other budgetary resources 308,933,780
Appropriation title & symbol: Ship Construction 1/ 13X1708	Total budgetary resources 465,933,780
	Amount to be deferred: Part of year $ ____ Entire year 157,000,000
OMB identification code: 13-1708-0-1-403	Legal authority (in addition to sec. 1013): [X] Antideficiency Act [ ] Other ____
Grant program: [X] Yes [ ] No	
Type of account or fund: [ ] Annual [ ] Multiple-year ____ (expiration date) [X] No-year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other ____

Justification:

This appropriation, available until expended, provides subsidies to U.S. shipyards for the construction and reconstruction of ships to be operated in the U.S.-foreign trade.

The deferral, totalling $157,000,000, is based on the current projections of reliable demand for U.S. shipbuilding. Anticipated new shipbuilding contracts during FY 1979 can be funded with the $308,933,780 apportioned for this period. The amount deferred will be used in succeeding years.

This deferral action is taken in accordance with the Antideficiency Act (31 U.S.C. 665) which provides that funds not limited to a definite period of time shall be apportioned so as to achieve their most effective and economical use.

Estimated Effects:

The deferral will not delay any planned construction or reconstruction of subsidized ships and will not affect the international competitive position of U.S. shipyards.

Outlay Effect:

There is no outlay effect of this deferral.

1/ This account was the subject of a similar deferral in FY 1978.

Deferral No: D79-34

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Defense - Military	New budget authority (P.L. 95-457) $ 3,759,600,000
Bureau	Other budgetary resources 5,000,000
Appropriation title & symbol: Shipbuilding and Conversion Navy 1/ 179/31611	Total budgetary resources 3,764,600,000
	Amount to be deferred: Part of year $ ____ Entire year 563,940,000
OMB identification code: 17-1611-0-1-051	Legal authority (in addition to sec. 1013): [X] Antideficiency Act [ ] Other ____
Grant program: [ ] Yes [X] No	
Type of account or fund: [ ] Annual [X] Multiple-year September 30, 1983 (expiration date) [ ] No-year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other ____

Justification:
These funds are proposed for deferral through September 30, 1979. Due to the long period of time required to build ships, the Congress makes appropriations available for five-year periods.

Since these funds are, by law, made available beyond the current year, they are not fully apportioned in the current year. The unapportioned amount is withheld and released as the program develops and additional funds are required. The amounts deferred are to be released contingent upon the development of program needs that arise in current and future years.

Prudent financial management requires the deferral of those funds that could not be used effectively during the current year even if made available for obligation.

The above multiple-year appropriation is currently being deferred under the provisions of the Antideficiency Act (31 U.S.C. 665), which authorizes the establishment of reserves for contingencies.

Estimated Effects:
Deferral of $563,940,000 will have no programmatic or budgetary effect since the funds could not be obligated at this time, even if made available.

Outlay Effects:
There is no outlay effect resulting from this deferral since the funds could not be used if made available.

1/ This account was the subject of a similar deferral in FY 1978.

D79-17A

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of Public Law 93-344.

This report revises Deferral No. D79-17 transmitted to the Congress on October 2, 1979, and printed as House Document No. 95-392.

The amount deferred for the Federal Prison System's Buildings and facilities account is $37,165,000, an increase of $11,865,000 over the amount previously deferred. This change results from an increase in budgetary resources made available by the State, Justice, and Commerce, the Judiciary and Related Agencies Appropriation Act of 1979.

Deferral No: D79-17 A

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Justice	New budget authority (P.L. ____) $ 35,280,000*
Bureau: Federal Prison System	Other budgetary resources 51,908,354
Appropriation title & symbol: Buildings and Facilities 1/ 15X1003	Total budgetary resources 87,188,354*
	Amount to be deferred: Part of year $ ____ Entire year 37,165,000*
OMB identification code: 15-1003-0-1-753	Legal authority (in addition to sec. 1013): [X] Antideficiency Act [ ] Other ____
Grant program: [ ] Yes [X] No	
Type of account or fund: [ ] Annual [ ] Multiple-year ____ (expiration date) [X] No-year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other ____

Justification: This appropriation finances planning, acquisition of sites, and construction of new penal and correctional facilities as well as construction, remodeling, and equipping of necessary buildings and facilities at existing penal and correctional institutions. Projects are undertaken to reduce overcrowding, close old and antiquated penitentiaries, and provide a safe and humane environment for staff and inmates. These funds were appropriated in the Departments of State, Justice, and Commerce, the Judiciary and Related Agencies Appropriation Act of 1979 and previous years. Due to the time required for planning, site acquisition, design efforts, and selection of contractors, it is not possible to complete the construction, renovation, and rehabilitation associated with these projects during FY 1979. This deferral is consistent with the congressional intent to provide no-year funding for the total cost of these projects and is taken under provisions of the Antideficiency Act (31 U.S.C. 665).

Estimated Effect: The amount deferred could not be economically used, if made available, in fiscal year 1979, because of the planned and phased procurement, construction and installation cycle.

Outlay Effect: In FY 1979 there is no outlay effect of this deferral.

1/ This account was the subject of a deferral during FY 1978.

* Revised from previous report.

D79-18A

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of Public Law 93-344

This report revises Deferral No. D79-18 transmitted to the Congress on October 2, 1978 and printed as House Document No. 95-392.

The amount deferred for the United States Emergency Refugee and Migration Assistance Fund is $12,250,000, an increase of $9,500,000 over the amount previously deferred. This change results from an increase in budgetary resources made available by the Foreign Assistance and Related Programs Appropriation Act, 1979.

Deferral No: D79-18A

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of State Bureau:	New budget authority (P.L.) $ 9,500,000* Other budgetary resources 2,750,000 Total budgetary resources 12,250,000*
Appropriation title & symbol: United States Emergency Refugee and Migration Assistance Fund, Executive 1/ 11X0040	Amount to be deferred: Part of year $ 12,250,000* Entire year
OMB identification code: 11-0040-0-1-151	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification: Section 501(a) of the Foreign Relations Authorization Act, Fiscal Year 1976, Public Law 94-141, approved November 29, 1975, amended section 2(c) of the Refugee and Migration Assistance Act of 1962 (22 U.S.C. 2601) by authorizing a fund not to exceed $25 million to enable the President to provide emergency assistance for unexpected urgent refugee and migration needs.

By Executive Order No. 11922 of June 16, 1976, the President allocated all funds appropriated to him for the Emergency Fund to the Secretary of State but reserved to himself the determination of assistance to be furnished and the designation of refugees to be assisted by the Fund.

In addition to $2,750,000 in unobligated balances previously deferred, the Foreign Assistance and Related Programs Appropriation Act, 1979 (P.L. 95-481) provided $9,500,000 in new budget authority for the Fund. Consonant with the President's authority set out in Executive Order No. 11922 and to achieve the most economical use of appropriations (31 U.S.C. 665(c)(1), $12,250,000 of the Fund is now deferred. It is anticipated that reapportionments may be made case-by-case as the President determines assistance to be furnished and designates refugees to be assisted by the Fund.

Estimated Effect: There are no programmatic or budgetary effects resulting from this deferral.

Outlay Effect: No effect on outlays results from this deferral action.

1/ This account was the subject of a similar deferral during FY 1978.
* Revised from previous report.

DISCLOSURE OF FOREIGN INVESTMENT IN AGRICULTURAL LAND

Proposed Rule; Hearing

mined that it is not possible to comply

V 4 3 / 2 3 5 DEC 6 78 UMI

[3410-05-M]

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[7 CFR Part 781]

DISCLOSURE OF FOREIGN INVESTMENT IN AGRICULTURAL LAND

Proposed Rulemaking and Public Hearing

AGENCY: Agricultural Stabilization and Conservation Service.

ACTION: Notice of Proposed Rulemaking and Public Hearing.

SUMMARY: Section 8 of the Agricultural Foreign Investment Disclosure Act of 1978 (effective October 14, 1978) prescribes that the Secretary of Agricultural shall promulgate regulations implementing the provisions of the Act within 90 days after its effective date. This Act requires foreign persons who acquire, transfer, or hold any interest, in agricultural land located in the United States to report within specified time periods such transactions or holdings to the Secretary of Agriculture.

In order to facilitate the development of such regulations, the Secretary desires to obtain the views of interested persons. Such views may be submitted in writing or presented orally at a scheduled public hearing.

DATES: Written comments must be received on or before January 5, 1979. Hearing on December 14, 1978; 9 a.m. to 4 p.m.

ADDRESSES: Mail comments and requests to speak at the hearing to DASCO Staff, USDA, Room 3757, South Building, Washington, D.C. 20250, where written comments wil be available for inspection during business hours 8:15 a.m. to 4:45 p.m.

Hearing will be held in the Jefferson Auditorium, South Building, USDA, 14th and Independence, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Paul H. Sindt, DASCO Staff, USDA, Room 3757 South Building, Wahington, D.C. 20250. Telephone number 202-447-4351.

SUPPLEMENTAL INFORMATION:

Background

After obtaining the reports required to be submitted pursuant to the Agricultural Foreign Investment Disclosure Act, the Secretary must, within specified time periods, (1) detemine the effect of such acquisitions, transfers, and holdings, particularly the effect on family farms and rural communities, and transmit a report of his findings and conclusions to the President and each House of the Congress, and (2) transmit to each State Department of Agriculture a copy of each report received from the reporting entities. If the Secretary determines that any foreign person required to submit a report has failed to do so or has knowingly submitted an incomplete, false, or misleading report, the Secretary shall impose a civil penalty on such person not to exceed 25 percent of the fair market value, on the date of the assessment of such penalty, of the interest held in such land by the foreign person.

Major Issues

The views of interested persons are sought in particular on the following issues:

1. *Nature of the interest in United States agricultural land which a foreign entity holds, acquires or transfers.* Section 2 of the Act requires all foreign entities holding, acquiring or transferring "any interest, other than a security interst", in the United States agricultural land to report such to the Secretary of Agricultural within various specified time periods. Should the words "any interest" be taken to include such things as future interests not yet realized or usufructory interests such as easements across agricultural land? How should "any interest" in agricultural land be defined?

2. *Nature of a security interest.* Pursuant to section 2 of the Act, the holding, acquisition, or transfer of any interest other than a "security interest", in agricultural land must be reported to the Secretary. Since holdings or transactions involving "security interests" need not be reported, how should a "secretary interest" be defined? Should it be defined to include only mortgages and other debt securing devices? What peculiarities might permit the use of a "securitiy interest" as a subterfuge? How may the use of a "security interest" as a subterfuge be mitigated or eliminated?

3. *Tracing of actual ownership.* Section 2(e) provides that whenever the initial reporting foreign entity is neither an individual nor a foreign government, the Secretary "may" require the reporting entity to submit a report containing, among other things, the legal name and address of each person who holds any interest in the foreign entity. Section 2(f) then provides that on the basis of the information received pursuant to 2(e), the Secretary "may" require those named foreign persons to submit to him a report containing, among other things, the legal name and address of any person who holds any interest in the person submitting the report under 2(f).

Since the Secretary's authority is discretionary, should he refrain from the acually exercising such authority beyond either the first, or second, or third level of ownership?

Moreover, in view of the fact that both section 2(e) and 2(f) permit the Secretary to request reports concerning each person holding "any interest" in the previous reporting entity, if the Secretary decides to exercise such statutory discretion, how should "any interest" be defined both quantitatively and qualitatively? For example, should "any interest" mean 5 percent, 10 percent, 25 percent, or 50 percent interst? Should the nature of the interest include leaseholds, security interests, easements, or any other such interest?

4. *The nature of Agricultural land.* Section 9(1) defines agricultural land to mean land used for "agricultural, forestry, or timber production purposes." In light of the fact that foreign entities need only file reports concerning such land, how should these terms be defined? For instance, should a residental lot owned by a foreign person be considered agricultural land simply because it may be utilized for personal horticulture? Similarly, should land held by a foreign person and used for growing seasonal or decorative trees be considered to be land use for forestry production purposes?

5. *The size of the agricultural land.* In addition to the foregoing, section 9(1) proposed to define agricultural land as "any land" used for agricultural, forestry, or timber production purposes as determined by the Secretary uder the regulations to be prescribed. Apparently, the language is inclusive enough to allow the Secretary to issue rules requiring that reports be filed by relevant entities holding small tracts of agricultural land. Would it be preferable for the Secretary to promulgate a minimum acreage regulation providing that foreign entities holding less than a specific figure need not file the reguired reports? If so, what should be the minimum acreage figure?

6. *Significant or substantial control.* Section 9(3) defines the term "foreign person". Pursuant to subsection (3)(c)(ii), foreign person includes any entity created or organized under the laws of any State, in which a "significant interest of substanital control" is directly or indirectly held by any other foreign entity or foreign person. What should be the extend of ownership constituting significant interest or substantial control? Can any foreign entity holding 10 percent or less of a domestically incorporated corporation be considered to have substantial control of such a corporation?

Since section 8 of the Agricultural Foreign Investment Disclosure Act of 1978 requires that the Secretary of Agriculture issue regulations implementing the provisions contained therein by January 12, 1979, I have determined that it is not possible to comply with the requirement for 60-day comment period as provided for by Executive Order 12044 of March 23, 1978 (43 FR 12661). Accordingly, a 30-day comment period is provided.

In accordance with Exective Order 12044 a regulatory impact analysis has been prepared. Descriptions of alternatives and their impact are included in the analysis. Copies of the regulatory impact analysis are available by contacting the Office of the Director of Economics, Policy Analysis and Budget, Room 102, Administration Building, USDA, Washington, D.C. 20250.

Signed at Washington, D.C. on December 4, 1978,

BOB BERGLAND,
Secretary of Agriculture.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	CSC		CSA	CSC
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[3410-02-M]

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Navel Orange Reg. 443]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final Rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period December 8-14, 1978. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: December 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under this marketing order, and upon other information, it is found that the limitation of handling of navel oranges, as hereafter provided, will tend to effectuate the declared policy of the act.

The committee met on December 5, 1978, to consider supply and market conditions and other factors affecting the need for regulation and recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The committee reports that prices for navel oranges are declining, and that demand is expected to increase as the Christmas holiday approaches.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 907.743 Navel Orange Regulation 443.

Order. (a) The quantities of navel oranges grown in Arizona and California which may be handled during the period December 8, 1978, through December 14, 1978, are established as follows:

(1) District 1: 1,250,000 cartons;

(2) District 2: Unlimited movement;

(3) District 3: Unlimited movement.

(b) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" mean the same as defined in the marketing order.

* * * * *

(Secs. 1-19, 48 Stat. 31, as amended; (7 U.S.C. 601-674))

Dated: December 6, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Amdt. 4]

PART 967—CELERY GROWN IN FLORIDA

Subpart—Rules and Regulations

REVISION OF BASE QUANTITY FORMULA

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: A recent amendment of the Florida Celery Marketing Order provides for periodic review of Base Quantities and authorizes the Secretary of Agriculture to update Base Quantities by revising the formula used to determine them to reflect a more representative period of historical marketings. This rule specifies this revised formula.

EFFECTIVE DATE: January 4, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Phone: 202-447-6393.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 149 and Order 967, both as amended, regulate the handling of celery grown in Florida. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The amended order (42 FR 32762) provides that the Secretary will issue rules or regulations which set forth the procedures to be followed in implementing the amended provisions.

Notice of rulemaking was published in the October 10, 1978, FEDERAL REGISTER (43 FR 46549) inviting comments by November 9, 1978. None was received.

The purpose of the rule is to have Base Quantities effective for the 1979-80 season that are in accord with the current status of the industry. Active producers will be issued revised Base Quantities reflecting their recent history of celery sales. Paragraph (a) will recognize permanent transfers of Base Quantities which have occurred since December 15, 1976. It also will implement a provision of the order which specifies that a condition for the con-

tinuing validity of a Base Quantity is

specified period of time prior to the

Inshell supply:	Tons
(5) Supply subject to regulation (Item	

[4910-13-M]

are impractical and good cause exist

[4910-13-M]

V 4 3 / 2 3 6

tinuing validity of a Base Quantity is production of celery thereunder. Any Base Quantities not used during both the 1977-78 and 1978-79 seasons, or any subsequent two consecutive seasons, will be declared invalid and canceled at the end of the second consecutive season of nonproduction.

Paragraph (b) of the rule will result in current producers receiving revised Base Quantities which recognize any recent fresh market sales larger than the producers' Base Quantities in effect for 1978-79. It also assures that producers who marketed celery under a Base Quantity temporarily transferred to them prior to the 1974-75 season will be credited with their celery marketing history when revised Base Quantities are issued.

Paragraph (c) provides that a producer who temporarily transferred a Base Quantity prior to the 1974-75 season will have that Base Quantity reissued to him. This recognizes that the initial transfer was in accord with rules then in effect.

Findings: After consideration of all relevant matters, including the proposal set forth in the notice, it is hereby found and determined that the rules should be amended as follows:

Amend Subpart—Rules and Regulations (7 CFR 967.100-967.166) by adding a new § 967.155 to read as follows:

§ 967.155 Revised Base Quantity Formula.

As soon as practicable following the May 1, 1979, registration deadline, Base Quantities for all producers of record with the Florida Celery Committee as of December 15, 1976, shall be revised to be effective for the 1979-80 season as follows and in the order enumerated:

(a) Application of the provisions of §§ 967.37(e) and 967.39 as it pertains to permanent transfers.

(b) Selection of the highest number of crates of celery produced and shipped by or for each producer during any one of the five seasons, 1974-75 through 1978-79, or his Base Quantity for the 1978-79 season, whichever is greater: *Provided however*, No producer who produced and shipped celery during each of the five seasons, 1974-75 through 1978-79 shall lose all or any portion of his Base Quantity by the application of § 967.39 pertaining to specified period of time transfers, which were approved by the committee prior to the commencement of the 1974-75 season: *And provided further*, any new producer who is issued a Base Quantity by the committee under § 967.37(d) or by transfer after December 15, 1976, shall retain his present Base Quantity.

(c) Any producer who transferred, with approval of the committee, all or a portion of his Base Quantity for a specified period of time prior to the commencement of the 1974-75 season shall have the transferred Base Quantity reissued to him upon the expiration date of such transfer.

(Secs. 1-19, 48 Stat. 31, as amended: (7 U.S.C. 601-674).)

Dated December 4, 1978 to become effective January 4, 1979.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[3410-02-M]

PART 982—HANDLING OF FILBERTS GROWN IN OREGON AND WASHINGTON

Free and Restricted Percentages for the 1978-79 Marketing Policy Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule establishes marketing percentages for inshell filberts for the marketing policy year beginning August 1, 1978. The action is taken under the marketing order for filberts grown in Oregon and Washington to promote orderly marketing conditions.

EFFECTIVE DATES: August 1, 1978, through July 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: On October 20, 1978, notice was published in the FEDERAL REGISTER (43 FR 49011) on the proposed establishment of free and restricted percentages of 50 percent and 50 percent, respectively. No comments were received. The percentages were recommended by the Filbert Control Board, which is established under the marketing agreement, and Order No. 982, both as amended (7 CFR Part 982), regulating the handling of filberts grown in Oregon and Washington. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The percentages are based upon the following estimates by the Filbert Control Board for the 1978-79 marketing policy year:

Inshell supply:	Tons
(1) Total production	12,925
(2) Less substandard, etc	1,681
(3) Merchantable production	11,244
(4) Carryover Aug. 1, 1978 of merchantable filberts	58
Inshell supply:	
(5) Supply subject to regulation (Item 3 plus Item 4)	11,302
Inshell requirements:	
(6) Trade demand	5,800
(7) Carryover July 31, 1979	950
(8) Total	6,750
(9) Less carryover Aug. 1, 1978 not subject to 1978-79 regulation	1,055
(10) Inshell requirements	5,695
Percentages:	
(11) Free percentage (item 10 divided by item 5)	50
(12) Restricted percentage (100 pct minus 50 pct)	50

The free percentage prescribes that portion of the total merchantable supply subject to regulation which may be handled as inshell filberts. The restricted percentage prescribes that portion which must be withheld from such handling. Restricted filberts may be shelled (for domestic or foreign consumption), exported, or disposed of in outlets determined by the Filbert Control Board to be noncompetitive with normal market outlets for inshell filberts.

FINDINGS: After consideration of all relevant matter presented, including that in the notice, the information and recommendation submitted by the Filbert Control Board, and other available information, it is found that to establish this rule will tend to effectuate the declared policy of the act.

It is further found that good cause exists for not postponing the effective time of this rule until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553). The order requires that free and restricted percentages for a particular marketing policy year shall apply to all inshell filberts handled during that year, and this rule automatically applies to all such filberts beginning August 1, 1978.

The free and restricted percentages follow.

§ 989.228 Free and restricted percentages for merchantable filberts during the 1978-79 marketing policy year.

The free and restricted percentages for the marketing policy year beginning August 1, 1978, shall be 50 percent and 50 percent, respectively.

(Secs. 1-19, 48 Stat. 31 as amended (7 U.S.C. 601-674).)

Dated: December 4, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

D E 7 7 8 UMI

[4910-13-M]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-EA-98; Amdt. 39-3360]

PART 39—AIRWORTHINESS DIRECTIVES

AVCO Lycoming

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to AVCO Lycoming 0-235-L2C type aircraft engines equipped with 4050, 4051, 4052 and 4081 Model Slick magnetos, installed on PA-38-112 airplanes. The purpose of the replacement is to prevent engine stoppage resulting from a dual failure of the magnetos, which failures have been reported.

DATE: Effective December 8, 1978. Compliance is required as set forth in the AD.

ADDRESSES: AVCO Lycoming Service Bulletins may be acquired from the manufacturer at AVCO Lycoming Division, Williamsport, Pa. 17701.

FOR FURTHER INFORMATION CONTACT:

E. Manzi, Propulsion Section, AEA-214, Engineering and Manufacturing Branch, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430; telephone 212-995-2894.

SUPPLEMENTARY INFORMATION: There had been reports of dual failures of Slick magnetos, Models 4050, 4051, 4052, and 4081 as incorporated in AVCO Lycoming engines installed in Piper PA-38-112 type airplanes. Due to the urgency of the matter, and the information available at the time, an Emergency Order of Suspension dated September 22, 1978, was issued which suspended the airworthiness certificates of all PA-38-112 airplanes. This Order was amended on October 5, 1978, to apply to only airplanes equipped with the same model magnetos with under 75 hours of operation and with serial number under 8100001. A re-evaluation of the information indicates that with higher than normal single magneto failures and their occurring after 75 hours of operation, a requirement exists to replace all such model magnetos regardless of the hours of operation, but still with a serial number under 8100001. Since this deficiency affects air safety, notice and public procedure hereon are impractical and good cause exist for making the rule effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by issuing a new airworthiness directive, as follows:

AVCO LYCOMING: Applies to all AVCO Lycoming Model 0-235-L2C engines installed in Piper Model PA-38-112 aircraft.

Compliance required as indicated, unless already accomplished.

To prevent engine stoppage caused by failure of condensers installed in the Slick 40xx series magnetos, comply with the following:

a. Prior to further flight, engines whose Slick 40xx series magnetos have not accumulated 75 hours of operation in a Piper Model PA-38-112 aircraft must have their Slick Models 4050, 4051, 4052, or 4081 magnetos replaced with Slick Models 4150, 4151, 4152, or 4181 magnetos respectively having serial numbers 8100001 and up, or an approved equivalent part.

b. Engines whose Slick 40xx series magnetos have accumulated 75 hours or more of operation in a Piper Model PA-38-112 aircraft must have their Slick Models 4050, 4051, 4052, or 4081 magnetos replaced with Slick Models 4150, 4151, 4152, or 4181 magnetos respectively having serial numbers 8100001 and up or an approved equivalent part within 50 hours in service after the effective date of this AD.

c. Equivalent methods of compliance may be approved by the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

d. Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA, Eastern Region, may adjust the compliance time specified in paragraph (b) in this AD.

AVCO Lycoming Service Bulletin No. 432 is the subject of the AD.

Effective Date: This amendment is effective December 8, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c); and 14 CFR 11.89.)

Issued in Jamaica, N.Y., on November 24, 1978.

WILLIAM E. MORGAN,
Director, Eastern Region.

[FR Doc. 78-33956 Filed 12-6-78; 8:45 am]

[4910-13-M]

[Docket No. 78-ASW-37; Amdt. 39-3359]

PART 39—AIRWORTHINESS DIRECTIVES

Bell Helicopter Textron Model 212 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) No. 78-17-03, Amendment No. 39-3282, (Docket No. 78-ASW-37) applicable to Bell Helicopter Textron (BHT) Model 212 helicopters to exempt helicopters incorporating the improved main transmission bevel gear, P/N 204-040-701-101, from repetitive inspections and modifications specified in the AD. This exemption does not apply to helicopters incorporating main transmission bevel gear P/N 204-040-701-3. This amendment is needed because the FAA has determined that installation of the improved bevel gear, P/N 204-040-701-101, provides sufficient strength to assure airworthiness without the inspections and restrictions prescribed by this AD.

DATES: Effective November 22, 1978. Compliance schedule—as prescribed in body of AD.

ADDRESSES: The applicable service bulletin may be obtained upon request to the Service Manager, Bell Helicopter Textron, Post Office Box 482, Fort Worth, Tex. 76101. A copy of the service bulletin is contained in the Rules Docket (Room 916, 800 Independence Avenue SW., Washington, D.C. 20591), or at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Tex. 76101.

FOR FURTHER INFORMATION CONTACT:

Wilbur F. Wells, Propulsion Section (ASW-214), Engineering and Manufacturing Branch, Federal Aviation Administration, Post Office Box 1689, Fort Worth, Tex. 76101, telephone 817-624-4911, extension 524.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment No. 39-3282 (43 FR 37680), AD 78-17-03 (Docket No. 78-SW-37) applicable to the BHT Model 212 helicopter, which currently requires removal of the rotor brake, if installed, and a 25-hour repetitive inspection of the main transmission bevel gear, P/N 204-040-701-3 or P/N 204-040-701-101. After issuing Amendment No. 39-3282, the FAA has determined that the P/N 204-040-701-101 bevel gear used in transmissions in some of these helicop-

Traffic Service, Federal Aviation Ad-

NOTE.—The FAA has determined that this

V 4 3 / 2 3 6

D E 7

7 8

UMI

ters is of sufficient strength that the 25-hour repetitive inspection and the requirement for removal of the rotor brake are no longer necessary. Therefore, the FAA is amending AD 78-17-03, Amendment No. 39-3282, to delete any reference to the bevel gear, P/N 204-040-701-101.

Since this amendment relieves a restriction and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and good cause exists for making the amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Amendment No. 39-3282 (43 FR 37680), AD 78-17-03, as follows:

Revise the applicability paragraph to read:

78-17-03 *Bell Helicopter Textron (BHT)*: Amendment 39-3282 (Airworthiness Docket No. 78-ASW-37). Applies to Model 212 helicopters certificated in all categories equipped with main transmission spiral bevel gear, P/N 204-040-701-3.

Revise the compliance paragraph as follows:

To minimize the possibility of failure of the input spiral bevel gear, P/N 204-040-701-3, used in the main transmission of Bell Helicopter Textron (BHT) Model 212 helicopters, accomplish the following:

Revise paragraph a.3 to read as follows:

Utilizing the opening provided by step 1 or step 2, above, inspect all 62 teeth of the main spiral bevel gear, P/N 204-040-701-3, as prescribed by paragraph 2 of Part I of BHT Service Bulletin No. 212-78-8, dated July 28, 1978, or later FAA approved revision.

Revise the service bulletin reference paragraph (following paragraph b) as follows:

BHT Service Bulletin No. 212-78-8 pertains to and provides for accomplishing the intent of this AD except that in addition, paragraph a, step 6, of this AD must also be accomplished. BHT Service Bulletin No. 212-78-12 also provides instructions and details pertinent to this AD.

This amendment becomes effective November 22, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Fort Worth, Tex., on November 22, 1978.

HENRY L. NEWMAN,
Director,
Southwest Region.

The incorporation by reference provisions in this document was approved by the Director of the Federal Register on June 19, 1967.

[FR Doc. 78-33959 Filed 12-6-78; 8:45 am]

[4910-13-M]

[Docket No. 78-SO-71; Amdt. No. 39-3361]

PART 39—AIRWORTHINESS DIRECTIVES

Lockheed Model 382 Series

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Final Rule.

SUMMARY: This amendment amends an existing Airworthiness Directive (AD) applicable to Lockheed Model 382 series airplanes by expanding the areas to be inspected and revising the inspection procedures. The amendment is needed because the FAA has determined that cracks may occur outside the existing areas to be inspected and that the surface finish must be mechanically removed prior to fluorescent penetrant inspection.

DATE: Effective December 8, 1978. Compliance within the next 50 hours after the effective date of this amendment unless already accomplished.

ADDRESSES: The applicable Lockheed Model 382 Service Bulletins and Lockheed Hercules Airfreighter Inspection Procedures may be obtained from the Lockheed-Georgia Company, Marietta, Georgia 30063. A copy of the inspection procedure is contained in Room 275, Federal Aviation Administration, Southern Region, 3400 Whipple Street, East Point, Georgia.

FOR FURTHER INFORMATION CONTACT:

Jack Bentley, Aerospace Engineer, Engineering and Manufacturing Branch, P.O. Box 20636, Atlanta, Georgia 30320, telephone 404-763-7407.

SUPPLEMENTARY INFORMATION: This amendment further amends Amendment 39-1867, AD 74-12-06, as amended by Amendment 39-2512, which currently requires inspection of the wing at outer wing stations 153 to 162 and 198 to 207 on Lockheed Model 382 series airplanes serial numbers 3946 and 4101 through 4541. After issuing Amendment 39-2512, the FAA has determined that cracks may occur outside the existing areas to be inspected and that the surface finish must be mechanically removed prior to fluorescent penetrant inspection. Therefore, the FAA is further amending Amendment 39-1867 by requiring inspection of the wing beam on Lockheed Model 382 series airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by further amending Amendment 39-1867, AD 74-12-06, as amended by Amendment 39-2512 as follows:

Revise paragraph (c) to read:

(c) Inspect outer wing lower forward beam cap, web, and skin for cracks in the area extending from outer wing stations 144 to 165 and 195 to 214, both left and right in accordance with Lockheed Hercules Airfreighter Inspection Procedures, SMP 515-A, Card SP-75, revised October 15, 1978, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region.

Revise paragraph (d) to read:

(d) Repair of the beam cap shall be in accordance with Lockheed Service Bulletin A382-169, Revision 7, and repair of the beam web in accordance with SMP 583, Lockheed Hercules Structural Repair Manual, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region.

Revise paragraph (e) to read:

(e) Before the accumulation of 30,000 flight hours, preventive modification shall be installed in accordance with Lockheed Service Bulletin 382-152, Revision 2, and Alert Service Bulletin A382-169, Revision 7, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region.

Revise paragraph (f) to read:

(f) Recurring inspections shall be performed in accordance with the following:

(1) Recurring inspections for unmodified airplanes will be in accordance with paragraphs (a), (b) and (c) of this amendment.

(2) Recurring inspections for airplanes with preventive modifications shall be in accordance with Lockheed Airfreighter Inspection Procedures, SMP 515-A, Card SP-75, revised October 15, 1978, or in an equivalent manner approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region, and a detailed visual inspection of the front beam lower cap and adjacent structure including modifications across the entire length of the outer wing dry bays from outer wing stations 144 to 214 at each "C" check.

(3) In addition to the recurring inspections of paragraphs (f)(1) and (f)(2), recurring inspections for airplanes with repairs shall be a detailed visual inspection of the front beam lower cap and adjacent structure, including repairs, across the entire length of the outer wing dry bays from outer wing stations 144 to 214 at each "C" check.

Revise paragraph (g) to read:

(g) Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Chief, Engineering and Manufacturing Branch, FAA, Southern Region, may adjust the repetitive inspection intervals specified in this amendment to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for such operator.

Add paragraph (h) to read:

(h) Airplanes may be flown to a base for performance of the inspections required by this amendment in accordance with Federal Aviation Regulations 21.197 and 21.199.

Add paragraph (i) to read:

(i) Report inspection findings to Chief, Engineering and Manufacturing Branch, FAA, Southern Region, P.O. Box 20636, Atlanta, Georgia 30320.

Delete last paragraph.

This amendment becomes effective December 8, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

Issued in East Point, Ga., on November 28, 1978.

GEORGE R. LA CAILLE,
Acting Director,
Southern Region.

[4910-13-M]

[Airspace Docket No. 78-NW-7]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment enlarges the Omak, Wash., control area, and will aid air traffic control by improving the flow control procedures associated with aircraft arriving/departing the Seattle and spokane, Wash., areas.

EFFECTIVE DATE: February, 22, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone 202-426-8525.

SUPPLEMENTARY INFORMATION:

HISTORY

On October 23, 1978, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to enlarge the southern portion of the Omak, Wash., Control Area with a base altitude of 4,500 feet MSL (43 FR 49312). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. Two comments were received but neither stated an objection to the proposal. This amendment is the same as that proposed in the notice. Section 71.163 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 348).

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations enlarges the southern portion of the Omak, Wash., control area and establishes a base altitude at 4,500 feet MSL. Also, the present 5,500 feet MSL base altitude of the northern portion of this control area is reduced to 4,500 MSL. This additional control area will permit more expeditious flow of traffic and allow additional flexibility in the application of minimum vectoring altitudes in the Spokane, Wash., and Seattle, Wash., terminal areas. The existing portion of the Omak control area that extends to the United States/Canadian border has a base of 8,500 feet MSL and is not changed in this amendment.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart E of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 348) is amended, effective 0901 G.m.t., February 22, 1979, as follows:

In § 71.163, Omak, Wash.

"That airspace extending upward from 5,500 feet MSL within 5 miles each side of a line extending from Omak RBN to the Ephrata VOR;" is deleted and "That airspace extending upward from 4,500 feet MSL beginning at Lat. 48°00'N., Long. 118°36'W., to Lat. 47°45'N., Long. 118°36'W., to Lat. 47°45'N., Long. 120°00'W., to Lat. 48°00'N., Long. 120°00'W., to Lat. 48°00'N., Long. 119°35'W., to Lat. 48°09'30"N., Long. 119°36'W., to Lat. 48°10'N., Long. 119°23'W., to Lat. 48°00'N., Long. 119°22'20"W., to point of beginning," is substituted therefor.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.69)

NOTE.—The FAA has determined that this document involves a regulation which is not significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Washington, D.C., on November 30, 1978.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

[Reg. ER-1084, Amdt. 12; Docket No. 33348]

PART 250—OVERSALES

Advertising Disclosure of Noncompliance With Oversale Rules; Postponement of effective date

AGENCY: Civil Aeronautics Board.

ACTION: Postponement of Effective Date.

SUMMARY: The Board has adopted a rule requiring every carrier operating in foreign air transportation that has not filed a tariff implementing the Board's denied boarding rules to state in its advertisements that it is not following U.S. Government rules for consumer protection on oversold flights. By this rule, the Board is postponing the effective date of the rule until January 18, 1979.

DATES: Effective: The new effective date for ER-1078 is January 18, 1979. Adopted: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Joseph A. Brooks, Office of the General counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W. Washington, D.C. 20428, (202) 673-5442.

SUPPLEMENTARY INFORMATION: By ER-1078 (43 FR 50164, October 27, 1978) the Board amended its regulations on overbooking to require every carrier operating in foreign air transportation that has not filed a tariff implementing these regulations to state in its advertisements that it is not following U.S. Government rules for consumer protection on oversold flights. In response to a petition for stay filed jointly by Air Canada, Canadian Pacific, Lufthansa, Swiss Air and Swiss Air Transport, the Board by Order 78-11-31 (43 FR 53028, November 15, 1978) stayed the effectiveness of ER-1078 until December 18, 1979,

stating its intention to reexamine the

DATE: Effective December 7, 1978.

warranties be "prominently displayed *on the face of the warranty*" (emphasis

glass" is lifted effective January 8, 1979.

issued an order to stay the standard, pending action on the petition, for

The basis for the proposed amendment was that only small quantities of

V 4 3 / 2 3 6

stating its intention to reexamine the rule, and to decide what action, if any, to take.

In a letter dated November 20, 1978, placed in the docket and served on all parties, the attorney for the petitioning carriers asked the Board to continue the stay *pendente lite*, as requested in their original petition. The carriers argue that ER-1078 would involve substantial burdens and competitive harm to them, and that the Court of Appeals will not have acted on their Petition for Review of the rule by expiration of the Board's current stay, expiring December 18, 1978.[1]

The Board intends to reexamine ER-1078 at its public meeting during the week of December 4, 1978. In order to provide the carriers sufficient time to comply, or take any other action, in response to the Board's decision at this meeting, the effectiveness of ER-1078 is extended an additional 30 days.

Accordingly, the effective date of ER-1078 (43 FR 50164, October 27, 1978), amending Part 250 of the Board's Economic Regulations (14 CFR Part 250), is changed to January 18, 1979.

(Sec. 204(a), Federal Aviation Act of 1958, as amended, 72 Stat. 743, (49 U.S.C. 1324(a).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[6750-01-M]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER G-RULES, REGULATIONS, STATEMENTS AND INTERPRETATIONS UNDER THE MAGNUSON-MOSS WARRANTY ACT

SERVICE CONTRACTS AND IMPLIED WARRANTIES

Section 108 of the Act; Advisory Opinion

AGENCY: Federal Trade Commission.

ACTION: Advisory opinion.

SUMMARY: The Federal Trade Commission issues an advisory opinion that relates to service contracts and implied warranties. The Commission states that Section 108 of the Magnuson-Moss Warranty Act prohibits a proposed course of action whereby automobile dealers entering into service contracts with vehicle purchasers at the time of sale seek to limit the duration of implied warranties therein.

[1] *Air Canada, et al v. C.A.B.* (CADC Case Nos. 78-2073, 78-2143).

DATE: Effective December 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Jeffrey Karp, Attorney, Division of Product Reliability, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, 202-523-1753.

SUPPLEMENTARY INFORMATION: By letter of October 4th and 18th, 1978, the firm of Rain, Harrell, Emery, Young and Doke requested on behalf of their clients, automobile dealers who enter into service contracts with vehicle purchasers at the time of sale, an opinion as to whether Section 108 of the Magnuson-Moss Warranty Act would prohibit limiting the duration of implied warranties to the duration of the service contract.

The Commission responded to the request as follows:

CATHLEEN CHANDLER STEVENSON, Esq.
Rain, Harrell, Emery, Young and Doke, Republic National Bank Tower, Dallas, Texas 75201

DEAR MRS. STEVENSON: This is in response to your letters of October 4th and 18th, 1978 requesting an advisory opinion as to whether Section 108 of the Magnuson-Moss Warranty Act, 15 U.S.C. 2308, would prohibit a proposed course of action for your clients. Your clients, automobile dealers who enter into service contracts with vehicle purchasers at the time of sale, propose to limit the duration of implied warranties to the duration of the service contract.

Section 108(a) of the Act flatly prohibits any modification of implied warranties by a supplier when a full warranty is offered or a service contract is entered into. This section states:

> No supplier may disclaim or modify (except as provided in subsection (b)) any implied warranty to a consumer with respect to such consumer product if (1) such supplier makes any written warranty to the consumer with respect to such consumer product, or (2) at the time of sale, or within 90 days thereafter, such supplier enters into a service contract with the consumer which applies to such consumer product.

Section 108(b) of the Act creates an exception to the general rule in Section 108(a) in the following manner:

> For purposes of the title (other than section 104(a)(2)), implied warranties may be limited in duration to the duration of a written warranty of reasonable duration, if such limitation is conscionable and is set forth in clear and unmistakable language and prominently displayed on the face of the warranty.

The exception in Section 108(b) does not refer, however, to service contracts or provide for the limitation of implied warranties in service contracts. In fact, the provision specifically requires that any permitted limitation of implied warranties be "prominently displayed *on the face of the warranty*" (emphasis added). Had Congress intended the exception to apply to service contracts as well, Section 108(b) would read ". . . prominently displayed on the face of the warranty or service contract." Further, there is no other section of the Act that could be interpreted to allow the course of action you have proposed.

Section 108(b) would thus not except the proposed course of action from the general prohibition against disclaimer or limitation of implied warranties in Section 108(a) of the Act.

By direction of the Commission dated November 17, 1978.

CAROL M. THOMAS,
Secretary.

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

PART 1201—SAFETY STANDARD FOR ARCHITECTURAL GLAZING MATERIALS

Amendment to Standard Exempting Certain Decorative Glazing Materials

AGENCY: Consumer Product Safety Commission.

ACTION: Final amendment to rule.

SUMMARY: In this document, the Commission amends the Safety Standard For Architectural Glazing Materials to exempt from its coverage carved glass, dalle glass, and leaded glass, if those materials are incorporated into doors or glazed panels covered by the standard for decorative or artistic purposes. The exemption is issued because these glazing materials have an aesthetic and artistic value but are unable to meet the requirements of the standard; acceptable substitute glazing is not available; and any risk of injury is mitigated by the visibility of the glass. The Commission in this document also lifts the stay of the standard it issued for faceted, patinaed, and leaded glass which has been ineffect pending action on this amendment.

DATES: The exemption for carved glass, dalle glass, and leaded glass incorporated into doors or glazed panels covered by the standard for decorative or artistic purposes is effective on December 7, 1978. The stay of the standard for faceted glass and leaded glass is lifted effective December 7, 1978. The stay of the standard for "patinaed glass" is lifted effective January 8, 1979.

FOR FURTHER INFORMATION CONTACT:

Allen Brauninger, Directorate of Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, (301) 492-6629.

SUPPLEMENTARY INFORMATION: On January 6, 1977, the Consumer Product Safety Commission issued the Safety Standard for Architectural Glazing Materials to eliminate or reduce unreasonable risks of injury associated with architectural glazing materials and products incorporating those materials (42 FR 1428 (16 CFR 1201). The standard prescribes tests to insure that glazing materials used in certain architectural products either do not break when impacted with a specified energy, or break with such characteristics that they are less likely to present an unreasonable risk of injury. The standard became effective on July 6, 1977.

Provisions of § 1201.1(c) of the standard, as issued on January 6, 1977, exempted six items of glazing materials from its requirements. The only decorative glazing materials exempted by § 1201.1(c) were:

> "Leaded glass panels where no individual piece of glass has an area greater than 30 square inches."

The term "leaded glass" is defined in the standard at § 1201.2(a)(14) to mean:

> • • • a decorative composite glazing material made of individual pieces of glass whose circumference is enclosed by lengths of durable metal such as lead or zinc and the pieces of glass are completely held together and supported by such metal."

On April 20, 1977, the Stained Glass Association of America (SGAA), petitioned the Commission under section 10 of the Consumer Product Safety Act (15 U.S.C. 2059) to amend the standard to exempt other decorative glazing materials. The petition was designated CP 77-12.

On June 21, 1977, SGAA requested the Commission to stay the standard as it applied to the products described in the petition *i.e.* patinaed, leaded and faceted glass. SGAA stated that decorative glazing materials of the types described in its petition could not be manufactured to conform to the standard, were used for decorative and artistic purposes, and were produced in extremely limited quantities. SGAA also argued that the standard effectively eliminated all of its products from use in glazed panels and decorative glass as an art form. After considering SGAA's arguments and reviewing information obtained by its staff, the Commission on June 30, 1977 issued an order to stay the standard, pending action on the petition, for "faceted glass", "patinaed glass" and "leaded glass", as those terms were defined in the order when those materials are used in doors, storm doors, and glazed panels having no individual piece of glazing material greater than nine square feet in area, provided certain specified criteria were met. Notice of the stay of the standard was published in the FEDERAL REGISTER on August 9, 1977 (42 FR 40188).

Discussion between the Commission staff and SGAA on the petition, after the Commission issued its stay of enforcement, disclosed that although the stay of enforcement did not include carved or etched glass, the same considerations which led to the stay of enforcement would support an exemption for carved or etched glass. Those discussion also indicated that "patinaed glass" was almost always used as a component of leaded glass panels, and generally did not constitute a separate category of decorative glazing material.

In the FEDERAL REGISTER of March 15, 1978, the Commission proposed an amendment to the standard. The proposal applied to "carved glass", "faceted glass" and "leaded glass"[1] that met the following criteria:

1. The coloring, texturing, or other design qualities or components of the glazing material cannot be removed without destroying the material; and
2. The primary purpose of such glazing is decorative or artistic; and
3. The glazing material is conspicuously colored or textured so as to be plainly visible and plainly identifiable as aesthetic or decorative rather than functional (other than for the purpose of admitting or controlling admission of light components or heat and cold); and
4. The glazing material, or assembly into which it is incorporated, is divided into segments by conspicuous and plainly visible lines.

After consideration of the injury information associated with these products, the aesthetic characteristics of the decorative glazing materials, and technical problems of producing decorative glazing materials which comply with the standard, the Commission proposed an exemption for carved, faceted, and leaded glass used in doors and glazed panels without regard to their size. The amendment, as proposed, would not exempt any decorative materials used in any storm door, sliding glass door (patio type), bathtub door and enclosure, or shower door and enclosure from the requirements of the standard.

[1] Because "patinaed glass" is used as a component of leaded glass panels, the March 15, 1978 proposal did not refer to "patinaed glass" as a separate category of glazing material.

The basis for the proposed amendment was that only small quantities of glazing were covered by the amendment, any risk of injury was mitigated by the visibility of decorative glass, substitute glazing that complied with the standard generally was not available, and not granting an exemption would reduce aesthetic qualities of the products with a resulting loss of consumer utility. These reasons are discussed in more detail in the proposal.

COMMENTS RECEIVED

Nine comments were received in response to the proposed amendment. All commenters expressed general approval of the proposal to remove certain decorative glazing materials from the requirements of the standard.

A comment from a manufacturer of decorative glazing materials stated that the exemption for "leaded glass" should be broadened to include copper-foil panels. This comment states that copper-foil panels have the same physical properties as panels of leaded glass. The petitioner has informed the Commission that "copper-foil panels" consist of individual pieces of glass which are edged with copper-foil and soldered together so that each piece of glass is completely surrounded and supported by metal.

The proposed amendment defined the term "leaded glass" as "a decorative composite glazing material made of individual pieces of glass • • • enclosed by lengths of durable metal such as lead or zinc • • •." Lead and zinc are only examples of durable metal that must enclose the glazing. Thus, "copper-foil" panels meet the definition of "leaded glass" contained in proposed § 1201.2(a)(14). However, to express the intent of the Commission more clearly and to respond to the comment under consideration, the definition of leaded glass in § 1201.2(a)(14) of the amendments issued below has been revised to state that "leaded glass" means a decorative material consisting of individual pieces of glass "enclosed by lengths of durable metal such as lead, zinc, copper, or solder • • •."

The same comment states that dalle glass, or dalle de verre, should be added to the types of decorative glazing materials exempted from the standard because it consists of pieces of glass approximately one-half inch thick or thicker which are embedded in epoxy cement, and are therefore unlikely to break on human impact.

The types of decorative glazing materials which were to be exempted from the requirements of the standard by the proposed amendment included "faceted glass." That material was defined by proposed § 1201.2(a)(37) to mean:

D E 7 7 8 UMI

[6740-02-M]

V 4 3 / 2 3 6

a decorative composition glazing material made of individual pieces of glass which are imbedded in a cast matrix of concrete or epoxy.

The definition of "faceted glass" set forth in the proposed amendment appears to encompass dalle glass as described by the comment under consideration. However, the petitioner has informed the Commission that "faceted glass" is a particular kind of "dalle glass" consisting of individual pieces of glass from which the edges have been chipped to create facets in the glass.

When the Commission proposed the amendment to broaden the categories of decorative glazing materials exempted from the standard, it intended to include any composite decorative glazing material described in proposed § 1201.2(a)(37). To express this intent more clearly and to respond to the comment under consideration, in the final amendment the term "dalle glass" has been substituted for the term "faceted glass" in § 1201.1(c)(4) as proposed; and § 1201.2(a)(37) of the amendment as proposed has been revised to read as follows:

(37) "Dalle glass" or dalle de verre (including faceted glass) means a decorative composite glazing material made of individual pieces of glass which are imbedded in a cast matrix of concrete or epoxy.

Two comments urge elimination of language in the proposal that requires decorative glazing material to be divided into segments by conspicuous lines in order to be exempted from the standard.

The Commission proposed the amendment to broaden the categories of decorative glazing material exempted from the requirements of the standard because of recognition that certain decorative glazing materials not falling within the definition of leaded glass are sufficiently similar to leaded glass such that the absence of an exemption for these other decorative glazing materials might be unfair. For example, certain panels of faceted glass were not exempted from the standard as issued on January 6, 1977, only because the individual pieces of glass were held together by cement or epoxy rather than by metal. Aside from this difference, faceted glass and carved glass, like leaded glass, require large amounts of highly skilled labor in their production, are produced in relatively small quantities, and are used principally for aesthetic purposes, thereby limiting consumer exposure to the glazing material and the resultant risk of injury from breakage by accidental impact.

Eliminating the requirement that the glazing material be divided into segments by conspicuous lines in order to come under the exemption, as urged by the coments under consideration, would broaden the categories of exempted materials and products to include some which do not share the characteristics described above, and would significantly increase the quantities of noncomplying materials to which consumers would be exposed. Further, it has not been shown that manufacture of this broader category of glazing material (i.e., materials not divided into segments by conspicuous lines) would be eliminated or otherwise seriously affected by a requirement to comply with the standard. Therefore, the Commission declines to expand the scope of the exemption as requested by these comments.

Two comments suggest a further expansion of the proposal to include opalescent glass, used as a separate category of glazing materials, within the category of material exempt from the requirements of the standard. The proposed amendment to the standard exempting decorative glass applied to three specified types of decorative glass. Opalescent glass used as a separate category of glazing material was not included in the proposal and therefore, interested persons were not given an opportunity to comment on the question of an exemption. Expanding the final amendment to include opalescent glass, as suggested by the comments under consideration, would significantly alter the scope of the amendment without giving interested persons an opportunity to comment, as is required by the Administrative Procedure Act. For this reason, the Commission declines to expand the scope of the exemption.

Environmental Considerations

The CPSC's interim environmental review procedures, 16 CFR 1021.5 provide that an environmental review is generally not required for amendments to an existing standard that do not alter the principal purpose or effect of the standard. The amendments below would not alter the principal purpose or effect of the standard for architectural glazing materials. Rather, they allow manufacturers to use additional types of glazing materials in specified architectural products. The Commission does not forsee any environmental effects from the issuance of the amendments which would necessitate an environmental review. Consequently, preparation of a draft environmental impact statement is unnecessary.

Effective Date

5 U.S.C. 553(d) provides that a rule which relieves a restriction or grants an exemption may take effect immediately. Because the amendments would grant an exemption, the Commission believes the amendment should take effect upon publication of a final amendment in the Federal Register.

In issuing this final amendment to the glazing standard, the Commission also is lifting the stay of the standard issued on June 30, 1977 and published in the Federal Register of August 9, 1977. The lifting of the stay will not affect leaded or faceted glass which will be exempt from the standard under the amendment. Patinaed glass, however, is exempt only to the extent that it is used in leaded glass and would not be exempt from the standard as an individual category of glass as it was under the stay order. Because of this different treatment of patinaed glass, the Commission is providing in the amendment that patinaed glass manufactured during the period of the stay may by sold without restriction; and it may be incorporated into architectural products subject to the standard and those products may be sold without restriction. It is also providing that the stay of the standard for patinaed glass is lifted January 8, 1979, in order to give manufacturers of patinaed glass notice of the Commission's action. It is the Commission's understanding that patinaed glass is used almost exclusively in leaded glass and thus it is unlikely that consumers will be exposed to a greater risk of injury from patinaed glass used as an individual piece of glazing material.

The Commission concludes that the standard should be amended as set forth below. Therefore pursuant to provisions of the Consumer Product Safety Act (sec. 9(e)), Pub. L. 92-583, 86 Stat. 1215; 15 U.S.C. 2058(e); and 5 U.S.C. 553, the Commission amends the Safety Standard for Architectural Glazing Materials by adding new §§ 1201.2(a) (36) and (37), and § 1201.7(h), and by revising § 1201.1(c)(4) and § 1201.2(a)(14), as follows:

§ 1201.1 Scope, application, and findings.

. . . . . .

(c) *Exemptions.* The following products, materials, and uses are exempt from this Part 1201:

. . . . . .

(4) Carved glass (as defined in § 1201.2(a)(36)), dalle glass (as defined in § 1201.2(a)(37)), or leaded glass (as defined in § 1201.2(a)(14)), which is used in doors and glazed panels (as defined in §§ 1201.2(a)(7) and (a)(10)) if the glazing material meets all of the following criteria:

(i) The coloring, texturing, or other design qualities or components of the glazing material cannot be removed without destroying the material; and

(ii) The primary purpose of such glazing is decorative or artistic; and

(iii) The glazing material is conspicuously colored or textured so as to be plainly visible and plainly identifiable as aesthetic or decorative rather than functional (other than for the purpose of admitting or controlling admission of light components or heat and cold); and

(iv) The glazing material, or assembly into which it is incorporated, is divided into segments by conspicuous and plainly visible lines.

. . . . . .

§ 1201.2 Definitions.

(a) As used in this Part 1201:

. . . . . .

(14) "Leaded glass" means a decorative composite glazing material made of individual pieces of glass whose perimeter is enclosed by lengths of durable metal such as lead, zinc, copper, or solder, and the pieces of glass are completely held together and supported by such metal. Such pieces of glass can be clear, colored, beveled, painted, or flashed and etched.

. . . . . .

(36) "Carved glass" means a decorative glazing material in which a permanent visible design has been produced by polishing, grinding, or otherwise removing portions of the surface.

(37) "Dalle glass" or dalle de verre (including faceted glass) means a decorative composite glazing material made of individual pieces of glass which are imbedded in a cast matrix of concrete or epoxy.

. . . . . .

§ 1201.7 Effective date.

. . . . . .

(h) Patinaed glass manufactured between July 6, 1977 and January 8, 1979, in accordance with the Commission's stay order published in the Federal Register of August 9, 1977 (42 FR 40188), may be sold without restriction. Architectural products incorporating such glazing may also be sold without restriction.

Effective date. The amendments issued herein shall become effective on December 7, 1978.

The lifting of the stay of the standard as it applies to patinaed glass shall become effective on January 8, 1979.

Dated: December 1, 1978.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL ENERGY REGULATORY COMMISSION, DEPARTMENT OF ENERGY

[Docket No. RM79-7]

PART 154—RATE SCHEDULES AND TARIFFS

Final Regulation Allowing Jurisdictional Pipelines with a PGA Clause in Effect on January 1, 1979, Which Includes a Deferred Account, to Include in Their PGA Tariffs, One Time, Certain Estimated Changes in Purchased Gas Cost Due to Implementing the Natural Gas Policy Act of 1978

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final Rule.

SUMMARY: This final rule allows jurisdictional piplelines to waive for one time that provision of the purchased gas adjustment provision (PGA clause) which limits calculation of the surcharge component of the PGA rates to amounts actually reflected in the deferred account. As a result pipelines with a PGA clause in effect on January 1, 1979 may include in their first PGA rate adjustments effective in 1979. Those costs they estimate they have incurred because of the Natural Gas Policy Act (NGPA) but which have not yet been reflected in their deferred account. The relief granted on this regulation is not available to a pipeline which has a PGA clause which does not contain a deferred account.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mary Jane Reynolds, Office of the General Counsel, Federal Energy Regulatory Commission 825 North Capitol Street, N.E., Washington, D.C. 275-4283.

Background

The Natural Gas Policy Act of 1978 ("NGPA") enacted November 9, 1978, takes effect with respect to certain first sales of natural gas delivered on or after December 1, 1978. The staff of the Federal Energy Regulatory Commission (Commission) has conducted an evaluation of the new Act and has made a preliminary estimate that potentially the first year impact of NGPA on interstate pipelines could be as much as $1.7 billion.

The impact of producer price increases resulting from Opinion No. 770-A [1] was at least equivalent to that expected from the NGPA. In Opinion No. 770-A, as well as Opinion No. 699-H [2] which provided for substantial increases in producer prices, the Commission allowed the pipelines special relief to recover the increased costs.

On November 13, 1978, the Interstate Natural Gas Association of America ("INGAA"), in conjunction with its comments on the proposed regulations implementing the NGPA, Docket No. RM79-3, proposed that the Commission permit a special one-time "tracker" to enable interstate pipelines to recover the increased costs associated with NGPA prices. On November 16, 1978, Texas Gas Transmission Corporation ("Texas Gas") [3] proposed a modification of INGAA's special one-time tracker.

The Commission has determined that some special relief is necessary to avoid an undue and adverse impact upon interstate pipelines because of the NGPA. It has considered several possibilities including the INGAA and Texas Gas proposals and the special relief allowed in Opinions 699-H and 770-A. The Commission has adopted a more limited form of relief than those proposed by INGAA and Texas Gas.

It is granting relief similar to that granted by the Federal Power Commission (FPC) in Opinion No. 770-A, with two modifications. In Opinion No. 770-A the Federal Power Commission permitted the pipeline industry a special PGA adjustment, effective December 1, 1976, that allowed the industry to reflect in their current cost of purchased gas price changes based on gas prices in effect in December 1, as well as a twelve-month surcharge to recover increased costs attributable to the opinion that had actually occurred and were estimated to occur during the period from July 27, 1976, through November 30, 1976. The first modification changes the length of the special surcharge period from twelve months to six months. The second modification changes the effective date from a single date for all companies with PGA clauses to each pipeline company's first regularly scheduled 1979 semi-annual anniversary date.

Discussion

A. The Regulation Adopted

Under existing practices, the PGA rate adjustment is composed of two

[1] Opinion No. 770-A was issued on November 5, 1976, in Docket No. RM75-14.

[2] 52 FPC 1604 (1974).

[3] Transcontinental Gas Pipe Line Corporation joined in the filing with Texas Gas.

proposal would cause multiple filings

the Natural Gas Policy Act of 1978

EFFECTIVE DATE: November 28,

V 4 3 / 2 3 6

parts: a current adjustment and a surcharge. The current adjustment reflects the prices the pipelines will pay suppliers as of the proposed effective date of the PGA rate adjustment. The surcharge reflects actual amounts included in the deferred account. By the amendment adopted in this order, each pipeline company with a PGA clause in effect on January 1, 1979, which includes a deferred account, may estimate the impact of the NGPA from December 1, 1978, up to its first regularly scheduled PGA rate adjustment date in 1979. However, for those months for which the pipeline has actual costs reflected in its deferred account, no estimate may be made because NGPA costs will be reflected in the deferred account. This amount may be added to the actual amount in the pipeline's deferred account for purposes of calculating the pipeline's first PGA surcharge rate adjustment to be effective on or after January 1, 1979.

Those companies which have PGA tariff sheets on file with an adjustment date of January 1 may at their option, include the special relief adjustment allowed for NGPA costs either (1) in the PGA rate adjustments to become effective on January 1, 1979 or (2) in their first PGA rate adjustments filed on or after January 1, 1979. Those pipelines which choose to include this special relief in their PGA rate adjustments to be effective on January 1, 1979 shall make an amended PGA rate adjustment filing with a proposed effective date of January 1, 1979. The amended rate filing shall be made as promptly as possible; but no later than December 15, 1978. The notice requirements of § 154.38(d)(4)(v) and the notice provisions of the pipelines' PGA clause tariff provisions are waived for this filing.

The special relief granted herein waive certain provisions in the PGA clause. As a result, it will apply only to those companies which elect [4] to use the PGA option, which include a deferred account, to recover all changes in purchased gas cost for the three year period commencing on January 1, 1979. Companies which have elected the non-PGA option must recover all changes in purchased gas costs, including those due to the impact of NGPA, in general section 4 rate filings pursuant to § 154.63.

The PGA provisions only allow for recovery of actual amounts reflected in the deferred account (Account 191).[5] The effect of this provision is that the PGA surcharge would not include or recover amounts attributable to the NGPA up to 90 days prior to the effective date of the surcharge adjustment. Thus increases in flowing gas supplies attributable to the NGPA and incurred by pipelines within up to 90 days before the filing of a PGA rate adjustment would have to be carried by the pipeline until its succeeding PGA rate adjustment absent some form of relief. However, this understates the problem, because Order No. 13 specifies semi-annual filing dates for PGA tariff adjustments. Thus pipelines with PGA clause adjustments effective by operation of Order No. 13 on or before March 1, 1979 would not be able to reflect in their proposed surcharge adjustments any changes in purchased gas costs attributable to the NGPA until as late as September 1979. Thus they would be carrying these NGPA costs for as long as nine months before the normal operation of the PGA clause would allow any recovery whatsoever of statutorily allowed increased purchased gas costs. This situation could cause hardship to some pipeline companies.

The Commission believes the special relief granted herein is an effective way to minimize the time that companies would be required to carry amounts attributable to NGPA in their deferred accounts. It also minimizes finance charges which would have been attributable solely to deferring collection of NGPA costs. By limiting the estimates to events occurring before the effective date of the PGA tariff adjustment, this method avoids the difficulties inherent in projecting future occurrences.

In sum, the Commission believes the amendment, in conjunction with the operation of Order No. 13 provides for a more orderly and gradual flowthrough of changes in purchased gas costs due to NGPA than would result if any of the other options discussed (*infra*) in this order were adopted.

B. OTHER OPTIONS WERE CONSIDERED

The proposals presented by INGAA [6] and Texas Gas [7] are very similar. Under INGAA's proposal, interstate pipelines with an effective PGA clause would be permitted a one-time adjustment, effective January 1, 1979, that would recover, through a surcharge, estimated increased purchased gas costs contributable to the NGPA of 1978 from December 1, 1978 to their next regularly scheduled semi-annual PGA anniversary date. Texas Gas proposes to modify the above proposal by giving interstate pipelines the option of delaying their one-time tracker until their first regularly scheduled semi-annual PGA anniversary date subsequent to January 1, 1979. Texas Gas' proposal is based upon a surcharge that would recover increased purchased gas costs attributable to the NGPA of 1978 from December 1, 1978 to their second regularly scheduled semi-annual PGA anniversary date subsequent to January 1, 1979.

Pacific Gas & Electric Company (PG&E) urged that the Commission deny the request by INGAA and suggested that the cost increases resulting from the implementation of NGPA should continue to be accumulated by the interstate pipeline companies and recovered at the time of their regularly scheduled PGA change date.[8] PG&E noted that Order No. 13 authorizes carrying charges on deferred balances in Account 191, which ameliorates the burden upon interstate pipelines.

Both the INGAA and Texas Gas proposals would permit the pipelines to estimate future changes in gas costs for as much as six months subsequent to the adjustment date. The Commission finds the use of such estimates undesirable because of the uncertainty involved in making estimates of future gas prices under the NGPA. For example, the pipelines would be required to estimate not only the volume of new supplies, but also when filings for determinations would be made and when the determination of the proper classification of gas that would be made by state regulatory agencies. The pipelines would also be required to estimate future inflation adjustment factors which are a function of future economic conditions of the national economy.

In Opinion No. 699-H the Federal Power Commission granted interstate pipelines with effective PGA clauses relief through a special one-time adjustment of their current cost of purchased gas on a specified date for the industry.

In Opinion No. 770-A the Federal Power Commission granted interstate pipelines with effective PGA clauses relief through a special one-time adjustment of their current cost of purchased gas, plus a twelve-month surcharge, with interest, that would recover estimated increased purchased gas costs attributable to Opinion No. 770-A that occurred during the period from July 27, 1976, through November 30, 1976. The industry was permitted to effectuate these adjustments on December 1, 1976.

The special relief in Opinion Nos. 699-H and 770-A as well as the INGAA

[4] Order No. 16, issued November 27, 1978, in Docket No. RM79-1, requires each pipeline to elect for three year periods whether to recover changes in purchased gas costs through a PGA clause or through general section 4 rate filings.

[5] See CFR § 154.38(d)(4)(iv)(*d*).

[6] Natural Gas Pipeline Company and El Paso Natural Gas Company support the INGAA proposal.

[7] The Texas Gas proposal is supported by Transcontinental Gas Pipe Line Corporation.

[8] PG&E's proposal would result in the normal operation of the PGA absent any special relief. The effects of this have been discussed previously.

proposal would cause multiple filings and a virtually immediate increase in all rates of a pipeline to its customers which would flow through the increase to the consumer. The numerous filings would impose a substantial administrative burden of the type which the Commission specifically addressed and alleviated by Order Nos. 13 and 16. Moreover, the importance of immediate passthrough of all NGPA costs by all pipelines has been lessened by the recently adopted Order No. 13 which permits carrying charges. Equally significant in rejecting the historic approach which would allow all pipelines to increase their rates simultaneously is the more abrupt increase in costs to the ultimate consumer and the impact this would have on the economy as a whole.

FINDINGS

(1) For the reasons set forth, the Commission finds that it is appropriate and in the public interest in administering the Natural Gas Act to adopt this amendment;

(2) For good cause as more fully described herein, the Commission finds that notice and comment upon the amendment are impracticable and contrary to the public interest;

(3) In view of the purposes, intent and effect of the amendment, good cause exists for making it effective immediately.

(Natural Gas Act (15 U.S.C. 55), Department of Energy Organization Act (42 U.S.C. 7101, *et seq.*), and E. O. 12009, 42 FR 46267.)

CONCLUSION

In consideration of the foregoing, Part 154, Chapter I of Title 18, code of Federal Regulations, is amended as set forth below, effective immediately.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

1. Section 154.38 is amended in paragraph (4) of paragraph (d) by a sentence at the end of the indroductory language and by adding a new clause (x) to read as follows:

§ 154.38 Composition of rate schedule.

* * * * *

(d) Statement of rate * * *

(4) * * * The first PGA rate adjustment to become effective on or after January 1, 1979, may reflect the calculation specified in clause (x).

(x) *One-time passthrough of certain estimated NGPA costs.* (*a*) *General Rule.* Notwithstanding the provisions of clause (iv)(*d*) of paragraph (d)(4), any natural gas pipeline company with a PGA clause in effect on January 1, 1979, may estimate its changes in purchased gas cost directly attributable to the Natural Gas Policy Act of 1978 (NGPA) up to and including the month preceding the effective date of its first PGA tariff adjustment effective on or after January 1, 1979, provided however, for those months for which the pipeline has acutal NGPA costs reflected in its deferred account, the actual amounts must be used in calculating the surcharge. The amount estimated may be added to the actual amounts reflected in the pipeline's deferred account (Account 191) for purposes of calculating the PGA surcharge included in the pipeline's first PGA rate adjustment to be effective on or after January 1, 1979.

(*b*) *Option for pipelines with a PGA rate adjustment effective on January 1, 1979.* Those pipelines with PGA rate adjustments to become effective on January 1, 1979 may elect to include the adjustment for NGPA costs prescribed in clause (x)(*a*) either (i) in their PGA rate adjustment to become effective on January 1, 1979, or (ii) in their first PGA rate adjustment filed on or after January 1, 1979. Those pipelines choosing (i) must file amended PGA rate sheets which reflect the adjustment allowed in clause (x)(*a*) no later than December 15, 1978; the notice requirements of § 154.138(d)(4)(v) and the notice provisions in the pipeline's PGA clause tariff provisions are hereby waived for such PGA tariff filings made during December 1978.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 811-78]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart P—Federal Bureau of Investigation

DELEGATING AUTHORITY TO THE DIRECTOR OF THE FEDERAL BUREAU OF INVESTIGATION

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This order permits the Director of the Federal Bureau of Investigation to adjust, determine, compromise, and settle a claim involving the Federal Bureau of Investigation, under section 2672 of Title 28, United States Code, relating to the administrative settlement of Federal tort claims, if the amount of a proposed adjustment, compromise, settlement or award does not exceed $5,000.00.

EFFECTIVE DATE: November 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Jeffrey Axelrad, Director, Torts Branch, Civil Division, U.S. Department of Justice, Washington, D.C. 20530 (202-724-6810).

By virtue of the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, § 0.85 of Subpart P of Part O of Chapter I of Title 28, Code of Federal Regulations, is amended by adding the following new paragraph (k):

§ 0.85. General function.

* * * * *

(k) Adjust, determine, compromise, and settle claims involving the Federal Bureau of Investigation under 28 U.S.C. 2672, relating to tort claims where the amount of a proposed adjustment, compromise, settlement or award does not exceed $5,000.00.

Dated: November 28, 1978.

GRIFFIN B. BELL,
Attorney General.

[4910-14-M]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 78-048]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Pequonnock River, Conn.

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the City of Bridgeport, the Coast Guard is changing the regulations governing the Grand Street bridge to provide that the draw need not open. This change is being made because no requests have been made to open the draw since 1961. This action will relieve the bridge owner of the burden of maintaining the machinery and of having a person available to open the draw.

EFFECTIVE DATE: This amendment is effective on January 8, 1979.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G-WBR/73), Room 7300, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-0942).

DEC 7 1978 UMI

and specific standards for acquisition, while maintaining the essential form tion, restoration, or reconstruction

V 4 3 / 2 3 6 D E 7 7 8 UMI

SUPPLEMENTARY INFORMATION: On May 25, 1978, the Coast Guard published a proposed rule (43 FR 22410) concerning this amendment. The Commander, Third Coast Guard District, also published the proposal as a Public Notice dated June 15, 1978. Interested persons were given until June 27, 1978 and July 17, 1978, respectively, to submit comments.

DRAFTING INFORMATION: The principal persons involved in drafting this rule are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Mary Ann McCabe, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF COMMENTS

Three comments were received which offered no objection or no comment regarding the proposal. After the close of the comment period the New England Division, Corps of Engineers, Department of the Army, requested that the bridge owner be instructed to restore this bridge to operable condition within 1 year after such action is requested. This request was generated by an existing project authorized by Congress that extends approximately 1,500 feet above the Grand Street bridge. The City of Bridgeport stated that it might take as long as 2 years to restore the bridge to operable condition. There is no navigation above this bridge nor has there been since 1961. Based on a review of the bridge and its associated mechanical components, the Coast Guard feels that the restoration of the draw to operable condition within 12 months as requested by the Corps of Engineers is reasonable and this condition is therefore incorporated in the regulation.

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.130(a)(5) to read as follows:

§ 117.130 Pequonnock River, Yellow Mill Channel, and Johnson Creek, Bridgeport, Conn.; bridges.

(a) • • •

(5) *Grand Street Bridge.* The draw need not open for the passage of vessels. However, the draw shall be returned to operable condition within 12 months after notification by the Commandant to take such action.

• • • • • •

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5)).

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: December 1, 1978.

J. D. HAYES,
Admiral, U.S. Coast Guard
Commandant.

Title 36—Parks, Forests and Public Property

CHAPTER XII—HERITAGE CONSERVATION AND RECREATION SERVICE, DEPARTMENT OF THE INTERIOR

PART 1207—THE SECRETARY OF THE INTERIOR'S STANDARDS FOR HISTORIC PRESERVATION PROJECTS

Final Rulemaking

AGENCY: Heritage Conservation and Recreation Service, Interior.

ACTION: Final Rulemaking.

SUMMARY: Interim standards were published on September 13, 1978. The following document sets forth the final standards established by the Secretary of the Interior for planning, undertaking, and supervising historic preservation grant-in-aid projects under the provisions of the National Historic Preservation Act of 1966, as amended through the creation of a National Historic Preservation Fund. The 1966 act authorizes the Secretary to grant funds to the States, Territories, and the National Trust for Historic Preservation for the purpose of preserving properties for public benefit that are significant in American history, architecture, archeology, and culture.

EFFECTIVE DATE: These regulations became effective on September 13, 1978.

FOR FURTHER INFORMATION CONTACT:

W. Brown Morton, III, Departmental Consultant for Historic Architecture, Chief, Technical Preservation Services Division, Office of Archeology and Historic Preservation, Heritage Conservation and Recreation Service, Department of the Interior, Washington, D.C. 20240, 343-7253.

SUPPLEMENTARY INFORMATION: In preparing these regulations and reviewing the National Register and the Historic Preservation Fund grant-in-aid program, the intent, requirements, and spirit of the National Environmental Policy Act of 1969 (Pub. L. 91-190, 42 U.S.C. 4321-4327) have been carefully considered. As established by the 1966 National Historic Preservation Act (80 Stat. 915, 16 U.S.C. 470 et seq.) and amended by title II, Pub. L. 94-422 through the creation of a National Historic Preservation Fund, these programs have as their purpose the identification, protection, and enhancement of the historic, architectural, archeological, and cultural resources of the manmade environment. It has been administratively determined that, beyond the overall program purpose which is intended to enhance the environment, this rulemaking will have no significant effect on the environment. Further information, including a memorandum of environmental assessment, is on file in the Office of Archeology and Historic Preservation, Heritage Conservation and Recreation Service, Department of the Interior, Washington, D.C. 20240.

Public comment regarding the interim standards was due on or before October 13, 1978. The one comment received involved questions or suggestions about sections: 1207.2 (f)f, 1207.3 (g), and 1207.4 (g), (1) and (4). The Service believes that although the questions or suggestions for the above-referenced sections are not applicable to the standards, they are appropriate to, and are therefore satisfactorily addressed and answered in, the Guidelines for Applying the Secretary of the Interior's Standards for Historic Preservation Projects, an appendix to the draft Grants Administration Manual. This draft manual was recently distributed to those officials responsible for administrating the grant-in-aid program in the States, Territories and the National Trust for Historic Preservation.

The primary authors of this document are W. Brown Morton III and Gary L. Hume, Heritage Conservation and Recreation Service, 202-343-7253.

DAVID F. HALES,
Deputy Assistant Secretary for
Fish and Wildlife and Parks.

DECEMBER 1, 1978.

Accordingly, a new Chapter XII, Part 1207 is added to Title 36 to read as follows:

Sec.
1207.1 Intent.
1207.2 Definitions.
1207.3 General standards for historic preservation projects.
1207.4 Specific standards for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction projects.

AUTHORITY: The National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470 et seq.; section 2124 of the Tax Reform Act of 1976, 90 Stat. 1918; Executive Order No. 11,593, 3 CFR 75 (1971).

§ 1207.1 Intent.

The intent of this part is to set forth standards for historic preservation projects, containing general standards and specific standards for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction. These standards apply to all proposed grant-in-aid projects assisted through the National Historic Preservation Fund.

§ 1207.2 Definitions.

The standards for historic preservation projects will be used by the Heritage Conservation and Recreation Service and State historic preservation officers and their staff members in planning, undertaking, and supervising grant-assisted projects for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction. For the purposes of this part:

(a) *Acquisition.* Means the act or process of acquiring fee title or interest other than fee title of real property (including the acquisition of development rights or remainder interest).

(b) *Preservation.* Means the act or process of applying measures to sustain the existing form, integrity, and material of a building or structure, and the existing form and vegetative cover of site. It may include initial stabilization work where necessary, as well as ongoing maintenance of the historic building materials.

(c) *Protection.* Means the act or process of applying measures designed to affect the physical condition of a property by defending or guarding it from deterioration, loss, or attack, or to cover or shield the property from danger or injury. In the case of buildings and structures, such treatment is generally of a temporary nature and anticipates future historic preservation treatment; in the case of archeological sites, the protective measure may be temporary or permanent.

(d) *Reconstruction.* Means the act or process of reproducing by new construction the exact form and detail of a vanished building, structure, or object, or a part thereof, as it appeared at a specific period of time.

(e) *Rehabilitation.* Means the act or process of returning a property to a state of utility through repair or alteration that makes possible an efficient contemporary use while preserving those portions or features of the property that are significant to its historical, architectural, and cultural values.

(f) *Restoration.* Means the act or process of accurately recovering the form and details of a property and its setting as it appeared at a particular period of time by means of the removal of later work or by the replacement of missing earlier work.

(g) *Stabilization.* Means the act or process of applying measures designed to reestablish a weather-resistant enclosure and the structural stability of an unsafe or deteriorated property while maintaining the essential form as it exists at present.

§ 1207.3 General standards for historic preservation projects.

The general standards listed below shall apply to all historic preservation grant-in-aid projects; additional standards in § 1207.4 for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction apply to specific grant-in-aid projects as appropriate:

(a) Every reasonable effort shall be made to provide a compatible use for a property that requires minimal alteration of the building structure, or site and its environment, or to use a property for its originally intended purpose.

(b) The distinguishing original qualities or character of a building, structure, or site and its environment shall not be destroyed. The removal or alteration of any historic material or distinctive architectural features should be avoided when possible.

(c) All buildings, structures, and sites shall be recognized as products of their own time. Alterations, which have no historical basis and which seek to create an earlier appearance, shall be discouraged.

(d) Changes, which may have taken place in the course of time, are evidence of the history and development of a building, structure, or site and its environment. These changes may have acquired significance in their own right, and this significance shall be recognized and respected.

(e) Distinctive stylistic features or examples of skilled craftsmanship which characterize a building, structure, or site shall be treated with sensitivity.

(f) Deteriorated architectural features shall be repaired rather than replaced, wherever possible. In the event replacement is necessary, the new material should match the material being replaced in composition, design, color, texture, and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplications of features, substantiated by historical, physical, or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other buildings or structures.

(g) The surface cleaning of structures shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials shall not be undertaken.

(h) Every reasonable effort shall be made to protect and reserve archeological resources affected by, or adjacent to, any acquisition, protection, stabilization, preservation, rehabilitation, restoration, or reconstruction projects.

§ 1207.4 Specific standards for acquisition, protection, stabilization, preservation, rehabilitation, restoration, and reconstruction projects.

In addition to the general standards set forth in § 1207.3 the following specific standards shall be applied as appropriate:

(a) *Acquisition.* (1) Careful consideration shall be given to the type and extent of property rights that are required to assure the preservation of the historic resource. The preservation objective shall determine the exact property rights to be acquired.

(2) Properties shall be acquired in fee simple when absolute ownership is required to insure their preservation.

(3) The purchase of less-than-fee-simple interests, such as open space or facade easements, shall be undertaken when a limited interest achieves the preservation objective.

(4) Every reasonable effort shall be made to acquire sufficient property with the historic resource to protect its historical, archeological, architectural, or cultural significance.

(b) *Protection.* (1) Before applying protective measures, which are generally of a temporary nature and imply future historic preservation work, an analysis of the actual or anticipated threats to the property shall be made.

(2) Protection shall safeguard the physical condition or environment of a property or archeological site from further deterioration or damage caused by weather or other natural, animal, or human intrusions.

(3) If any historic material or architectural features are removed, they shall be properly recorded and, if possible, stored for future study or reuse.

(c) *Stabilization.* (1) Stabilization shall reestablish the structural stability of a property through the reinforcement of loadbearing members or by arresting material deterioration leading to structural failure. Stabilization shall also reestablish weather resistant conditions for a property.

(2) Stabilization shall be accomplished in such a manner that it detracts as little as possible from the property's appearance. When reinforcement is required to reestablish structural stability, such work shall be concealed wherever possible so as not to intrude upon or detract from the esthetic and historical quality of the property, except where concealment would result in the alteration or destruction of historically significant material or spaces.

(d) *Preservation.* (1) Preservation shall maintain the existing form, integrity, and materials of a building, structure, or site. Substantial reconstruction or restoration of lost fea-

of different architectural features

Dated: November 30, 1978.

[Grams per vehicle mile]

§ 440.230 Sufficiency of amount, duration, and scope

V 4 3 / 2 3 6 DEC 7 78 UMI

tures generally are not included in a preservation undertaking.

(2) Preservation shall include techniques of arresting or retarding the deterioration of a property through a program of ongoing maintenance.

(e) *Rehabilitation.* (1) Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant historic, architectural, or cultural material, and such design is compatible with the size, scale, color, material, and character of the property, neighborhood, or environment.

(2) Wherever possible, new additions or alterations to structures shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would be unimpaired.

(f) *Restoration.* (1) Every reasonable effort shall be made to use a property for its originally intended purpose or to provide a compatible use that will require minimum alteration to the property and its environment.

(2) Reinforcement required for structural stability or the installation of protective or code required mechanical systems shall be concealed whenever possible so as not to intrude or detract from the property's esthetic and historic qualities, except where concealment would result in the alteration or destruction of historically significant materials or spaces.

(3) When archeological resources must be disturbed by restoration work, recovery of archeological material shall be undertaken in conformance with current professional practices.

(g) *Reconstruction.* (1) Reconstruction of a part or all of a property shall be undertaken only when such work is essential to reproduce a significant missing feature in a historic district or scene, and when a contemporary design solution is not acceptable.

(2) Reconstruction of all or a part of a historic property shall be appropriate when the reconstruction is essential for understanding and interpreting the value of a historic district, or when no other building, structure, object, or landscape feature with the same associative value has survived and sufficient historical documentation exists to insure an accurate reproduction of the original.

(3) The reproduction of missing elements accomplished with new materials shall duplicate the composition, design, color, texture, and other visual qualities of the missing element. Reconstruction of missing architectural features shall be based upon accurate duplication of original features, substantiated by historical, physical, or pictorial evidence rather than upon conjectural designs or the availability of different architectural features from other buildings.

(4) Reconstruction of a building or structure on an original site shall be preceded by a thorough archeological investigation to locate and identify all subsurface features and artifacts.

(5) Reconstruction shall include measures to preserve any remaining original fabric, including foundations, subsurface, and ancillary elements. The reconstruction of missing elements and features shall be done in such a manner that the essential form and integrity of the original surviving features are unimpaired.

Title 37—Patents, Trademarks, and Copyrights

CHAPTER II—COPYRIGHT OFFICE, LIBRARY OF CONGRESS

[Docket RM 77-3]

PART 201—GENERAL PROVISIONS

Compulsory License for Making and Distributing Phonorecords

AGENCY: Library of Congress, Copyright Office.

ACTION: Extension of time to submit written statements.

SUMMARY: This notice is issued to advise the public that the Copyright Office of the Library of Congress is extending the time for interested persons to submit written statements relating to the compulsory license for making and distributing phonorecords ("mechanical license").

DATE: Statements should be submitted on or before January 31, 1979.

ADDRESSES: Statements should be submitted, if by hand, to: Office of the General Counsel, U.S. Copyright Office, Library of Congress, Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Room 519, Arlington, Virginia; or, if by mail, to: Office of the General Counsel, U.S. Copyright Office, Library of Congress, Caller No. 2999, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT:

Jon Baumgarten, General Counsel, United States Copyright Office, Library of Congress, Washington, D.C. 20559, 703-557-8731.

SUPPLEMENTARY INFORMATION: Section 115 of 17 U.S.C. provides that "[w]hen phonorecords of a nondramatic musical work have been distributed to the public in the United States under authority of the copyright owner, any other person may, by complying with the provisions of this section, obtain a compulsory license to make and distribute phonorecords of the work" for certain purposes.

A compulsory license permits the use of a copyrighted work without the consent of the copyright owner if certain conditions are met and royalties paid.

Paragraphs (b) and (c) of section 115 direct the Copyright Office to issue regulations governing the content and filing of certain notices and statements of account under this section.

On April 26, 1977, in accordance with an Advance Notice of Proposed Rulemaking (42 FR 16837), we held a public hearing to elicit information relevant to the formulation of regulations under this section. After considering the testimony given at the hearing and in supplemental statements, on December 29, 1977 (42 FR 64889), we issued interim regulations. We then considered public comments received in response to the interim regulations and, on September 28, 1978 (43 FR 44511), we: (1) adopted amendments to the interim regulations; and (2) announced a public hearing, to be held on November 28 and 29, 1978, to take testimony on the interim regulations as amended. The record of the hearing was to be kept open until December 29, 1978, for receipt of written statements from any interested person, including supplemental statements from witnesses.

Substantial clarification of the difficult accounting issues involved in this proceeding emerged during the hearing. The possibility was also raised that representatives of the recording and music publishing industries might confer among themselves in an attempt to refine or resolve some of the differences between their positions. In accordance with requests made by both interests, and to permit full exploration of these and other matters raised at the hearing, we are extending the time for written statements to be filed from December 29, 1978, to January 31, 1979.

The full text of the interim regulations, as amended, is set forth in our September 28, 1978, notice (43 FR 44511). As soon as it is received from the reporting service, the unedited transcript of the hearing will be available for public inspection between the hours of 8:00 a.m. and 4:00 p.m. in the Public Information Office of the Copyright Office, Room 101, Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia. Arrangements for receiving copies of the unedited transcript should be made directly with the Miller-Columbian Reporting Service, 927 15th Street, N.W., Washington, D.C. 20005 202-347-0224.

Dated: November 30, 1978.

BARBARA RINGER,
Register of Copyrights.

Approved:

WILLIAM J. WELSH,
The Acting Librarian of Congress.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL-1020-6]

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLE AND NEW MOTOR VEHICLE ENGINES: CERTIFICATION AND TEST PROCEDURES

Clarification and Technical Amendments; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Correction to final rule.

SUMMARY: On September 25, 1978, the EPA published in the FEDERAL REGISTER (43 FR 43299) a regulation intended to bring EPA's regulations for the certification and testing of new motor vehicles and new motor vehicle engines into conformance with the provisions of the amended Clean Air Act regarding certification of motor vehicles at high altitude. That same action also promulgated the light-duty vehicle exhaust emission standards for model years 1979 and 1980. Several errors were made in that document (FR Doc. 78-26812) which this notice is intended to correct.

DATE: This correction is effective December 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Paul A. J. Wilson, Regulatory Management Staff, Office of Mobile Source Air Pollution Control (ANR-455), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-0596.

1. The first complete paragraph and the table in the first column at page 43300 should be corrected to read as follows:

The exhaust emission standards for light-duty vehicles required by the Act are as follows:

[Grams per vehicle mile]

	HC	CO	NO_x
1979	1.5	15	2.0
1980	0.41	7.0	2.0

2. Section 86.079-8(a)(1)(ii) at page 43302 should read as follows:

(ii) *Carbon monoxide.* 15 grams per vehicle mile.

Dated: November 9, 1978.

Title 42—Public Health

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—MEDICAL ASSISTANCE PROGRAM

PART 440—SERVICES: GENERAL PROVISIONS

Sufficiency of Amount, Duration, and Scope; Correction

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Correction to final rule.

SUMMARY: This document corrects 42 CFR 440.230, *Sufficiency of amount, duration, and scope*, by reinserting two phrases omitted from the September 29, 1978, (43 FR 45176) publication of the rewritten and reorganized Medicaid regulations. The omission of these phrases was not intended to be a policy change. However, several commenters expressed concern that these omissions have been construed as a policy change restricting a State's authority to decide what medical assistance will be covered under the State Medicaid plan. In order to avoid further misunderstandings, § 440.230 is being amended as set forth below.

EFFECTIVE DATE: December 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Ann Watts (202) 245-0722.

TEXT OF REGULATION

Title 42, Part 440, of the Code of Federal Regulations is amended by reinserting the words "arbitrarily" and "such criteria as" in § 440.230, revising that section to read as follows:

§ 440.230 Sufficiency of amount, duration, and scope.

(a) The plan must specify the amount and duration of each service that it provides.

(b) Each service must be sufficient in amount, duration, and scope to reasonably achieve its purpose.

(c)(1) The medicaid agency may not arbitrarily deny or reduce the amount, duration, or scope of a required service under §§ 440.210 and 440.220 to an otherwise eligible recipient solely because of the diagnosis, type of illness, or condition.

(2) The agency may place appropriate limits on a service based on such criteria as medical necessity or on utilization control procedures.

(Sec. 1102 of the Social Security Act (42 U.S.C. 1302).)

Dated: November 28, 1978.

LEONARD D. SCHAEFFER,
Administrator, Health Care Financing Administration.

Approved: November 30, 1978.

JOSEPH A. CALIFANO, JR.,
Secretary.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

CODE OF FEDERAL REGULATIONS

Miscellaneous Amendments

AGENCY: Office of Education, HEW.

ACTION: Rule.

SUMMARY: This document removes from the *Code of Federal Regulations* (CFR) materials falling into the following four categories: (1) Obsolete regulations that are being revoked; (2) Regulations that have no current applicability; (3) Regulations currently repeated verbatim in more than one place in the CFR; and (4) Materials of a non-regulatory nature that need not be reprinted annually in the CFR. The removal of these materials from the CFR will make the 1978 edition of Title 45 a more streamlined and functional publication.

EFFECTIVE DATE: December 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. A. Neal Shedd, U.S. Office of Education, 400 Maryland Avenue, SW., Room 2129, Washington, D.C. 20202, 202-245-7091.

SUPPLEMENTARY INFORMATION:

(2) Preambles of major rulemaking umes indefinitely. Persons who would

grants and cost-type contracts under

PART 117—FINANCIAL ASSISTANCE

PART 129—COMPREHENSIVE EDUCA-

V 4 3 / 2 3 6

SUPPLEMENTARY INFORMATION: The obsolete regulations being removed from the CFR by this document are:

(1) Appendix A to Subchapter A of Chapter I.

(2) Part 121.

(3) Part 160.

INAPPLICABLE REGULATIONS

The regulations in 45 CFR Parts 117, 118, 119, 124, 127, 129, 141, 142, 170, and 171 currently have no applicability because the Congress is not funding the programs for which they were written. These regulations are being suspended and taken out of the CFR. The suspension and removal of these regulations from the CFR will eliminate potential confusion for persons not aware that they have no current applicability. Because these regulations might be necessary at some future date, they are suspended rather than revoked. For regulations in this category, Part 100 of the CFR will contain a reference that tells the reader where they may be found.

In the event that funds are made available for these programs, the Office of Education (OE) will publish a document in the FEDERAL REGISTER informing the public that funds have been appropriated and lift the suspension. At that time OE will republish the regulations in full for inclusion in the CFR unless a finding is made at that time that full text republication is not warranted.

REPEATED REGULATIONS

The cost principles currently appended to Subchapter A of Chapter I duplicate appendices to the Department's general grant regulations in 45 CFR Part 74. Rather than repeat these lengthy appendices, the Office of Education—(1) amends its General Provisions Regulations in Parts 100a and 100b to add references to the Part 74 Appendices, and (2) revokes Appendices B-D of Subchapter A of Chapter I.

NONREGULATORY MATERIAL

Over the past several years OE has published in the FEDERAL REGISTER, for inclusion in the CFR, certain material that would not normally be codified in the CFR under the requirements of the FEDERAL REGISTER Act. These materials fall into the following three categories:

(1) Statutory materials that underlie OE programs and regulations (Part 116, Appendix);

(2) Preambles of major rulemaking actions (Part 105, Appendix B and Part 121a, Appendix A);

(3) Guidelines supplementing existing regulations (Part 121d Appendix; Part 162, Appendix B; and Part 166 Appendices A and C).

While the inclusion of these materials in the CFR on a one-time basis is useful to CFR users, it is not necessary that they be republished annually. By removing them, Title 45 of the CFR, beginning with the 1978 edition, can be streamlined to include only regulations of general and current applicability and future effect together with any new materials in any of the above three categories not previously published that would be of significant interest to users of Title 45.

For ease of use, the appendix headings will be retained in the 1978 edition of the CFR with an explanation of where the materials formerly included there may be found. The Office of Education is working with the Office of the Federal Register to explore a means for future publication of nonregulatory material relevant to persons interested in Title 45 without requiring either full text republication every year or retention of old CFR volumes indefinitely. Persons who would like to be consulted as these discussions proceed are invited to express their interest by writing to Dr. Shedd at the address stated above.

Dated: October 31, 1978.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: November 28, 1978.

HALE CHAMPION,
Acting Secretary of Health, Education and Welfare.

Title 45 of the Code of Federal Regulations is amended as follows:

PART 100—GENERAL

1. Part 100 is amended by adding a new Subpart C, to read as follows:

Subpart C—Regulations for Certain Programs

§ 100.10 Where to find regulations for certain programs.

The following programs were not funded for Fiscal Year 1979. If funds become available for a later fiscal year, the table below shows where to find the regulations that apply to each program. ("FR" means the FEDERAL REGISTER.)

Title of program	Authorizing statute	Location of regulations
Financial assistance for school library resources, textbooks, and other instructional materials.	Title II of the Elementary and Secondary Education Act (as in effect Sept. 30, 1978).	41 FR 37576, Sept. 7, 1976.
Supplementary centers and services, guidance, counseling, and testing programs.	Title III of the Elementary and Secondary Education Act (as in effect Sept. 30, 1978).	40 FR 51011, Nov. 3, 1976.
Federal financial assistance for strengthening State departments of education.	Title V (except secs. 531-534) of the Elementary and Secondary Education Act (as in effect Sept. 30, 1978).	34 FR 7242, May 2, 1969, as amended at 36 FR 8950, May 15, 1971; 38 FR 30659, Nov. 6, 1973.
Financial assistance for demonstration projects for reducing school dropouts.	Sec. 807 of the Elementary and Secondary Education Act (as in effect Sept. 30, 1978).	39 FR 13662, Apr. 16, 1974.
Grants for demonstration projects to improve school health and nutrition services for children from low-income families.	Sec. 808 of the Elementary and Secondary Education Act (as in effect Sept. 30, 1978).	39 FR 41851, Dec. 3, 1974.
Comprehensive educational planning and evaluation.	Sec. 531-534 of the Elementary and Secondary Education Act (as in effect Sept. 30, 1978).	38 FR 21924, Aug. 14, 1973; as amended at 38 FR 30659, Nov. 6, 1973.
Strengthening instruction in academic subjects in public schools.	Title III-A of the National Defense Education Act.	40 FR 1018, Jan. 6, 1975.
Loans to private nonprofit schools for strengthening instruction in academic subjects.	Sec. 305 of the National Defense Education Act.	40 FR 6343, Feb. 11, 1975.
Financial assistance for construction of higher education facilities.	Title VII of the Higher Education Act.	39 FR 26724, July 23, 1974.
Instructional equipment grants for institutions of higher education.	Title VI of the Higher Education Act.	39 FR 12950, Apr. 9, 1974; as amended at 42 FR 63573, Dec. 16, 1977

(20 U.S.C. 1221e-3(a)(1))

PART 100a—DIRECT PROJECT GRANT AND CONTRACT PROGRAMS

2. Section 100a.80 is revised to read as follows:

§ 100a.80 Cost principles.

The Commissioner uses the principles referenced in §§ 74.170-74.176 of this title in determining costs under grants and cost-type contracts under grants.

(20 U.S.C. 1221e-3(a)(1))

§§ 100a.81, 100a.82, 100a.83, 100a.84 and 100a.290 [Revoked]

3. The following sections in Part 100a are revoked: §§ 100a.81, 100a.82, 100a.83, 100a.84, and 100a.290.

PART 100b—STATE ADMINISTERED PROGRAMS

4. Section 100b.80 is revised to read as follows:

§ 100b.80 Cost principles.

The Commissioner uses the principles referenced in §§ 74.170-74.176 of this title in determining costs applicable to grants, subgrants, and cost-type contracts under grants and subgrants.

(20 U.S.C. 1221e-3(a)(1))

§§ 100b.81, 100b.82, 100b.83 and 100b.84 [Revoked]

5. The following sections in Part 100b are revoked: §§ 100b.81, 100b.82, 100b.83, and 100b.84.

Appendices A, B, C, and D to Subchapter A [Revoked]

6. Appendices A, B, C, and D to Subchapter A of Chapter I are revoked.

PART 105—COMMISSIONER'S DISCRETIONARY PROGRAMS OF VOCATIONAL EDUCATION

Appendix B [Amended]

7. Appendix B to Part 105 is amended by removing from the Code of Federal Regulations the title "COMMENTS AND RESPONSES" and all of the material in Appendix B which follows that title.

PART 116—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES AND STATE AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF EDUCATIONALLY DEPRIVED, HANDICAPPED, MIGRANT, AND NEGLECTED AND DELINQUENT CHILDREN—GENERAL PROVISIONS.

Appendix [Removed]

8. The Appendix to Part 116 is removed from the Code of Federal Regulations.

PART 117—FINANCIAL ASSISTANCE FOR SCHOOL LIBRARY RESOURCES, TEXTBOOKS, AND OTHER INSTRUCTIONAL MATERIALS [Removed]

PART 118—SUPPLEMENTARY CENTERS AND SERVICES; GUIDANCE, COUNSELING, AND TESTING PROGRAMS [Removed]

PART 119—FEDERAL FINANCIAL ASSISTANCE FOR STRENGTHENING STATE DEPARTMENTS OF EDUCATION [Removed]

9. Parts 117, 118, and 119 are removed from the Code of Federal Regulations.

PART 121—DEFINITIONS; GENERAL PROVISIONS [Revoked]

10. Part 121 is revoked.

PART 121a—ASSISTANCE TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN

Appendix A [Removed]

11. Appendix A to Part 121a is removed from the Code of Federal Regulations.

PART 121d—EARLY EDUCATION FOR HANDICAPPED CHILDREN

Guidelines (Subpart B) [Removed]

12. The Guidelines appended to Subpart B of Part 121d are removed from the Code of Federal Regulations.

PART 124—FINANCIAL ASSISTANCE FOR DEMONSTRATION PROJECTS FOR REDUCING SCHOOL DROPOUTS [Removed]

PART 127—GRANTS FOR DEMONSTRATION PROJECTS TO IMPROVE SCHOOL HEALTH AND NUTRITION SERVICES FOR CHILDREN FROM LOW-INCOME FAMILIES [Removed]

PART 129—COMPREHENSIVE EDUCATIONAL PLANNING AND EVALUATION [Removed]

PART 141—STRENGTHENING INSTRUCTION IN ACADEMIC SUBJECTS IN PUBLIC SCHOOLS [Removed]

PART 142—LOANS TO PRIVATE NON-PROFIT SCHOOLS FOR STRENGTHENING INSTRUCTION IN ACADEMIC SUBJECTS [Removed]

13. Parts 124, 127, 129, 141, and 142 are removed from the Code of Federal Regulations.

PART 160—SPECIAL PROJECTS ACT [Revoked]

14. Part 160 is revoked.

PART 162—NATIONAL READING IMPROVEMENT PROGRAM

Appendix B [Removed]

15. Appendix B to Part 162 is removed from the Code of Federal Regulations.

PART 166—STATE ADULT EDUCATION PROGRAMS APPENDICES A AND C [Removed]

16. Appendices A and C to Part 166 are removed from the Code of Federal Regulations.

PART 170—FINANCIAL ASSISTANCE FOR CONSTRUCTION OF HIGHER EDUCATION FACILITIES [Removed]

PART 171—INSTRUCTIONAL EQUIPMENT GRANTS FOR INSTITUTIONS OF HIGHER EDUCATION [Removed]

17. Parts 170 and 171 are removed from the Code of Federal Regulations.

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 77-222]

PART 153—SAFETY RULES FOR SELF PROPELLED VESSELS CARRYING HAZARDOUS LIQUIDS

Requirements for Resuscitation Equipment

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment deletes the requirement to carry resuscitation equipment aboard tankers carrying hazardous chemicals. To use resuscitation equipment effectively and safely requires training. The Coast Guard is developing standards to ensure that certain of the tankship's personnel are trained in cardiopulmonary resuscitation (CPR) techniques and to require equipment that would aid in administering CPR. This final rule removes the requirement for equipment until training standards have been established.

EFFECTIVE DATE: This amendment is effective on January 4, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert M. Query, Office of Merchant Marine Safety, Room 8309, Department of Transportation, Nassif Building, 400 7th Street, SW., Washington, D.C. 20590 (202) 426-1217.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of Thursday, December 22, 1977 (42 FR 64134), the Coast Guard proposed to amend 46 CFR 153.214(d) to allow a chemical tanker to carry either a portable oxygen inhalator and bag valve mask resuscitator or a demand valve oxygen powered resuscitator as the required adjunctive cardiopulmonary resuscitation (CPR) equipment. This equipment was intended to aid in the treatment of anyone on the tanker exposed to a toxic concentration of cargo vapor. Interested persons were given until February 6, 1978 to comment on the proposal. The Coast Guard received two comments on the proposal.

DRAFTING INFORMATION

The principal persons involved in drafting this document are Mr. Robert M. Query, Project Manager, Office of Merchant Marine safety; and Mr. Michael N. Mervin, Project Attorney, Office of Chief Counsel.

DISCUSSION OF COMMENTS

The Coast Guard received two specific comments on the proposal, one in favor of and one against the change. The comments were essentially the same as the discussion in the preamble to the proposal. One person commented that the bag-valve mask manual resuscitator was too difficult to use effectively without initial and refresher training, and he recommended the demand valve resuscitator as easier and more effective for unskilled users. The other person commented that the bag valve mask manual resuscitator was safer than the demand valve resuscitator when used by an unskilled person and recommended that only the bag valve mask manual type be allowed.

Some types of adjunctive (assisting or auxiliary) resuscitation equipment may be harmful if used by someone who has not been trained in how to use them correctly. The documentation presented with the two comments suggests that for either type of adjunctive equipment to be safe and effective, the user needs initial and refresher training in using that type of equipment.

It is important to remember that cardiopulmonary resuscitation (CPR) can be of great value even without adjunctive equipment. The Coast Guard has decided that the best action to take in the long run would be to require training in unassisted CPR as a minimum and to require adjunctive equipment only when combined with training in how to use it safely.

Since a requirement for CPR training would be beyond the scope of the notice and since the Coast Guard plans to include requirements for CPR training, including use of adjunctive resuscitative equipment, in a comprehensive rule to be proposed for another part of title 46 in the near future, the present requirement for a resuscitator in 46 CFR 153.214 is revoked. In the interim, the Coast Guard urges tanker operators to consider training some of their shipboard personnel in CPR techniques and to provide adjunctive equipment to those who are trained to use it.

In consideration of the foregoing, Chapter I of Title 46, Code of Federal Regulations, is amended as follows:

PART 153—SAFETY RULES FOR SELF PROPELLED VESSELS CARRYING HAZARDOUS LIQUIDS

§ 153.214 [Amended]

1. In § 153.214, by deleting paragraph (d).

(46 U.S.C. 170, 46 U.S.C. 391a, 49 U.S.C. 1655(b)(1); 49 CFR 1.46(n)(4), (t).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: December 1, 1978.

J. B. HAYES,
Admiral, U.S. Coast Guard
Commandant.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

PART 1011—COMMISSION ORGANIZATION: DELEGATIONS OF AUTHORITY

SUBCHAPTER B—PRACTICE AND PROCEDURE

PART 1100—RULES OF PRACTICE

Delegation of Appellate Authority

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: New rules and procedures affecting the Commission's internal organization became effective January 1, 1978, 42 FR 65181 (December 30, 1977). After experience with these rules, certain modifications and clarifications proved necessary, and effective August 1, 1978, several provisions were amended. Further amendment is necessary to delegate appellate authority to review boards in railroad matters limited to (A) rate cases instituted after referral by the courts and (B) investigation cases instituted under 49 U.S.C. 11501. The rules of practice are amended consistent with this delegation of appellate authority. Because these amendments involve the internal organization and procedures of the Commission, they are being issued in final form, and public comments are not being requested.

EFFECTIVE DATE: December 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak or Harvey Gobetz, Section of Rates, Office of Proceedings, Washington, D.C. 20423 (202-275-7693).

SUPPLEMENTAL INFORMATION: Under section 10304 of the Interstate Commerce Act (49 U.S.C. 10304) the Commission is authorized to substitute employee boards for divisions for purposes of hearing exceptions to recommended reports. Formerly, the parties to a review board appellate decision, in both rail and non-rail proceedings, were accorded the right to petition for reconsideration, and they could continue to do so for as long as decisions on reconsideration reversed, changed, or modified prior decisions. The net effect of this scheme was to guarantee parties a minimum of two rights of appeal and one discretionary appeal.

Section 303 of Pub. L. 94-210, the Railroad Revitalization and Regulatory Reform Act of 1976, streamlined the Commission's appellate procedure in railroad related proceedings by limiting to one the number of levels of mandatory appellate review. Under what is now section 10327(f) of the Act, the Commission is empowered to delegate to employee boards the authority to decide appeals in rail-related cases, but only if there is no provision for a further administrative appeal as a matter of right. Since the enactment of this legislation, we have generally refrained from assigning appeals to the review boards in rail cases, but instead have referred such cases to a division of the Commission. We have decided, after a review of the rail-related cases which come before us on appeal, that it would be more appropriate to assign certain of those cases to the review boards, and to make the boards' decisions administratively final. At this time, only two categories of cases are to be assigned to the review boards for appellate action: rate cases instituted by complaint or petition, and cases involving the prescription of intrastate rates under section 11501 of the Act. This assignment of appellate decision-making authority to the review boards is experimental. If it proves to be satisfactory, as we expect it to be, we will give consideration later to expanding the review boards' appellate jurisdiction in rail-related cases. Should it prove unsatisfactory, the delegation will be rescinded.

To give effect to our decision, § 1011.6(g) of our Organization Rules and § 1100.98 (e) and (f) of our rules of practice are being modified in the manner described below.

Part 1011 of Title 49 of the Code of Federal Regulations is amended in the following respects—

§ 1011.6 [Amended]

Section 1011.6(g) is amended to read—

. . . . . .

(g) *Review Boards Nos. 1, 2, 3, 4, and 5.* (1) Except as provided in paragraph (g)(2) of this section, determination of matters not expressly reserved to the Commission or assigned to another employee board, other than those proceedings in which a Commissioner or a member of the Board has presided at the hearing or issued an initial decision and those proceedings that are considered to be the relatively more important cases, including those which appear to involve issues of general transportation importance. In determining what matters are of relatively greater importance, consideration will be given, among other things, to the significance of the matters involved in terms of impact on, or importance to, the national transportation system; the potential significance of the matter as precedent; the question whether a matter of first impression is involved; and the complexity of the record and the issues involved.

(2) Appellate jurisdiction over railroad matters is limited to (i) rate cases instituted by complaint or petition, including proceedings instituted after referral by the courts and (ii) investigation cases instituted under section 11501 of the Act.

Part 1100 of Title 49 of the Code of Federal Regulations is amended in the following respects—

§ 1100.98 [Amended]

Section 1100.98(e) is amended to read—

. . . . . .

(e) *Discretionary review of final decisions.* (1) Any party may file a petition for administrative review of the decision, order, or requirement of the review board, the division, or Commission, subject to the following requirements:

. . . . . .

Section 1100.98(f) is amended to read—

. . . . . .

(f) *Effectiveness.* (1) The timely filing of an appeal shall stay the effect of the decision order, or requirement pending the determination of such appeal. (2) Unless otherwise provided, the Commission, on its own motion, or upon petition, may stay the effect of a decision, order, or requirement of the division or Commission. (3) Any decision, order, or requirement of the review board, the division, or Commission not stayed shall become effective 30 days after it is served on the parties, unless the Commission provides for such decision, order, or requirement to become effective at an earlier date.

These rules are promulgated under the authority of 49 U.S.C. 10321 and 10327.

By the Commission, Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham and Clapp. Commissioner Stafford dissented.

Dated October 19, 1978, at Washington, D. C.

H. G. HOMME, JR.,
Secretary.

Commissioner Stafford, dissenting:

I do not believe the 4-R Act gave the Commission power to allow review boards to make final decisions.

It is clear that before the 4-R Act, the Commission had no such power. In the legislative history of the 1961 amendments to Section 17 of the Act, the Commission clearly promised that it would always assure parties an automatic right to appeal any final decision to the Commission or a division thereof.

The impact of the 4-R Act on this commitment is unclear. There appears to be no legislative history on the parenthetical phrase at the end of Section 17(9)(c). We do know, however, that Congress was vitally concerned about delays in the administrative process. One cause of that delay was the fact that a decision by a review board on exceptions (from the initial decision of an administrative law judge or joint board) was subject to another appeal. To eliminate the multiple appeal process, Section 17(9)(c) now says that we may not delegate appellate matters to employee boards if a second appeal would lie to the Commission or to a division.

There seems to be two interpretations of this prohibition. One interpretation, which I believe correct, is that Congress did not want employee boards to be handling such appeals. The other interpretation, adopted here by the majority, is that the new section allows employee boards to make final decisions. In my view, the former policy, enunciated in 1961, must be clearly overruled by Congress. I see no such intent in the 4-R Act.

As a policy matter, I believe that all parties to our proceedings should have one automatic right of appeal to the Commission or a division. While we may view individual cases as simple and unimportant, the parties never see them in this light. I believe as regulators it is our obligation to participate in the decisional process in every case. Our workload is admittedly at an all-time high; but it is not so great that affected persons should be deprived of their right to have their case adjudicated by the Commission.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Opening of Kirwin National Wildlife Refuge, Kans. to Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to sport fish-

V 4 3 / 2 3 6

ing on the Kirwin National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: January 1 through December 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Keith S. Hansen, Kirwin, Kansas 67644, telephone: 913/646-2373.

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations; sport fishing for individual wildlife refuge areas.

Sport fishing on the Kirwin National Wildlife Refuge, Kansas is permitted from January 1 through December 31, 1979, inclusive, on all areas not designated by signs as closed to fishing. These open areas, comprising 5,000 acres, are delineated on maps available at refuge headquarters, 5 miles west of Kirwin, Kansas, and from the Area Manager, Fish and Wildlife Service, Suite 106, Rockcreek Office Building, 2701 Rockcreek Parkway, North Kansas City, Missouri 64116. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1979. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: November 6, 1978.

KEITH S. HANSEN,
Refuge Manager.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-02-M]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 928]

HANDLING OF PAPAYAS GROWN IN HAWAII

Proposed Grade and Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice proposes minimum grade and size requirements for shipments of Hawaiian papayas. These requirements are designed to provide for orderly marketing in the interest of producers and consumers.

DATES: Written comments must be received by December 22, 1978. Proposed effective dates: January 1, 1979, through December 31, 1979.

ADDRESSES: Send two copies of comments to the Hearing Clerk, U.S. Department of Agriculture, Room 1077 South Building, Washington, D.C. 20250, where they will be made available for public inspection during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: The proposed regulation was recommended by the Papaya Administrative Committee, established under the marketing agreement and Order No. 928 regulating the handling of papayas grown in Hawaii. The program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The committee estimates that 1979 production of Hawaiian papayas will total 70.0 million pounds, the same amount produced during 1978. This will be the first time in eight years that papaya production will not increase over a previous year. This situation resulted from the announced closing of a major papaya producer on the island of Maui sometime during mid-1979. Fresh sales are expected to total 57.0 million pounds and the remaining 13.0 million processed. In-state fresh sales are projected at 14.5 million pounds for 1979, compared to 15.0 million estimated for 1978. It is anticipated that out-of-state sales will amount to 74 percent of the total fresh sales next year and reach 42.5 million pounds, .5 million more than in 1978.

The grade and size requirements are designed to prevent the shipment of Hawaiian papayas of a lower grade and smaller size than specified and are designed to provide ample supplies of good quality papayas in the interest of producers and consumers pursuant to the declared policy of the act.

As proposed § 928.309 Papaya Regulation 9 would read as follows:

§ 928.309 Papaya Regulation 9.

Order. (a) No handler shall ship any container of papayas (except immature papayas handled pursuant to § 928.152 of this part):

(1) During the period January 1 through December 31, 1979, to any destination within the production area unless said papayas grade at least Hawaii No. 1, except that the allowable tolerances for defects shall be 5 percent: *Provided,* That not more than 3 percent shall be permitted for serious damage, not more than 1 percent for immature fruit, and not more than 1 percent for decay; *Provided further,* That such papayas individually weigh not less than 13 ounces.

(2) During the period January 1 through December 31, 1979, to any export destination unless said papayas grade at least Hawaii No. 1, except they shall be free from injury caused by bruises and free from deep scars; and scars, when scaly, cracked or not smooth, shall not aggregate a circle greater than 1 inch in diameter, or when smooth shall not aggregate more than 7.5 percent of the surface of the fruit, except that the total tolerance for all defects shall not exceed 3 percent: *Provided,* That of this amount not more than 1 percent shall be for immature fruit and not more than 1 percent shall be for decay: *Provided further,* That such papayas shall individually weigh not less than 11 ounces each.

(b) When used herein "Hawaii No. 1" shall have the same meaning as set forth in the Standards for Hawaii Grown Papayas, as amended, Subsection 5.32, Section 5, Regulation 1, Divisionof Marketing and Consumer Services, Department of Agriculture, State of Hawaii, issued pursuant to Section 147-4, Part I and Section 147-22, Part II, Chapter 147, Title 11, Volume 3, Hawaii Revised Statutes. All other terms shall have the same meaning as when used in the marketing agreement and order.

Dated: December 1, 1978.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

SUPPLEMENTAL INFORMATION: On October 12, 1978, the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board (collectively referred to as "the Agencies") adopted regulations to implement the Community Reinvestment Act of 1977 ("the CRA") (FR 47144). Those regulations became effective November 6, 1978, as required by statute.

The CRA requires that in connection with their examination of institutions in their jurisdiction, the Agencies assess each institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of the institution. The CRA further requires that the appropriate Agency take that record into account in its evaluation of any application by the institution for a charter, deposit insurance, branch or other deposit facility, office relocation, merger, or acquisition of bank or savings institution shares or assets.

On November 10, 1978, the Financial Institutions Regulatory and Interest Rate Control Act of 1978 was enacted (Pub. L. 95-630), which contained the following amendment to the CRA:

§ 803 • • •

(4) A financial institution whose business predominantly consists of serving the needs of military personnel who are not located within a defined geographic area may define its 'entire community' to include its entire deposit customer base without regard to geographic proximity.

This proposed regulatory amendment would allow qualified institutions to delineate a "military community" of nonlocal depositors in addition to a local community or communities: these would comprise their "entire community" under the regulation.

The Agencies propose this implementation of the statutory provision because preliminary information indicates that institutions potentially qualified under it have a local customer base as well as nonlocal military customers. However, the amendment is issued in proposed form to allow comment on the scope of the statutory provision. Commenters are asked to consider particularly the proposed percentage and mileage limitations, and whether a military community should be the only community required to be delineated where local depositors constitute an insignificant portion of the institution's entire deposit customer base.

Institutions are requested to comply with the proposed regulation during the comment period.

Accordingly, the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board propose to amend 12 CFR Parts 25, 228, 345, and 563e, as follows:

PART 25—COMMUNITY REINVESTMENT ACT REGULATIONS

1. Section 25.3 is amended by adding new paragraph (c) to read as follows:

§ 25.3 Delineation of Community.

(a) • • •

(b) • • •

(c)(1) Nothwithstanding the requirements of paragraphs (a) and (b) of this section, a national bank, over half of whose depositors are active duty or retired military personnel or their dependents who reside more than 50 miles from any of its offices, may delineate a "military community" for those depositors, in addition to its local community or communities. A military community shall be delineated by a written description rather than a map.

(2) References to "local communities" in the provisions of this part shall apply to military communities.

(Community Reinvestment Act of 1977 (12 U.S.C. 2901 et seq. as amended by Title XV of Pub. L. 95-630); 12 U.S.C. 21, 22, 26, 27, 30, 36, 161, 215, 215a, 481, 1814, 1816, 1828(c).)

Dated: November 28, 1978.

JOHN G. HEIMANN,
Comptroller of the Currency.

PART 228—COMMUNITY REINVESTMENT

2. Section 228.3 is amended by adding new paragraph (c) to read as follows:

§ 228.3 Delineation of community.

• • • • • •

(c) (1) Notwithstanding the requirements of paragraphs (a) and (b) of this section, a State member bank, over half of whose depositors are active duty or retired military personnel or their dependents who reside more than 50 miles from any of its offices, may delineate a "military community" for those depositors, in addition to its local community or communities. A military community shall be delineated by a written description rather than a map.

(2) References to "local communities" in the provisions of this part shall apply to military communities.

• • • • • •

(Community Reinvestment Act of 1977 (title VIII, Pub. L. 95-128, 91 Stat. 1147 (12 U.S.C. 2901 et seq.)); Pub. L. 95-630; (12 U.S.C. 321, 325, 1814, 1816, 1828, 1842).)

By order of the Board of Governors, effective November 29, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

PART 345—COMMUNITY REINVESTMENT

3. Section 345.3 is amended by adding a new paragraph (c) thereto, to read as set forth below:

§ 345.3 Delineation of community.

• • • • • •

(c) (1) Notwithstanding the requirements of paragraphs (a) and (b) of this section, an institution, over half of whose depositors are active duty or retired military personnel or their dependents who reside more than 50 miles from any of its offices, may delineate a "military community" for those depositors, in addition to its local community or communities. A military community shall be delineated by a written description rather than a map.

(2) References to "local communities" in the provisions of this part shall apply to military communities.

(Sec. 1503, Pub. L. 95-630, 92 Stat. 3641 (12 U.S.C. 2902); sec. 806, Pub. L. 95-128, 91 Stat. 1148 (12 U.S.C. 2905); sec. 9, Pub. L. 797, 64 Stat. 891 (12 U.S.C. 1819).)

Approved November 30, 1978.

By order of the Board of Directors.

FEDERAL DEPOSIT INSURANCE CORPORATION,
HOYLE L. ROBINSON,
Assistant Executive Secretary.

PART 563—COMMUNITY REINVESTMENT

4. Section 563e.3 is amended by adding a new paragraph (c) thereto, to read as set forth below:

§ 563e.3 Delineation of community.

• • • • • •

(c) (1) Notwithstanding the requirements of paragraphs (a) and (b) of this section, an institution, over half of whose depositors are active duty or retired military personnel or their dependents who reside more than 50 miles from any of its offices, may delineate a "military community" for those depositors, in addition to its local community or communities. A

military community shall be delineated by a written description rather than a map.

(2) References to "local communities" in the provisions of this part shall apply to military communities.

(Pub. L. 95-630; Pub. L. 95-128, 91 Stat. 1147, et seq.; secs. 17, 47 Stat. 736, as amended, (12 U.S.C. 1437); secs. 402, 403, 407, and 408, 48 Stat. 1256, 1257, 1260, and 1260a, as amended, (12 U.S.C. 1725, 1726, 1730, 1730a); sec. 5, 48 Stat. 132, as amended, (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 Com. 1071.)

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary,
Res. #78-674.

NOVEMBER 29, 1978.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Parts 23, 25, and 37]

[Docket No. 18564; Notice No. 78-16]

AIRCRAFT WHEELS AND WHEEL-BRAKE ASSEMBLIES

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revise the Technical Standard Order (TSO) for aircraft wheels and wheel-brake assemblies (TSO-C26b) and a related type certification requirement for airplane brakes. As revised, the standards would incorporate updated and improved minimum performance standards and standards for the design and construction of aircraft wheels and brakes. The proposed changes are recommended to fulfill service needs with respect to future designs.

DATE: Comments must be received on or before February 7, 1979.

ADDRESS: Send all comments on the proposal in duplicate: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-24), Docket No. 18564, 800 Independence Avenue, S.W., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond E. Ramakis, Regulatory Projects Branch, Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Indpendence Avenue, S.W., Washington, D.C. 20591; telephone (202) 755-8716.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or argument as they may desire. Comments relating to any significant environmental or economic impact that might result because of the adoption of these proposals may also be submitted. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comment specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

AVAILABILITY OF NPRMS

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, S.W., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2, which describes the application procedures.

DISCUSSION OF THE PROPOSED RULE

There are several changes to the standards of Parts 23, 25, and 37 of the Federal Aviation Regulations included in this notice of proposed rulemaking. Present §§ 23.735(a)(2), 25.735(f)(2), and 37.172, paragraph 4.2(a)(1) prescribe a formula that may be used for the determination of the kinetic energy absorption requirements of each main wheel brake assembly if a rational analysis is not used. The formula provides as one parameter the power-off stalling speed (V_{S_0}) of the aircraft at sea level at the design landing weight and in the landing configuration. However to provide for those aircraft for which the manufacturer desires to have the speed greater than V_{S_0}, e.g., when the speed at which brakes may be applied is greater than V_{S_0}, the formula would be revised by substituting V to indicate a speed equal to or greater than V_{S_0}. Also, in the formula the numerical constant "0.0444" would be corrected to the fourth decimal by revising it to read "0.0442".

Present § 25.735(b) sets forth the certification requirements for brakes for transport category airplanes. However, in defining the conditions under which the airplane must be brought to rest, reference is made to § 25.75 only. Section 25.75 is applicable to reciprocating engine powered airplanes but not to turbine engine powered airplanes which are identified in § 25.125. The reference to § 25.125 would therefore be added to § 25.735(b).

Present § 25.735(g) provides for the use of V_{S_0} as the initial speed in dynamometer tests for determining the kinetic energy capacity of the wheel-brake assembly. Consistent with the change proposed for § 25.735(f)(2), "V_{S_0}" would be replaced by "V" to indicate a speed equal to or greater than V_{S_0}.

The energy absorbing ability and functional compatibility of a brake with a wheel are a function of both the brake and the wheel working as a unit. Thus, in current paragraph 4.2(a) of the Federal Aviation Administration Standard that is contained in § 37.172, wheel-brake assemblies must be used in the dynamometer tests when testing for kinetic energy ratings. To clarify this, all references to "wheels and brakes" in the title and elsewhere in § 37.172, have been deleted and replaced by references to "wheels and wheel-brake assemblies".

The variation between manufacturer accountability procedures indicates a need for optional marking in order to identify the time period in which the part is manufactured. Therefore, as alternative to serial number identification, an optional date of manufacture would be allowed under § 37.172(b)(2).

It is proposed to amend the *Data requirements* of § 37.172(c) by including accelerate-stop and design landing stop deceleration values prescribed in the wheel brake system tests covered under § 37.172, paragraph 4.2(a)(2). In addition, § 37.172(c) would be amended to require only that the maintenance instructions be made available upon request since such instructions are not needed by the FAA for assessment of wheels and wheel-brake assembly performance.

In the proposed standard, paragraph 2(a)(1) has been amended to make clear that lubricant retainers must control lubricant in the bearing areas under all operating conditions and not just the maximums.

Rim repair instructions contained in current paragraph 2(b) have been deleted since this type of information belongs in the maintenance manual. The paragraph would also be amended to make clear that holes in all aluminum alloy and magnesium alloy parts must have protective finishes similar to

assemblies used on FAR 23, 25, 27 and requires that a certain number of test

V 4 3 / 2 3 6

other surfaces of the wheel to guard against corrosion.

Since there is no requirement for load ratings of the wheel-brake system design to be compared to ground reactions, the words "and wheel-brake system design" would be deleted from paragraph 3(a). Also, the words "accelerate-stop" and "rejected takeoff" are synonymous as they are used in the TSO and airworthiness standards. The TSO uses both terms but the airworthiness standards use only "accelerate-stop." To be consistent with the airworthiness standards, it is proposed to replace the term "rejected takeoff" with "accelerate-stop" in paragraph 3(b)(2).

In connection with proposed paragraph 4. *Qualification tests*, an introductory statement has been added to the paragraph requiring that the assemblies be tested and that the test data be included in the test report required in § 37.172(c)(2).

Paragraph 4.1(a)(1) would be revised to require that the wheel be fitted with the proper size tire during the qualification testing of the wheel to simulate conditions as demanding as those in actual service.

Paragraphs 4.1 (a)(2) and (b)(2) presently contain a wheel position sequence for applying the yield test loads such that the first load application is at the 0° position, then one load application each at 90°, 180°, and 270°, and finally two successive loads at the 0° position. As proposed, one test setup has been eliminated by requiring three load applications ending at the 0° position. The order of the load applications is not significant as long as the number of loads applied is the same. The permanent deformation allowable standard for wheels under test loads has been changed to 0.005 inches or 5 percent of the deflection caused by the test load, whichever is greater. Information available to the FAA indicates that it is difficult to measure the permanent set in small wheels for determining compliance with the existing 5 percent maximum allowable permanent deformation.

The present paragraph 4.1(a)(3) requirement that the ultimate load must be sustained for 10 seconds is significantly more severe than the required time for sustaining test loads on structure as specified in the airworthiness standards. See, for example, § 25.305(b). To be consistent with the airworthiness standards, paragraph 4.1(a)(3) would be amended to state a 3-second requirement.

Wheel and brake manufacturers have reported that in most tests conducted, tire bottoming occurs prior to reaching full application of ultimate loads. When tire bottoming occurs, high stresses are imposed on the wheel rims at the loading surface with possible rupturing of the tire or failure of the wheel due to the concentrated loads if load application is continued. One manufacturer stated that if the tire inflation pressure were increased over the allowable pressure, ultimate loads could be applied without the tire bottoming in most tests. An unlimited tire inflation pressure increase could not be allowed because of the potential hazards to test personnel due to possible tire blowouts. However, an allowance of 2 times rated inflation pressure is reasonable in view of the 2 times maximum radial limit load permitted in the tests. Some wheel and brake manufacturers have constructed a "loading block" which fits the contour of the wheel between the rim flanges and simulates the load transfer of the inflated tire. Use of this device permits application of ultimate loads without the concern of the tire bottoming. Provision for the "loading block" has been included in paragraphs 4.1 (a)(3) and (b)(3) to be used in the tests if increasing the inflation pressure of the tire to 2 times the rated inflation pressure fails to prevent tire bottoming.

The current requirement in paragraph 4.1(b)(1) is for the wheel axle to be positioned at the same angular orientation to the nondeflecting surface that the axle would have if it were mounted on an aircraft and the limit radial load applied. However, the purpose of the test is to determine how the wheel will react to the combined radial and side loads. Application of the side load could make a significant difference in the angular relationship of the axle to the nondeflecting surface. To determine the most accurate indication of the wheel's reaction to the combined radial and side loads, the angular position of the axle obtained under these loads has been proposed for the test.

The current paragraph 4.1(c)(1) requires that the wheel with tire mounted be positioned against a flat nondeflecting surface for the maximum static load test. However, the test consists of rolling the wheel for a given number of miles and this implies the wheel must be rolled on a flat nondeflecting surface for this distance. Such a test is impractical with present wheel testing technology. Testing machines with flat nondeflecting surfaces and for rolling are available but prohibitive in cost at this time. Manufacturers currently are conducting wheel roll tests on a dynamometer flywheel which has a curved surface and this testing procedure has been approved by the certifying regions. Therefore, the words "or a flywheel" would be added following the word "surface" in the first sentence of paragraph 4.1(c)(1). For the same reason, the word "nondeflecting" has been changed to "load" in the second sentence. Limit loads are specified in the second and third sentences of the present paragraph. Since this is a roll test to be conducted with static load application, the word "limit" would be replaced by the word "static" in paragraph 4.1(c)(1). Also, the words "with air" have been deleted in the third sentence since the certifying regions have approved other mediums, such as nitrogen and water, as a means of inflating the tire. Service records show that fatigue cracks and stress corrosion account for a large number of wheel failures during service operation. In evaluating the fatigue strength of wheels, the evaluation must include the typical loading spectrum expected in service which includes side loads as well as vertical loads. Side loads are encountered in all aircraft ground operations resulting from taxi turns, takeoff and landing crosswind gusts, and other causes. The TSO currently provides for static combined radial and side loads in the qualification testing of wheels but does not include side or yaw loads in the roll tests which more appropriately represent service operation.

In view of the foregoing, a new side load or yaw test standard is proposed for transport category airplanes in paragraph 4.1(c)(2). Ground operational distances to which the wheel may be expected to roll during its service life must be considered. In view of the wheel failures that have already occurred and, in order to extend the service life of wheels, the current 1,000 mile roll distance test would be increased to 2,000 miles.

Current paragraph 4.1(d)(1) requires that the wheel be hydrostatically tested to a burst pressure that is not less than the inflation pressure at the rated load "S" times a factor of 3.5 for airplanes and 3.0 for rotorcraft. References are made to "burst pressure" and the paragraph is titled "Burst test" implying that the wheel must be tested to the point that it "bursts". This implication is incorrect since the objective of the test is to ensure that the wheel will understand without failure a pressure somewhat greater than the rated inflation pressure of the tire with which it is to be used. Thus, the test pressure to be applied is not literally a burst pressure but rather an overpressure. Accordingly, the title of paragraph 4.1(d)(1) should be changed from "Burst test" to "Overpressure test".

Current paragraph 4.1(d)(2) specifies a static leakage test for the wheel and tubeless tire assembly requiring immersion in water after inflating the tire to an overpressure of 1.5 times the inflation pressure. There is no time limit given for the length of test and only a visual check for bubbles to determine if there is leakage. A more efficient and stringent test is contained in paragraph 4.1(d)(3) *Diffusion test* which is required to determine if the wheel will hold inflation pressure. It is therefore proposed to delete the static test, paragraph 4.1(d)(2).

The current paragraph 4.2 requires that the wheel-brake system be tested in order to qualify for its kinetic energy ratings and that it must use the recommended operating medium in the tests. Since it has already been made clear that the operating medium must be used in the tests, those words in parentheses at the end of the last sentence in paragraph 4.2 may be deleted.

The last sentence in paragraph 4.2(a)(1) lists certain devices that affect deceleration, such as propeller reverse pitch, drag parachutes, and engine thrust reversers, that are not to be considered in determining kinetic energy. Since this information is used in the Method II analysis, it would be moved to paragraph 4.2(a)(1)(ii) which speaks to Method II.

There have been reported cases in which small aircraft brakes have worn out prior to require annual inspection periods. Incidents involving aircraft over-running runways at small airports have also been reported. Paragraph 4.2(a)(2) would be revised to require additional design landing stop tests for wheel-brake assemblies intended for use on such aircraft. The number of design landing stops would be increased from 35 to 100 with one change of brake lining and attached discs allowed.

Airframe manufacturers have stated that the current 6 ft./sec.² deceleration specified in paragraph 4.2(a)(2) is often too low for modern transport category airplanes. Accordingly, they have proposed several methods for establishing higher, more appropriate decelerations. In a review of these methods, there is little evidence to indicate that the current 6 ft./sec.² deceleration is inadequate as a minimum TSO performance requirement. While it is true that manufacturers of larger transport aircraft would like higher rates to satisfy accelerate-stop distance criteria, such rates above the 6 ft./sec.² minimum can be selected if desired by the wheel-brake manufacturers, as a design limit and basis for TSO approval. To this extent, paragraph 4.2(a)(2) would be amended to require that FAR 25 wheel-brake assemblies be subjected to one accelerate-stop test at a minimum deceleration of 6 ft./sec.². In addition, the deceleration data would be included in the limitations data required by § 37.172(c)(1). With respect to landing stop decelerations, a minimum value would also be added for wheel-brake assemblies used on FAR 23, 25, 27 and 29 aircraft and the specific values obtained during the landing stop tests would be included in the data requirements under § 37.172(c)(1).

Paragraph 4.2(a)(3)(i) currently specifies that one change of brake lining and attached discs is permissible during the landing stop tests when determining the kinetic energy capacity (KE_{DL}) for wheel-brake assemblies. It is proposed to delete the words "and attached discs" since they redundant with respect to the definition of "brake lining" given in paragraph (iii). The last sentence of current paragraph 4.2(a)(3)(ii) states that the brakes must be usable to taxi the aircraft off the runway after the accelerate-stop tests. This requirement is not appropriate for a TSO since it involves an aircraft performance condition. However, to ensure that the intended usability of the brake assembly is retained, the requirement would be restated to require that the brake be usable following completion of the accelerate-stop test.

Paragraph 4.2(b) currently requires that a brake structural torque test be conducted; however, in the first sentence the applied load S is incorrectly identified as a radial load. Load S is a maximum static load as defined in paragraph 3(a)(1) of the TSO standard. The words "the radial" would therefore be removed. Application of torque load factors are identified in paragraphs (b)(1) and (2) where the letter R is currently defined as the normal "rolling" radius of a tire. The word "rolling" does not fully describe the condition of the tire required for the test, and would be replaced by the word "loaded". These same two paragraphs would be amended to make clear that rated inflation pressure of the tire is to be used in conducting the tests. In addition, since the footnote at the bottom of the present paragraph 4.2(b) is merely informational, it would be deleted.

Paragraph 4.2(c) requires that the brake with actuator piston extended to simulate a maximum worn condition must withstand a test hydraulic pressure equal to the greatest of three alternative test conditions. However, the hydraulic pressures resulting from conditions specified in paragraphs 4.2(c)(2) and (3) can in no way be greater than that in paragraph (1) and they may be less. It is therefore proposed to delete the substance of paragraphs (2) and (3).

Paragraph 4.2(d) requires that the hydraulic brake-wheel assembly be subjected to certain endurance tests. However, since only the brake assembly is involved, the word "wheel" would be deleted from "brake-wheel assembly" in the first and third sentences. Paragraph 4.2(d)(1) presently requires that a certain number of test cycles be performed at each of four piston positions; the requirement would be amended to make clear that the 25, 50, 75, and 100 percentages specified are percentages of the wear limit. Paragraph 4.2(d)(2) requires that for rotorcraft the hydraulic brake-wheel assembly must be subjected to 2,500 test cycles at a hydraulic pressure equal to the greatest of three alternative test conditions. However, since the hydraulic pressures resulting from conditions specified in paragraphs (d)(2)(i) and (d)(2)(ii) can be no greater than that specified in paragraph (d)(2)(iii), these three subparagraphs would be deleted and the information contained in (d)(2)(iii) included in paragraph (d)(2). The footnote at the bottom of paragraph 4.2(d) would be deleted as unnecessary.

Finally, a number of editorial or clarifying revisions to §§ 23.735, 25.735 and 37.172 are proposed which do not involve any substantive changes to the present requirements.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend Parts 23, 25 and 37 of the Federal Aviation Regulations (14 CFR Parts 23, 25 and 37) as follows:

PART 23—AIRWORTHINESS STANDARDS: NORMAL, UTILITY, AND ACROBATIC CATEGORY AIRPLANES

1. By amending § 23.735 by revising paragraph (a)(2) to read as follows:

§ 23.735 **Brakes.**

(a) • • •

(2) Instead of a rational analysis, the kinetic energy absorption requirements for each main wheel brake assembly may be derived from the following formula:

$$KE = 0.0442\ WV^2/N$$

where—

KE = Kinetic energy per wheel (ft.-lb.);
W = Design landing weight (lb.);
V = Airplane speed in knots. V must be not less than V_{S_0}, the poweroff stalling speed of the airplane at sea level, at the design landing weight, and in the landing configuration; and
N = Number of main wheels.

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

2. By amending § 25.735(b) by inserting the words "or § 25.125, as applicable," between the reference to "§ 25.75" and the word "with" in the first sentence; by deleting the words "that section" at the end of the first sentence of paragraph (b) and inserting in place thereof the words "those sections".

3. By amending § 25.735 by revising paragraph (f)(2) to read as follows:

DE 7 78 UMI

tions if the other positions are more be bled off to obtain the same tire de-

V 4 3 / 2 3 6

§ 25.735 **Brakes.**

• • • • •

(f) • • •

(2) Instead of a rational analysis, the kinetic energy absorption requirements for each main wheel brake assembly may be derived from the following formula, which assumes an equal distribution of braking between main wheels:

$$KE = 0.0442\ WV^2/N$$

where—

KE = Kinetic energy per wheel (ft.-lb.);
W = Design landing weight (lb.);
V = Aircraft speed (knots), V must be not less than V_{S_0}, the poweroff stalling speed of the airplane at sea level, at the design landing weight, and in the landing configuration; and
N = Number of main wheels.

The formula must be modified in cases of unequal braking distribution.

4. By amending § 25.735(g) by deleting the term "V_{S_0}" and inserting in place thereof the letter "V".

PART 37—TECHNICAL STANDARD ORDER AUTHORIZATIONS

5. By revising § 37.172 to read as follows:

§ 37.172 **Aircraft wheels and wheel-brake assemblies—TSO-C26c.**

(a) *Applicability.* This Technical Standard Order prescribes the minimum performance standards that aircraft landing wheels and wheel-brake assemblies must meet in order to be identified with the applicable TSO marking. New models of such equipment which are to be so identified and which are manufactured on or after (the effective date of this amendment) must meet the requirements of the Federal Aviation Administration Standard for Aircraft Wheels and Wheel-Brake Assemblies set forth at the end of this section.

(b) *Marking.* In lieu of the marking requirements of § 37.7, the aircraft wheels and brakes must be legibily and permanently marked with the following information:

(1) Name of the manufacturer responsible for compliance.

(2) Serial number or date of manufacture or both.

(3) Part number.

(4) Applicable technical standard order (TSO) number.

(5) Size (this marking applies to wheels only).

All stamped, etched, or embossed markings must be located in non-critical areas.

(c) *Data requirements.* (1) In addition to the data specified in § 37.5, the manufacturer must furnish to the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, in the region in which the manufacturer is located (or, in the case of the Western Region, the Chief, Aircraft Engineering Division), the following technical data:

(i) One copy of the applicable limitations pertaining to installation of wheels and brakes on aircraft, including the weight of the brake assembly, maximum static load rating, maximum limit load rating, maximum accelerate-stop kinetic energy in foot-pounds (KE_{RT}), design landing kinetic energy in foot-pounds (KE_{DL}), accelerate-stop deceleration in feet/second^2, design landing stop deceleration in feet/second^2, applicable speed as specified in paragraph 4.2(a)(1) of the FAA Standard for Aircraft Wheels and Wheel-Brake Assemblies, type of hydraulic fluid used, and the weight of the wheel.

(ii) One copy of the manufacturer's test report.

(2) Upon request of the regional office specified in paragraph (c)(1) of this section, the manufacturer must furnish the applicable maintenance instructions.

(d) *Previously approved equipment.* Wheels and wheel-brake assemblies approved prior to (the effective date of this amendment) may continue to be manufactured under the provisions of their original approval.

Federal Aviation Administration Standard for Aircraft Wheels and Wheel-Brake Assemblies

1. *Purpose.* This document contains minimum performance standards for aircraft landing wheels and wheel-brake assemblies.

2. *Design and construction.* (a) *Design.* (1) *Lubricant retainers.* Lubricant retainers must retain the lubricant under all operating conditions, prevent lubricant from reaching braking surfaces, and prevent foreign matter from entering the bearings.

(2) *Removable flanges.* All removable flanges must be assembled onto the wheel in a manner that will prevent the removable flange and its retaining device from eaving the wheel if a tire should deflate while the wheel is rolling.

(3) *Adjustment.* When necessary to assure safe performance, the brake mechanism must be equipped with suitable adjustment devices.

(4) *Water seal.* Wheels intended for use on amphibious aircraft must be sealed to prevent entrance of water into the wheel bearings or other portions of the wheel or brake, unless the design is such that brake action and service life will not be impaired by the presence of sea water or fresh water.

(5) *Explosion prevention.* Unless determined to be unnecessary, means must be provided to minimize the probability of wheel and tire explosions which result from elevated brake temperatures.

(b) *Construction.* (1) *Castings.* Castings must be of high quality, clean, sound, and free from blowholes, porosity, or surface defects caused by inclusions, except that loose sand or entrapped gases may be allowed when the serviceability of the casting has not been impaired.

(2) *Forgings.* Forgings must be of uniform condition, free from blisters, fins, folds, seams, laps, cracks, segregation, and other defects. If strength and serviceability are not impaired, imperfections may be removed.

(3) *Rim surfaces.* For wheels designed for use with a tire and inner tube combination, the surface of the rim between bead seats must be free from defects which would be injurious to the inner tube while mounting the tire or while in service.

(4) *Rim joints.* For wheels designed for use with a tire and inner tube combination, joints in the rim surface and joints between rim surfaces and demountable flanges must be smooth, closefitting, and noninjurious to the inner tube while mounting the tire, or while in service.

(5) *Rivets and bolts.* When rivets are used, they must be well headed over, and rivets or bolts coming in contact with the casing or tube must be smooth enough not to damage the tube or casing during normal operation.

(6) *Bolts and studs.* When bolts and studs are used for fastening together sections of a wheel, the length of the threads for the nut extending into and bearing against the sections must be held to a minimum; and there must be sufficient unthreaded bearing area to carry the required load.

(7) *Steel parts.* Wherever possibile all steel parts, except braking surfaces and those parts fabricated from corrosion resistant steel, must be cadmium plated or zinc plated. Where cadmium or zinc plating cannot be applied, the surface must be thoroughly cleaned and suitably protected from corrosion.

(8) *Aluminum parts.* All aluminum-alloy parts must be anodized or have equivalent protection from corrosion. This protection must include protection for fuse plug holes, valve stem holes, and other passages.

(9) *Magnesium parts.* All magnesium alloy parts must receive a suitable dichromate treatment or have equivalent protection from corrosion. This protection must include protection for fuse plug holes, valve stem holes, and other passages.

3. *Rating.* (a) Each wheel design must be rated for the following:

(1) S=Maximum static load in pounds (refs. §§ 23.731(b), 25.731(b), 27.731(b), and 29.731(b) of this chapter).

(2) L=Maximum limit load in pounds (ref. §§ 23.731(c), 25.731(c), 27.731(c), and 29.731(c) of this chapter).

(b) Each wheel-brake assembly design must be rated for the following:

(1) KE_{DL}=Kinetic energy capacity in foot-pounds per wheel-brake assembly at the design landing rate of absorption.

(2) KE_{RT}=Kinetic energy capacity in foot-pounds per wheel-brake assembly at the maximum accelerate-stop rate of absorption for wheel-brake assemblies of airplanes certificated under Part 25 of this chapter only.

4. *Qualification tests.* The aircraft wheels and wheel-brake assemblies must be tested as follows and the test data included in the applicant's test report required by paragraph (c)(1)(ii) of § 37.172.

4.1 *Wheel tests.* To establish the S and L ratings for a wheel, test a standard sample in accordance with the following radial, combined and static load test:

(a) *Maximum radial load test.* Test the wheel for yield and ultimate loads as follows:

(1) *Test method.* Mount the wheel, with a suitable tire of proper fit installed, on its axle, and position it against a flat nondeflecting surface. The wheel axle must have the same angular orientation to the nondeflecting surface that it will have to the runway when it is mounted on the aircraft and is under the maximum limit load. Inflate the tire to the pressure recommended for the S load with air or water. If water inflation is used, the water must be bled off to obtain the same tire deflection that would result if air inflation were used. Water pressure may not exceed the pressure which would develop if air inflation were used and the tire deflected to its maximum extent. Load the wheel through its axle perpendicular to the flat nondeflecting surface. Deflection readings must be taken at suitable points to indicate deflection and permanent set of the wheel rim at the bead seat.

(2) *Yield load.* Apply to the wheel a load not less than 1.15 times the maximum radial limit load, determined under §§ 23.471 through 23.511 or §§ 25.471 through 25.511, or §§ 27.471 through 27.505, or §§ 29.471 through 29.511 of this chapter, as appropriate. Apply the load with the wheel positioned against the nondeflecting surface, and the valve hole positioned at 90° with respect to the line between the center of the wheel and the point of contact, then with the valve hole positioned 180°, 270°, and 0° from the nondeflecting surface. The 90° increments must be altered to other positions if the other positions are more critical. Three successive loadings at the 0° position may not cause permanent set increments of increasing magnitude. The permanent set increment caused by the last loading at the 0° position may not exceed 5 percent of the deflection caused by that loading or 0.005 inches, whichever is greater. The bearing cups, cones, and rollers used in operation must be used for these loadings. There must be no yielding of the wheel such as would result in loose bearing cups, air or water leakage through the wheel or past the wheel seal, or interference in any critical areas.

(3) *Ultimate load.* Apply to the wheel a load, not less than 2 times the maximum radial limit load for castings and 1.5 times the maximum radial limit load for forgings, determined under §§ 23.471 through 23.511, or §§ 25.471 through 25.511, or §§ 27.471 through 27.505, or §§ 29.471 through 29.511 of this chapter, as appropriate. Apply the load with the same wheel positioned against the nondeflecting surface and the valve hole positioned at 0° with respect to the line between the center of the wheel and the point of contact. The wheel must be able to support the load without failure for at least 3 seconds. The bearing cones may be replaced with conical bushings, but the cups used in operation must be used for this loading. If at a point of loading during the test, it is shown that the tire will not successfully maintain pressure or if bottoming of the tire on the nondeflecting surface occurs, the tire pressure may be increased to no more than 2 times the rated inflation pressure. If bottoming of the tire continues to occur with this increased pressure, a loading block which fits between the rim flanges and simulates the load transfer of the inflated tire may be used. The arc of wheel supported by the loading block must be no greater than 60°.

(4) If the radial limit load in paragraph 4.1(b) is equal to or greater than the maximum radial limit in paragraphs 4.1(a) (2) and (3), the tests specified in paragraphs 4.1(a) (2) and (3) may be omitted.

(b) *Combined radial and side load test.* Test the wheel for the yield and ultimate loads as follows:

(1) *Test method.* Mount the wheel, with a suitable tire of proper fit installed, on its axle, and position it against a flat nondeflecting surface. The wheel axle must have the same angular orientation to the nondeflecting surface that it will have to the runway when it is mounted on the aircraft and is under the combined radial and side load. Inflate the tire to the pressure recommended for the maximum static load with air or water. If water inflation is used, the water must be bled off to obtain the same tire deflection that would result if air inflation were used. Water pressure may not exceed the pressure which would develop if air inflation were used and the tire deflected to its maximum extent. For the radial load component, load the wheel through its axle perpendicular to the flat nondeflecting surface. For the side load component, load the wheel through its axle parallel to the flat nondeflecting surface. The side load reaction must arise from the friction of the tire on the nondeflecting surface. Apply the 2 loads simultaneously, increasing them either continuously or in increments no larger than 10 percent of the loads to be applied. Alternatively, a resultant load equivalent to the radial and side loads may be applied to the axle. Deflection readings must be taken at suitable points to indicate deflection and permanent set of the wheel rim at the bead seat.

(2) *Yield load.* Apply to the wheel radial and side loads not less than 1.15 times the respective ground loads determined under §§ 23.485, 23.497, and 23.499, or §§ 25.485, 25.495, 25.497, and 25.499, or §§ 27.485 and 27.497, or §§ 29.485 and 29.497 of this chapter, as appropriate. Apply these loads with the wheel positioned against the nondeflecting surface, and the valve hole positioned at 90° with respect to the line between the center of the wheel and the point of contact, then with the valve hole positioned 180°, 270°, and 0° from the nondeflecting surface. The 90° increments must be altered to other positions if the other positions are more critical. Three successive loadings at the 0° position may not cause permanent set increments of increasing magnitude. The permanent set increment caused by the last loading at the 0° position may not exceed 5 percent of the deflection caused by that loading, or 0.005 inches, whichever is greater. The bearing cups, cones, and rollers used in operation must be used in this test. There must be no yielding of the wheel such as would result in loose bearing cups, air or water leakage through the wheel or past the wheel seal, or interference in any critical areas. A tire and tube may be used when testing a tubeless wheel only when it has been demonstrated that pressure will be lost due to the inability of a tire bead to remain properly positioned under the load. The wheel must be tested for the most critical inboard and outboard side loads.

(3) *Ultimate load.* Apply to the wheel radial and side loads not less than 2 times for castings and 1.5 times for forgings the respective ground loads determined under §§ 23.485, 23.497 and 23.499, or §§ 25.485, 25.495, 25.497 and 25.499, or §§ 27.485 and

D E 7 7 8 UMI

V 4 3 / 2 3 6

27.497, or §§ 29.485 and 29.497 of this chapter, as appropriate. Apply these loads with the same wheel positioned against the nondeflecting surface and the valve hole positioned at 0° with respect to the center of the wheel and the point of contact. The wheel must be able to support the load without failure for at least 3 seconds. The bearing cones may be replaced with conical bushings, but the cups used in operation must be used for this loading. If at a point of loading during the test it is shown that the tire will not successfully maintain pressure or if bottoming of the tire on the nondeflecting surface occurs, the tire pressure may be increased to no more than 2 times the rated inflation pressure. If bottoming of the tire continues to occur with this increased pressure, a loading block which fits between the rim flanges and simulates the load transfer of the inflated tire may be used. The arc of wheel supported by the loading block must be no greater than 60°.

(c) *Maximum static load test.* Test the wheel for the maximum static load test as follows:

(1) *Test method.* Mount the wheel, with a suitable tire of proper fit installed, on its axle, and position it against a flat nondeflecting surface or a flywheel. The wheel axle must have the same angular orientation to the load surface that it will have to the runway when it is mounted on the aircraft and is under the maximum static load. Inflate the tire to the pressure recommended for the maximum static load "S". The radial load must be applied to the wheel through the axle and perpendicular to the load surface. The side load, when required, must be applied through the wheel axle and parallel to the load surface. For the side load, the wheel axle must be rotated or yawed to that angle which will produce a side load component equal to 0.15 "S" while the wheel is being roll tested.

(2) *Roll test.* The wheel must be tested under the loads and for the distances shown in Table I. At the end of the test there must be no cracks in the wheel and no leakage through the wheel or past the wheel seal, and the bearing cups may not be loosened in the hub.

TABLE I

Category of aircraft and load conditions	Roll distance (miles)
Part 25:	
Maximum static load, "S"	2,000
Maximum static load, "S" plus 0.15 "S" side load applied in outboard direction	100
Maximum static load, "S" plus 0.15 "S" side load applied in inboard direction	100
Part 23:	
Maximum static load, "S"	1,000
Parts 27 and 29:	
Maximum static load, "S"	250

(d) *Pressure test.* Pressure test the wheel in accordance with the following:

(1) *Overpressure test.* The wheel must be hydrostatically tested to withstand without failure for at least 3 seconds application of an overpressure factor not less than 4.0 for Part 25 airplanes, 3.5 for Part 23 airplanes, and 3.0 for rotorcraft, times the rated inflation pressure determined by the applicant.

(2) *Diffusion test.* The tubeless tire and wheel assembly must hold the rated inflation pressure for 24 hours with no greater pressure drop than 5 percent. This test must be performed after the tire growth has stabilized.

4.2 *Wheel-brake assembly test.* A sample of a wheel-brake assembly design must meet the following tests to qualify the design for its kinetic energy ratings. The wheel of a wheel-brake assembly must be separately tested under paragraph 4.1. The wheel-brake assembly must be tested with the operating medium specified by the manufacturer.

(a) *Dynamic torque tests.* Test the wheel-brake assembly on a suitable inertia brake testing machine in accordance with the following:

(1) *Speed and weight values.* For airplanes, select either Method I or Method II below to calculate the kinetic energy level which a single wheel and wheel-brake assembly will be required to absorb. For rotorcraft, use Method I.

(i) *Method I.* Calculate the kinetic energy level to be used in the brake testing machine by using the equation:

$$KE = \frac{0.0442\ WV^2}{N}$$

Where—

KE = Kinetic energy per wheel-brake assembly (ft.lbs.);
W = Design landing weight (lbs.);
V = Aircraft speed in Knots. V must not be less than V_{S_0}, the power-off stalling speed of the aircraft at sea level, at the design landing weight, and in the landing configuration. For the accelerate-stop tests, applicable only to wheel-brake assemblies for airplanes certificated under Part 25 of this chapter, the manufacturer must determine the most critical combination of takeoff weight and speed; and
N = Number of wheels with brakes.

For rotorcraft, the manufacturer must calculate the most critical combination of takeoff weight and brake application speed to be used in the above equation.

(ii) *Method II.* The speed and weight values may be determined by other equations based on a rational analysis of the sequence of events expected to occur during operational landing at maximum landing weight. The analysis must include rational or conservative values for braking coefficients of friction between the tire and runway, aerodynamic drag, propeller drag, powerplant forward thrust, and, if critical, loss of drag credit for the most adverse single engine or propeller due to malfunction. Do not consider the decelerating effects of propeller reverse pitch, drag parachutes, and powerplant thrust reversers.

(2) *Test requirements.* The wheel-brake assembly must bring the inertia testing machine to a stop at the average deceleration, and for the number of repetitions, specified in Table II without failure, impairment of operation, or replacement of parts except as permitted in paragraph 4.2(a)(3):

TABLE II

Category of aircraft	Tests
Parts 23 and 25	KE_{DL}: 100 design landing stops at a deceleration selected by manufacturer but not less than 10 ft/sec².
Part 25	KE_{RT}: 1 accelerate-stop at a deceleration selected by manufacturer but not less than 6 ft/sec².
Parts 27 and 29	KE_{DL}: 20 design landing stops at a deceleration selected by manufacturer but not less than 6 ft/sec².

(3) *General conditions.* (i) During landing stop tests (KE_{DL}), one change of brake lining is permissible. The remainder of the brake assembly parts must withstand the 100 KE_{DL} stops without failure or impairment of operation.

(ii) During the accelerate-stop tests (KE_{RT}), brake lining and bare discs may be new or used. No less than two landing stop tests must have been completed on the brake prior to this test. The brake must be usable for taxi after the accelerate-stop test to KE_{RT}.

(iii) As used in this paragraph, "brake lining" is either individual blocks of wearing material or discs which have wearing material integrally bonded to them. "Bare discs" are plates or drums which do not have waring material integrally bonded to them.

(b) *Brake structural torque test.* Apply load S and a torque load specified in paragraph 4.2(b) (1) or (2), as applicable, for at least 3 seconds. Rotation of the wheel must be resisted by a

reaction force transmitted through the brake or brakes by an application of at least maximum brake line pressure or brake cable tension in the case of a nonhydraulic brake. If such pressure or tension is insufficient to prevent rotation, the friction surface may be clamped, bolted, or otherwise restrained, while applying the pressure or tension.

(1) For landing gears with only one wheel per landing gear strut, the torque load is 1.2 SR where R is the normal loaded radius of the tire at rated inflation pressure under load S.

(2) For landing gears with multiple wheels per landing gear strut, the torque load is 1.44 SR where R is the normal loaded radius of the tire at rated inflation pressure under load S.

(c) *Overpressure—hydraulic brakes.* The brake with actuator piston extended to simulate a maximum worn condition must withstand hydraulic pressure, for at least 3 seconds, equal to the following:

(1) For airplanes, 2 times the maximum brake line pressure available to the brakes.

(2) For rotorcraft, 2 times the pressure required to hold the rotorcraft on a 20° slope at design takeoff weight.

(d) *Endurance tests—hydraulic brakes.* The hydraulic brake assembly must be subjected to an endurance test during which the total leakage may not exceed 5cc. and no malfunction may occur during or upon completion of the test. Minimum piston travel during the test may not be less than the maximum allowable piston travel in operation. The tests must be conducted by subjecting the hydraulic brake assembly to—

(1) 100,000 cycles for airplanes, and 50,000 cycles for rotorcraft, of application and release of the average hydraulic pressure needed in the KE_{DL} tests specified in paragraph 4.2(a)(2) except that manufacturers using Method II in conducting the tests specified in paragraph 4.2(a)(2) must subject the wheel-brake assembly to the average of the maximum pressures needed in those tests. The piston must be adjusted so that 25,000 cycles for airplanes, and 12,500 cycles for rotorcraft, are performed at each of the four positions where the piston would be at rest when adjusted for 25, 50, 75 and 100 percent of the wear limit; and

(2) 5,000 cycles for airplanes, and 2,500 cycles for rotorcraft at the maximum system pressure available to the brakes.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.45.)

NOTE.—The Federal Aviation Administration has determined that this document is not significant in accordance with the criteria required by Executive Order 12044, and set forth in proposed "Department of Transportation regulatory Policies and Procedures" published in the FEDERAL REGISTER June 1, 1978 (43 FR 23925).

Issued in Washington, D.C., on November 29, 1978.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 782 3023]

GENERAL MILLS FUN GROUP, INC.

Consent Agreement with Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Minneapolis, Minn. subsidiary of General Mills, Inc. to cease in the advertising and sale of its toy products, misrepresenting or failing to make relevant disclosures regarding the performance, operation, use, size or appearance of such products through visual portrayals, descriptions, or commercial production techniques. General Mills, Inc. would also be bound by the terms of the order.

DATE: Comments must be received on or before February 2, 1979.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St. and Pennsylvania Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

William S. Sanger, Assistant Director For Division Of Compliance, Federal Trade Commission, 1726 M St., NW., Washington, D.C. 20580. (202) 254-6128.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record, together with material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act, for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9 (b)(14)).

[File No. 782 3023]

GENERAL MILLS FUN GROUP, INC.

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

The Federal Trade Commission having initiated an investigation of certain acts and practices of General Mills Fun Group, Inc., a corporation, and it now appearing that General Mills Fun Group, Inc., a corporation, hereinafter referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated:

It is hereby agreed by and between General Mills Fun Group, Inc., by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission, that:

1. Proposed respondent General Mills Fun Group, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Nevada, with an office and place of business located at 9200 Wayzata Boulevard, Minneapolis, Minnesota.

Proposed respondent General Mills Fun Group, Inc., is a wholly-owned subsidiary of General Mills Inc., a corporation, and is comprised of several divisions, including among others, Kenner products.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or reviews submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper or inadequate.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(d) of the Commission's Rules, the Commission may, without further

D E 7 7 8 UMI

DATES: Notification of interest, in

V 4 3 / 2 3 6

notice to proposed respondent (1) issue its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the decision containing the agreed-to order to proposed respondent's business address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent had read the proposed complaint and order contemplated hereby, and it understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

It is hereby further agreed by and between General Mills, Inc., by its duly authorized officer and its attorney and counsel for the Federal Trade Commission, that General Mills, Inc. has read the proposed complaint and order contemplated hereby and that General Mills, Inc. shall be bound by the terms of the order as set forth in the following order.

ORDER

For the purposes of this Order:

1. The compression of a television commercial into a short time span shall not be considered a violation of this Order so long as it does not result in the misrepresentation to children of the toy's performance or operation.

2. The term "children" shall mean the age group or age groups of children as shown on the packaging for whom the manufacturer recommends use of the toy.

3. The effectiveness of any oral or written disclosure, disclaimer or qualification of any visual portrayal or oral or written description shall be considered in determining whether the advertisement, as a whole, misrepresents to children the toy's performance, operation, size or appearance.

4. The term "commercial production technique" shall include, but not be limited to, the use in commercial production of prototypes or other non-production or modified versions of a toy, controlled action sequences, mechanical or human assistance to child actors in actuating or manipulating the toy during or prior to commercial production, the use of special camera lenses or film or audio techniques, including video or audio overlays or the like, and the use of splicing or editing techniques.

5. The use of "commercial production techniques" shall not be considered a violation of this Order so long as they do not result in the misrepresentation to children of the toy's performance, operation, size or appearance.

I

It is ordered, That General Mills Fun Group, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, sale, offering for sale or distribution of toys or related products (hereinafter referred to as "toys"), in or affecting commerce, cease and desist from, directly or indirectly, portraying or describing in an advertisement the performance, operation, use, size, appearance, components or similar characteristic of such toy by or through the use of:

A. Any visual portrayal or oral or written description of the performance or operation of a toy in any manner which cannot be duplicated by children in the ordinary use of such toy.

B. Any use of commercial production technique that results in any visual portrayal or oral or written description which, in the context of the advertisement as a whole, misrepresents to children a toy's performance, operation, size or appearance.

C. Any visual portrayal or oral or written description of the performance or operation of a toy which fails to disclose to children the need for human or mechanical assistance, when such failure, in the context of the advertisement as a whole, mispresents to children such toy's performance or operation.

II

It is further ordered, That respondent shall forthwith distribute a copy of this Order to each of its operating divisions.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this Order.

It is further ordered, That the respondent herein shall, within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

III

It is further ordered, That General Mills, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, employees, directly or through any corporation, subsidiary (other than General Mills Fun Group, Inc.), division or other device, shall be bound by the terms of this Order in the event it engages in the advertising of toys, in or affecting commerce, excluding those advertisements for toys not manufactured by or for General Mills, Inc. and those advertisements relating to the use of toys as premiums in connection with the sale of non-toy products.

It is further ordered, That General Mills, Inc., a corporation, shall be liable for any penalties or other legal or equitable relief which arise or could have arisen from any suit based on any alleged violation of this Order committed by any subsidiary, division or other device of General Mills, Inc. subject to this Order (hereafter "company"), or by their officers, representatives or employees, while such company was owned by General Mills, Inc., if, for any reason, such as sale, dissolution, merger, reorganization, insolvency or termination, the company is not amenable to suit or the execution of full judgment.

GENERAL MILLS FUN GROUP, INC.

[File No. 782 3023]

ANALYSIS OF PROPOSED ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement to a proposed consent order from General Mills Fun Group, Inc., under Section 5 of the FTC Act. This company is a wholly-owned subsidiary of General Mills, Inc.

The proposed consent has been placed on the public record for a period of sixty (60) days for reception of comments by interested parties and the public. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

I. *Introduction.* This matter concerns three television advertisements broadcast by Kenner Products, a division of General Mills Fun Group, Inc. The first advertisement is for "Nugget," a ten-inch high toy horse which is an accessory to the "Dusty" doll, also sold by Kenner Products. In this commercial, two young girls are shown playing with one "Nugget" and one "Dusty." The second advertisement is for "Lightnin' TTP," a launcher and car set. Here, three boys are shown playing with three launcher and car sets and they perform several stunts with the cars. The third advertisement is for "TTP Trouble Patrol," which consists of a launcher, a car, a motorcycle and some accessories. In this advertisement, two boys are shown playing together with one "Trouble Patrol" set and they perform several stunts with the car and motorcycle.

II. *The Proposed Complaint.* The proposed Section 5 complaint contains three charges of unfair or deceptive acts or practices. Paragraph Seven alleges that the three challenged advertisements contain the following representations:

1. That "Nugget" will stand without any human assistance or mechanical aid.

2. That a child can exercise a high degree of control over the speed and direction of the "Lightnin' TTP" car when it is launched from the "Lightnin' TTP" launcher and thereby can perform certain acts or series of acts with the "Lightnin' TTP" car as shown in one of the challenged advertisements.

3. That a child can exercise a high degree of control over the speed and direction of the "TTP Trouble Patrol" motorcycle and car when they are launched from the "TTP Trouble Patrol" launcher and thereby can perform certain acts or series of acts as shown in one of the challenged advertisements.

Paragraph Eight alleges that these representations are false and that, in truth and in fact, "Nugget" cannot stand by itself and a child cannot exercise a high degree of control or perform the depicted acts with the "Lightnin' TTP" set or the "TTP Trouble Patrol" set. Paragraph Eight further alleges that the representations referred to in Paragraph Seven are deceptive and/or unfair.

III. *The Proposed Consent Order.* The proposed consent order contains the following paragraphs which prohibit General Mills Fun Group, Inc. from using certain practices when it advertises toys.

PARAGRAPH I(A)

Paragraph I(A) prohibits the use of any portrayal or description of a toy's performance which cannot be duplicated by children in the ordinary use of the toy.

PARAGRAPH I(B)

Paragraph I(B) prohibits the use of any filming, production or editing technique which results in the misrepresentation to children of the toy's performance, operation, size or appearance.

PARAGRAPH I(C)

Paragraph I(C) prohibits the use of any portrayal or description of the performance of a toy which does not disclose to children that the toy needs human or mechanical assistance when such lack of disclosure results in the misrepresentation to children of the toy's performance or operation.

REMAINING PARAGRAPHS OF THE ORDER

Section II of the proposed order contains standard language required in most Commission orders. These provisions enable the Commission to determine whether the order is being complied with.

Section III of the proposed order contains two paragraphs which bind the parent company, General Mills, Inc. The first paragraph provides that if General Mills, Inc. does any toy advertising in the future, it will be bound by the order. The second paragraph holds General Mills, Inc. under certain circumstances to be liable for the actions of its subsidiaries which are under the proposed order.

IV. *Conclusion.* The purpose of this analysis is to aid public comment on the proposed order and is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

CAROL M. THOMAS,
Secretary.

[6750-01-M]

[16 CFR Part 457]

STANDARDS AND CERTIFICATION

Proposed Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This proposed rule would establish prohibitions and requirements for standards developers, certifiers, and persons who reference standards or certifications in the marketing of products.

This notice sets out the rulemaking procedures to be followed, the text of the proposed rule, a list of general questions upon which the Commission particularly desires comment and testimony, an invitation for written comments, and instructions for prospective witnesses and other persons who desire to testify or otherwise participate in the proceeding.

DATES: Notification of interest in questioning witnesses must be submitted on or before March 2, 1979.

Written comments must be submitted on or before March 16, 1979.

Prepared statements of witnesses and exhibits (if any) must be submitted on or before March 26, 1979 for witnesses at the San Francisco hearings and April 30, 1979 for witnesses at the Washington, D.C. hearings.

Public hearings commence at 9:00 a.m. on April 16, 1979 in San Francisco and at 9:00 a.m. on May 21, 1979 in Washington, D.C.

ADDRESSES: Notifications of interest, written comments, prepared statements of witnesses and exhibits should be submitted, when feasible and not burdensome, in five copies, to Henry B. Cabell, Presiding Officer (PU), Federal Trade Commission, Washington, D.C. 20580, 202-724-1045. The public hearings will be held in Room 15022, Federal Building, 450 Golden Gate Avenue, San Francisco, California and in Room 332, Federal Trade Commission Building, Pennsylvania Avenue and 6th Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Robert J. Schroeder, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, 202-523-3936.

SUPPLEMENTARY INFORMATION: The proposed rule would apply to the development and use of product standards, to the related activity of product certification, and to the referencing of product standards and use of certifications by sellers in the marketing of their products. The proposed rule requires standards developers to notify specified classes of persons of a standards development proceeding. The notice must describe the proposed action in sufficient detail to enable persons to determine whether they should participate in the proceeding. A general right to participate in all phases of standards proceedings is established. The proposed rule requires standards developers and certifiers to disclose any serious hazards that are not immediately apparent to users. The rule also establishes a redress system that private parties can use to challenge unfair, deceptive or anticompetitive standards. Certain product standard areas are proposed as exempt from the rule, including food and drug standards and certain certifier test methods. In addition, comment is specifically requested as to whether procedural, challenge, and other rights and benefits should be granted only to persons from countries which grant reciprocal rights to United States interests. Nonproduct standards, such as standards of professional competence or financial accounting standards, are considered beyond the scope of this proceeding.

Private standards development and certification activities are in the nature of an intermediate service in commerce. Standards and certifications are relied on extensively in commerce to facilitate communication between sellers and buyers, promote the interchangeability of products and components, transfer technology, assure the safety, fitness and energy efficiency of products, and help achieve efficiencies in design, production and inventory. Despite these benefits, standards development and certification activities have frequently caused or contributed to substantial consumer and competitive injuries. The injuries include, among others, denial to consumers of the benefits of superior or lower cost technology denial to businesses of the opportunity to enter and compete in profitable industries, inadequate product safety levels, unnecessary costs, and failure to provide for disclosure of important porduct hazard or use information.

The following discussion is intended only to highlight the major provisions of the proposed rule, and to explain the reasons for the rule provisions and their anticipated effect. The full staff report contains a detailed analysis of the proposed rule and the reasons for each rule provision. Copies of the staff report are available in Room 130, Public Reference Room, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580, and may be obtained in person or by mail.

Subpart A sets forth the rule's scope and defines relevant terms.

Subpart B imposes procedural safeguards on the standards development process and creates a framework for principled decision-making. Section 457.3 requries that the standards developer establish and follow written procedures. Section 457.4 requires that the standards developer notify specified persons 30 days prior to commencement of any proceeding to develop, revise or withdraw a standard. This notification must contain information describing the purpose of the proceeding and how interested persons may participate. The information that standards developers currently include in their general notices is insufficient to permit persons to make an informed decision as to whether they want to participate in the proceeding.

Section 457.4 requires that the standards developer also notify specified persons of its intention to adopt, revise, or withdraw a standard at least 60 days prior to a final decision. This notification must contain, among other items, a copy or summary of the proposal, and a statement of the

D E 7 7 8 UMI

Subpart E—Marketing

V 4 3 / 2 3 6

major substantive disputes that occurred during the proceeding and the reasons these disputes were decided as they were. The purpose of this requirement is to provide interested parties with enough information to judge the action prior to reliance on the standard in the market. The statement of major disputes and the reasons for decisions on them is intended to aid interested parties in formulating their input into the process. The section also requires that the standards developer notify specified persons 30 days prior to the effective date of the action.

The time limits that are set throughout the section are necessary to enable recipients of the notices to make use of the information provided. These time limits do require that a standards developer will spend a certain minimum amount of time in the standards proceeding; however, this will not slow the process, as most proceedings appear to take far longer.

The proposed rule specifies classes of persons that must receive notice. These classes include producers, institutional and individual consumers, government procurement and code officials, certifiers, environmental and energy conservation groups and others who may have an interest in the proceeding. Standards developers have often failed to give adequate consideration to all interested parties. To preclude full participation by interested parties is to run the risk of making a decision on incomplete data and without consideration of all viewpoints on critical issues.

It is expected that direct mailings will be the dominant mode of providing the required notice to all interested persons, although the standards developer is free to use other means to achieve actual notice to the required parties. The notice provisions in this section may impose some costs associated with printing and mailing. The costs are limited, however, by the restricted universe of recipients. The provision may also, in some instances, permit fewer notices than are currently provided.

Section 457.5 establishes a general right to participate in all phases of all standards proceedings to all persons. The term participate includes such things as direct involvement in oral deliberations, submission of written materials, and receipt of agenda and minutes. The purpose of the requirement is to expand the universe of inquiry by ensuring that all interests have the opportunity to present their arguments during a standards development proceeding.

Sections 457.6 and 457.7 create a complaint mechanism which private parties can use if they believe that they are being harmed by unfair, deceptive or anticompetitive standards. Section 457.6 permits a complainant to test standards against the following basic principles:

1. Standards should have logical and technical justification in light of their stated or implied policy goals;

2. Standards should not exclude products that are equivalent to products not excluded;

3. Rather than excluding products, standards developers should choose the least restrictive alternative, i.e., one which preserves or increases buyer options and the opportunity of sellers to compete;

4. Standards should avoid raising false presumptions that two or more conforming products are homogeneous in performance or safety;

5. Standards should not be drawn to cause misreliance that results in economic loss to buyers or exposes product users to unforeseen risks.

While the notice and participation requirements of the proposed rule do provide that all viewpoints may be heard, they do not guarantee that the decision will reflect consumer protection and competition policies. The purpose of § 457.6 is to enable private parties to raise these issues to a standards developer and receive consideration. The standards developer is required under § 457.7 to take appropriate action when a complainant prevails in a challenge under § 457.6. Appropriate action consists of actions necessary to cure the harm and must be completed within a reasonable time period. If a standards developer determines that it is not required to take appropriate action, it must notify the complainant of the reason for the decision, and of the existence of an appeal board established under § 457.10 of the proposed rule.

Section 457.8 requires that every standard that is promulgated must disclose its intended scope, and warn of any serious hazards or limitations in conforming products that are not immediately apparent to users. These disclosures are intended to insure informed use of standards and guard against deception and misreliance that might occur in their absence.

Section 457.9 imposes a recordkeeping obligation on standards developers. The provision merely requires retention of written materials compiled in the course of a proceeding. Records would be open to the public.

Section 457.10 requires the standards developer to establish an impartial appeal board to hear disputes relating to procedural matters, or to unfair, deceptive or restrictive standards. Under the section the standards developer cannot unreasonably refuse to abide by appeal board decisions.

Section 457.11 sets out several categories of standards and standards development activities that are being proposed as exemptions under the rule. They include certain certifier test methods and standards relating to food, drugs, and other products regulated by the Food and Drug Administration. The exemptions generally reflect an intent either to shield certain standards development activity from procedural or other rule burdens, or to limit the scope of the rule. The rule proceeding will attempt to discern the proper scope of the exemptions, in light of existing practices, costs, and the public interest. One of the questions on which comment is specifically requested is whether an exemption should be included which would limit the ability of a person from a foreign country to exercise rights created by the rule if similar rights were not granted to United States interests in their country.

Subpart C sets out the duties of certifiers. Section 457.12 requires the certifier to use standards properly by following the requirements in the standards and any later requirements issued by the standards developer. Further, under § 457.12 the certifier must require a seller who uses its seal of approval to disclose specified information on or near the seal. The disclosure must include a statement of the product attributes that are covered by the certification, and a statement warning of any serious risks or limitations associated with use of the product which are disclosed in standards as required by § 457.8.

In addition, the section requires a certifier to take action against producers that abuse its seal or listings. This can occur, for example, when products represented as being certified do not comply with relevant standards. The certifier's action may consist of withdrawal of the certification, probation, retesting or other appropriate action. A certifier that has knowledge that a standard it is using in certification violates the § 457.6 complaint criteria must request action on it by the standards developer. The required disclosures and obligations are intended to prevent uninformed use of a product and to prevent deception and consumer misreliance.

Section 457.13 applies only to certifiers who are relied on to such an extent in a market that they, in effect, control access of products to that market. The section prohibits granting or denying certification, or discriminating in the quality of service, based on such factors as a producer's trade association membership, size of the producer, product origin, and whether a product is intended for retrofit rather than installation as original equipment.

The section also prohibits certifiers from imposing test requirements that

D E 7 7 8 UMI

are unnecessary in terms of buyer expectations. Superfluous retesting requirements on products tested by competent laboratories or on product changes that do not affect safety or performance are also prohibited. One other requirement for certifiers subject to § 457.13 is that they establish an impartial appeal board to hear disputes relating to duties under that section.

If a certifier refuses to do business with one producer, but not other producers of the same product, the first producer will be excluded from markets that require the certification. Even if the certification is not an absolute requirement, the excluded producer will have a marketing disadvantage to the extent that buyers view the absence of certification as connoting an inferior or unsuitable product. The purpose of the prohibition is to eliminate unfair discrimination in the certification process and thereby expand producer and consumer options.

Section 457.14 imposes a recordkeeping obligation on certifiers. The provision requires that the certifier keep records relating to the certification of individual products, as well as any complaints it receives about deceptive or otherwise improper use of its seal of approval by sellers. The records must be made available to a client in a certification action for inspection and copying. Records are not required to be made available to the general public because of the need to protect trade secrets. The recordkeeping provisions should not be unduly burdensome in that it appears to follow current certifier practices.

Section 457.15 sets forth several categories of certification that are being proposed as exemptions under the rule. These include, among others, certifications relating to food, drugs, and other products regulated by the Food and Drug Administration, and representations such as endorsements which consumers are likely to believe are subjective or not based on controlled testing.

One of the questions on which comment is specifically requested is whether an exemption should be included which would limit the ability of a person from a foreign country to exercise rights created by the rule if similar rights were not granted to United States interests in their country.

Subpart D, § 457.16, sets forth requirements for the impartial appeal board that must be established by standards developers and certifiers pursuant to §§ 457.10 and 457.13(e) respectively. It outlines certain requirements that the appeal board must observe to ensure that the parties are given a fair hearing. These include, among others, that the board be independent of the sponsoring organizations and that members have no conflicts of interest relating to the appeal. The appeal board must render a decision within 60 days of its receipt of a complaint.

Subpart E, § 457.17, contains several prohibitions and requirements applying to sellers who represent conformance with standards in the marketing of their products. It requires the marketer to disclose information relating to product attributes covered by the standard and any product hazards or limitations. It prohibits the marketer from marketing a product in a manner contrary to requirements contained in the standard or imposed by the certifier. The purpose of the provision is to ensure that standards are complied with, and that buyers receive the information required in other sections of the rule.

Section A. Proposed Trade Regulation Rule

Notice is hereby given that the Federal Trade Commission, pursuant to the Federal Trade Commission Act, as amended, 15 U.S.C. 41, *et seq.*, the provisions of Part 1, Subpart B of the Commission's procedures and rules of practice, 16 CFR 1.7, *et seq.*, and section 553 of subchapter II, Chapter 5, U.S. Code (Administrative Procedure), has initiated a proceeding for the promulgation of a trade regulation rule concerning the development of standards, certification of products, and use of standards and certifications in marketing.

Accordingly, the Commission proposes the following Trade Regulation Rule and would amend Subchapter D, Trade Regulation Rules, Chapter I of 16 CFR by adding a new Part 457 as follows:

PART 457—STANDARDS AND CERTIFICATION

Subpart A—Scope and Definitions

Sec.
457.1 Scope.
457.2 Definitions.

Subpart B—Standards

457.3 Written procedures.
457.4 Notice.
457.5 Participation.
457.6 Duty to act.
457.7 Appropriate action.
457.8 Required disclosures.
457.9 Recordkeeping and access.
457.10 Appeals.
457.11 Exemptions.

Subpart C—Certification

457.12 General certifier duties.
457.13 Additional certifier duties.
457.14 Recordkeeping and access.
457.15 Exemptions.

Subpart D—Appeal Board

457.16 Appeal board.

Subpart E—Marketing

457.17 Use of standards and certifications.

Subpart F—Notes

AUTHORITY: 38 Stat. 717, as amended, 15 U.S.C. 41, *et seq.*

Subpart A—Scope and Definitions

§ 457.1 Scope.

(a) This part shall apply to the development of standards, the certification of products, and the use in marketing of standards and certifications, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, 15 U.S.C. 41, *et seq.*

(b) It is an unfair method of competition and an unfair or deceptive act or practice, within the meaning of section 5(a)(1) of the Federal Trade Commission Act, 15 U.S.C. 45(a)(1), for any standards developer, certifier, or marketer to violate any applicable provision of this part.

§ 457.2 Definitions.

(a) *Certification.* The grant of a form of approval, as well as the process on which the grant (or denial) is based. The process may include sampling, testing, inspection, followup, and related activities. Certification does not include self-certification, or official governmental acts.

(b) *Certifier.* A person who engages in the process of granting forms of approval. Certifier does not include a governmental entity acting in its official capacity.

(c) *Evidence.* Materials of any kind or written arguments (whether or not accompanied by supporting materials), that are offered in support of a proposition.

(d) *Form of approval.* A seal, statement of conformance, label, classification, listing in a directory, and any other affirmation that a product complies with, or performs in a specified manner in relation to, a standard or other requirement.

(e) *Marketer.* A manufacturer, wholesaler, retailer, or other person who engages in marketing.

(f) *Marketing.* The sale, offering for sale, advertising, or promotion of products.

(g) *Person.* An individual, proprietorship, partnership, corporation, association, federal, state, and local government agency, and any other entity.

(h) *Product.* A finished product, components, equipment, materials, and lighting, heating or other systems. The term includes both personal and real property, and any other consumer or producer good.

(i) *Recognized area of competence.* A product area in which the standards developer holds itself out as competent to do business, or in which persons who rely on the standards devel-

producers of competing products. The

action accompanied by substantial evi- misrepresent product attributes to rea- graph (c)(1) of this section timetable.

V 4 3 / 2 3 6 D E 7 7 8 UMI

oper would reasonably recognize it as competent to do business.

(j) *Request for action.* Any written communication to an officer or director of a standards developer, or to the chairman or other officer of a standards development committee, which calls into question a standards developer, or lack of a standard within the standards developer's recognized area of competence, and which requests the standards developer to change its position with respect to the matter called into question. Requests may relate to matters under consideration in a standards development proceeding under §§ 457.4 and 457.5.

(k) *Self-certification.* Affirmation by the marketer of a product that the product complies with, or performs in a specified manner in relation to, a standard or other requirement.

(l) *Standard.* A prescribed set of conditions or requirements, or portion thereof, applicable to any product in any market, established by agreement among buyers, sellers, professional groups, standards developers, certifiers, or others. A standard may include definitions; methods of test; specifications for performance, design, construction, or composition; classifications; disclosures; guides; codes; and recommended practices. Standard does not include standards which are prepared by one manufacturer or marketer solely for its own procurement, production, or marketing purposes. See § 457.11 Exemptions.

(m) *Standards developer.* A person that develops standards, sponsors the activity of developing standards, or promulgates standards. Standards developer does not include a governmental entity acting in its official capacity.

(n) *Standards development.* The process of development and promulgation of standards. The term includes notice, committee selection, development, review, balloting, resolution of negative votes, adoption, veto, subsequent revision, withdrawal, and all related activities. Standards development does not include official governmental acts.

(o) *Testing.* Evaluation, inspection, controlled experiments, and other methods for determining whether or not a product complies with, or performs in a specified manner in relation to, a standard or other requirement.

Subpart B—Standards

§ 457.3 Written procedures.

(a) The standards developer shall establish operating procedures to implement and administer the requirements of this subpart.

(b) The procedures shall be written and made available without charge to any person upon request.

(c) The standards developer shall follow its procedures.

§ 457.4 Notice.

(a) *Notice of proceeding.* The standards developer shall provide notice of intent to develop, revise or withdraw a standard to those persons specified in paragraph (d) of this section, except in instances in which only employees of the standards developer who have no commercial interest in the matter under consideration will participate. The notice shall be provided at least 30 days prior to commencement of the proceeding. The notice shall contain, at a minimum, a statement of the subject matter and type of action proposed to be taken, reasons for the proceeding, and a summary of the rules and time limits for participation.

(b) *Notice of proposed decision.* The standards developer shall provide notice of intent to make a final decision on adoption, revision or withdrawal of a standard to those persons specified in paragraph (d) of this section. The notice shall be provided at least 60 days prior to the final decision. The notice shall contain, at a minimum, a copy or summary of the proposal, a statement of the major substantive disputes that occurred and the reasons these disputes were decided as they were, likely effects on the classes listed in paragraph (d)(2) of this section, and a summary of the rules and time limits for comment or other participation.

(c) *Notice of final decision.* The standards developer shall provide notice of final decision on adoption, revision or withdrawal of a standard to those persons specified in paragraph (d) of this section. The notice shall be provided 30 days prior to the effective date of the action. The notice shall contain, at a minimum, a copy or summary of the standard, a statement of the major substantive disputes that occurred and the reasons these disputes were decided as they were, likely effects on the classes listed in paragraph (d)(2) of this section, a statement that all persons have the right of access to the records of the proceeding, and a statement explaining how requests for action in accordance with § 457.6 may be made.

(d) Notices required by paragraphs (a), (b), and (c) of this section shall be provided to the following:

(1) All persons requesting notice;

(2) A representative of each of the classes listed below that is likely to be affected by the action and of any other class that is likely to be affected by the action. Representatives shall be selected on the basis of such factors as their interest in the matter, the likelihood that they will participate, and their competence to adequately represent the interest of the class:

(i) Producers (and importers, if foreign producers are not represented) of products covered by the standard, and producers of competing products. The representatives shall be selected to reflect the range of products and competing products, production processes, size of producers, and other variations within the industry;

(ii) Individual consumers, and consumer groups;

(iii) Institutional and industrial consumers;

(iv) Federal, state, and local procurement officials;

(v) Other persons in the chain of distribution, such as retailers;

(vi) Federal, state, and local building code and other officials who have regulatory jurisdiction over products covered by the standards;

(vii) Environmental groups;

(viii) Energy conservation groups;

(ix) Certifiers.

(3) Representatives of classes may be chosen from those requesting notice under paragraph (d)(1) of this section. All representatives shall be informed that the notice to them is intended to serve as notice to a class that shall be defined as specifically as practicable.

§ 457.5 Participation.

(a) Except as provided in paragraphs (b) and (c), the standards developer shall provide to all persons equal opportunity to participate in all phases of all standards proceedings.

(b)(1) The requirements of paragraph (a) of this section shall not apply to:

(i) A phase of a standards proceeding in which the only participants are employees of the standards developer who have no commercial interest in the matter under consideration;

(ii) A final decision on adoption, revision or withdrawal of a standard (following issuance of a notice under § 457.4(b)) which is made by a board or committee composed of at least one representative of each interest (e.g., producer, small business, consumer, government regulatory, government procurement, environmental, other) affected by the action.

(2) Notwithstanding paragraph (b)(1) of this section, no person shall be denied the right to present written materials at any point in the proceeding.

(c) When the number of persons requesting participation is so large as to be unmanageable, the standards developer may identify classes of persons with the same or similar interests in the proceeding and select a representative or representatives to exercise attendance and oral participation rights on behalf of each such class.

§ 457.6 Duty to act.

(a) The standards developer shall determine under paragraph (b) of this section whether it has a duty to act whenever it receives a request for

action accompanied by substantial evidence (Note 1) that one of its standards, proposed standards, interpretations, acts or practices, or lack of a standard within its recognized area of competence (hereinafter its "position"):

(1) Raises prices or excludes products (Note 2) and lacks factual basis (Note 3); or

(2) Excludes a product that is at least equivalent under actual use conditions to one or more products not excluded (Note 4); or

(3) Excludes a product that is inferior under actual use conditions to one or more products not excluded; and that there is a less restrictive alternative (Note 5); or

(4) Discriminates against a product that is superior under actual use conditions to other products that meet the requirements of the position, by leading reasonable buyers to assume that the product is not superior (Note 6); or

(5) Misrepresents product attributes to reasonable buyers, where such misrepresentations would affect their purchasing decisions (Note 7).

(b) Whenever the standards developer receives a request for action that satisfies the requirements of paragraph (a) of this section, it shall take appropriate action under § 457.7 unless it has substantial evidence on the record as a whole (Note 8):

(1) Where the request has met the requirements of paragraph (a)(1) of this section, that the position is not raising prices or excluding products, or that there is factual basis for the position (Note 9); or

(2) Where the request has met the requirements of paragraph (a)(2) of this section, that the position is not excluding the product, or that the excluded product is not at least equivalent under actual use conditions to products that are not excluded by the position; or

(3) Where the request has met the requirements of paragraph (a)(3) of this section, that the position is not excluding the product; or that the suggested alternative is not less restrictive or cannot be implemented; or that the excluded product is one which a reasonable person would not purchase or which presents an unreasonable risk of injury (Note 10); or

(4) Where the request has met the requirements of paragraph (a)(4) of this section, that the product is not superior under actual use conditions to other products that meet the requirements of the position, or that the position does not lead reasonable buyers to assume that the product is not superior; or

(5) Where the request has met the requirements of paragraph (a)(5) of this section, that the position does not misrepresent product attributes to reasonable buyers; or that the misrepresentation(s) would not affect the purchasing decisions of reasonable buyers; or

(6) That the higher prices, product exclusions or misreliances complained of are *de minimis;* except that this rebuttal shall not be available where the cost of corrective action is less than the magnitude of the injury (Note 11).

(c)(1) When the standards developer determines under paragraph (a) or (b) of this section, that it does not have a duty to act, it shall notify the requester of its decision and the specific reasons therefor and of the existence of the appeal board established pursuant to § 457.10.

(2) The standards developer's determination under paragraph (a) of this section and, where applicable, paragraph (b) of this section, and either the paragraph (c)(1) of this section notification or commencement of appropriate action, shall occur within 60 days of the receipt of the request. Where complainant offers additional evidence on the same request within the 60 day period, the standards developer shall have such additional time as necessary to complete the review of the evidence, but in no case shall the additional time exceed 60 days from the receipt of the additional evidence.

§ 457.7 Appropriate action.

When the standards developer has a duty to take appropriate action under § 457.6(b), it shall take such actions which appear from the record to be necessary to correct or prevent higher prices or product exclusions, or to cure misrepresentations, to the extent that such actions are supported by showings under § 457.6(a) and are not rebutted by showings under § 457.6(b). Appropriate action shall be completed within a reasonable period [Note 12].

(b) When withdrawal of a standard is the appropriate action, the standards developer shall withdraw by issuing a notice complying with § 457.4(c) within 60 days of receipt of the request.

(c)When development or revision of a standard is the appropriate action, the standards developer shall, within 60 days of receipt of the request:

(1) Commence development or revision in compliance with §§ 457.4 and 457.5, prepare a timetable for completion of the action, and include the timetable in all notices provided under § 457.4; or

(2) Issue a notice complying with paragraph (e) of this section.

(d) Whenever the standards developer, under paragraph (c)(1) of this section, undertakes development or revision of a standard and then determines that it cannot complete such effort in accordance with its paragraph (c)(1) of this section timetable, it shall issue a notice complying with paragraph (e) of this section.

(e) A notice required under paragraph (c)(2) or (d) of this section shall be provided to the persons described in § 457.4(d) an shall contain the following:

(1) The designation of the standard (if a standard exists), and a description of the product area in which the harm is occurring and the attributes that are or would be addressed by the standard [Note 13].

(2) A statement of the problem and harm alleged;

(3) A statement of the course of action determined to be appropriate, and a description of any action taken to date;

(4) As applicable, a statement that the standards developer has elected not to undertake a development or revision effort, or that it is unable to complete the effort in accordance with its paragraph (c)(1) of this section timetable;

(5) A list of standards in the product area, and a statement that the listed standards are withdrawn and should no longer be considered as falling within the standards developer's recognized area of competence and that persons who do or would rely on them should determine the acceptability of products on some other basis.

(f) The standards developer shall withdraw by issuing the paragraph (e) notice, and shall cease distributing any of its standards required to be listed under paragraph (e)(5) of this section, and shall cease representing in any way that such standards and the product area in which the harm is occurring are within its area of competence.

(g) Notwithstanding paragraphs (e)(5) and (f) of this section, a standards developer that has determined that it cannot complete a development or revision of a standard in accordance with its paragraph (c)(1) timetable may continue the action after the expiration of the timetable without withdrawing from the product area involved if:

(1)(i) There has been a reasonable attempt to complete the action within the paragraph (c)(1) timetable;

(ii) There has been substantial progress towards completing the action; and

(iii) There is a high degree of certainty that the action will be completed within 60 days; and

(2) The notice required by paragraph (d) of this section provides, in addition to the information required by paragraphs (e)(1)(4) of this section, a revised timetable not exceeding 60 additional days for the completion of the action.

(b)(1) The certifier shall establish

on any other method of initiating an

Subpart D—Appeal Board

V 4 3 / 2 3 6 D E 7 7 8 UMI

§ 457.8 Required disclosures.

A standard shall contain the following:

(a) A statement of its intended scope and use, including products and product attributes intended to be covered by the standard;

(b) A disclosure of any products or product attributes not covered by the standard that users of the standard would reasonably presume were covered;

(c) A disclosure of any serious risks or limitations associated with use of products that confrom to the standard, when such risks or limitations would not be apparent to reasonable buyers; and

(d) A statement as to how persons voted on the standard if a list of persons who participated in the development proceeding is printed with the standard.

§ 457.9 Recordkeeping and access.

(a) The standards developer shall compile the following records in each standard proceeding:

(1) A copy of each notice given pursuant to § 457.4 and a list of persons and publications to whom notices were sent;

(2) A list of participants under § 457.5;

(3) All written comments under § 457.5; and

(4) All other written materials compiled in the proceeding.

(b) The standards developer shall compile the following records relating to each request for action under § 457.6:

(1) A copy of the request;

(2) Evidence submitted, or generated, relating to the request;

(3) A copy of any notice issued pursuant to § 457.6(c)(1) or § 457.7 (b), (c), or (d); and

(4) A statement describing any action taken in response to the request.

(c) The records specified in paragraphs (a) and (b) of this section shall be retained for at least 5 years from final decision in a matter.

(d) The standards developer shall:

(1) Make available all records specified in paragraphs (a) and (b) of this section to any person for inspection during regular business hours; and

(2) Promptly provide to any person upon request copies of the records at no more than actual cost.

§ 457.10 Appeals.

(a) The standards developer shall established and maintain an appeal board that meets the requirement of § 457.16, to hear and decide complaints relating to requirements under §§ 457.3–457.9.

(b) The standards developer shall act reasonably in determining whether and to what extent it will abide by a decision of the appeal board.

(c) The standards developer shall conspicuously include in every standard, and shall provide to each person with a complaint relating to requirements under §§ 457.3–457.9, a statement that the appeal board exists, and the name and address of the person to whom an appeal should be sent or information on any other method of initiating an appeal.

§ 457.11 Exemptions.

Subpart B shall not apply to:

(a) the drafting of a standard by a person solely for the purpose of transmitting the draft standard to a standards developer for a proceeding that is in accord with §§ 457.4 and 457.5 and that does not utilize the "employee" exception of §§ 457.4(a) and 457.5(b)(1); except that if any such standard is used in marketing prior to such a proceeding for purposes not otherwise exempt under this section, then the drafter of the standard shall, for purposes of this one standard, be considered a standards developer subject to §§ 457.6, 457.7, 457.9, and 457.10;

(b) the establishment of test methods or other requirements by a certifier for use in its certification program, when the only participants are employees of the certifier who have no commercial interest in the matter under consideration; except that the certifier shall be considered a standards developer subject to §§ 457.6, 457.7, 457.9, and 457.10 to the extent that such test methods or requirements, or certifications based on them, are used in the marketing of products;

(c) Standards, or development of standards, relating to drugs as defined in 21 U.S.C. 321(g) (but not devices as defined in 21 U.S.C. 321(h)); cosmetics as defined in 21 U.S.C. 321(i); and food as defined in 21 U.S.C. 321(f), including poultry and poultry products as defined in 21 U.S.C. 457 (c) and (f), meat and meat food products as defined in 21 U.S.C. 601(j), and eggs and egg products as defined in 21 U.S.C. 1033.

Subpart C—Certification

§ 457.12 General certifier duties.

(a)(1) Except as provided in paragraph (a)(2) of this section, whenever the certifier represents that products comply with a standard, the certifier shall not use the standard in a manner contrary to requirements contained in the provision stating its scope, the body of the standard, or an "appropriate action" notice that it has received from the standards developer acting pursuant to § 457.7.

(2) If the certifier deviates from a standard covered in paragraph (a)(1), of this section it shall require disclosure of the deviation under paragraph (b)(2) of this section. The certifier that deviates from a standard shall be considered a standards developer to the extent of the deviation as provided by § 457.11(b).

(b) The certifier shall disclose on or in close proximity to the form of approval, and shall require the marketer using its form of approval to disclose on or in close proximity to the form of approval, the following information:

(1) Name of certifier;

(2) Designation of the standards and other criteria on which the certification is based;

(3) A statement of the product attributes that are covered by the certification;

(4) A statement warning of any serious risks or limitations associated with use of the product which are disclosed in the standard as required by § 457.8(c);

(5) A statement describing the nature of the testing, including whether and to what extent prototype testing, factory inspection, and follow-up testing and inspection were done.

(c) Whenever the certifier has actual knowledge or knowledge fairly implied on the basis of objective cricumstances that a producer of a certified product:

(1) Is producing or marketing units that do not comply with relevant standards or other requirements [Note 14]; or

(2) Is using its name or form of approval in an unauthorized manner;

the certifier shall take such actions as are appropriate to end the abuse, which may include withdrawal of certification, probation, retesting, or other actions.

(d) Whenever the certifier has actual knowledge or knowledge fairly implied on the basis of objective circumstances that a producer of a noncertified product is using its name or form of approval, it shall inform the producer that it is in violation of § 457.17 and must cease the unauthorized use.

(e) Whenever the certifier has actual knowledge or knowledge fairly implied on the basis of objective circumstances that a standard it is using in certification violates the § 457.6 complaint criteria, it shall submit an appropriate request for action to the standards developer.

§ 457.13 Additional certifier duties.

(a) This section shall apply only to a certifier whose certification in a particular product area is relied on either in law or in fact by any government entity and who is effectively the sole source of certification services in that product area and market. The section shall apply only to certification actions in the affected product area and market [Note 15].

(b)(1) The certifier shall establish operating procedures which shall include, at a minimum, the steps which must be taken by one seeking certification, the steps the certifier will follow in determining whether to grant, deny or withdraw certification, and other procedures to implement and administer the requirements of this section.

(2) The procedures shall be written and made available without charge to any person upon request.

(3) The certifier shall follow its procedures.

(c) The certifier shall not grant or deny certification, or discriminate with regard to the quality of its services, solely on the basis of factors such as:

(1) Membership of the producer in a trade association or other group;

(2) Size of the producer;

(3) Country of origin of the product;

(4) Whether a product submitted for certification is intended for retrofit rather than installation as original equipment.

(d) The certifier shall not deny certification based on:

(1) Requirements not relating to product attributes that reasonable buyers would presume are addressed by the certification, or requirements not necessary to insure that the product meets reasonable buyer expectations relating to those attributes [Note 16];

(2) Requirements that product attributes already addressed in the test report of another laboratory be retested, unless there is substantial evidence on the record as a whole that the reported results are unreliable [Note 17]; or

(3) Requirements that a product be retested because of a design, component, or other change in the product, or a change in the underlying standards or other requirements, when such retesting would not result in a more accurate representation of the product's actual safety or performance to persons who rely on the certification [Note 18].

(e)(1) The certifier shall establish and maintain an appeal board that meets the requirements of § 457.16, to hear and decide complaints relating to requirements under this section.

(2) The certifier shall act reasonably in determining whether and to what extent it will abide by a decision of the appeal board.

(3) The certifier shall conspicuously include in every certification contract to which this section applies, and shall provide to each person with a complaint relating to requirements under this section, a statement that the appeal board exists, and the name and address of the person to whom an appeal should be sent or information on any other method of initiating an appeal.

§ 457.14 Recordkeeping and access.

(a) The certifier shall compile the following records:

(1) For each certification action:

(i) Name and model number of the product;

(ii) Designation of standards used to test the product;

(iii) Description of any other criteria on which grant or denial of certification is based; and

(iv) Reports of results on any testing pursuant to standards or other criteria used;

(2) Notices referred to in § 457.12(a);

(3) Information that a product that it has certified does not comply with relevant standards or other criteria, that its name or form of approval is being used in an unauthorized manner, or that a standard it is using violates the § 457.6 complaint criteria; together with such records as will show any action taken by the certifier in response; and

(4) Any complaints received by the certifier relating to requirements under § 457.13; together with such records as will show any action taken by the certifier in response.

(b) The records specified in paragraph (a) of this section shall be retained for at least 5 years.

(c) The certifier shall:

(1) Make available all records specified in paragraph (a) of this section to the client in the particular certification action for inspection during regular business hours; and

(2) Promptly provide to the client upon request copies of the records at no more than actual cost.

§ 457.15 Exemptions.

Subpart C shall not apply to:

(a) A representation which reasonable buyers are likely to believe is subjective, based on personal experience, or not based on controlled testing of the product pursuant to standards or other requirements;

(b) A certification procured by the purchaser of a product which is not for any purpose connected with resale of the product;

(c) Certifications relating to drugs as defined in 21 U.S.C. 321(g) (but not devices as defined in 21 U.S.C. 321(h)); cosmetics as defined in 21 U.S.C. 321(i); and food as defined in 21 U.S.C. 321(f), including poultry and poultry products as defined in 21 U.S.C. 457 (c) and (f), meat and meat food products as defined in 21 U.S.C. 601(j), and eggs and egg products as defined in 21 U.S.C. 1033.

Subpart D—Appeal Board

§ 457.16 Appeal board.

(a) The standards developer or certifier shall establish and operate an appeal board which complies with this section as required by §§ 457.10 and 457.13(e). A standards developer or certifier may establish and operate its own appeal board, or may jointly establish and operate an appeal board with other organizations.

(b) The appeal board shall be sufficiently independent of sponsoring standards developers and certifiers, and of other interest groups, so that it can render fair and impartial decisions.

(c) One or more members of the appeal board, each of whom is competent to decide the appeal and has no affiliation that would create a conflict of interest relating to the appeal, shall hear and decide each appeal.

(d) In establishing the appeal board the standards developer or certifier may reserve the right to have a reasonable opportunity to act on a complaint before it is heard by the appeal board. A reasonable opportunity shall not exceed 60 days from the date the standards developer or certifier receives or is informed of the complaint.

(e) The appeal board shall establish and follow written procedures, copies of which must be made available without charge to any person upon request. These procedures shall contain, at a minimum, the following:

(1) Upon receipt of a complaint, the appeal board shall notify the complainant and all persons whose conduct is the subject of the complaint that the complaint has been received.

(2) Meetings at which oral testimony is received shall be open to observors; except that this requirement shall not apply to an appeal brought against a certifier unless the person making the appeal requests that it apply.

(3) Within a reasonable period of time not to exceed 60 days from receipt of the complaint, the appeal board shall render a written decision based on the record and supported by reasons. A copy of the decision shall be sent to the complainant and to all persons whose conduct was the subject of the complaint.

(4)(i) The appeal board shall compile in each appeal, and retain for at least 5 years, the complaint, evidence gathered by the appeal board, including copies of written material and summaries of oral testimony, and the decision.

(ii) The appeal board shall make available all records specified in paragraph (e)(4)(i) of this section to any person for inspection during regular business hours, and shall promptly provide to any person, upon request, copies of records at no more than

actual cost; except that access to re-

method is well enough known that sellers

other conforming products which buyers be-

V 4 3 / 2 3 6 D E 7 7 8 UMI

actual cost; except that access to records in an appeal brought against a certifier shall be granted only to the complainant and the certifier.

(f) If the appeal board finds that the standard, act, practice, or failure to act constitutes a violation of the applicable rule provision, then it shall notify the standards developer or certifier of the actions that must be taken to comply with this rule.

Subpart E—Marketing

§ 457.17 Use of standards and certifications.

(a)(1) Except as provided in paragraph (a)(2) of this section, the marketer shall not use a standard in a manner contrary to requirements contained in the provision stating its scope, the body of the standard, or an "appropriate action" notice issued by the standards developer acting pursuant to § 457.7, when it has actual knowledge or knowledge fairly implied on the basis of objective circumstances of the requirements.

(2) If the marketer deviates from a standard covered in paragraph (a)(1) of this section, it shall disclose the deviation as part of the information required under paragraph (c) of this section.

(b) The marketer shall not use a certification in a manner contrary to requirements issued by the certifier relating to the certification, when it has actual knowledge or knowlege fairly implied on the basis of objective circumstances of the requirements.

(c) The marketer shall not use in marketing a certification or self-certification without disclosing on or in close proximity thereto the information specified in § 457.12(b).

(d) Whenever the marketer has actual knowledge or knowledge fairly implied on the basis of objective circumstances that it is producing or marketing units of a self-certified product that do not comply with the underlying certification requirements, it shall cease using the self-certification (see Note 14).

Subpart F—Notes

NOTE 1.—As used in § 457.6(a), "substantial evidence" is such technical, scientific, statistical, economic, theoretical, or other evidence as could lead a person knowledgeable in the area of technology to reasonably conclude that a proposition is true. Evidence may be "substantial" even though other similarly knowledgeable persons could reasonably conclude that the proposition is not true. "Substantial evidence" consists only of such materials that complainant chooses to offer. By contrast, substantial "evidence on the record as a whole" (Note 8) includes this evidence plus any evidence offered by the standards developer.

The purpose of this test is to establish an evidentiary threshold that the person requesting action must meet in order to compel the standards developer to take cognizance of a claim. It can be expected that on many questions probative evidence will consist of (i) scientific tests, (ii) engineering evaluations and analyses, (iii) field experience, (iv) accident reports, (v) insurance loss experience, (vi) expert opinion, (vii) statistical analyses, (viii) economic, scientific, or other theory, (ix) laws, codes, procurement specifications, and regulations, (x) reasoned approval or disapproval by government code or procurement officials, (xi) consumer surveys, or (xii) price lists. This list is not exhaustive. In order instances a commonsense judgment reduced to writing will suffice.

NOTE 2.—As used in § 457.6(a)(1), a position of the standards developer raises prices or excludes products when, but for reliance on such position by consumers, code officials, architects, insurers, certifiers or others, such effects would not have occurred. The term may include a showing that a position *will raise* prices or exclude products. A necessary part of such a showing would be that, at the time of the complaint, the position was in a form or status that would not be subject to change by the time injury was expected to occur. Where such a complaint involves potential exclusion of an item not yet in production, complainant would only have to show that production of the item is feasible.

Higher prices includes higher costs to consumers related to selection, purchase, installation, maintenance, energy use, insurance or replacement of products than would otherwise prevail. Showings of higher production, testing, sale or other related costs for sellers constitute showings of higher prices for purposes of § 457.6(a)(1).

Product exclusions include situations in which the sale of a product in any market is barred or to any extent restricted or impeded as a results of the reliance of buyers, code officials, architects, insurers or others on a position of a standards developer.

Products may be totally excluded from some markets, as where under local law only products meeting a standard's requirements are permitted to be marketed. Where local laws do not mandate conformity with standards, voluntary reliance on standards by buyers may result in at least partial exclusion from the market of nonconforming products, especially when buyers cannot easily determine safety or performance attributes of complex products. Marketers of such products may thereby lose sales to substitute products encompassed by such standards.

A standard may cause product exclusions even for conforming products which exceed the standard's minimum requirements. For instance, buyers might assume in certain cases that the standard's failure to differentiate among the conforming products is evidence of their functional equivalence (for examples, see Note 6). Another example might be where a standard incorrectly ranks or grades product types, and complainant is able to show that this impedes the sale of particular products. In sum, a complainant may show any type of restriction of product sales that is caused or will be caused by a standards developer's position.

NOTE 3.—As used in § 457.6(a)(1), "factual basis" is the foundation in logic and fact for that portion of standards developer's position (i.e., standard, proposed standard, interpretation, act or practice, or lack of a standard within its recognized area of competence) that is the subject of a request for action. The distinctions drawn in a standard are necessarily based on certain logical and factual conclusions. A position lacks factual basis whenever any of these necessary conclusions is incorrect, illogical, or not supported by the existing technical, scientific, statistical, economic, theoretical, or other factual evidence. This inquiry may concern facts explicitly asserted in the standard—e.g., a table in the document that ranks certain products—or implicit assumptions—e.g., that cost-adding or exclusionary features are necessary to promote the safety or performance of the product.

Lack of factual basis may be shown by simply showing lack of documented or credible support.

Example 1: A standards developer has promulgated room environment standards calling for specific levels of cooling, light, and ventilation for public school buildings. The stated or implied purpose of these levels is to ensure that level of health and reading proficiency is achieved. In addition to showings of excessive energy costs, (i.e., higher prices), consumer complainant claims that there is no documentation proving a relationship of the health/proficiency levels to the standards set. Although complainant has not proven there is no relationship, it can nevertheless show lack of factual basis under § 457.6(a)(1).

Where the requirement is not arbitrary on its face, the complainant may have to identify its purpose in specific terms. If the purpose is unknown or ill-defiend, complainant can nevertheless proceed by positing a rationale which relying parties reasonably presume supports the requirement. In any paragraph (a)(1) complaint, the only relevant subject is the position's factual or logical relation to the purpose. The underlying policy or value elements are not within the factual basis inquiry.

Example 2: A prominent canoeing association writes a standard for canoes. One of the standard's provisions requires use of a puncture-proof new material. Canoes using this material cost, on the average, $300 more than other canoes. Complainant seller of aluminum canoes shows that its product is excluded inasmuch as many recreation areas require use of equipment that meets association standards. In the absence of a documented purpose, complainant posits that recreation owners *reasonably assume* that use of the standard will "save lives" and that there is no factual basis for this assumption. All reported drownings were from overturned canoes in fast water, as to which the new canoes are equally susceptible. Complainant has met its burden. The association rebuts, however, that its purpose was not to "save lives," but to "avoid wet equipment and inconvenience" where canoes take on water due to ruptures. It proves that the new material does in fact rupture less easily. Though a $300 per canoe price increase might appear unreasonable from a performance/cost standpoint, this is a value judgment that is not part of the factual basis inquiry. (It can be challenged under paragraph (a)(3), however.)

Another variety of action that can be challenged in paragraph (a)(1) is the arbitrary elimination of product types, for reasons unrelated to the performance or safety of those particular types.

Example 3: Heavy cable used in construction is customarily sold in three grades based on strength. A number of sellers have

begun marketing cable in grades that fall between the existing three. An industry standard, incorporated in local building codes, only specifies the traditional three grades. Buyer complains that (i) prices are raised since buyers who need only in-between grades must "step up" to sizes of excessive strength and price, and (ii) that there is no factual basis for the proposition that restriction of grades promotes the safety, performance, interchangeability, or interconnectability of cable. Complainant has carried its burden under paragraph (a)(1).

NOTE 4: Under § 457.6(a)(2) complainant must show that an excluded product is at least equivalent, as to the performance or safety characteristics subject to dispute, to other products which standards developer treats more favorably. Complainant need only show functional equivalence. The product's price or other characteristics are irrelevant. (Nor is it necessary to prove equivalence with conforming brands actually being sold. For instance, where the complaint regards a product treated as nonconforming under a standard, it is enough that the product is equivalent to hypothetical products that would meet the minimum requirements.)

In certain instances conforming products may be "over-engineered" for the uses to which they are normally put. Complainant need only show that its product is equivalent to conforming products "under actual use conditions."

Example 1: A trade association standard for public address systems in schools requires that speakers be able to transmit sound of a specified decibel level without distortion. Complainant proves that (i) its own product transmits, without distortion, sounds having two-thirds the specified decibel level, and (ii) that state health laws uniformly forbid the generation of more than one-half the specified decibel level within school building. Complainant has proven that "under actual use conditions," its product is equivalent to those meeting the minimum requirements.

NOTE 5: The general effect of § 457.6(a)(3) is to enable complainants to test whether the standards developer could adopt a "less restrictive alternative," i.e., a position that would increase buyer options or the opportunity of sellers to compete.

In addition to showing product exclusions, complainant must (i) identify the proposed alternative in general terms, and (ii) show that the alternative would equally promote the purpose or would adequately inform parties of the safety, performance, or other relevant attributes of the product in question. Section 457.6(b)(3) indicates how these showings may be rebutted.

Example 1: Standards developer requires that each length of metal used for supporting beams in construction be tested under a new stress test. This change was instituted in response to reports of a 2 percent failure rate in the field. The new test requires expensive equipment only possessed by the very largest sellers. Complainant shows that smaller sellers will be put at a disadvantage in having to spread costs of the equipment over fewer units and that the standard will thereby cause product exclusions. Complainant also demonstrates that (i) the alternative of requiring present test methods to be conducted at closer intervals can as effectively reduce the failure rate, and (ii) that in any event, the failure rate of the old method is well enough known that sellers using that method could be required to disclose its disadvantage. Under either showing complainant has carried its burden under paragraph (a)(3).

In some cases a nonconforming product may not be equivalent to conforming products under actual use conditions, but may nevertheless meet the needs of some buyers. Where complainant requests that the excluded product be treated as conforming, the following specific application of the two-part showing will suffice. Complainant must (i) identify the proposed alternative in general terms, and (ii) submit evidence which accurately describes the safety, performance, or other problems which differentiate the excluded product from conforming products under actual use conditions. As in all paragraph (a)(3) requests, complainant is not required to initially prove the practicality of implementing the alternative.

Example 2: Seller makes a water pipe that uses a new plastic compound not permitted under the relevant water pipe standard. The only documented problem with the new material is that it cannot be molded to form the simple joint used in competing pipe. Seller (i) states in general terms that it would be less restrictive to treat its product as conforming together with a requirement that the problems with its joint be disclosed on the pipe itself, and (ii) provides evidence that the pipe can be joined according to a method which produces a joint that is as reliable as a simple joint, but lasts only 30 years as opposed to the 50-year life of other joints. Seller has carried its burden under paragraph (a)(3).

Another variant of the above is where products are excluded for interchangeability or interconnectability purposes, or as part of a simplification program to reduce sizes and designs. Complainant must prove that a less restrictive alternative, such as requiring disclosures, could also enable buyers to avoid confusion, unnecessary stocking of parts, or the other problems the standard was intended to correct.

Example 3: The majority of water heater tanks for industrial use can be directly fitted with only one of two basic sizes of pressure relief valves. A standard covering relief valves only encompasses the two sizes permitting a direct fit. The rationale is that the stocking of adaptors can thereby be avoided. Seller of odd-size valves states in general terms that it would be less restrictive to encompass all sizes in the valve standard but require the size of any conforming valve to be stamped on the product so that purchasers could decide for themselves whether they would have to stock adaptors. Seller has carried its burden under paragraph (a)(3).

Another type of less restrictive alternative may be the imposition of a marketing segregation acheme as an alternative to treating a product as conforming. For instance, where a product poses a safety risk only if installed by nonexperts, the standard could require conforming products to be sold only to outlets which use qualified installers.

NOTE 6: Section 457.6(a)(4) applies where the standards developer's position misleads buyers into assuming that all conforming products are, for all practical purposes, equivalent. Aside from the product exclusion showing (see Note 2), complainant must show that its product is in fact functionally superior under actual use conditions to other conforming products which buyers believe are its equivalent.

The mere fact that the standard does not classify or "grade" products does not raise a presumption that buyers will assume conforming products are homogeneous. It is necessary to show that the position raises false assumptions. Section 457.6(b)(4) indicates how these showings may be rebutted.

Example 1: A furnace standard establishes pass-fail requirements for all furnaces using a particular type of fuel. A seller claims that its furnace is superior to other furnaces that also conform to the standard, but that the standard mistakenly leads housing contractors to assume that all conforming furnaces have the same essential quality or safety attributes. Seller claims that it loses business to cheaper competitors as a result. Seller proves the superiority of its product with test results. However, because of buyers' exposure to advertising, wide price ranges, and product variations, it cannot show that the standard leads these buyers to assume that all conforming furnaces are homogeneous. Seller has failed to carry its burden under paragraph (a)(4).

Example 2: Standards developer customarily classified or ranks water safety equipment on a scale of I-V. The higher the number, the safer the product. Its life preserver standard does not adopt this system, but rather adopts a two-tier system. Seller of the most expensive life preserver proves (i) that its preserver will retain the required bouyancy for two seasons longer than the low-priced Class II products; (ii) that there is evidence that retailers believe that the standards developer would have assigned the product a special ranking if that were true, given its past practice, and (iii) that, given its higher price, it cannot sell its product as it could have absent the standard. Complainant has carried its burden under paragraph (a)(4).

NOTE 7: Section 457.6(a)(5) applies where the standards developer's position in effect "oversells" the performance of a conforming product. Complainant will have to prove that the position raises expectations in the buyers' minds, and that the underlying facts do not support these expectations.

The standard may be a source of misreliance in numerous ways. A partial list includes (i) misleading scope notes which prompt certifiers to apply its requirements to the wrong product; (ii) faulty test methods or requirements which "pass" products not fit for their purpose; (iii) misleading labeling or marking requirements; (iv) ambiguous provisions which result in certification of unfit products; or (v) failure to effectively communicate instructions or warnings necessary to offset false assumptions of safety or performance raised by the standard. The test of effective communication is whether reasonable buyers would receive, read, and understand the information, and be able to use it to their advantage. In certain instances, the certification of unfit products may be due to certifier or marketer failure to carry out understandable requirements in the standards document. These cases are not the subject of paragraph (a)(5) complaints.

Complainant must show that the position deceives reasonable buyers. If complainant can show that deception will occur in other than isolated, atypical cases, it has met this burden. Thus, a complainant may test whether the standards developer took into account the variations in intelligence, moti-

established under the standard. Complain-

generally accepted sampling techniques, or

NOTE 17: The definition of "substantial

V 4 3 / 2 3 6 D E 7 7 8 UMI

vation, expertise, and knowledge of standards among the parties that rely on the particular standard.

Complainant must also show that the misrepresentation would affect the purchasing decisions of reasonable buyers. It is not necessary to demonstrate actual instances of purchases which would not have occurred absent the standard.

The following illustrate the operation of paragraph (a)(5):

Example 1: A standard for a building material allows products which meet a certain level of performance on tests to be stamped as acceptable for exterior use. Complainant proves that complying products may deteriorate rapidly when exposed to the elements. Complainant has carried its initial burden under paragraph (a)(5).

Example 2: A standard for a product which is marketed as an energy saving device covers only the safety attributes of the product. Complainant proves that reasonable buyers assume that representations by sellers of conformance to the standard validate the seller's safety and energy saving claims. The product is proven not to save energy. Complainant has carried its initial burden under paragraph (a)(5).

Example 3: A type of home insulation presents severe fire hazards if laid on attic floors close to recessed light fixtures. This hazard can be controlled by constructing a special guard around the light fixtures. The standard requires instructions concerning this safeguard to be disclosed on the insulation package. Complainant shows (i) that buyers assume that conformity to the standard means there is no problem with flammability, and (ii) that although contractors read and understand the instructions, even reasonable homeowners who also purchase and install the insulation themselves cannot understand the instructions. Complainant has carried its initial burden under paragraph (a)(5).

NOTE 8: As used in § 457.6(b), "substantial evidence on the record as a whole" is "substantial evidence" [Note 1], taking together complainant's evidence, evidence in the standards developer's file, plus any other evidence the standards developer may produce.

NOTE 9: The § 457.6(b)(1) rebuttal to a § 457.6(a)(1) showing simply requires the standards developer to refute complainant's evidence. In certain instances, the standards developer may have to state the purpose of its requirement with sufficient specificity so that its factual basis can be tested, § 457.6(c)(1). (See Note 3, Example 2.) If the purpose of the requirement *has* been documented in prior proceedings, standards developer is not permitted to rebut that it now serves a different purpose, e.g., a higher level of safety warranting its cost-adding features.

In certain instances the basis for requirements can be explained only as engineering "conservatism." For purposes of paragraph (b)(1), this can be defined as the requirement of certain product features to supply a margin of safety or reliability not strictly required by available evidence. To justify a feature on engineering conservatism grounds, the standards developer must show (i) plausible contingencies whose precise impact cannot be anticipated, or (ii) inability to strictly extrapolate from existing data, given the data's unreliability, limited applicability, or incompleteness.

Example 1: Standard "A" covers all steam pressure vessels and specifies minimum wall thicknesses. Standard "B" covers only steam vessels used in electrical generating plants, and requires 50% thicker walls. A number of states have adopted standard "B", thereby forcing vessel manufacturers to retool, which raises costs statewide. Complainant has successfully shown that there is no positive documentation that thicker walls are required for electrical generation uses. Standards developer rebuts (i) that data for standared "A" did not test for the long periods of cyclical stress sometimes occurring in electrical generation; (ii) that unexplained failures of standard "A" vessels have been reported; and (iii) that data does not exist which explains how extended cyclical stress affects wall strength. Standards developer has successfully rebutted under paragraph (b)(1).

NOTE 10: In § 457.6(b)(3), there are several distinct lines of rebuttal, anyone of which may be sufficient. In addition to disproving the claim of product exclusions, the standards developer may show that "the suggested alternative is not less restrictive or cannot be implemented; or that the excluded product is one which a reasonable person would not purchase or which presents an unreasonable risk of injury."

That the alternative is not less restrictive or cannot be implemented. The alternative is not less restrictive if in general, the alternative does not increase buyer options or the opportunity of sellers to compete, whatever its effect on complainant. The rebuttal as to implementation concerns the practical limits to the standards developer's power to make the alternative work in actual practice. The standards developer can successfully rebut if, as a practical matter, the alternative cannot be implemented to have its intended effect.

A specific subset of this rebuttal is the situation where a complainant claims that a nonconforming product could be treated as conforming if the standard required disclosures to relying parties. (See Note 5, Example 2.) The specific showing on rebuttal is that reasonable buyers would not receive, read, understand, or be able to use the information to their advantage. In general, if the alternative would fail in these respects only in isolated, atypical cases, the standards developer cannot rebut on these grounds. The receive, read, and understand elements are self-explanatory. The "use information to their advantage" criterion is designed to anticipate situations where, even if buyers understand the disclosures, they may not have the expertise, education, or wherewithal to make use of them. This does not imply that the buyer need be able to perform all necessary installation or other steps without assistance.

Example 1: A standard for automobile fuel-saving devices only treats factory-installed devices as conforming. Seller of retrofit devices proves that the steps for safe and effective retrofit installation are known and can be followed by any minimally knowledgeable auto mechanic. The device can save 15 percent of fuel used in older automobiles. Standards developer shows that substantial numbers of automobile owners cannot reliably perform the required installation steps. However, it cannot show that it could not treat the retrofit items as conforming with the condition that sellers disclose at point-of-sale that the devices are only safe or effective if installed by a competent mechanic. Standards developer has failed to rebut.

Reasonable persons would not purchase the product. This rebuttal is met where no reasonable buyer would purchase the product if fully informed of its attributes. "Reasonableness" in this context need not be limited to purely economic concerns. Aesthetics, ethics, experimentation, and other factors may be legitimate considerations for the reasonable person.

The product presents an unreasonable risk of injury. An unreasonable risk of injury is presented where the product's utility is outweighed by the likelihood and severity of injury associated with that product's use. Unreasonable risk may exist even when users are fully informed of the product's safety risks. In certain instances, the utility of the product may not, from a value perspective, outweigh the inordinate number of injuries that would result from its use. Persuasive evidence that a product poses such risks is that under rules promulgated pursuant to the Consumer Product Safety Act, it could be classified as a "banned hazardous consumer product," 15 *U.S.C.* 2057, or an "imminently hazardous consumer product," 15 *U.S.C.* 2064(a), or that it presents a "substantial product hazard," 15 *U.S.C.* 2052(a)(3), or an "unreasonable risk of injury," 15 *U.S.C.* 2057.

NOTE 11: The § 457.6(b)(6) rebuttal permits the standards developer to assert that the higher prices or dollar amounts are insignificant. This rebuttal is available only where (i) injury is only short-term and (ii) complainant cannot prove that the competitive position of sellers is appreciably affected or dollar or safety injuries to buyers or users are more than negligible. Even if the injury does not exceed this threshold, this rebuttal is unavailable if the cost of corrective action is lower than the injury, as where an explanatory letter would be sufficient.

NOTE 12: The basic test of appropriate action as stated in § 457.7(a) is that it "correct or prevent higher prices or product exclusions, or • • • cure misrepresentations • • •." The standards developer is free to choose the course of action that will satisfy this requirement. If withdrawal, revision, or development of a standard is required, the particular duties are set out under provisions in §§ 457.7(b)-(f). Once development or revision of a standard is commenced, the standards developer is not constrained to model its solution only on the evidence submitted in the 60-day complaint/rebuttal period of § 457.6(c). It may consider any evidence that will enable it to successfully rebut subsequent complaints by either the original complainant or other parties.

To discharge its duty under § 457.7(a), the standards developer need only correct or prevent the harm "to the extent which such actions are supported by showings under § 457.6(a) and are not rebutted by showings under § 457.6(b)." This caveat recognizes that there may be times when complainants will request total elimination of their harms, when they have not proven that full relief is justifiable.

Example 1: A standard requires that a transparent shield for welder's masks be made of a certain material and have no more than a specified curvature. A mask using a different material is designed to wrap around the side of the face, thereby providing greater protective coverage. However, the curvature exceeds the maximum established under the standard. Complainant seller shows that the curvature requirement has no documented support. Standards developer fails to rebut, sets a timetable for reconsidering the evidence, and within the time limits produces evidence which supports a modified curvature requirement. However, even the modified requirement excludes complainant's product. Despite this continuing exclusion, the standards developer has satisfied § 457.7(a). Complainant had not submitted evidence which proved that the standards developer would be justified in treating the product as equivalent to other conforming products (as it might have under the "equivalence" provision, § 457.6(a)(2)).

Paragraph (a) does not establish any one time period as a presumptive "reasonable period." Calculation of this period is, for purposes of this requirement, assumed to be a two-step process. First, a reasonable period is preliminarily determined, based on two assumptions: (i) Commitment of time of individual participants is less than full-time, and (ii) the task involves only drafting, review, or criticism or proposals, plus marshalling evidence and position papers. Any figure that exceeds a time period that is reasonable in light of the above, must be supported on the basis of at least one of four criteria: (i) The necessity for generating new data; (ii) the necessity for advancing the "state of the art", e.g., for devising new test methods; (iii) the number of issues to be resolved and their complexity, and (iv) the necessity of obtaining data or policy approval from governmental bodies. The latter element recognizes that in certain instances collaboration with bodies such as Congress, CPSC, Occupational Safety and Health Administration (OSHA), state agencies, etc. may be desirable. Failure to committee members to provide necessary personnel or resources to the task is a permissible factor only when the failure relates to one of the four criteria. The standards developer cannot lengthen the timetable to accommodate uncooperative members.

Where the appropriate action is development or revision of a standard, § 457.7(c)(1) requires the standards developer to propose a timetable in advance. The reasonableness of the period stated in the timetable is governed by the same criteria as those listed above.

NOTE 13: As used in § 457.7(e)(1), "product area" is that category of products which perform the same specific function and can be substituted for each other. Products may be in the same product area irrespective of such differences as (i) their mode of installation or servicing, e.g., factory installation versus retrofit; (ii) their ease of application, e.g., use of adaptors, special safeguards; (iii) the materials from which they are made; (iv); the engineering theories that are their basis; or (v) their particular level of safety or efficiency.

NOTE 14: Section 457.12(c)(1) requires the certifier to take corrective action when a certified producer is producing and marketing noncomplying product units. This is not intended to mean that there can be no product failures. The intent is to require action when the failure rate reaches such a level as to be unacceptable in terms of general practice in the product area. General practice in the product area can be determined from such sources as the standard or testing procedures, which may specify a failure rate, generally accepted sampling techniques, or accepted manufacturing practices.

NOTE 15: Section 457.13(a) states that § 457.13 applies only to a certifier whose certifications in a "product area" are relied on by a "government entity." "Product area" is used with the same meaning in § 457.7(d)(1) and is defined in Note 13. The market in which reliance is occurring is limited to "government entities," which includes local, state, and federal jurisdictions, and agencies and officials thereof. For example, the U.S. Air Force would be considered a government entity, so a certifier exclusively relied on in Air Force base purchasing decisions would fall within paragraph (a). Another example would be a city which specifies one certifier in its building code.

The operation of this section is further limited to those situations in which the certifier is "effectively the sole source of certification services" in the affected product area and market. This does not mean that the certifier must be the only one who is relied on in the market, but it must substantially control the area. This may occur because other laboratories which are relied on by the government entity do not do certification in the particular product area, or only have facilities to handle a few clients. It may also occur because, even though the government regulation specifies several acceptable laboratories, the officials enforcing the regulation in practice will accept only the one certifier. For these and other reasons, it may appear that two or more certifiers are providing certification services, when in fact producers are effectively limited to one certifier if they want to sell their products in the market in question. In this situation the certifier would be covered by the requirements of § 457.13.

NOTE 16: Section 457.13(d)(1) addresses the imposition by certifiers of test requirements that are unnecessary in terms of buyer expectations.

The first category of proscribed requirements includes those "not relating to product attributes that reasonable buyers would presume are addressed." "Attribute" may have a broad meaning—e.g., safety versus performance. For instance, where a certifier is testing only for fire hazards, it could not require radios to be tested for range, clarity or other performance attributes, or for easy connectability with both auto batteries and house receptacles. "Attribute" can also have a narrower construction—e.g., various "safety attributes." For instance, unless a certifier disclosed the fact, most buyers would not assume that resistance of an auto tire to deliberate slashing of the tire wall is covered by a certification assuring tire durability. Absent such disclosure, the imposition of tests which simulate such vandalism would be prohibited.

A second category is made up of requirements "not necessary to ensure that the product meets reasonable buyer expectations relating to those attributes." Thus, in the above example buyers would expect tires to be tested for safety under normal or even hard driving conditions. However, a test exposing the tire to open flame for a prolonged period prior to road tests may be excessive, even if an extraordinarily durable tire can be singled out in this manner. Such requirements would mislead buyers and unnecessarily restrict consumer choice since they "are not necessary to ensure that the product meets reasonable buyer expectations."

NOTE 17: The definition of "substantial evidence on the record as a whole" is the same under § 457.13(d)(2) as it is in the standards developer context—"such technical, scientific, statistical, • • • theoretical, or other evidence as could lead a person knowledgeable in the area of technology to reasonably conclude that a proposition is true. Evidence may be substantial even though other similarly knowledgeable and reasonable persons could conclude otherwise" (Note 1). Where a marketer desiring certification carries its burden of providing evidence of the reliability of a test report, the certifier must either (i) omit retesting or (ii) provide such rebuttal evidence that a reasonable person would no longer conclude that the report is reliable. While a time limit for this determination is not stated, the time taken is governed by a general standard of reasonableness.

The issue of reliability will turn on a number of factors, including: (i) Whether the laboratory is independent of manufacturers and vendors of the product tested; (ii) whether the laboratory has adequate staff and test facilities for purposes of such testing; (iii) whether the laboratory employs appropriate standards or other test requirements in such tests; (iv) the laboratory's reputation or record of problems in this area of product testing; and (v) whether the test report itself is based on scientific and well-controlled testing (where scientific and well-controlled testing would be required to establish a product's conformance to relevant standards). The certifier may charge the marketer desiring certification the reasonable costs associated with determining test report reliability.

NOTE 18: Section 457.13(d)(3) prohibits retesting that is unnecessary given the adequacy of prior tests by the same certifier. Where, for instance, the material in the exterior of a television set is changed from one plastic compound to another, retesting of the model for electrical safety would be unnecessary, absent a showing of causal relationship. Similarly, if a portion of the underlying standard for testing television sets which applies only to 100% solid state, the validity of the prior test is not undermined. In neither of these cases would retesting "result in a more accurate representation of the product's actual safety or performance to persons who rely on the certification."

SECTION B. STATEMENT OF THE COMMISSION'S REASONS

Pursuant to the direction of the Commission, the staff of the Bureau of Consumer Protection initiated an investigation to determine whether persons and organizations involved in standards development and certification, and in marketing with reference to standards, are engaged in acts or practices in violation of section 5 of the Federal Trade Commission Act. The Commission's determination to commence this rulemaking proceeding is based on consideration of the report of the staff investigation.

The Commission's directive to commence the investigation was given at the time that the Commission provisionally accepted consent orders in a matter involving alleged marketing misrepresentations relating to the flammability of foam plastics used as insulation in buildings.[1] These alleged misrepresentations were based on small scale

[1] *In re* Society of the Plastics Indus., 84 F.T.C. 1253 (1974).

V 4 3 / 2 3 6

D E 7

7 8

UMI

standard test methods of the American Society for Testing and Materials, which did not accurately predict flammability hazards under actual use conditions. In announcing its provisional acceptance of the consent orders, the Commission reported that it had "directed the staff to continue an investigation of ASTM and others engaged in standards-setting and product certification activities that may result in deceptive or unfair standards and certifications." [2]

In response to the Commission's directive the staff conducted a broad inquiry into the full range of factual and legal issues presented by private standards and certification activities. The staff has set forth the results of its investigation in a publicly available document entitled Staff Report on Standards and Certification.[3]

In the course of its investigation the staff reviewed numerous specific complaints in which the actions of standards developers and certifiers appeared to raise questions of illegality under section 5 of the Federal Trade Commission Act. Allegations have related to a broad spectrum of products and industries, and to many types of consumer and competitive injury. Staff also made a comprehensive survey of current standards development and certification practices, and attempted to assess their role and importance in commerce. Information and views were solicited from producers, consumers, representatives of federal, state and local government agencies which rely on standards in procurement and regulation, standards development organizations, testing laboratories, trade associations, technical experts, and others. In addition, staff relied on the reports and public record compiled by the FTC Task Force on Industry Self-Regulation,[4] Which had been established by the Commission in December, 1971.

The Staff Report cites numerous allegations that were reviewed in the investigation, including the following: Lack of adequate notice to consumers, small businesses and others who might wish to participate in a standards proceeding; lack of opportunities for participation; high costs and complex procedures that favor participation and dominance by established firms; failure to update standards in a timely manner; tendency to use narrow design standards rather than performance standards; tendency to use pass-fail standards rather than graded standards; inadequate disclosures in standareds of critical product use or hazard information; lack of avenues to challenge deceptive or restrictive standards; the use by certifiers of deceptive or restrictive standards; arbitrary or discriminatory treatment by certifiers of some sellers; excessive certification fees; inadequate disclosure to consumers of the meaning and limitations of seals of approval; and failure of certifiers to police sellers who falsely represent conformance of their products to standards.

The Report states that these practices have been associated with complaints of various injuries to consumers and competition, which include denying consumers the benefits of superior or lower cost technology, denying businesses the opportunity to enter and compete in profitable industries, inadequate product safety levels, inflated product prices, and deception or nondisclosure of material product information. Staff has concluded that the practices may be unfair and deceptive acts and practices and unfair methods of competition within the meaning of section 5 of the FTC Act, requiring appropriate remedy.

The Commission has carefully and deliberately considered the Report and recommended Trade Regulation Rule. Based upon that Report, the Commission believes that the initiation of a rulemaking proceeding would be in the public interest.

The public is advised that the Commission has not adopted any findings or conclusions of the staff. All findings in this proceeding shall be based solely on the rulemaking record. Accordingly, the Commission invites comment on the advisability and manner of implementation of the proposed rule.

The Commission's Rules of Practice shall govern the conduct of the rulemaking proceeding, except that, to the extent that this notice differs from the rules of practice, the provisions of this notice shall govern. This alternative form of proceeding is adopted in accordance with § 1.20 of the rules of practice (16 CFR § 1.20).

Section C. Invitation To Comment

All interested persons are hereby notified that they may submit data, views, or arguments on any issue of fact, law or policy which may have bearing upon the proposed rule. Such comments may be made either in writing or orally. Written comments should be addressed to Henry B. Cabell, Presiding Officer (PU), Federal Trade Commission, Washington, D.C. 20580, 202-724-1045; they will be accepted until March 16, 1979. To assure prompt consideration, comments should be identified as "Standards and Certification Rule Comment" and furnished when feasible and not burdensome in five copies. Instructions for persons wishing to present their views orally are found in Sections E and F.

While the Commission welcomes comments on any issues which you feel may have bearing upon the proposed rule, listed in Section D are questions on which the Commission particularly desires comment. All comments and testimony should be referenced specifically to either the Commission's Questions or the section of the proposed rule being discussed. Comments should include reasons and data for the position. Comments opposing the proposed rule or specific provisions should, if possible, suggest a specific alternative. Proposals for alternative regulations should include reasons and data that indicate why the alternatives would better serve the purposes of the proposed rule. Comments should be supported by a full discussion of all the relevant facts and/or be based directly on first-hand knowledge, personal experience or general understanding of the particular issues addressed by the proposed rule.

Section D. Questions and Issues

Interested persons are urged to consider carefully the following questions. Although the proposed rule was drafted in specific language, the Commission retains its authority to promulgate a final rule in ways suggested by these questions and based upon the rulemaking record.

1. In the accompanying statement of reason for the proposed rule (Section B) the Commission has described the consumer protection and competitive problems that may arise from private standards and certification activities. How prevalent are the challenged practices set forth in the statement, and in what manner and context are such acts and practices unfair, deceptive or anticompetitive?

2. Are there benefits that flow from present industry practices that would be lost if the rule is promulgated as presently proposed? Does the proposed rule set out the least restrictive alternatives to achieve the intended goals?

3. What would be the cost of compliance for each of the groups covered by the proposed rule? To what degree would each of the requirements of the proposed rule raise costs, delay the adoption of new standards, or delay the introduction of new products? Might the rule discourage smaller standards developers and certifiers from staying in the market? Would this have any adverse effects in the market? How might the procedures themselves be used by incumbent firms and/or standard setters to deter, delay, or raise the cost of entry for new products?

4. What economic or other effects upon small businesses and consumers, if any, would result from implementation of the proposed rule?

5. Should the definition of "standard" be expanded to include nonproduct standards? Are there additional categories of either product or nonproduct standards that should be excluded or included in the rule? Is the definition of standard overly broad? Might it inadvertently include newspaper stories and other statements about products that do not raise the same problems as industry standards?

6. Do the notice requirements of § 457.4(a)-(c) insure that consumers, small business, and others will receive enough information to decide whether their participation in a proceeding is necessary? For instance, should the § 457.4(a) "notice of proceeding" include a statement of the likely effects of the proposed action on various parties? How specific could such a statement be, given the early stage at which this notice is given?

Do the notice requirements of § 457.4(a)-(c) impose an unnecessary burden on standards developers? Would interested parties, including small business and consumer interests, receive adequate notice if the notice requirements were lessened? For instance, could the § 457.4(a) notice be eliminated without unduly reducing the effectiveness of the rule? Alternatively, could the § 457.4(c) notice be combined with the earlier notice required by § 457.4(b) without unduly reducing the effectiveness of the rule? In what ways could the notice requirements be made less burdensome while still conveying necessary information to persons or interests who might want to participate in a standards proceeding?

7. Are the time limits for the provision of notice established by § 457.4 (a), (b), and (c), (30, 60, and 30 days respectively), appropriate? Are there instances where these time limits will unduly delay a standards proceeding? If so, how should such instances be handled?

8. To insure that consumers, small businesses, and other interested parties with limited financial resources have an equal and meaningful opportunity to participate in standards proceedings, is it necessary that their costs of participating be borne in whole or in part by other persons or groups? What has been the experience where consumers and small business have had the right to participate but have not been provided funds? Does the Commission have authority under section 5 of the FTC Act to order standards developers, industry members, or others to bear these costs? Should the Commission require the funding? If so, how much funding is necessary and what method should be used to compute the individual obligations of contributors? What criteria should govern allocation of funds, and what types of costs should be funded? What are other possible governmental or private sources of funding for unrepresented interests in standards proceedings?

To what degree would a funding requirement increase participation by small business and consumers interests in standards development process? Should funding be available only to producers or potential producers that would suffer direct economic injury and whose interests would not otherwise be represented? Would limitation of funding to such participants adequately protect consumer and other interests that would not otherwise be represented? If not, what parties should be able to receive funding?

9. Section 457.6 and related provisions set up a mechanism, which includes substantive criteria, for handling standards complaints. Suppose these sections were eliminated, and the proposed rule provided only *procedural* rights to directly affected parties—i.e., right of notice, opportunity to be heard, access to a meaningful summary of reasons for action, and perhaps a right of appeal to an independent board established by the standards maker or certifier. Would that adequately deal with most or all unfair or anticompetitive practices that may exist in standards making and certification? What evidence is there that unfair or anticompetitive practices would continue to exist if standards development processes contained adequate procedural safeguards? Are private rights of action available to deal with any problems which would remain?

Would such procedures as outlined above, in addition to a requirement that standards developers numerically "balance" some or all standards development committees so that viewpoints of all affected parties are fully represented, prevent most or all unfair, deceptive, or anticompetitive practices that may exist? Even if provisions providing for a challenge mechanism were not eliminated from the proposed rule, are "balancing" and "consensus" procedures necessary to prevent standards developers from drafting standards which injure consumers and/or small businesses? If "balancing" is necessary, what criteria and procedures should be used to determine the interests represented by various members of committees? Conversely, in light of the possible costs of compliance with §§ 457.3, 457.4, and 457.5, would reliance solely in the § 457.6 challenge procedures be sufficient to ensure adequate remedies for unfair, deceptive, and anticompetitive standards?

10. Should standards developers be required to develop all standards in accordance with the principles of § 457.6, rather than having only to evaluate specific standards with respect to those principles when challenged?

11. If the proposed rule were to go into effect, approximately how many requests for action per year would be submitted to the FTC for violations of the provisions of § 457.6? In the first year? In the fifth year after the proposed rule went into effect? Approximately how many of the complaints would come from parties who currently have no legal way (by antitrust suit or otherwise) to seek redress for alleged injuries?

12. Are there alternative mechanisms which would provide a means for resolving complaints without the necessity of specifying evidentiary burdens and substantive criteria? For example, would a requirement that a standards developer that receives a complaint about a standard set out in detail its evidence and reasoning in the matter result in resolution of most or all complaints?

13. Section 457.6 requires the standards developer to take action on a complaint (assuming that the complainant has met its threshold burden) unless it has "substantial evidence on the record as a whole" that its current standard is correct. Is this the proper evidentiary level that should be required or should a level that shows greater deference (e.g., some evidence) or less deference (e.g., preponderance of the evidence) to the standards developer selected?

14. Are the critiera in § 457.6(a) all of the substantive elements which are relevant to standards decisions, or should additional criteria be specified?

How well do the criteria strike the correct balance between the needs of uninformed buyers and the discouragement of unfair, deceptive, and anticompetitive standards? In particular, do standards by their very nature create possibly false presumptions of equivalence among conforming products? Under what circumstances are disclosures preferred to exclusions or graded standards and vice versa?

Will the criteria be effective in distinguishing legitimate from illegitimate claims? How might the criteria themselves be used by incumbent firms and/or standards setters to deter or delay the acceptance of new products? How might these tactics be stopped?

To what exent could grading criteria in standards misrepresent comparative characteristics of products with multiple attributes, e.g., by manipulation of attribute weighting criteria? In what other ways might unfair, deceptive or anticompetitive standards be adopted even while satisfying the basic principles in § 457.6(a)? How might the rule be altered to minimize this possibility at reasonable cost?

15. Under § 457.6, a standards developer is required to respond to a request for action within 60 days of receipt of the request. Is 60 days an appropriate length of time for a standards developer to determine whether or not a withdrawal, revision, or development of standard is called for?

16. Section 457.7 requires all appropriate actions that are commenced in response to a request under § 457.6 to be completed "within a reasonable period." If the appropriate action is development or revision of a standard, the standards developer is further required to commence action with respect to its own timetable, and to complete action within that timetable or to withdraw from the product area. Should the standards developer be allowed to amend its timetable? If so, for what reasons? If not, does the proposed rule encourage unnecessarily long timetables in order to avoid withdrawing from a product area?

17. Paragraph (g) of § 457.7 allows a 60 day extension of the timetable under certain specified conditions. Are those conditions appropriate? Should other conditions be added? Is the 60 day extension an appropriate length? Would an extension for a "reasonable period" allow completion of actions without encouraging undue delay in ending the harm that is occurring?

18. If there are multiple complainants about a particular position of a standards developer, should a period of time be allowed to consolidate requests before responding to the requests, e.g., should additional evidence on a request for action from *any* complainant operate to give the standards developer additional time to respond to the initial request (see § 456.6(c)(2))?

19. Should § 457.10 place a time limit on the availability of appeal to an unsuccessful complaint?

20. Should parties who have had notice and an opportunity to participate in a standards proceeding but have failed to participate be allowed to challenge the result of the proceeding, by requesting action under the challenge and appeal sections? Under what circumstances would denial of access to the challenge or appeal process be appropriate? Would this denial to persons who declined to participate in a proceeding provide an incentive for standards developers to provide wider notice and opportunity to participate to interested parties? Would denial of the challenge mechanism to parties that failed to participate in a standards proceeding result in the insulation of standards injurious to the public from challenge?

21. Certain activities are exempted from operation of the rule in §§ 457.11 and 457.15. Section 457.11 exempts some initial drafts of standards, some certifier test method development, and development of food, drug, and cosmetic standards. Should these activities be exempted from the standards development sections? What other activities should be exempted? Are there standards or industries for which this rule is particularly appropriate or inappropriate? Should the certification of used products be treated in the same manner under the rule as that of new products?

Section 456.15 exempts certain endorsements and testimonials, certifications procured by purchasers, and certifications relating to food, drugs, and cosmetics. Should these activities be exempted from the certification sections? What other activities should be exempted?

22. Should there be provisions in the rule for routine certifier duties, such as required factory inspections and use of statistically valid sampling plans, to insure the reliability of reported results? Should the rule permit limited public access to certifier records? If so, how could such access be structured to avoid disclosure of trade secrets?

V 4 3 / 2 3 6

23. To what extent would the disclosures required on seals of approval and in product listing directories by § 457.12(b) be read and understood by consumers, code officials, and other who rely on seals and listings? Is all of this information necessary? Might these disclosures create confusion for uninformed buyers? On the other hand, are there elements that should be required to be disclosed? Are there alternatives to requiring disclosures on seals, such as having the information available for those persons who request it, which would provide the necessary information without risking consumer confusion?

24. The certifier is required to perform certain duties relating to policing the use of its seal of approval by § 457.12(c) and (d). Is there sufficient uncorrected misuse of seals of approval to justify imposition of these duties on certifiers? Alternatively, are there adequate existing incentives for certifiers to police the use of their seals in marketing?

25. How might the requirements of § 457.13(d) be sidestepped by certifiers in practice? Is the term "reasonable buyer expectations" too vague?

26. Franchising and trademark licensing are technically certifications. However, because of the exemptions of internal company standards from the definition of standard (§ 457.2(1)), franchising and trademark licensing based on internal company standards would not be subject to the requirements of the certification sections of the rule. To what extent are franchising and trademark licensing based on standards which are not internal company standards? Should these activities be excluded from the rule? If so, how can a proper line be drawn between them and other forms of certification?

27. Does the proposed requirement in § 457.16 that an appeal board be "sufficiently independent of sponsoring * * * groups, so that it can render fair and impartial decisions" provide adequate guidance to sponsors of appeal boards and ensure impartiality of appeal boards? What other methods of insuring impartiality are available? What procedures and criteria, if any, should be established to determine whether an appeal board is sufficiently independent and whether individual members have conflicts of interest? Should the rule specify the composition of appeal boards, e.g., at least 51 percent public interest representatives?

28. Does the requirement that standards developers (§ 457.10) and certifiers (§ 457.13(e)) act "reasonably" with respect to the decision of an appeal board accord the proper amount of authority to appeal boards and the proper degree of deference to the standards developer of certifier? Should §§ 457.10 and 457.13(e) be amended to require standards developers and certifiers always to comply with decisions of the appeal board? Would the Commission have the authority to require compliance? Conversely, should the role of the appeal board be totally advisory? If the appeal board decision is not final, should standards developers and certifiers be required to furnish a written explanation of the failure to abide by the decision of the appeal board?

29. Is there reason to believe that practices declared illegal in § 457.17 (Marketing) are numerous (compared to other frauds relating to misuse of endorsements), cause serious consumer or competitive harm, and deserve to be covered separately by a Commission rule?

Additionally, should the rule require manufacturers, retailers or other persons in the chain of product distribution to notify a certifier whenever its seal or listings are being used in connection with the sale of products that do not perform as certified? What means, if any, would be appropriate to assure that consumer complaints about unsafe or shoddy goods sold under a seal of approval are transmitted to the certifier?

30. Section 457.17 imposes requirements relating to proper use of standards and certifications on all producers, distributors, retailers, and others involved in the marketing of products. Are there certain persons or activities covered by this section which should be exempted? Are there persons or activities not covered which should be added?

The section attempts to minimize affirmative burdens, especially on those persons lower in the chain of product distribution. Are there alternatives to the method used which should further minimize burdens while effectively ending misuse of standards and certifications?

31. Does the proposed rule adequately insure that consumer complaints to sellers relating to standards reach standards developers? How might the rule increase the likelihood that consumer complaints do reach standards developers?

32. The rule does not apply to individual participants in the standards process. Should the rule prohibit sellers or others from participating in the process or from using the resulting standards with the intent or effect of restraining trade or deceiving consumers?

33. How and to what extent do insurance companies and insurance rating bureaus affect standards development and certification activities? What are the effects on consumers and competition of basing insurance rates on compliance with private standards or certification requirements?

34. What is the relationship of standards development to rates of technological change? To what extent does the fixing of product quality through standards enhance or impede the introduction and diffusion of new products and the growth of markets? To what extent do current practices enhance or impede competition in the quality, availability, variety and safety of products?

35. What effects upon state and local laws, if any, would result from implementation of the proposed rule?

36. Should exercise of the procedural, challenge, and other rights and benefits established by the proposed rule, by persons or on behalf of products from foreign countries, be conditioned on the availability of substantially equivalent rights and benefits in such countries to persons or on behalf of products from the United States? The purpose of such a condition would be to encourage the elimination by other countries of technical barriers to international trade which might operate against products from the United States.

Such a condition could be accomplished by making revisions in the proposed rule such as the following. The existing paragraphs of § 457.11 would be redesignated as paragraphs (a)(1), (a)(2), and (a)(3), and a new paragraph (b) would be added to that section as follows:

(b) The standards developer shall have no obligation under this subpart with respect to persons or interests from countries in which procedural safeguards, challenge opportunities, and other benefits substantially equivalent to those provided under this subpart are not available to United States interests. The standards developer shall also have no obligation under §§ 457.6 and 457.7 with respect to claims (from any person) which would benefit only products which have such countries as their country of origin. For purposes of this section, adherence of a country to an international standards code for preventing technical barriers to trade, to which the United States has agreed, shall be deemed to result in the availability of substantially equivalant benefits.

A new paragraph (f) would be added to § 457.13 as follows:

(f) The certifier shall have no obligation under this section with respect to persons or products whose country of origin is one in which nondiscriminatory treatment, challenge opportunities, and other benefits substantially equivalent to those provided under this section are not available to United States interests. For purpose of this paragraph, adherence of a country to an international certification code for preventing technical barriers to trade, to which the United States has agreed, shall be deemed to result in the availability of substantially equivalent benefits.

What should be the scope of such provisions? Is the limitation, as proposed, broader than is necessary to encourage reciprocation by other countries? Would such a broad limitation result in added costs being imposed on consumers and others in this country which would outweigh its benefits?

Issues to be resolved under rule provisions such as those above include the following. What evidence, other than adherence to an international code, would establish that a country provides substantially equivalent benefits? Who would determine that countries are providing substantially equivalent benefits? The standards developer or certifier?

37. United States participation in international standards proceedings and development of U.S. positions for these proceedings are currently carried out by private interests. Should these activities be subject to the rule? If so, should all of the rule's provisions apply, or should the applicable provisions be limited or modified?

Are there other areas of international standards development and certification that should be addressed by the rule?

SECTION E. PUBLIC HEARINGS

Public hearings will be held commencing on April 16, 1979 at 9:00 a.m. in Room 15022, Federal Building, 450 Golden Gate Avenue, San Francisco, California and May 21, 1979 at 9:00 a.m. in Room 332, Federal Trade Commission Building, Pennsylvania Avenue and 6th Street, N.W., Washington, D.C. Persons desiring to present their views orally at the hearings should advise Henry B. Cabell, Presiding Officer (PU), Federal Trade Commission, Washington, D.C. 20580, 202-724-1045, as soon as possible.

The Presiding Officer appointed for this proceeding shall have all powers prescribed in 16 CFR 1.13(c), subject to any limitations described in this notice.

SECTION F. INSTRUCTIONS TO WITNESSES

1. *Advance notice.* If you wish to testify at the hearings, you must notify the Presiding Officer of your desire to appear and file with him your complete, word-for-word statement no later than March 26, 1979 for

D E 7 7 8 UMI

witnesses at the San Francisco hearings and April 30, 1979 for witnesses at the Washington, D.C. hearings. This advance notice is required so that other interested persons can determine the need to ask you questions and have an opportunity to prepare. The written testimony will be entered into the record exactly as submitted. Consequently, it will not be necessary for you to repeat this statement at the hearing. You may simply appear to answer questions with regard to your written statement or you may deliver a short summary of the most important aspects of that statement within time limits to be set by the Presiding Officer. As a general rule, such oral statements and summaries should not exceed twenty minutes.

Prospective witnesses are advised that they may be subject to questioning by designated representatives of groups with the same or similar interests in the proceeding and by members of the Commission's staff. Such questioning will be conducted subject to the discretion and control of the Presiding Officer and within such time limitations as he may impose. In the alternative, the Presiding Officer may conduct such examination himself or he may determine that full and true disclosure as to any issue or question may be achhieved through rebuttal submissions or the presentation of additional oral or written statements. In all such instances, the Presiding Officer shall be governed by the need for a full and true disclosure of the facts and shall permit or conduct such examination with due regard for relevance to the factual issues raised by the proposed rule and the testimony delivered by each witness.

2. *Use of exhibits.* Use of exhibits during oral testimony is encouraged, especially when they are to be used to help clarify technical or complex matters. If you plan to offer documents as exhibits, file them as soon as possible during the period for submission of written comments so they can be studied by other interested persons. Such documents that may be unavailable to you during this period must be filed as soon as possible thereafter but not later than the deadline for filing prepared statements. Mark each of the documents with your name, and number them in sequence, e.g., Jones Exhibit 1. The Presiding Officer has the power to refuse to accept for the public record any hearing exhibits that are not furnished by the deadline.

3. *Expert witnesses.* If you are going to testify as an expert witness, you must attach to your statement a resume or summary of your professional background and a bibliography of your publications. It would be helpful if you would also include documentation for the opinions and conclusions you express by footnotes to your statement or in separate exhibits.

4. *Results of surveys and other research studies.* If in your testimony you will present the results of a survey or other research study, as distinguished from simple references to previously published studies conducted by others, you must also present as an exhibit or exhibits in compliance with paragraph 2 above the following:

a. A complete report of the survey or other research study and the information and documents listed in (b) through (e) if they are not included in that report.

b. A description of the sampling procedures and selection process including the number of persons contacted, the number of interviews completed, and the number of persons who refused to participate in the survey.

c. Copies of all completed questionnaires or interview reports used in conducting the survey or study if respondents were permitted to answer questions in words of their choice rather than to select an answer from one or more answers printed in the questionnaire or suggested by the interviewer.

d. A description of the methodology used in conducting the survey or other research study including the selection of and instructions to interviewers, introductory remarks by interviewers to respondents and a sample questionnaire or other data collection instrument.

e. A description of the statistical procedures used to analyze the data and all data tables which underlie the results reported.

Other interested persons may wish to examine the questionnaires, data collection forms and any other underlying data not offered as exhibits and which serve as a basis for your testimony. This information along with punch cards or computer tapes which were used to conduct analyses should be made available (with appropriate explanatory data) upon request of the Presiding Officer. The Presiding Officer will then be in a position to permit their use by other interested persons or their counsel.

5. *Identification, number of copies, and inspection.* To assure prompt consideration, all materials filed by prospective witnesses pursuant to the instructions contained in paragraphs 1-4 above should be identified as "Standards and Certification Statement" ("and Exhibits," if appropriate), and submitted in five copies when feasible and not burdensome.

6. *Reason for requirements.* The foregoing requirements are necessary to permit us to schedule the time for your appearances and that of other witnesses in an orderly manner. Other interested parties must have your expected testimony and supporting documents available for study before the hearing so they can decide whether to question you or file rebuttals. If you do not comply with all of the requirements, the Presiding Officer has the power to refuse to let you testify.

7. *General procedures.* These hearings will be informal and courtroom rules of evidence will not apply. You will not be placed under oath unless the Presiding Officer so requires. You are also not required to respond to any question outside the area of your written statement, although, if such questions are permitted, you may respond if you feel you are prepared and have something to contribute. The Presiding Officer will assure that all questioning is conducted in a fair and reasonable manner. The Presiding Officer further has the right to limit the number of witnesses to be heard if the orderly conduct of the hearing so requires.

The deadlines established by this notice will not be extended and hearing dates will not be postponed unless hardship to participants can be demonstrated.

SECTION G. NOTIFICATION OF INTEREST

Interested persons who wish to avail themselves of the opportunity to question witnesses must, by March 2, 1979, notify the Presiding Officer of their position with respect to the proposed rule and each individual provision thereof. This notification must be in sufficient detail to enable the Presiding Officer to identify groups with the same or similar interests respecting the proposed rule. The Presiding Officer may require the submission of additional information from any applicant whose notification is inadequate. Failure to file an adequate notification in sufficient detail may result in the applicant not being considered for purposes of questioning.

Before the hearings commence, the Presiding Officer will identify groups with the same or similar interests in the proceeding. Such groups will be required to select a single representative for the purpose of conducting questioning and, if unable to make this selection, the Presiding Officer may select a representative of each such group. The Presiding Officer will notify all interested persons of the identity of the group representatives at the earliest practicable time.

Group representatives will be given an opportunity to question each witness on any issue relevant to the proceeding and within the scope of the testimony. The Presiding Officer may disallow any questioning which is not appropriate for full and true disclosure as to relevant issues. The Presiding Officer may impose fair and reasonable time limitations on the questioning. Given that questioning by group representatives and the staff will satisfy the statutory requirements with respect to disputed issues, no such issues will be designated by the Presiding Officer.

SECTION H. COMPENSATION OF WITNESSES AND REPRESENTATIVES

Pursuant to section 18(h) of the FTC Act, funds may be available for reimbursement of public participation costs incurred in this proceeding to those who satisfy the requirements of § 1.17 of the Commission's rules of practice. For further information contact Bonnie Naradzay, Special Assistant for Public Participation, Office of the General Counsel, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, D.C. 20580, 202-523-3796.

SECTION I. POSTHEARING PROCEDURES

Interested persons will be afforded 40 days after the close of the public hearings to file rebuttal submissions, which must be based only upon identified, properly cited matters already in the record. The Presiding Officer will reject all submissions which are essentially additional written comment in contrast to rebuttal. The 40-day rebuttal period is intended to include the time consumed in securing a complete transcript of the hearings.

Not later than 120 days after the close of the rebuttal period the staff shall submit its report as required by § 1.13(g) of the Commission's rules of practice. The Presiding Officer's report shall be submitted not later than 45 days thereafter and shall be confined to points of difference with the staff report. Post record comments, as described in § 1.13(h), shall be submitted not later than 30 days after the submission of the Presiding Officer's report.

SECTION J. RULEMAKING RECORD

In veiw of the substantial rulemaking records that have been established in prior trade regulation rulemaking proceedings (and the consequent difficulty in reviewing such records), the Commission urges all interested persons to consider the relevance of any material before placing it on the rulemaking record. While the Commission en-

V

Commission's rules under the FOIA, under the Commission's Freedom of

V 4 3 / 2 3 6 D E 7 7 8 UMI

courages comments on its proposed rule, the submission of material that is not generally probative of the issues posed by the proposed rule merely overburdens the rulemaking record and decreases its usefulness, both to those reviewing the record and to interested persons using it during the course of the proceeding. The Commission's rulemaking staff has received similar instructions.

Material that the staff has obtained during the course of its investigations prior to the initiation of the rulemaking proceeding that is not placed in the rulemaking record will be made available to the public. From time to time during the proceeding the staff may place additional materials on the rulemaking record, and make other additional materials available for inspection by the public. Some of these materials may be exempt from disclosure under the Freedom of Information Act, 5 U.S.C. 552, but will have been determined by the staff to be relevant and helpful to interested persons. Trade secrets or other sensitive exempt materials will not be made available.

The rulemaking record, as defined in 16 CFR 1.18(a), will be made available for examination Room 130, Public Reference Room, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, D.C.

By direction of the Commission, dated November 29, 1978.

CAROL M. THOMAS,
Secretary.

SEPARATE STATEMENT OF COMMISSIONER CLANTON

I have no difficulty supporting those aspects of the proposed rule which deal with procedural due process in the standards setting industry. In fact, if a rule is found to be justified, it may be desirable to go further by requiring consensus action, balanced membership and a binding appeals process. However, I am opposed to the inclusion of §§ 457.6 and 457.7, which deal with the substantive aspect of standards setting. It will be exceptionally difficult to define and enforce substantive standards. In my opinion, the due process sections provide adequate incentives to deter most of the anti-competitive problems that are likely to arise.

In addition, I do not support inclusion of the marketing section (457.17) in the proposed rule. Any problems which may crop up in this area can be adequately dealt with under existing law and Commission precedent.

[6351-01-M]

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Parts 1, 145, 147]

FORM 1-FR, FREEDOM OF INFORMATION ACT, AND GOVERNMENT IN THE SUNSHINE ACT

Proposed Form Change and Rules Changes

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed Form Change and Proposed Rules Changes.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is proposing to adopt a revised Form 1-FR to be used for complying with the financial reporting requirements of § 1.10 of the Commission's regulations. In addition, the Commission is proposing to amend its rules under the Freedom of Information Act ("FOIA") (5 U.S.C. 552) concerning those portions of the Form 1-FR that will not generally be made public or released. Finally, the Commission is proposing to amend its rules under the Government in the Sunshine Act (5 U.S.C. 552b) with respect to closing Commission meetings to the public and withholding from the public certain information concerning the portions of the Form 1-FR that will not generally be made public or released. The proposed amendments are intended to implement the provisions of the revised minimum financial regulations which were recently adopted by the Commission (43 FR 39956, September 8, 1978).

DATES: Comments must be received by January 8, 1979.

ADDRESS: Send comments to the Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Attention Secretariat.

FOR FURTHER INFORMATION CONTACT:

John L. Manley, Chief Accountant, Division of Trading and Markets, 2033 K Street, NW., Washington, D.C. 20581 (202) 254-5218.

SUPPLEMENTAL INFORMATION: The Commission adopted new minimum financial requirements on August 28, 1978,[1] which, among other things, amended the reporting requirements imposed upon futures commission merchants (FCMs) and changed the computation formula used to determine whether a futures commission merchant meets the Commission's minimum financial requirements. The preamble to the rules stated that the Commission would publish for comment proposed revisions in Form 1-FR reflecting the changes in the regulations. The proposed new Form 1-FR is set forth below. The following is a summary of the proposed changes in Form 1-FR:

1. The "Statement of Financial Condition" has been changed to provide the information needed to compute adjusted net capital but contains similar information to that previously required to be filed on the "Statement of Financial Condition";

2. The "Statement of the Computation of Minimum Capital Requirements" has been revised but includes similar information as existing schedules 1 and 2, "Determination Of Adequacy of Capital Position in Meeting Minimum Capital Requirements" and "Charges Against Unadjusted Working Capital;"

3. The "Statement of Income (Loss)" is new;

4. The "Statement of Changes in Financial Position" is new;

5. The "Statement of Changes in Ownership Equity" is new;

6. The "Statement of Changes in Liabilities Subordinated to the Claims of General Creditors" is new;

7. The "Schedule of Segregation Requirements & Funds In Segregation" for customers' commodity futures accounts has been amended but requires similar information to that previously required to be filed on schedule 3;

8. The "Schedule of Segregation Requirements and Funds In Segregation" for commodity option accounts is new; and

9. The revised Form 1-FR will no longer require the information previously required to be included on schedules 4 through 9.

CLARIFICATION OF CERTAIN PROVISIONS

The Commission believes that the proposed form, when read in conjunction with the minimum financial regulations which have previously been adopted,[2] does not require an elaborate explanation. However, certain items do require a brief explanation.

The boxes next to each line will be used to assist any computerization of the information obtained from the form. Certain exchanges already use data processing to facilitate their financial surveillance of their members.

The heading of each page of the Form 1-FR includes a space for a firm identification number. The Commission currently assigns a five digit identification number to each applicant for registration as a futures commission merchant but does not require FCM's to use this number when reporting on Form 1-FR. The Commission is considering using the number it assigns in the registration process in this heading. However, the Commission realizes that this may add another identification number to an already growing list of identification numbers each firm must have. The Commission is aware that many of the firms are already assigned identification numbers by the exchanges and/or the clearing organizations. In addition, each firm has a taxpayer identification number. Therefore, the Commission is specifically requesting comment on which identification numbers should be used when reporting to the Commission.

The Statement of Financial Condition and the Statements of Income (Loss), Changes in Financial Position, Changes in Ownership Equity, and Changes in Liabilities Subordinated to Claims of General Creditors filed in

[1] The regulations were published on September 8, 1978 at 43 FR 39956.

[2] 43 FR 39956 (September 8, 1978).

connection with the certified reports need not be filed in Form 1-FR format if the independent public accountant determines such format would be inconsistent with generaly accepted accounting principles for the financial statements of the applicant or registrant. If such a determination is made, the Statement of Financial Condition must be presented in a format which is as consistent as possible with Form 1-FR and a reconciliation must be provided which reconciles the Statement of Financial Condition to the Statement of the Computation of the Minimum Capital Requirements pursuant to § 1.17 of the Commission's regulations.

As was indicated in the FEDERAL REGISTER notices which accompanied the proposed amendments and the adoption of amendments to § 1.17,[3] the Commission's staff and representatives of the Securities and Exchange Commission (SEC) have initiated cooperative efforts in connection with their respective financial regulations. In part, as a result of such efforts, the Commission incorporated by reference the SEC's safety factors or "haircuts" on securities into its financial regulations. In addition, the Commission understands that the SEC's staff plans to recommend that its own Commission incorporate by reference the CFTC's safety factors on futures. If this step is taken, it will provide the requisite uniformity to permit those FCM's which are also registered with SEC as securities broker-dealers to comply with the Commission's financial reporting requirements by simply filing copies of the SEC's FOCUS Report[4] with the self-regulatory organizations and the CFTC.

PROPOSED AMENDMENTS TO COMMISSION RULE 145.5

The Freedom of Information Act (FOIA) basically requires that upon request, the Commission must make its records available to the public unless the records fall within the exemptions set forth in that Act. Section 552(b)(4) of that Act provides that "trade secrets and commercial or financial information obtained from a person and privileged or confidential" are exempt from mandatory public disclosure.[5] Rule 145.5(d)(1)(i) of the Commission's rules under the FOIA, 17 CFR 145.5(d)(1)(i), provides that certain of the information submitted to the Commission on and submitted with the Form 1-FR is to be treated as nonpublic. The Commission is now proposing to amend Rule 145.5(d)(1)(i) to conform its provisions to the proposed amendments to Form 1-FR.

Under the proposed rule, the following portions of Form 1-FR which are required to be filed pursuant to § 1.10 of the Commission's regulations will be treated as nonpublic provided that the procedure set forth in § 1.10(g) of the Commission's regulations is followed: The statement of Income (Loss), the Statement of Changes in Financial Position, the Statement of Changes in Ownership Equity, the Statement of Changes in Liabilities Subordinated to the Claims of General Creditors Pursuant to a Satisfactory Subordination Agreement and related footnote disclosures thereof and the accountant's report on material inadequacies filed under § 1.16(c)(5) of the Commission's regulations.[6]

The instructions to the Form 1-FR state that the Commission may, however, disclose to third parties certain portions of the "nonpublic" information under those circumstances described in the instructions. If the applicant or registrant files a petition for confidential treatment of this information, Commission Rule 145.9 affords the applicant or registrant with notice and a right to appeal any Commission staff decision to disclose this information pursuant to a Freedom of Information Act request. The instructions also state that if the applicant or registrant believes that the placing of any other information submitted on or with Form 1-FR in the Commission's public files would constitute an unwarranted invasion of the registrant's or applicant's personal privacy or would reveal sensitive business information, the registrant or applicant may petition the Commission under Rule 145.9 to treat such other information as nonpublic. The notice and appeal rights referred to above would also apply to this information.

These instructions inform the applicant or registrant of the Commission's responsibilities in general and under the Freedom of Information Act and the applicant's or registrant's rights under the Commission's Freedom of Information Act rules. It is the Commission's policy that exempt records generally will be withheld from disclosure under the Freedom of Information Act. However, irrespective of this policy and of whether a person petitions the Commission for confidential treatment, the Commission has an obligation to determine whether its records are publicly available. In each case, the Commission examines the records subject to a request for access in order to determine their availability. If a determination is made that the records are nonpublic since they fall within one of the FOIA exemptions, they normally will not be disclosed. As stated above, a person who has submitted information and has accompanied the submission with a petition for confidential treatment will receive notice and appeal rights during the normal decision-making process by the Commission staff and the Commission itself as to disclosure or withholding or materials pursuant to the Freedom of Information Act. See 17 CFR 145.9. Those considering a petition are reminded of the requirement in Rule 145.9(i) that a petitioner intend in good faith to aid the Commission in any proceeding that might be brought to compel the Commission to disclose the information.[7]

PROPOSED AMENDMENTS TO COMMISSION RULE 147.3

The Government in the Sunshine Act[8] basically requires that Commission meetings be open to public observation and certain information pertaining to meetings be disclosed to the public unless a meeting is likely to focus on a matter exempt from the openess requirements of the Act. Sec-

[3] 42 FR 27168, (May 26, 1977), 43 FR 15076 (April 10, 1978), 43 FR 39956, (September 8, 1978).

[4] Financial and Operational Combined Uniform Single Report under the Securities Exchange Act of 1934.

[5] 5 U.S.C. 552(b)(4). In certain instances, some of the information on the nonpublic portions of Form 1-FR may also be subject to general protection from public disclosure under Section 8(a) of the Commodity Exchange Act if it "would separately disclose the business transactions or market positions of any person and trade secrets or names of customers." As such, that information would be entitled to be withheld from disclosure under FOIA pursuant to the exemption for matters specifically exempted from disclosure by a statute which requires withholding from the public. See Section 552(b)(3) of the FOIA, 5 U.S.C. 552(b)(3), and the Commission Rule 145.5(c) thereunder, 17 CFR 145.5(c).

[6] Section 1.10(g) requires that the other portions of the Form 1-FR be bound separately in order that nonpublic treatment be accorded to the portions listed in the text.

[7] The Commission has received two comments that suggested that the Commission amend Rule 145.5 (dealing with information generally regarded as nonpublic) to provide that if the Commission proposes to disclose any such information to third parties, the person who submitted the information should receive prior notice regardless of whether that person has petitioned for confidential treatment of the material pursuant to Rule 145.9. The Commission does not believe that such an amendment is warranted. The petition procedure provided by Rule 145.9 is clear and amply protects the interests of those who consider information submitted to the Commission to be confidential. The procedure provides the submitter an opportunity to make his views known to the Commission in advance of any request for information. In addition, the submitter receives notification of any intended disclosure of the information pursuant to the Freedom of Information Act and the right to appeal to the Commission any staff denial of his petition. The Commission believes that this procedure is satisfactory and enables those desiring to be notified of intended disclosure the opportunity to assure themselves that they will be so notified.

[8] 5 U.S.C. 552b.

Pursuant to a Satisfactory Subordination

V 43/236 DEC 78 UMI

tion 552b(c)(4) of the Act provides that Commission meetings or portions of meetings which are likely to "disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential" may be closed and that certain information with respect thereto may be withheld from the public.

Rule 147.3(b)(4)(i)(A) of the Commission's rules under that Act, 17 CFR 147.3(b)(4)(i)(A), permits the closing of Commission meetings or portions of meetings and the withholding from the public of certain information with respect thereto when such meetings or portions of meetings are likely to involve discussions of certain, nonpublic information submitted to the Commission on and submitted with the Form 1-FR. The Commission is now proposing to amend Rule 147.3(b)(4)(i)(A) to conform its provisions to the proposed amendments to Form 1-FR.

Under the proposed rule, the following portions of Form 1-FR which are required to be filed pursuant to § 1.10 of the Commission's regulations will constitute a basis for closing Commission meetings or portions of meetings and withholding from the public information pertaining thereto provided that the procedure set forth in § 1.10(g) of the Commission's regulations is followed: the Statement of Income (Loss), the Statement of Changes in Financial Position, the Statement of Changes in Ownership Equity, the Statement of Changes in Liabilities Subordinated to the Claims of General Creditors Pursuant to a Satisfactory Subordination Agreement and related footnote disclosures thereof and the accountant's report on material inadequacies filed under § 1.16(c)(5) of the Commission's regulations.[9]

In consideration of the foregoing, and pursuant to the authority contained in the Commodity Exchange Act ("Act"), the Commission hereby proposes to amend Parts 1, 145, and 147 of Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. By amending Form 1-FR to read as follows:

FORM 1-FR

GENERAL INSTRUCTIONS

This form contains the financial statements and schedules which are required to be filed by each futures commission merchant or applicant thereof in accordance with the Commission's regulations. These instructions, and any other instructions issued from time to time, must be use in preparing this form and constitute part of this form.

The references in these instructions and on the financial statements and schedules to §§ 1.3, 1.10, 1.12, 1.16, 1.17, 1.18, 1.20-1.30, and 1.31, are to the Commission's regulations contained in 17 CFR Chapter I. The references to §§ 240.15c3-1 and 240.15c3-3 are to the Securities and Exchange Commission's regulations contained in 17 CFR Chapter II.

Before completing this form, the applicant or registrant should be familiar with the following sections of the Commission's regulations:

(1) 1.3—Definitions.

(2) 1.10—Application for registration and filing financial reports (futures commission merchants).

(3) 1.12—Maintenance of minimum financial requirements by futures commission merchants.

(4) 1.16—Qualifications and reports of accountants (if this report is required to be certified by an independent public accountant).

(5) 1.17—Minimum financial requirements—futures commission merchants.

(6) 1.18—Records for and relating to financial reporting and monthly computation (futures commission merchants).

(7) 1.20 through 1.30—Customers' money, securities, and property (commodity futures customer segregation).

(8) 32.6—Commodity option transactions segregation.

The terms "current assets," "liabilities," "net capital," "adjusted net capital," and "aggregate indebtedness" are all defined terms. The definitions of these terms may be found in § 1.17 of the Commission's regulations.

Section 1.10(d) of the Commission's regulations describes the required contents of these financial reports as follows:

(d) *Contents of financial reports.* (1) Each form 1-FR filed pursuant to this § 1.10 which is not required to be certified by an independent public accountant must be completed in accordance with the instructions to the form and contain: (i) A statement of financial condition as of the date for which the report is made; (ii) a statement of changes in ownership equity for the period between the date of the most recent statement of financial condition filed with the Commission (or the beginning of the fiscal quarter immediately following the effective date of this rule but in no event more than 90 days after such effective date) and the date for which the report is made; (iii) a statement of the computation of the minimum capital requirements pursuant to § 1.17 and a schedule of segregation requirements and funds on deposit in segregation, as of the date for which the report is made; and (iv) in addition to the information expressly required, such further material information as may be necessary to make the required statements and schedules not misleading.

(2) Each form 1-FR filed pursuant to this § 1.10 which is required to be certified by an independent public accountant must be completed in accordance with the instructions to the form and contain: (i) A statement of financial condition as of the date for which the report is made; (ii) statements of income (loss), changes in financial position, changes in ownership equity and, changes in liabilities subordinated to claims of general creditors, for the period between the date of the most recent certified statement of financial condition filed with the Commission (or the beginning of the fiscal year immediately following the effective date of this rule but in no event more than 1 year after such effective date) and the date for which the report is made: *Provided*, That for an applicant filing pursuant to paragraph (a)(2) of this section the period must be the year ending as of the date of the statement of financial condition; (iii) a statement of the computation of the minimum capital requirements pursuant to § 1.17 and a schedule of segregation requirements and funds on deposit in segregation, as of the date for which the report is made; (iv) appropriate footnote disclosures and (v) in addition to the information expressly required, such further material information as may be necessary to make the required statements not misleading.

(3) The statements required by paragraphs (d)(2)(i) and (d)(2)(ii) of this section may be presented in accordance with generally accepted accounting principles in the certified reports filed as of the close of the registrant's fiscal year pursuant to paragraph (b)(2) of this section or accompanying the application for registration pursuant to paragraph (a)(2) of this section, rather than in the format specifically prescribed by these regulations: *Provided*, The statement of financial condition is presented in a format as consistent as possible with the Form 1-FR and a reconciliation is provided reconciling such statement of financial condition to the statement of the computation of the minimum capital requirements pursuant to § 1.17. Such reconciliation must be certified by an independent public accountant in accordance with § 1.16.

(4) Attached to each form 1-FR filed pursuant to this § 1.10 must be an oath or affirmation that to the best knowledge and belief of the individual making such oath or affirmation the information contained in the form 1-FR is true and correct. If the applicant or registrant is a sole proprietorship, then the oath or affirmation must be made by the proprietor; if a partnership, by a general partner; or if a corporation, by the chief executive officer or chief financial officer.

The financial statements and schedules must be prepared in conformity with generally accepted accounting principles (except where otherwise indicated by the regulations) applied on a basis consistent with that of the preceding report. The financial statements and schedules must include, in the basic statements, schedules or accompanying footnotes, all informative disclosures which are necessary to make the required statements and schedules not misleading. The applicant or registrant must report all data after proper accruals have been made for income, expense and unrecorded liabilities; adequate reserves have been provided; and any other necessary adjustments have been made for the report to be on the accrual basis of accounting. If no response is made to an item or subdivision thereof, it will indicate a representation that the applicant or registrant has nothing to report.

This form with the exception of the Statement of Income (Loss), the Statement of Changes in Ownership Equity, the Statement of Changes in Financial Position, the Statement of Changes in Liabilities Subordinated to the Claims of General Creditors Pursuant to a Satisfactory Subordination Agreement, all footnote disclosures thereof and the accountant's report on material inadequacies filed under § 1.16(c)(5) of the Commission's regulations (provided the procedure set forth in § 1.10(g) of the Commission's regulations is followed) is considered by the Commission as a public record and will be available for inspection by any interested person. Copies will be available for public inspection at the Commission's office in which the form was filed. Under the provisions of the Freedom of Information Act (5 U.S.C. 552), the Commission may disclose to third parties portions of the "nonpublic" information listed above under the following circumstances: (1) In connection with matters in litigation; (2) in connection with Commission investigations; (3) where the information is furnished to regulatory, self-regulatory and law enforcement agencies to assist them in meeting responsibilities assigned to them by law; (4) where disclosure is required under the Freedom of Information Act; and (5) in other circumstances in which withholding of such information appears unwarranted. If the applicant or registrant files a petition for confidential treatment of this information, Commission Rule 145.9 affords the applicant or registrant with notice and a right to appeal any Commission staff decision to disclose this information pursuant to a request for information under the Freedom of Information Act. In addition, if the applicant or registrant believes that the placing of any other information submitted on or with this form in the Commission's public files would constitute an unwarranted invasion of the applicant's or registrant's personal privacy or would reveal sensitive business information, the registrant or applicant may petition the Commission to treat such other information as nonpublic pursuant to Rule 145.9 in response to requests under the Freedom of Information Act.

This form must be based upon the applicant's or registrant's accounting records. All accounting records, schedules and other memorandum which support amounts shown on the financial statements and schedules must be retained in accordance with § 1.31 of the Commission's regulations.

[9] As noted above, § 1.10(g) requires that the other portions of the Form 1-FR be bound separately in order that nonpublic treatment be accorded to the portions listed in the text.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 117]

[CGD 78-130]

DRAWBRIDGE OPERATION REGULATIONS

Ashley River, S.C.

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Seaboard Coast Line (SCL) Railroad Company, the Coast Guard is considering changing the regulations governing the SCL bridge across the Ashley River, mile 12.0, to require that the draw open on signal from 7 a.m. to 11 p.m. At all other times the draw will open on signal if at least three hours notice is given. The draw is presently required to open on signal. This proposal is being made because of limited requests for openings from 11 p.m. to 7 a.m. This action will relieve the bridge owner of the burden of having a person constantly available to open the draw.

DATE: Comments must be received on or before January 8, 1979.

ADDRESS: Comments should be submitted to and are available for examination at the office of the Commander (oan), Seventh Coast Guard District, 51 S.W. First Avenue, Miami, Florida 33130.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbridge Regulations Branch (G-WBR/73), Room 7300, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-0942.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their name and address, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal.

The Commander, Seventh Coast Guard District, will forward any comments received with his recommendations to the Chief, Office of Marine Environment and Systems, U.S. Coast Guard Headquarters, Washington, D.C., who will evaluate all communications received and recommend a course of final action to the Commandant on this proposal. The proposed regulations may be changed in the light of comments received.

DRAFTING INFORMATION: The principal persons involved in drafting this proposal are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Mary Ann McCabe, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF THE PROPOSED REGULATIONS

An analysis of the bridge logs submitted for the period October 1977 through September 1978 show a total of 898 openings, of which all but seventeen were from 7 a.m. to 11 p.m. The Coast Guard feels that this demonstrates a potential for the requested change and the public is hereby given an opportunity to comment on this proposal.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations be amended by adding a new § 117.245(g)(19) immediately after § 117.245(g)(18) to read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

§ 117.245 Navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets; bridges where constant attendance of draw tenders is not required.

. . . . . .

(g) • • •

(19) Ashley River, mile 12.0, Seaboard Coast Line Railroad bridge, near Drayton Hall, S.C. The draw shall open on signal from 7 a.m. to 11 p.m. At all other times the draw shall open on signal if at least three hours notice is given.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; (33 U.S.C. 499. 49 U.S.C. 1655(g)(2)); 49 CFR 1.46(c)(5).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: December 1, 1978.

J. B. HAYES,
Admiral,
U.S. Coast Guard Commandant.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by Minnesota Pollution Control Agency to National Can Corp.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to approve an Administrative Order issued by the Minnesota Pollution Control Agency to National Can Corporation. The Order requires the company to bring air emissions from two two-piece manufacturing lines in St. Paul, Minnesota, into compliance with certain regulations contained in the federally approved Minnesota State Implementation Plan (SIP) by May 1, 1979. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under the Clean Air Act (the Act). If approved by U.S. EPA, the Order will constitute an addition to the SIP. In addition, a source in compliance with an approved Order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on U.S. EPA's proposed approval of the Order as a Delayed Compliance Order.

DATE: Written comments must be received on or before January 8, 1979.

ADDRESS: Comments should be submitted to Director, Enforcement Division, U.S. EPA, Region V, 230 S. Dearborn Street, Chicago, Illinois 60604. The State Order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Cynthia Colantoni, Enforcement Division, U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, 312-353-2082.

SUPPLEMENTARY INFORMATION: National Can Corporation operates a can manufacturing facility at St. Paul, Minnesota. The Order under consideration addresses emissions from two two-piece can manufacturing lines at the factility, which are subject to Minnesota Regulation APC-1(c)(4). The regulation limits the emissions of hydrocarbons and is part of the federally approved Minnesota State Implementation Plan. The Order requires final compliance with the regulation by May 1, 1979, through modification of the existing two-piece can lines to change the inside spray coating to a water borne formulation so that emissions from this coating are no more than 4.2 pounds of solvent emission per gallon of coating used exclusive of water.

Because this Order has been issued to a major source of hydrocarbon emissions and permits a delay in compliance with the applicable regulation, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under Section 113(d) of the Act. U.S. EPA may approve the Order only if it satisfies the appropriate requirements of this subsection.

If the Order is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provision of the act (Section 304) would be similarly precluded. If approved, the Order would also constitute an addition to the Minnesota SIP.

All interested persons are invited to submit written comments on the proposed Order. Written comments received by the date specified above will be considered in determining whether U.S. EPA may approve the Order. After the public comment period, the Administrator of U.S. EPA will publish in the Federal Register the Agency's final action on the Order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601.)

Dated: November 24, 1978.

[FRL 1022-2]

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by Ohio Environmental Protection Agency To Buckeye Sugars, Inc.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: U.S. EPA proposes to approve an Administrative Order issued by the Ohio Environmental Protection Agency to Buckeye Sugars, Inc. The Order requires the Company to bring air emissions from two coal-fired boilers in Ottawa, Ohio, into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP) by July 1, 1979. Because the Order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under the Clean Air Act (the Act). If approved by U.S. EPA, the Order will constitute an addition to the SIP. In addition, a source in compliance with an approved Order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on U.S. EPA's proposed approval of the Order as a Delayed Compliance Order.

DATES: Written comments must be received on or before January 8, 1979.

ADDRESS: Comments should be submitted to Director, Enforcement Division, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. The State Order, supporting material, and public comments received in response to this notice may be inspected and copied for appropriate charges at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Cynthia Colantoni, Enforcement Division, U.S Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois, 312-353-2082.

SUPPLEMENTARY INFORMATION: Buckeye Sugars, Inc., operates a sugar processing plant at Ottawa, Ohio. The Order under consideration addresses emissions from two coal-fired boilers at the facility, which are subject to OAC 3745-17-10 and OAC 3745-17-07. The regulations limit the emissions of particulate matter, and are part of the federally approved Ohio State Implementation Plan. The Order requires final compliance with the regulations by July 1, 1979, either by improving the efficiency of steam utilization, thereby permitting replacement of Boilers No. 1 and 2 with a small oil-fired boiler or by the installation of appropriate particulate control equipment on Boilers No. 1 and 2. Pending achievement of compliance with the Order, Buckeye Sugars, Inc., shall use the best practicable systems of emission reduction for the period during which the Order is in effect.

Because this Order has been issued to a major source or particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by U.S. EPA before it becomes effective as a Delayed Compliance Order under Section 113(d) of the Clean Air Act. U.S. EPA may approve the Order only if it satisfies the appropriate requirements of this subsection.

If the Order is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the Order would also constitute an addition to the Ohio SIP.

All interested persons are invited to submit written comments on the proposed Order. Written comments received by the date specified above will be considered in determining whether U.S. EPA may approve the Order. After the public comment period, the Administrator of U.S. EPA will publish in the FEDERAL REGISTER the Agency's final action on the Order in 40 CFR Part 65.

Dated: November 24, 1978.

JOHN MCGUIRE,
Regional Administrator,

[4110-35-M]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

[42 CFR Part 405]

MEDICARE PROGRAM

Beneficiary Liability for Nonreimbursable Services or Items

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed amendment would revise a current Medicare regulation that implements section 1879 of the Social Security Act. That section provides that a beneficiary is not required to pay for certain items or services erroneously charged to Medicare, if he did not know, and could not reasonably have been expected to know, that the items or services were not covered by Medicare. The current regulation has been interpreted by some Administrative Law Judges to mean that evidence of an oral statement to the beneficiary is sufficient for finding that he knew items or services were not covered. The purpose of the proposed amendment is to clarify the regulations by providing that a beneficiary will not be found to have knowledge that items and services are not covered unless he is given written notification from the provider, the fiscal intermediary, or some other appropriate source.

DATES: Consideration will be given to written comments or suggestions received on or before February 5, 1979.

ADDRESS: Address comments to: Administrator, Health Care Financing Administration, Department of Health, Education, and Welfare, P.O. Box 2372, Washington, D.C. 20013.

In commenting, please refer to MAB-31P. Comments will be available for public inspection beginning approximately 2 weeks after publication, in room 5225 of the Department's offices at 330 C Street, SW., Washington, D.C. on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (202-245-0950).

FOR FURTHER INFORMATION CONTACT:

Mendel J. Kaufman, Medicare Bureau, Room 127, East High Rise Building, Baltimore, Maryland 21235, 301-594-9232.

SUPPLEMENTARY INFORMATION: The proposed change is intended to assure uniform treatment for all beneficiaries under section 1879 of the Social Security Act (Limitation on Liability of Beneficiary Where Medicare Claims are Disallowed). That provision relieves a beneficiary from liability for payment if he acted in good faith in accepting items or services for which Medicare payment is later denied because the items or services are determined either to be not medically reasonable and necessary or to constitute custodial care. Under section 1879, Medicare payment may be made for these items or services if neither the provider of the items or services (or other person who accepted assignment under Part B) nor the beneficiary knew, or could reasonably have been expected to know, that the items or services were not covered (see § 405.330). If it is established that the provider of the items or services, but not the beneficiary, had knowledge that the items or services were not covered, section 1879 authorizes the Secretary to indemnify the individual for payments he has made to the provider. If the beneficiary files a timely request for indemnification, Medicare will pay him the amount he paid the provider or other person less deductibles and coinsurance and will then recover the payment from the provider or other person who had, or should have had, knowledge that the services were not covered (see § 405.331).

The present regulation cites four examples of evidence sufficient to find that a beneficiary knew or could have been expected to know that the services or items furnished him were excluded from coverage. Each example involves written notice to the beneficiary from an appropriate source that the services or items were not covered. However, the parenthetical phrase "(but shall not be limited to)" which now precedes the examples has been interpreted by some Administrative Law Judges to permit oral notices as adequate evidence that a beneficiary has been advised of noncoverage. The intent of that parenthetical phrase was not to allow oral notices to constitute sufficient evidence that a beneficiary knew of noncoverage, but rather to avoid excluding written notices from official sources other than those cited in the four examples.

The proposed amendment deletes the parenthetical phrase and makes other editorial changes in order to avoid any implication that an oral notice of noncoverage would be acceptable evidence for finding that a beneficiary had knowledge of the noncoverage of items or services furnished him. Thus, the beneficiary will be relieved of liability under section 1879 of the Act unless he has received a written notice advising him of the noncoverage of the items or services furnished to him or, in a prior case, he had received written notice with respect to similar or reasonably comparable items and services.

fied matter, or *at a designated location allowing reasonable access*

V 4 3 / 2 3 6

42 CFR 405.332 is amended by revising the title of the section and paragraph (a) to read as follows:

§ 405.332 Criteria for determining that there was knowledge that certain items or services were excluded from coverage.

(a) *The individual to whom items or services are furnished.* An individual furnished items or services which are excluded from coverage by reason of § 405.310(g) or § 405.310(k) shall not be found to have known, or to have reasonably been expected to know, that such items or services were excluded from coverage unless written notice had been given to the individual (or to a person acting on his behalf) that the items or services were excluded from coverage. Written notice may consist of the following:

(1) An intermediary or carrier informed the individual (or a person acting on his behalf) in writing that the items or services furnished were not covered;

(2) The group or committee responsible for conducting the utilization review function of the institution furnishing the items or services (see § 405.1035 or § 405.1137) made a finding that the items or services were not covered and informed the individual (or a person acting on his behalf) in writing that the services or items were not covered.

(3) The provider of services or other person furnishing the items of services to the individual informed the individual (or a person acting on his behalf) in writing that the items or services are excluded from coverage and an intermediary or carrier (whichever is appropriate) has determined on the basis of the provider's or other person's past billing practices that the provider or person can effectively distinguish between cases where the items or services furnished are covered under Medicare and where the items or services are excluded from coverage.

(4) In a prior case involving the individual, he was notified under the circumstances referred to in paragraph (a)(1), (2), or (3) of this section that similar or reasonably comparable items or services were excluded from coverage.

NATIONAL DIRECT STUDENT LOAN, COLLEGE WORK-STUDY, AND SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANTS

Change in Location and Date of Hearing

AGENCY: Office of Education, HEW.

ACTION: Change in location and date of hearing.

SUMMARY: On November 8, 1978 (43 FR 52128) the Commissioner published in the FEDERAL REGISTER a notice of proposed rulemaking (NPRM) proposing changes in the institutional application procedures for the three "campus-based" Federal programs of student financial aid. Those three programs are popularly known as National Direct Student Loans, College Work-Study, and Supplemental Educational Opportunity Grants.

That NPRM announced the dates and places of four hearings on the proposed changes. In response to a public request, the date and place of one of those hearings is being changed

DATES: The hearing previously scheduled for December 4 in New Orleans is cancelled and will be replaced by a hearing on December 1 in Little Rock, Arkansas.

ADDRESS: The new hearing will be at:

December 1—Little Rock, Arkansas; University of Arkansas Conference Center, Library 517B, 33rd and University Avenue, Little Rock, Arkansas; 10 a.m. to conclusion. Contact person for scheduling presentation time: Ms. Carole Sivright, Dallas Regional Office (214) 767-3766.

FOR FURTHER INFORMATION CONTACT:

Mr. Jack Reynolds, 202-245-0231.

[Docket No. 25; Notice 29]

CONSUMER INFORMATION REGULATIONS

Uniform Tire Quality Grading; Extension of Comment Period

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Extension of period for public comment.

SUMMARY: This notice responds to a petition for extension of time to comment on NHTSA's announcement on radial tire treadwear test results relating to the Uniform Tire Quality Grading (UTQG) regulation. The closing date for comments is extended from December 4, 1978, to December 19, 1978.

DATE: Comments must be received on or before December 19, 1978.

ADDRESS: Comments should be submitted to: Docket Section, Room 5108, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Dr. F. Cecil Brenner, Office of Automotive Ratings, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590, 202-426-1740.

SUPPLEMENTARY INFORMATION: On November 6, 1978 (43 FR 51735), NHTSA announced the availability for public inspection and comment of the data from agency testing of radial tire treadwear characteristics under the road test conditions of the UTQG Standards (49 CFR 575.104) and NHTSA's analysis of that data. The notice set a closing date for comments of December 4, 1978.

The Dunlop Tire Company has petitioned for an extension of time to comment on the test results due to

delays it has encountered in handling the data. Dunlop's petition proposed no time period for the requested extension. The Rubber Manufacturers Association has also indicated difficulty in submitting comments within the December 4 time frame. In order to provide all interested parties with an adequate opportunity to evaluate and comment on test results, NHTSA has determined that an extension of the comment period is justified. Accordingly, Dunlop's petition is granted and the comment closing date for Docket 25, Notice 28 is hereby extended until December 19, 1978.

The RMA has also requested identification of the course used in NHTSA's radial tire treadwear testing and the test procedures employed. While NHTSA does not as a matter of practice respond to docket comments during the comment period, in order to assist the RMA in commenting on the radial tire data the agency points out the statement in Notice 28 (43 FR 51735) that, "Following issuance of Notice 22, NHTSA conducted a program of tests of radial tires on the UTQG treadwear test course in San Angelo, Texas." NHTSA also calls to the RMA's attention the paper "Test of Tread Wear Grading Procedure—The Course Monitoring Tire Adjustment on Radial Tire Wear Rates" by Brenner and Williams (Docket 25, General Reference Number 105) which stated with regard to the subject radial tire testing, "The procedures used were those specified in the UTQGS regulation (49 CFR 575.104)."

Comments received by the new comment closing date will be considered prior to the establishment of an effective date for application of the UTQG regulation to radial tires. To the extent possible, late comments will be considered.

The principal author of this notice is Richard J. Hipolit of the Office of Chief Counsel.

(Sec. 103, 112, 119, 201, 203; Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1401, 1407, 1421, 1423); delegations of authority at 49 CFR 1.50 and 501.8).

Issued on: December 1, 1978.

MICHAEL M. FINKELSTEIN,
Associate Administrator for Rulemaking.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Various railroads filed petitions with the Commission on March 31, and May 9, 1978, requesting that this proceeding be reopened to make changes in the data requirements set forth at 49 CFR Part 1102 (published at 41 FR 11824 on March 22, 1976 and as corrected on October 3, 1977, at 42 FR 53602).

The proceeding was reopened by the Commission in a decision served November 20, 1978. Interested parties are invited to comment on the proposed changes in the regulations which are set forth under Supplementary Information.

DATES: Comments must be received on or before January 8, 1978.

ADDRESSES: Send comments to: Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, Room—5342

FOR FURTHER INFORMATION CONTACT:

Janice Rosenak or Harvey Gobetz, Interstate Commerce Commission, Washington, D.C. 20423, Phone 202-275-7693.

SUPPLEMENTARY INFORMATION: Interested parties are invited to comment on the following issues:

(1) Is the following proposed change in 49 CFR 1102.9 warranted? (New material is italicized.)

All underlying data used in preparation of the material outlined above, *with the exception of revenue-to-cost calculations by individual railroad by commodity*, shall be made available for inspection during usual office hours by any party of record in the office of the party serving such verified matter, or *at a designated location allowing reasonable access.*

This underlying data shall be made available before hearing and whenever a hearing is not held. The underlying data shall also be made available at the hearing, but only if and to the extent specifically requested in writing and required by any party for the purpose of cross-examination.

All underlying data, with no exception, shall be made available for those commodities which the commission may choose to investigate pursuant to its decision in a general rate increase proceeding. the Commission shall have access to all underlying data at any stage of the proceeding upon request.

The purpose of this change is to let the railroads keep the computer tapes which calculate the actual revenue-costs ratios by commodities by individual carriers confidential at the protest level.

(2) Whether 49 CFR 1102.(4)(e) should be modified to read (new material is italicized) as follows:

The cost study shall be based on service unit costs developed for each individual study carrier through the use of Rail Form A costing procedures. These service unit costs shall be appropriately adjusted to reflect the transportation characteristics of the specified commodities, *and to reflect the operation characteristics associated with single-car, multiple car train-load and unit-train movements. The service unit costs* shall be applied to the respective individual carrier's traffic service units as determined from its traffic study.

The purpose of this change is to clarify when the railroads must make relevant adjustments to the system average costs calculated in Schedule C.

(3) Whether the term a "substantial number of commodities" as that phrase is used in 49 CFR 1102.1 should be clarified or defined further;

(4) Whether the regulations at 49 CFR 1102 should be changed to provide that a rail general increase in rates should become effective on a uniform date following authorization of the increase;

(5) Whether the following technical changes in the various Schedules required to be filed in general increase proceedings at 49 CFR Part 1102 are warranted;

H. G. HOMME, Jr.,
Secretary.

[7035-01-C]

PETITIONERS'

RECOMMENDED CHANGES IN EX PARTE 290 SCHEDULES

Item	Schedule/Line		Problem	Recommendations*
Net income	A	1	Net income includes extraordinary and prior period items, some of which do not apply to the current year. These are frequently non-cash accounting transactions which do not adequately reflect trends and income and should not be used in calculation of dividend payout ratio, return on equity, cash flow, throw-off to debt ratio and return on capitalization.	Change line 1 to read "Income before extraordinary and prior period items." Change formula to A.R. Sch. 300, L. 62, col. "b". Add line 1-A --Net Income. Calculate cash flow and other ratios using revised line 1.
Depreciation & retirements --equipment	A	3	Depreciation for shop machinery is omitted.	Change formula to A.R. Sch. 320, L. 68 + L. 81 + L. 82, col. "b".
Net railway operating income	A	11	The net gain or loss from operations and disposal of discontinued segments should not be deducted from NROI. (Accts. 560 and 562). (Also, see problems in Schedule B).	Change formula to A.R. Sch. 300, L. 22, col. "b". 1/
Current ratio	A	22	Material and supplies are neither liquid in nature nor intended to be converted to cash and, therefore, should not be included in current assets for calculation of current ratio.	Change formula to A.R. Sch. 200, L. 15 minus L. 12 + L. 64 + L. 65.
Cash flow	A	26	Cash flow incorrectly includes a number of non-cash items as the result of inclusion of extraordinary and prior period items in net income (line 1).	Change formula in Sch. A to L. 1 (revised) + L. 2 + L.3 + L. 12 minus L. 13. Item should read "Cash flow before dividends."
ICC instructions	B	-	Reference to "forecasted" data in second line of instructions was inadvertently retained by Commission after deciding to remove all forecast data from various schedules. (p. 3, ICC order, February 8, 1977). 2/	Delete "forecasted" and remove all references to "projected" in instructions for Schedules D-G.
Net railway operating income	B	Fn.1	Tax effects of operations and disposal of discontinued segments are incorrectly deducted from net revenue. (L. "d" and L. "e" of footnote 1). (Also, see problems in Schedule A). Also, "income from lease of road and equipment" must be deducted from "net revenue from railway operations" and "rent for leased roads and equipment" must be added to "net revenue from railway operations." (L. "f" and L. "g", footnote 1).	Revise formula as follows for footnote 1: L. "a" minus L."b" minus L."c" minus L."f" + L."g". (Present lines "d" and "e" should be deleted from the formula).
Cost of wage increases during period	E	7-8	(Line 7 should be conformed to line 8). Should be clarified to refer only to wage increases which occur during the base period and are paid during that period.	Amend line 8, column "a" to read "Cost of wage increase paid during period," and clarify language in line 7.

Item	Schedule/Line		Problem	Recommendations*
Payroll taxes attributable to freight service	F	8	Formula in column "b" is incorrect.	Amend formula in column "b" to read L. 5 x (Sch. E, L. 6 ÷ L. 1).
Pension costs attributable to freight service	F	11	Formula in column "b" is incorrect.	Amend formula in column "b" to read L. 9 x (Sch. E, L. 6 ÷ L. 1).
Increase in health & welfare cost over previous period; Increase in payroll taxes over previous year; Increase in pension costs over previous year; Increase in total costs	F	3, 7, 10, 14	Language is in conflict with Schedule E, line 8, which calls for "cost of wage increases during period"--also has little relevance to increases specified in lines 2 and 6 of Schedule F. Also pro forma column (d) requires clarifying guidelines for this Schedule and Schedule E.	Delete "over previous period" and "over previous year" and insert in lieu thereof "paid during the period." 3/
Schedule G	G	-	Computations do not accurately reflect productivity trends. There are two primary reasons: (1) the time span is too brief; and (2) ton-miles per freight service-hour is not, by itself a good index of productivity.	Eliminate Schedule G.
Base year	A&J	-	General instructions for determining base year and the latest calendar year when a filing is made in July appear to require that same year be reported in both columns--"d" and "e" for Schedule A--"c" and "d" for Schedule J. 4/	Amend instructions calling for latest calendar year to apply only when filing occurred in the last five months of a year rather than in the last six months. Otherwise, second most recent calendar month would be called for.
Transactions with affiliates	-	-	Decision published September 28, 1977, inadvertently dropped the $30,000 reporting limitation.	Commission should clarify as is done in Schedule J.

Footnotes:

* Annual report (R-1) references shown below are from 1977 report. Comparable data should be used for prior and subsequent periods.

** The relative portions of referenced pages in V.S. No. 1 are contained in Appendix B.

1/ Also, footnote in proposed R-1 report for 1978 should be adjusted to produce NROI on a comparable basis to previous years as was the intention. (See Chapter IV, p. 54).

2/ Similar error is repeated several times on page 26 of same Appendix relating to "recent, present and projected levels" in Schedules D-G.

3/ The recommended footnote for column "d" of Schedules E and F is "Column (d) should provide (1) the annualized cost of increases which occur on or near the effective date of the increases but after the base period, and (2) the added cost attributable to the differences between the cost of base period increases paid during the bases period and the annualized costs of such increase in the pro forma period. All of these calculations should be adjusted to employee levels, wage rates, productivity levels, and traffic conditions existing in the pro forma year."

Federal Grain Inspection Service

OFFICIAL AGENCY DESIGNATION

Cancellation of Amarillo Grain Exchange—Official Designation of Amarillo Grain Exchange, Inc., Proposal of Georgraphic Area

AGENCY: Federal Grain Inspection Service.

ACTION: Notice and Request for Comments.

SUMMARY: This notice announces the cancellation of designation of the Amarillo Grain Exchange, Amarillo, Tex., and the designation of the Amarillo Grain Exchange, Inc., owned by Mr. Don R. Burris, as an official agency at Amarillo, Tex., to perform grain inspection services under the U.S. Grain Standards Act, as amended, effective August 11, 1978. This notice also proposes a geographic area within which the agency will operate.

DATE: Comments by January 8, 1979.

FOR ADDITIONAL INFORMATION CONTACT:

Edith A. Christensen, Federal Grain Inspection Service, Compliance Division, Delegation and Designation Branch, 201 14th Street, S.W., Room 2405, Auditors Building, Washington, D.C. 20250, (202) 447-8525.

SUPPLEMENTARY INFORMATION: The United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (hereinafter the "Act"), has been amended to extensively modify the official grain inspection system. Pursuant to Sections 7 and 7A of the Act (7 U.S.C. 79 and 79a), the Administrator of the Federal Grain Inspection Service (FGIS) has the authority to designate any State or local governmental agency, or any person, as an official agency for the conduct of all or specified functions involved in official inspection (other than appeal inspection), weighing, and supervision of weighing of grain at locations where the Administrator determines there is a need for such services. Such designation shall terminate triennially (7 U.S.C. 79(g)(1) and 79a(c)).

On June 26, 1978, a notice was published in the FEDERAL REGISTER (43 FR 27574) announcing that (1) The Amarillo Grain Exchange (Exchange), Amarillo, Tex., requested that its designation as an official inspection agency be transferred to Mr. Don R. Burris, the General Manager of the Exchange; and (2) Mr. Don R. Burris applied for designation in accordance with Section 7(f)(1) of the Act (7 U.S.C. 79(f)(1)) to operate as an official agency at Amarillo, Tex., to be known as the Amarillo Grain Exchange, Inc.

Interested persons were given until July 26, 1978, to submit written views and comments with respect to the requested transfer of designation and/or to apply for designation to operate as an official agency at Amarillo, Texas. Forty-nine comments were received regarding the June 26, 1978, notice. All of these comments supported the proposed transfer. Twenty of the 49 comments were submitted by members of the former Exchange. Applications were received from the Alva Grain Inspection Department, Alva, Okla., and the Guymon Grain Inspection Inc., Guymon, Okla., to operate as the official agency at Amarillo, Tex.

The FGIS has conducted the required investigations of the three applicants, which included onsite reviews of their inspection points.

NOTE.—Section 7(f)(2) of the Act (7 U.S.C. 79(f)(2)) generally provides that not more than one official agency shall be operative at one time for any geographic area as determined by the Administrator.

As a result of these investigations, and after due consideration of the request for transfer, the applications filed herein, and all views and comments received, the Amarillo Grain Exchange, Inc., owned by Mr. Don R. Burris, was selected for designation under the Act to perform official inspection functions (other than appeal inspection), not including official weighing, and the designation of the former Exchange was canceled, effective August 11, 1978.

A document designating the Amarillo Grain Exchange, Inc., as an official agency was signed on August 11, 1978. Said designation also includes an interim assignment of geographic area within which the official agency shall officially inspect grain. The geographic area assigned to the Amarillo Grain Exchange, Inc., on an interim basis, pending final determination in this matter is:

Bounded on the North by: The Texas-Oklahoma State line from New Mexico east;

Bounded on the East by: The Texas-Oklahoma State line south-southeast to Montague County; the Clay-Montague County line south to southern Clay County line;

Bounded on the South by: The Southern Clay County line; the western Clay County line north to Wichita County; the southern Wichita County and Wilbarger County lines; the western Wilbarger County line north to Hardeman County; the southern Hardeman County line; the western Hardeman County line north to Childress County; the southern Childress County line north to U.S. Route 287; U.S. Route 287 northwest to Donley County; Donley County southern county line; the southern Armstrong County line west to Prairie Dog Town Fork of the Red River; Prairie Dog Town Fork of the Red River northwest to State Route 217; State Route 217 west to Farm Market Road (FM) 1062; FM 1062 west to U.S. Route 385; U.S. Route 385 north to Oldham County; the southern Oldham County line west to State line; and

Bounded on the West by: The Texas-New Mexico State line north to Oklahoma.

Interested persons may obtain maps of the proposed geographic area from the Compliance Division, Delegation and Designation Branch.

The specified service point of the Amarillo Grain Exchange, Inc., is 1300 South Johnson Street, Amarillo, Tex. 79101, which is located within the agency's proposed geographic area. A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of all or specified official inspection functions and where the agency or one or more of its licensed inspectors is located. A service location for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspection functions other than official grading where no licensed inspector is located. The designation document provides for the inclusion of additional specified service points and service locations which may be established in the future, within the agency's assigned geographic area.

Publication of this notice does not preclude future amendment of this designation, consistent with the provisions and objectives of the Act.

Interested persons are hereby given opportunity to submit written views or comments with respect to the geographic area proposed for assignment to the Amarillo Grain Exchange, Inc. All views or comments should be submitted in writing to the Office of the Director, Compliance Division, Federal Grain Inspection Service, 201 14th Street, SW., Room 2405, Auditors Building, Washington, D.C. 20250. All materials submitted should be mailed to the Director not later than January 8, 1979. All materials submitted pursuant to this notice will be made available for public inspection at the Office of the Director during regular business hours (7 CFR 1.27(b)). Consideration will be given to the views and comments so filed with the Director and to all other information available to the U.S. Department of Agriculture before final determination of the assignment of geographic area is made with respect to this matter.

(Sec. 4, Pub. L. 94-582, 90 Stat. 2868 (7 U.S.C. 75a); sec. 8, Pub. L. 94-582, 90 Stat. 2870 (7 U.S.C. 79); sec. 9, Pub. L. 94-582, 90 Stat. 2875 (7 U.S.C. 79a); sec. 27, Pub. L. 94-582, 90 Stat. 2889 (7 U.S.C. 74 note))

Done in Washington, D.C. on November 30, 1978.

D. R. GALLIART,
Acting Administrator.

Forest Service

COLVILLE NATIONAL FOREST

Noxious Weed Control; Finding of No Significant Effect

An Environmental Assessment Report that discusses noxious weed control on approximately 1694 acres of National Forest lands in Ferry and Stevens Counties, Wash., is available for public review in the Forest Service Office in Colville, Wash.

Although this project involves application of the herbicide 2,4-D, and picloram the Environmental Assessment Report does not indicate that there will be any significant effect upon the quality of the human environment. Therefore, it has been determined that an environmental statement will not be prepared.

This determination was based upon consideration of the following factors, which are discussed in the Environmental Assessment Report: (1) application of the herbicide 2,4-D, and picloram in accordance with Federal, State, and local government regulations and requirements is not expected to have any unanticipated effects on the ecosystem; (2) there will be no irretrievable or irreversible resource commitments on the proposed project areas; (3) physical and chemical effects of 2,4-D, and Picloram when properly applied, have proven to be acceptable based on the best scientific evidence available; and (4) no known unique or rare resources within the proposed project areas.

Public concern has been expressed about possible effects of 2,4-D, and picloram on human health. Use of 2,4-D, and picloram in accordance with Federal and State regulations provides controls which guarantees protection of human health and welfare.

No action will be taken prior to 30 days from the date of publication in the FEDERAL REGISTER (January 8, 1979).

The responsible official is Robert B. Terrill, Forest Supervisor, Colville National Forest, 695 So. Main, Colville, Wash. 99114.

Dated: November 21, 1978.

ROBERT B. TERRILL,
Forest Supervisor.

[6320-01-M]

CIVIL AERONAUTICS BOARD

[Docket Nos. 34138, 34100, 34089; Order No. 78-11-154]

COMMUTER/CERTIFICATED CARRIER JOINT FARES

Tentative Decision and Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 30th day of November, 1978.

Section 37(c) of the Airline Deregulation Act of 1978, Pub. L. 95-504 requires *inter alia* that:

> Whenever the Board * * * prescribes a uniform method generally applicable to the establishment of joint fares, and the divisions thereof, between carriers holding certificates issued under Section 401 of (the) Act, it shall make such uniform method applicable to the establishment of joint fares, and the divisions thereof, between such air carriers and commuter air carriers.
>
> [T]his subsection shall apply to any [such] uniform method which the Board prescribes on and after December 27, 1974.

On December 27, 1974, the Board issued Order 74-12-108 which, subject to certain minor modifications contained in Order 75-8-26 (August 6, 1975) and a clarification contained in PS-80 (August 25, 1978) sets forth a uniform method for the establishment and division of joint fares between certificated carriers.

After the adoption of this uniform method, the Commuter Airline Association of America, Inc. (CAAA), on behalf of its members and itself, petitioned the Board to extend this uniform method to joint fares between commuter and certificated carriers (Docket 29707). After consideration, the Board, in Order 77-9-100, refused to do this because of its belief that the uniform method, based as it is on DPFI fares and costs, could not properly be applied to the largely unregulated commuter carriers. The Board viewed the extension of the division formula to commuter/certificated joint fares as providing an unjustified windfall to commuters.

Despite the Board's earlier finding, we must now act to effectuate the legislated will of Congress. In so doing it is neither considering nor adopting a new approach on policy grounds, but is performing a ministerial act. The Board explicitly repeats its intention, expressed in PS-80, to comprehensively examine and address the entire policy of joint fares.

Consequently, the Board is now issuing a tentative decision and order to be

Aviation (BIA) and answered by Bran-

Toronto/Montreal markets in the pro-

V 4 3 / 2 3 6 DEC 7 78 UMI

effective January 22, 1979. That has been chosen as the effective date for the following reasons:

1. The uniform methods applies to the establishment of joint fares, as well as their division. A failure to make this rule prospective only would likely result in unlawful fares having been charged under conditions which could not be viewed as allowing carriers a reasonable opportunity to have charged lawful fares. There is, moreover, nothing the Board can do to restore the *status quo ante* in the numerous markets in which we believe were charged more than would have been permitted our joint fare formula.

2. A retroactive application of the 90 days notice requirement (the added responsibility imposed on commuters along with the benefits conferred by the uniform method of joint fare divisions) would have the unduly harsh result of permanently excluding from the uniform method any commuter airline which, since October 24, 1978, modified schedule over a route covered by an agreement with a certificated carrier. This result would be mandated by the portion of Section 37(c) which states that the uniform method "shall not apply" to any commuter carrier making such changes without having provided such notice. This could not be a result intended by Congress. Neither is there any indication that Congress intended the benefits of the uniform method to attach prior to the assumption of the obligation by the commuter carriers to give notice. To the contrary, one is clearly predicated on the other.

3. Although we are waiving the 30-day rule for joint fares between commuter and certificated carriers, and permitting such tariffs to be effective on one-day notice, nevertheless commuter carriers will face a heavy burden of filing. In addition to filing specific joint fares, as required by the uniform method, new tariffs will have to be filed to enable joint fares to be constructed over routes for which a specific tariff was not previously filed. A period of time must be allowed for this.

The Board has recently received two petitions which relate to this question. Docket 34089 concerns a CAAA petition that we (1) include commuters within the ambit of DPFI joint fares and divisions and (2) make such relief retroactive, at least with respect to divisions, "as of and from at least October 24, 1978." Docket 34100 is a joint petition of Altair Airlines, a commuter airline, and Wright Airlines, a certificated carrier, requesting that they too be brought within the DPFI provisions. With respect to the CAAA petition and Altair, the tentative action we describe above constitutes our response to the petitions. We feel free to act now without waiting for answers inasmuch as we are now issuing only a tentative order. If interested parties believe themselves aggrieved, they are free, of course, to file the statement of objections for which we provide below.

Wright's request raises a different issue. The Board has previously brought newly certificated carriers within the uniform joint fare and division formulae by show-cause procedures.[1] Such procedures seem overly cumbersome, particularly in the perspective of the Deregulation Act, inasmuch as it is difficult to imagine a basis for placing newly-certificated carriers on a worst or different footing than commuters. We will, therefore, propose that newly certificated carriers be made subject to uniform joint fare and division formulae 15 days after certification, unless it gives the Board timely notice of an intent not to participate. Other carriers or interested parties may object to such status either before, within, or after the 15-day period. Should an objection be received, the Board will issue an appropriate order on an expeditious basis.

We now make the following tentative findings:

1) The Board finds that application of the uniform method of establishing and dividing joint fares to interline routings between certificated and commuter carriers beginning January 22, 1979 is required by the Airline Deregulation Act of 1978, Pub. L. 95-504.

2) The Board finds that the uniform method of establishing and dividing joint fares should not apply to interline routings between certificated and commuter carriers, except in those specific cases previously ordered by the Board, until January 22, 1979.

3) The Board finds that newly-certificated carriers should be brought within the ambit of any joint fare and division formulae applicable to other carriers within 15 days of certification.

4) The Board finds that the issuance of this order is not a "major federal action significantly affecting the quality of the human environment" within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969, and will not constitute a "major regulatory action" under the Energy Policy and Conservation Act of 1975, as defined in subsection 313.4(a)(1) of the Board's regulations.

ACCORDINGLY THE BOARD PROPOSES:

1. To amend paragraph 1 of Order 74-12-108, as amended by order 75-8-126, by revising the first paragraph to read as follows:

The maximum lawful joint fares hereafter to be demanded, charged, collected, and received by trunk, local, and commuter service carriers for interline transportation of persons, involving at least one certificated carrier, by said air carriers in the 48 contiguous states and the District of Columbia are as follows:[54]

2. To amend paragraph 6 of Order 74-12-108 to read as follows:

Divisions of all joint fares for transportation of persons by trunk, local, and commuter carriers for interline transportation involving at least one certificated carrier between points served by said carriers in the 48 contiguous states and the District of Columbia shall be based on the relative costs for the distances flown by each carrier participating in the interline carriage.

3. To add a new paragraph, to be paragraph 8a, to Order 74-12-108, to read as follows:

The provisions of this order, as amended, shall be applicable to all air carriers within 15 days of their certification unless otherwise provided by Board order. This paragraph shall not apply to any newly-certificated carrier that notifies the Board, before its certification, that it chooses not to accept these provisions.

4. To waive the requirements of 14 C.F.R. Section 221.160 and paragraph 3 of Order 74-12-108 that required tariffs to be filed 30 days before their effective date for 30 days from the date of this order with respect to tariffs involving joint fares between certificated and commuter carriers. During this period, such tariffs will be effective one day after filing.

5. That this uniform method of establishing and dividing joint fares shall not apply to any commuter air carrier which has an agreement with any air carrier to provide service for persons and property which includes transportation over its routes and which:

a) modifies, suspends or terminates such service; and

b) fails to provide ninety days notice of such modification, suspension or termination of service to the Board and to the carrier or carriers involved in such agreement.

We direct any interested person having objection to the issuance of this order to file with us no later than December 20, 1978, and to serve upon all the parties served with this order, a statement of objections together with a summary of facts, statistical data, and other materials relied upon to support the stated objections; answers to any such statements of objections will be due no later than December 29, 1978.

A copy of this order shall be served on all certificated and commuter airlines, and on the Commuter Airline Association of America, Inc..

We will publish this order in the FEDERAL REGISTER.

TEXAS/GREAT LAKES-EASTERN CANADA SERVICE CASE

Order on Reconsideration

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 30th day of November, 1978. Applications of ALLEGHENY AIRLINES, INC., AIRLIFT INTERNATIONAL, INC., AMERICAN AIRLINES, INC., BRANIFF AIRWAYS, INC., CONTINENTAL AIR LINES, INC., DELTA AIR LINES, INC., EASTERN AIR LINES, INC., FRONTIER AIRLINES, INC., NORTH CENTRAL AIRLINES, INC., SOUTHERN AIRWAYS, INC., TEXAS INTERNATIONAL AIRLINES, INC.

By Order 78-9-90, adopted September 20, 1978, and served September 25, 1978, the Board instituted the *Texas/Great Lakes-Eastern Canada Service Case*, to implement a bilateral air transport agreement between the United States and Canada which provided new and expanded routes for U.S. air carriers. The case was to include consideration of the following issues:

(a) Do the public convenience and necessity require certification of one or more air carriers to engage in foreign air transportation on a subsidy ineligible basis between the following points:

(1) Cleveland, Ohio, on the one hand, and Toronto and Montreal, Canada, on the other;

(2) Detroit, Michigan and Montreal, Canada;

(3) Houston and Dallas/Fort Worth, Texas, on the one hand, and Toronto and Montreal, Canada, on the other;

(b) If the answer to subparagraph (a) is affirmative, in whole or in part, which air carrier(s) should be authorized to engage in such service, and what terms, conditions, and limitations, if any, should be placed on the operation of such carrier(s);

(c) Should Allegheny Airlines' temporary authority between Cleveland, Ohio, and Toronto, Canada be renewed, deleted, or otherwise modified.

We provided a reasonable period for the filing of applications, motions to consolidate, and petitions for reconsideration, and a further period for responsive answers.

A petition for reconsideration was filed by the Bureau of International Aviation (BIA) and answered by Braniff. BIA seeks to have the Board clarify the description in its instituting order of four U.S. routes authorized in the United States-Canada Civil Air Transport Agreement particularly with respect to selection of intermediate points. It points out that the U.S.-Canada bilateral describes routes by terminal points but permits a designated carrier to serve intermediate points in its home territory subject to three limitations: (1) intermediates must be geographically located between the specified terminals within reasonable proximity to an imaginary direct line connecting the terminal points; (2) no intermediate point may be selected which, when included on the designated route, would comprise another designated route which the air carrier is not authorized to serve; (3) no carrier may originate or terminate operations at an intermediate. Further, the Texas-East Canada route is limited to two intermediates. BIA asserted that in the absence of a clarifying amendment to our instituting order applications might be filed at variance with the bilateral limitations. Braniff answered that the BIA petition would serve as well as an amendment to our order. In fact, the applications filed have not run afoul of the bilateral limitations. We shall deny the BIA petition for reconsideration.

The Commonwealth of Puerto Rico also filed a petition for reconsideration, asking the Board to expand the proceeding to include Puerto Rico within the scope of the proceeding. Recognizing that the U.S.-Canada bilateral makes no provision for such routes, Puerto Rico points out that such a circumstance has not been a deterrent to the Board including markets in a case where such action was in the public interest. Here, it asserts, such action is in the public interest because (1) the markets are larger and receive poorer service than the markets in the case; (2) awards of authority in these markets would benefit, among others, air travelers, the Puerto Rican government and people, U.S. air carriers and the U.S. economy; and (3) it is unlikely that a better opportunity will arise for the consideration of these markets in the foreseeable future. Puerto Rico has made a substantial factual showing in support of its allegations summarized above.

The Government of the Virgin Islands of the United States filed an answer to Puerto Rico's petition for reconsideration.[1] It states that it did not file a petition for reconsideration seeking to include the Virgin Islands-Toronto/Montreal markets in the proceeding because "such a major geographical expansion seemed to us inappropriate where only a single, and not very dense, Caribbean market would be added." However, it urges that if Puerto Rico-Toronto/Montreal is added to the case, then Virgin Islands-Toronto/Montreal should also be added since the Virgin Islands compete for the same vacation travelers and are subject to the same or more severe service deficiencies. They agree with Puerto Rico that this may be the last chance to consider these markets in the near future and that the absence of these routes from the U.S.-Canada bilateral is not decisive.

BIA also filed an answer to Puerto Rico's petition for reconsideration. It opposes the petition on the grounds that (1) the San Juan-Toronto/Montreal route has little relationship to the other routes in the case, (2) it is not covered by the U.S.-Canada bilateral, and (3) its inclusion could delay the institution of service on the other routes, for which bilateral authority becomes effective April 29, 1979.

We have decided to deny Puerto Rico's petition for reconsideration and leave the scope of the proceeding as we fixed it originally. We do not quarrel with Puerto Rico's view that legally, and frequently practically, the Board may and should designate a carrier for a foreign route even though no authorization exists for such a route in the governing bilateral agreement. But it does not follow that it must do so in every case. The size and importance of the market and the geographical unity of the markets which governed the *Seattle/Portland-Japan Service Investigation*, Order 78-10-42, and the *Yucatan Service Case*, Order 78-8-100, cited by Puerto Rico, are not present here. Moreover, if San Juan-Canada markets are included then the Virgin Islands are entitled to consideration with possible complications from many other Caribbean points. The scope and focus of the proceeding would be radically altered causing delay, inefficiency, and unfairness to the original applicants. *San Francisco-Reno-Albuquerque-Texas Service Investigation*, Order 78-10-103, p. 2. This does not mean that an investigation of the markets connecting Toronto and Montreal with Puerto Rico and the Virgin Islands is not warranted or will be bypassed for the foreseeable future, as has been suggested, but only that they should be considered on their merits in a separate proceeding.

Several applications have been filed in addition to those previously consolidated. Applications to serve all of the precise markets placed in issue by our order were filed by Allegheny in Docket 33647, Delta in Docket 33839,

[1] The Virgin Islands also filed a motion to intervene in the event that Puerto Rico's petition for reconsideration is granted. Since we are denying Puerto Rico's petition, the Virgin Islands' motion to intervene is moot and will be dismissed.

V 43 / 236 DEC 7 78 UMI

Airlift International in Docket 33840, Continental in Docket 33850, and North Central in Docket 33855. Applications to serve only the Great Lakes points and the Eastern Canada points (segments (1) and (2) of the Board's description of issues) were filed by Southern in Docket 33854 and Frontier in Docket 33856. Also, Braniff filed Amendment No. 1 to its application in Docket 28337 (already consolidated) to include the Detroit, Mich.-Montreal, Canada market as well as the Texas-East Canada markets applied for earlier.[2] Texas International (TXI) applied for the co-terminal points Houston/Dallas/Fort Worth, the intermediate points St. Louis, Mo. and New Orleans, La., and the co-terminal points Toronto/Montreal, Canada in Docket 33837. Eastern filed two applications for consolidation into this case. The first, Docket 33847, sought authority between the Texas and Eastern Canada points with St. Louis, Mo. and Pittsburgh, Pa., as intermediates. The second application, Docket 33848, sought authority between the co-terminals Pittsburgh, Pa. and St. Louis, Mo. and the co-terminals Dallas/Fort Worth and Houston, Tex.

Each of the applications was accompanied by a motion to consolidate it into Docket 33477. We shall grant the motions to consolidate the applications of Allegheny in Docket 33647, Delta in Docket 33839, Airlift in Docket 33840, Continental in Docket 33850, North Central in Docket 33855, Southern in Docket 33854 and Frontier in Docket 33856, and Braniff (Amendment No. 1) in Docket 28337. All of these applications request authority at issue in this case and their consolidation will be conducive to the proper dispatch of the Board's business and the ends of justice.

The applications of TXI in Docket 33837 and Eastern in Docket 33847 seek authority between the Texas terminal points and the East Canada terminal points in each case with two named intermediates. In the case of TXI the intermediates are St. Louis and New Orleans and for Eastern, St. Louis and Pittsburgh. As noted earlier, the addition of two intermedite points on the Houston/Dallas/Fort Worth Toronto-Montreal route accords with the U.S.-Canada bilateral. The only limitation of the bilateral drawn into question is that which provides that intermediates must be geographically located between the specified terminals within reasonable proximity to an imaginary direct line connecting the terminal points. We conclude that the intermediates named by TXI and Eastern in these applications, namely, St. Louis, New Orleans, and Pittsburgh, are within reasonable proximity of such an imaginary line between the Texas and East Canada terminals.[3] We find that these intermediates may be considered in this case and that TXI's motion to consolidate its application in Docket 33837 will be granted. Eastern's motion to consolidate will also be granted insofar as it relates to Docket 33847.

Eastern's motion also seeks consolidation for its application in Docket 33848. That application requests a new segment on its Route 5 authorizing Pittsburgh/St. Louis-Dallas/Fort Worth/Houston service. Such a request has no necessary relationship to the implementation of the bilateral agreement or the original scope of the proceeding. It will expand the issues and delay the proceeding and, if allowed to become a precedent, could cause incalculable harm to the swift completion of the proceeding. We shall deny Eastern's motion to consolidate insofar as it relates to its application in Docket 33848.[4]

Petitions for intervention have been filed by the Indianapolis Airport Authority (Indianapolis), the Greater Cincinnati Chamber of Commerce, City of Cincinnati, and Kenton County Airport Board, operators of the Greater Cincinnati Airport (the Cincinnati Parties), and by Board of County Road Commissioners of the County of Wayne, Michigan, and Greater Detroit Chamber of Commerce (the Detroit Parties). Each of these persons appears to have a sufficient economic interest in the case of justify its participation and no one has filed an objection to any of the petitions. We shall permit Indianapolis, the Cincinnati Parties, and the Detroit Parties to intervene.

ACCORDINGLY,

1. The petitions for reconsideration of Order 78-9-90 filed by the Bureau of International Aviation and the Commonwealth of Puerto Rico are denied.

2. The contingent motion to intervene filed by the Government of the Virgin Islands is dismissed.

3. The motions to consolidate into Docket 33477 the applications filed by Allegheny Airlines in Docket 33647, Delta Air Lines in Docket 33839, Airlift International in Docket 33840, Continental Air Lines in Docket 33850, North Central Airlines in Docket 33855, Southern Airways in Docket 33854, Frontier Airlines in Docket 33856, Braniff Airways (Amendment No. 1) in Docket 28337, Texas International Airlines in Docket 33837, and Eastern Air Lines in Docket 33847 are granted.

4. The motion of Eastern Air Lines to consolidate into Docket 33477 its application in Docket 33848 is denied.

5. The petitions for intervention in Docket 33477 filed by Indianapolis, the Cincinnati Parties, and the Detroit Parties are granted.

6. Except to the extent granted, all other written requests in this case are denied.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-34191 Filed 12-6-78; 8:45 am]

[2] It is the same Texas-East Canada market that American Airlines applied for in Docket 32746 which was consolidated by Order 78-9-90.

[3] Although not yet directly involved in this issue, we find that San Antonio, Corpus Christi, Indianapolis, and Cincinnati, where intervenors are located, are also within reasonable proximity of such an imaginary line.

[4] Procedurally, such an expansion of the scope of the proceeding should have been sought in a petition for reconsideration. As is evident, we would have denied such a petition.

[6320-01-M]

[Docket No. 33276; Order No. 78-11-153]

TRANS WORLD AIRLINES, INC.

Order Denying Petition for Reconsideration

Adopted by the Civil Aeronautics Board at its office in Washington D.C. on the 30th day of November, 1978.

By Order 78-9-38, August 23, 1978, the Board suspended, pending investigation, five percent increases in winter/low season normal economy class fares proposed by Trans World Airlines, Inc. (TWA). On September 18, 1978, that carrier filed a petition for reconsideration of this action.

Arguing that the Board has made improper use of its suspension powers to get policy concessions on unbundling normal economy fares, TWA states the Board's belief that transatlantic fares are less cost-related than domestic fares is factually unproven; it may be disregarding the many cost differences between domestic transcontinental operations and transatlantic operations, which on a unit basis are 13.5% more costly; only a general fare increase will arrest the decline in transatlantic yields; the order makes no finding of potential unlawfulness of the level or structure of economy fares either existing or proposed, but rather it is an example of regulatory arm-twisting to extract desired concessions on fares without regard to the judgment of carrier management; and although the recently terminated *North Atlantic Fares Investigation, (NAFI)* might have been the proper forum to examine economy fares, the Board presently has no international ratemaking standards, has expressed an intent to abandon rate regulation to carriers, and, therefore, has no grounds upon which to base a suspension.[1] It states that investigation of its economy fares is futile since the real issues seem ones of policy, touching on competition among incumbent carriers and entry of new carriers, which are best resolved through intergovernmental discussion; further, it is difficult to determine exactly what the issues to be investigated will be since suspension was not based on any finding of excessive earnings and no changes were proposed in the existing structure of fares; and were the issue one of fare structure, it would have industry-wide ramification, extending beyond the fare increases, thus requiring a general investigation of the *NAFI* type. TWA argues that certain ignored realities of international competition, such as foreign carrier insistence on being competitive in all transatlantic markets, unwillingness to accept the principle of constructing through fares by combination of local fares, and lack of economic incentive to lower pro-rate requirements on interlines, make unbundling of economy fares impossible to achieve; further, the United States' position in recent talks with Holland and others affirming foreign carrier rights to fifth and sixth freedom traffic at the lowest available fare leaves TWA at a loss for a practical approach to unbundling since stopover and circuity costs on intermediate flight segments operated mainly for other markets are small; the nature of many foreign carrier's route structures in effect guarantees free circuity and possibly free stopovers; given these circumstances, unbundling would produce unacceptable revenue losses for all U.S. transatlantic flag carriers; even with a 5-percent increase in current economy fares, TWA would experience an annual $27 million loss in revenue if it introduced an unbundled on-demand fare for point-to-point travel at 22/45-day excursion fare levels because of lost revenue from the reduction, diversion from higher 14/21-day excursion fares and prorate absorption [2]; it would take an additional 20-percent increase in promotional fares to cover this loss; unbundling would cripple U.S. carrier ability to compete equally with foreign carriers; and if the Board could achieve prorate reform or acceptance of the combination of local fares principle by interlining carriers, TWA would look favorably upon unbundling.

We have carefully considered TWA's arguments and conclude we should deny its petition for reconsideration.

First, we clearly have properly exercised our suspension powers. The Federal Aviation Act of 1958 gives us broad discretion in the use of these powers to suspend fares we conclude are not in the best interests of the public, and this has been affirmed by the courts. Additionally, the Act charges us to promote competition, which includes price competition among carriers. In Order 78-9-38, we concluded that while noticeable price competition exists in the discount fare categories, there is none in regular economy fares and if we approve the increases, they would simply be adopted by other carriers with the result that regular economy fare passengers would continue to be excluded from the benefits of an improving competitive regime.[3] We also noted that over the years, these fares have been established in a long series of carrier agreements at levels well above the costs of direct point-to-point carriage, high enough to cover the costs of providing services not required for basic point-to-point transportation and high enough to protect generally high costs carriers.[4] We concluded that point-to-point normal economy fare passengers, who by TWA's own admission constitute a substantial portion of total normal economy fare passengers, should not be charged fares that are even higher than those already in effect.[5] These passengers are already called upon to subsidize other normal economy fare passengers who make use of stopovers and circuity. In these circumstances it was clearly reasonable to suspend the fare increases.

Further, we do not believe TWA's argument that the suspension was motivated by the desire to force certain fare structure changes is particularly relevant. Many suspensions have the effect of encouraging structural reforms and as such act as a vehicle to articulate new or evolving policy or to implement established policy. That result does not affect our powers under the Act to suspend a clearly unlawful fare.

Nor are we swayed by TWA's suggestion that no basis for suspension exists in the absence of prescribed international rate-making standards or that any investigation of its suspended economy fares is futile unless the Board undertakes a general *NAFI* type investigation of all economy fares. On the contrary, as far back as 1975, in a policy statement issued prior to an IATA passenger conference, we stated the view that normal economy fares were too high. Subsequently, we denied approval to numerous IATA and individual carrier proposals that would have increased these fares.[6] By now our policy on carrier proposals which merely increase normal economy fares with no thought to their structural reform should be well known to the carriers. Therefore any future suspensions and investigation of individually filed normal economy fare increases is not at all inconsistent with the termination of *NAFI*.

Finally, we do not agree with TWA's position that unbundled economy fares are unacceptable to foreign governments, impractical, and financially ruinous. On the first point, we note that to the extent unbundled fares have been placed in transatlantic markets, it has been at the intitiative of foreign carriers with the acquiesence of their governments. Alitalia pioneered with a partially unbundled, direct service, one-stopover fare in the U.S.-Italy market and, subsequently, similar fares were introduced in other southern European markets. In the United Stated-United Kingdom market British Caledonian had a partialy unbundled "executive class" fare for on-demand point-to-point transportation during the peak summer season. We are also seeking the liberalization of existing rate articles in bilateral air transport agreements which, when implemented, should make the filing of unbundled economy fares for direct point-to-point service by U.S. carriers much easier.[7]

On TWA's last two points, TWA must have misinterpreted our suspension order. What we said in that order was that existing normal economy fares include costs of various services, including stopovers, circuity, and prorates, in addition to the costs of basic point-to-point transportation. It is pos-

[1] The carrier argues that suspension powers can be used only when there is a reasonable expectation that the tariffs will be found unlawful and that rate payers would suffer substantial harm if they are exposed to the tariff during the course of investigation. Neither consideration is presented, says TWA, by its proposed economy fare increases.

[2] TWA claims it prorate absorption on regular economy fares has increased steadily since 1974, the last time increases were approved, and would become even more acute with unbundled fares, especially if matching European carriers increased their intra-European fares to cover transatlantic losses.

[3] See also Orders 78-10-61, October 5, 1978, and 78-10-143, October 20, 1978, where we suspended the transatlantic winter normal economy fare increases of other carriers.

[4] Recently, El Al proposed a New York-Tel Aviv basic season "Holiday class" normal fare which, while not completely unbundled, is an unrestricted, on-demand fare that is $195 below the existing normal economy fare.

[5] TWA indicates that almost one-third of its total normal economy fare passengers use only point-to-point services.

[6] See, for example, Order 76-4-175, April 30, 1976; Order 76-6-180, June 18, 1976; Order 76-7-36, June 29, 1976; Order 76-10-108, October 15, 1976; and Order 77-3-54, March 9, 1977.

[7] TWA raises the issue of third country carrier participation in any unbundled fares filed by third/fourth freedom carriers. We believe that third-country carriers should be permitted to decide on their own whether to match such fares over an indirect routing at their discretion.

V 4 3 / 2 3 6

sible that as a consequence of not raising these fares for almost four years the average cost of bundled economy fares may, along with other fares, produce an unsatisfactory return for TWA. We believe the way these fares are priced must be changed precisely because they are now related to the average costs of carriage of all economy fare passengers. The existing fare is the same for a direct service, point-to-point passenger as for a multiple stopover passenger, it does not reflect the desires of the direct service point-to-point passenger, and it forces that passenger to subsidize the more costly itineraries of other economy fare passengers. If TWA reduced its economy fare for point-to-point carriage and either established separate charges for the other service elements to be added to the basic point-to-point fare, or established a separate fare for these higher cost passengers, such a proposal would receive careful consideration from the Board.

Accordingly:

1. We deny Trans World Airlines' petition for reconsideration; and

2. The Dockets Section will serve a copy of this order on Trans World Airlines, Inc.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.*

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

Economic Development Administration

QUAKER SHOE CORP., Q-T SHOE MANUFACTURING CO., INC., AND GOLD MILLS, INC.

Petitions for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions have been accepted for filing from three firms: (1) Quaker Shoe Corporation; 327 South Carlisle Street, Allentown, Pennsylvania 18103, a producer of footwear for men, women and children (accepted November 20, 1978); (2) Q-T Shoe Manufacturing Company, 629 East 19th Street, Paterson, New Jersey 07514, a producer of women's footwear (accepted November 29, 1978); and (3) Gold Mills, Inc., 1430 Broadway, New York, New York 10018, a producer of synthetic fabrics (accepted December 1, 1978). The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

CHARLES L. SMITH,
Acting Chief, Trade Act Certification Division, Office of Planning and Program Support.

[3510-17-M]

Office of the Secretary

NATIONAL STANDARDS POLICY ADVISORY COMMITTEE

Final Policy Recommendations and Implementation Plan

The Department of Commerce functions as the Federal Government focal point in the development, coordination, and strengthening of U.S. national and international standards policy in the public interest.

The National Standards Policy Advisory Committee (NSPAC), which was established in 1977 under the auspices of the American National Standards Institute, completed in early 1978 a draft document entitled "A Recommended National Standards Policy for the United States." In its own words, NSPAC's objective in preparing that document "was to prepare a recommended U.S. National Standards Policy that would, if implemented, go a long way towards creating a working environment within which the Nation's standards capability—both public and private—could be effectively, economically, and equitably used in behalf of the national interest."

In the exercise of its role in U.S. standards policy, the Department of Commerce published that draft document in the FEDERAL REGISTER on February 14, 1978 (pp 6299-6305). That notice directed that public comments on the draft NSPAC document be sent to the NSPAC Program Administrator, Mr. Richard O. Simpson. Mr. Simpson subsequently reconvened the NSPAC to consider the comments received, and to prepare NSPAC's final policy recommendations and implementation plan.

The Department has recently received a copy of NSPAC's final policy recommendations and implementation plan (dated December 1978), and believes that the public interest will be served by publication of this document in the FEDERAL REGISTER for the information of interested parties. Such publication in no way constitutes approval or disapproval of that document by the Department or any of its employees. Accordingly, that document, renamed "National Policy on Standards for the United States and a Recommended Implementation Plan," is reproduced below in its entirety. Any questions on the document or requests for copies thereof should be referred not to the Department of Commerce but to the NSPAC address cited at the end of the document.

Dated: December 4, 1978.

JORDAN J. BARUCH,
Assistant Secretary for Science and Technology.

The full text of NSPAC's "National Policy on Standards for the United States and a Recommended Implementation Plan" is as follows:

NATIONAL POLICY ON STANDARDS FOR THE UNITED STATES AND A RECOMMENDED IMPLEMENTATION PLAN

DECEMBER 1978.

Prepared by National Standards Policy Advisory Committee (NSPAC).

MEMBERS OF THE NATIONAL STANDARDS POLICY ADVISORY COMMITTEE

Dr. Ernest Ambler,[1] National Bureau of Standards
Mr. William T. Cavanaugh, American Society for Testing and Materials
Mr. Dennis G. Cherot, Office of Consumer Action for Newark
Mr. Kern E. Church, Department of Insurance, North Carolina
Dr. Howard I. Forman, U.S. Department of Commerce
Dr. Aaron Gellman, Gellman Research Associates
Mr. Joseph Gilbert, Society of Automotive Engineers
Mr. Richard Goodemote, Sears Roebuck & Company
Dr. Robert Harris, Environmental Defense Fund
Mr. S. F. Harrison, National Board of Boiler and Pressure Vessel Inspectors
Ruth Botz Jones (Mrs. Rudard A.), Urbana, Illinois, Consumer
Mr. Byron Lee, Commonwealth Edison
Mr. Herbert Liebenson, National Small Business Association
Professor Kenneth L. McFate, University of Missouri
Mr. W. Robert Moore, Chemical Bank

*All Members concurred.

Mr. Baron Whitaker, Underwriters Laboratories
Mr. Philip Smith, Designated Liaison, Office of Science and Technology Policy, White House
Mr. Richard O. Simpson, NSPAC Program Administrator

NOTE.—The support and contributions of the designated alternates who participated in the development and production of this document are gratefully acknowledged.

FOREWORD

Standards are used by buyers and sellers to define their mutual obligations. They are also used by government to assert its regulatory authority on behalf of the health and safety of citizens. Standards are essential for the orderly and efficient conduct of domestic and international commerce and for the protection of the economic, social, environmental, and safety interests of sellers, buyers, and consumers—both individual and industrial.

Standards can favorably or unfavorably affect consumer costs, availability and performance of products, domestic and international trade, and the use of scarce materials. They are significant media for technology transfer among relevant groups, nationally and internationally. They also serve to introduce technology into the social value system of the society.

The United States possesses a sizable capability—public and private—for developing standards. What it has lacked, until now, is a national policy to ensure that these resources can be employed most effectively, economically, and equitably in the national interest.

This document is an attempt to fill that need. It contains two parts:

- A National Policy on Standards for the United States
- A Recommended Implementation Plan

Both the policy and implementation plan were developed by a group designated as the National Standards Policy Advisory Committee. NSPAC is an independent body established in early 1977 as a public service under the auspices of, but free from any policy direction from, the American National Standards Institute.

A national standards policy implies a definite course or method of action to be pursued. It should generate, foster, and maintain a basis or series of guidelines under which various organizations and people comprising the nation's standards capability can develop consistent working policies and procedures. NSPAC believes that the policy it developed meets these criteria.

NSPAC also recognizes that attainment of a unanimously agreed-upon national standards policy cannot be achieved quickly, if ever. The one proposed in this document is believed to represent as high a degree of agreement as can reasonably be expected when all the parties at interest are adequately represented. Agreement was very often not unanimous. Footnotes are included for dissenting views that were so strongly held that the dissenting parties felt constrained to have their views recorded.

The Recommended Implementation Plan is believed to be conceptually sound and pragmatic. In developing it, the relevant principles in the National Standards Policy were followed.

Special consideration was given to whether the policy should treat testing and certification and international standardization.

NSPAC recognized the relationship between standardization and the testing and certification process. It deliberately decided to exclude testing and certification from the policy on the basis that they are important enough to warrant consideration of a separate policy development activity. The methodology followed in developing the National Policy on Standards could serve as a useful model in formulating a testing and certification policy, in the event that such an activity is undertaken in the future.

International standardization in the National Policy on Standards was purposely limited by NSPAC to discussions deemed essential to the basic policy underlying national standards activities. Committee members did not consider themselves properly representative of the desired balance in expertise and interests to undertake a full policy treatment of this very important aspect of standardization. Initiation of a separate program to develop a more complete statement of policy on international standardization that expands on, and is consistent with, the National Policy on Standards is considered very desirable by the Committee. Again, the Committee believes that the NSPAC format offers a useful model for such activity.

Under this country's national standards system, any one of the many groups that have either direct or indirect interest in standards matters could properly have started a policy development project. It could have been initiated by federal, state, or local governments, organized labor, public interest groups, trade associations, industry or professional societies, standards writing bodies, testing laboratories, or consumers. It was logical, however, for the American National Standards Institute (ANSI), the generally recognized functioning coordinator of the U.S. voluntary standards system, to take the initiative. It did so with the caveats that it would in no way influence the work and that all interested parties would be ensured the opportunity to participate in the process.

The National Standards Policy Advisory Committee was formed to undertake the project. This independent group is comprised of some thirty representatives of government, organized labor, public interest groups, trade associations, industry, professional societies, standards writing bodies, testing laboratories, and consumers. Its assigned task was to prepare a recommended U.S. National Policy on Standards that would, if implemented, go a long way toward creating a working environment within which the nation's public and private standards capability could be effectively, economically and equitably used on behalf of the national interest.

Extraordinary steps were taken to ensure the independence, objectivity, and credibility of the Committee. Funds for the effort, for example, were raised in small amounts from over fifty organizations, maintained for the Committee's purposes only, and disbursed from a special account under the control of NSPAC.

In February 1978, NSPAC released a Recommended National Standards Policy for public review and comment. The comments received were considered in preparing the National Policy on Standards and Recommended Implementation Plan published in this document.

In discharging its responsibility, NSPAC has made arrangements to transmit a copy of this final report to:

- ANSI, along with a complete record of NSPAC activities
- Appropriate officials of the federal government
- Each of the organizations identified as significantly involved in national standards activities
- The press, for information of the general public.

D E 7 7 8 UMI

V 4 3 / 2 3 6 D E 7 7 8 UMI

NSPAC recognizes that a policy document does little good unless it receives broad exposure and the high degree of general acceptance essential to effective implementation. Therefore, careful attention should be given to the National Policy on Standards and the closely related Recommended Implementation Plan which accompanies it.

8. Recommendations to the Joint Government/Private Sector.
9. Follow-up by NSPAC.

NATIONAL POLICY ON STANDARDS FOR THE UNITED STATES

I. INTRODUCTION

As standards are documents developed with appropriate expertise to define and/or establish acceptable solutions to recurring problems, they provide a means for effective communication in areas of science, education, technology, industry, trade, and commerce.

Standards are used to enhance engineering and manufacturing efficiencies through establishment of performance criteria, characteristics of products, procedures, methods, materials, and systems, and through interchangeability.

Where regulation is deemed necessary to safeguard the health and/or safety of product users and/or consumers, standards, which generally relate to minimum requirements, may serve as a base to further communicate understanding through descriptive terminology and procedures.

II. DEFINITIONS

1. Standard. A prescribed set of rules, conditions, or requirements concerning definitions of terms; classification of components; specification of materials, performance, or operations; delineation of procedures; or measurement of quantity and quality in describing materials, products, systems, services, or practices. (For convenience in the text of this policy, we refer to standards for "products, systems, and services" as being inclusive of the above.) The word "standard" does not include federal, state, or local laws or statutes enacted to adopt or reference a standard.

2. National. The word "national" is used in this policy in a broad sense that is inclusive of both the private and government sectors. Further, the word "national" is used to indicate that the total standards preparation resources of the U.S. constitute a national capability, a capability that is not exclusively government or private.

3. *National Standard.* A standard which has, or could reasonably be expected to have, a significant effect upon a substantial number of U.S. citizens. This term does not include what are commonly termed "company" standards, nor does it include those industry standards which have little or no significance outside of that industry. It includes standards whose acceptance is recognized on a national basis.

III. OBJECTIVE(S)

1. To provide policies with respect to both government and private initiation, development, use, and maintenance of national standards for products, systems, and services.

2. To provide a framework for the efficient organization and management of both government and private resources to ensure that the United States' national standards needs are competently and economically met, on a timely basis, under generally recognized principles of due process.

IV. SCOPE

1. Products, Systems, and Services. Unless otherwise excluded, this policy is applicable to all national standards for products, systems, and services found in commerce, including those acquired, fabricated, or regulated by agencies of federal, state, or local governments.

2. Organizations and Agencies. This policy is directed toward all organizations and agencies, government or private, that initiate, develop, or approve national standards, as well as to all government agencies that use national standards.

3. International Standards. Where relevant, this policy is directed toward standards participation on behalf of the United States in international as well as national standards activities.

V. GENERAL PRINCIPLES

1. Cooperation, an Essential Element. The national interest is best served when both the government and private sectors, and/or components of both sectors, initiate, develop, and participate in programs which stimulate and encourage cooperation of both sectors in national standards activities.

2. National Standards Writing Activities.[1]

a. *Openness:* Participation in national standards writing activities shall be open to all persons who might reasonably be expected to be, or who indicate that they are, directly and materially affected by the activity in question. There shall be no undue financial barriers to participation. Participation shall not be conditioned upon membership in any organization including the group or organization sponsoring the activity. Organizations shall give reasonable notice of standards development activities and actions.[2]

b. National Standards Decisions: Decisions in national standards writing activities shall reflect a substantial agreement by all of the parties at interest, or their representatives, who are directly and materially affected by the standard. A substantial agreement means much more than a simple majority but not necessarily unanimity. It also includes the requirement to consider and attempt to resolve all substantive negative comments.

c. *Balance—Rules and Procedures:* The rules and procedures to be followed in national standards writing activities shall be such that all appropriate societal interests (e.g., government, consumer, labor, producers, users, general interests, etc.) that might be directly and materially affected by the standard in question have the opportunity for fair and equitable participation. There shall be no opportunity for domination by any single interest.

d. Consumer/User Participation: Special attention shall be given to ensuring that consumer/user participants are included when consideration is given to the make up of national standards committees. Consumer/user participation should come from individuals and representatives of organized groups. For purposes of this policy, the following is applicable:

i. User—Individual Consumer: Where the national standards activity in question deals with a consumer product, e.g., lawn mowers, aerosol sprays, etc., an appropriate consumer participant's view is synonymous with the individual's view. In other words, consumer means an individual user—a person who uses goods and services rather than produces or sells them.

ii. User—Industrial: Where the national standards activity in question does not deal with a consumer product, but rather deals with an industrial product, e.g., hardness of steel, insulation used in transformers, etc., an appropriate user participant is the industrial user of the product in question.

iii. User—Government: Where the national standards activity in question is likely to result in a standard that may become the basis for a government action, e.g., procurement or regulation, the relevant government agency(s) participant may become one of the user participants.

iv. User—Labor: Where the national standards activity in question deals with subjects of special interest to the American worker, e.g., products used in the workplace, workplace environment, etc., an appropriate user participant(s) is a representative of labor.

e. Consumer/User Views:[3] Appropriate representative consumer/user views shall be actively sought and fully considered in national standards activities. Wherever possible, consumer/user participants with the requisite technical knowledge shall be included as active, but not necessarily the sole, consumer/user participants.

f. Records: Reasonable records of national standards development activities shall be prepared, maintained, and be accessible to interested parties under reasonable conditions of time, location, and convenience to all concerned. Such records shall include, but not necessarily be limited to, the status and history of the project, reports of meetings, including discussion, disposition of dissenting views, rationale and principal supporting data for key variables and wordings, etc.

The records maintained should allow an overall review of what transpired rather than be a verbatim transcript, and need be retained for only a reasonable period of time.

3. Private Sector Commitment: The private sector shal take all necessary and reasonable steps to ensure that, to the maximum extent possible, the nation's standards needs are identified and met through the voluntary standards system.

Consistent with this commitment, those private sector organizations engaged in national standards writing activities and other beneficiaries of standards writing activities shall support and participate with the private sector standards coordinating center identified in Section VIII(2) of this policy. Such support shall include equitable fiscal support.

4. Government Encouragement: It is appropriate and essential that governments take all necessary and reasonable steps to encourage responsible private sector activities to meet national standards needs.

5. Government Participation: Government(s) should actively participate in private sector national standards activities that are consistent with this policy to lend their expertise and make their needs known to help ensure that, where necessary, and when possible, the standards developed will be in a form suitable for government use or are otherwise in the public interest.

6. Consumer/Small Business Funding: It is in the best interests of both the government and the private sectors to ensure that a reasonable source of funds is available to consumers and small businesses to support and encourage their participation in national standards activities that are consistent with this policy and to offset their costs where necessary.

7. Minimizing Duplication: In the interest of efficiency and cost-effectiveness, governments should not undertake development of new standards where suitable national standards already exist or are nearing completion unless an evaluation by government indicates that the existing standard is inadequate. Where such an evaluation indicates that changes in either the format or substance would make an existing national standard suitable for government use, the government should cooperate with the original sponsor of the standard in bringing about desirable changes.

In the same vein, private sector standards writing organizations shall take all reasonable steps to ensure that there is a minimum of duplication of effort among these organizations engaged in national standards writing activities. A principal step is full cooperation and participation with the private sector standards coordinating center identified in Section VIII(2) of this policy.

8. Effects of Innovation and Competition: Care in the development and use of standards shall be taken to ensure that they will not restrict users' choice among items that will produce satisfactory results, act as barriers to innovative designs or compositions, or otherwise tend to unreasonably restrain competition and trade. In the development and use of standards, preference shall be given to those that emphasize performance and function while limiting detailed design requirements to such things as fit and interchangeability (e.g., films and cameras) and where composition or other measurable attributes cannot be expressed in terms of performance without excessive costs or undue delays for technological development.

9. Standards Maintenance: Any organization or agency, government or private, that initiates, develops, adopts, or uses national standards shall incorporate appropriate procedures to ensure that each such standard is reviewed at periodic intervals no longer than five years and is either reaffirmed, amended, or revoked as a result of such review. Having once published a standard, organizations or agencies shall adopt procedures such that the relevant board, committee, or council considers proposals to amend procedures or standards without unreasonable delay. Standards shall be kept current and adequately upgraded to encourage technological innovation.

10. Forecasting and Measurement: Organizations and agencies concerned with national standards writing activities shall encourage and support research in standards theory and methodology, especially that pertaining to forecasting and measuring various effects of standards (e.g., economic impact on commerce and consumers; quantitative changes in health, safety, and environmental factors; risk-benefit evaluation techniques; methods of

[1] The most commonly used method for standards development is use of a standards developing committee, but other methods which achieve a substantial degree of acceptance of the standards should also be recognized. If the standards writing activities do not have such rules and procedures as called for in this section, the product of such activities can become a recognized national standard under this policy provided that the approval of the standard is given by an organization engaged in standards approval activities and whose approval procedures are consistent with this section.

[2] One member (George Papritz) expressed the view that the first and last sentences respectively of this provision should read as follows: "Participation in national standards activities should be open to all interested persons and groups." "Organizations shall give interested persons and groups reasonable notice of standards development activities and actions."

[3] One member (George Papritz) expressed the view that "actively sought" should be changed to "obtained" in line two. This member also believed that a new sentence, as follows, should be added at the end of the provision: "If consumers with appropriate technical knowledge are unavailable, a source of relevant unbiased technical assistance shall be made available for advice and consultation to consumer members of standards writing committees."

V 43/236 DE 7 78 UMI

ensuring equity in committee composition, etc.)

11. Federal/State/Local Government Cooperations: Governments, in their standards activities, should establish cooperative mechanisms to ensure that the public health, safety, and general welfare are adequately protected while at the same time minimizing undue burdens on interstate commerce. To this end, governments should take all necessary and reasonable steps to promote as much uniformity as practical in the establishment of mandatory requirements and to ensure that they are kept current.

VI. HEALTH, SAFETY, AND ENVIRONMENT

Recognizing that governments and the private sector each have an important contribution to make, it is in the national interest to have a constructive, cooperative relationship between them in the areas of public concern, e.g., health, safety, environment, energy, etc.

1. Government Sector Role: Government departments and agencies should take all necessary and reasonable steps to:

a. Identify and publish their priority standards needs.

b. Encourage, cooperate with, and actively participate in relevant national standards activities that are consistent with this policy.

c. List all national standards that are relevant to the agencies' needs.

d. Ensure that the following steps are taken prior to, and as a prerequisite of, any determination that a mandatory standard may be required:

i. Technically evaluate all relevant listed standards.

ii. Assess the marketplace for voluntary confirmity with such standards.

iii. Evaluate the suitability of such standards for use as the basis for a mandatory standard (where necessary, encourage the originating standards writing organization to revise the standard, with government cooperation, to suitable form).

iv. Specifically consider, and make formal findings with respect to the technical, marketplace, and suitability reviews before deciding whether a mandatory standard will be required.

2. Private Sector Role. The private sector shall take all necessary and reasonable steps to:

a. Identify and use all available data in determining its view of priority standards needs, as well as cooperate with governments to aid government in setting priority standards needs.

b. Initiate and actively pursue national standards activities in a manner consistent with this policy in areas of its high priority.

c. Cooperate with and support national standards activities that are consistent with this policy and that are designed to meet government-identified priority standards needs.

VII. GOVERNMENT PROCUREMENT

1. Avoid Duplicaton. National standards to meet government procurement needs should be developed by governments only in those instancces where private sector standards development efforts are not responsive in a reasonable, efficient, and timely manner to the demonstrated government needs.

2. Standards Preference. National standards prepared in accordance with this policy should be given preference over other standards for use by government(s) to meet their procurement needs.

VIII. ORGANIZATION/APPEALS

1. Centralized Government Focus. There should be established, or identified, within the executive branch of the federal government, an entity to serve as the government standards coordinating center. It should have the principal responsibility for the coordination of government activities covered by this policy. Such a center should have a primary responsibility to:

a. Establish criteria to determine eligibility of private sector standards activities for government support in accordance with this policy.

b. Assist, upon request, the federal agencies in their evaluations of national standards to determine their suitability for use by the government.

c. Cooperate with other government agencies in establishing criteria and information by which government employees with the appropriate expertise can be readily identified so as to encourage their voluntary participation in appropriate private sector standards writing groups.

d. Serve as a catalyst to stimulate and aid federal agencies in identifying and publicizing standards priority needs.

e. Provide the guidelines for the disbursement of government funds available for financial aid to private sector standards activities to offset consumer and small business participation costs, when and as required, and for other purposes.

f. Work closely and cooperatively with the private sector standards coordinating center to ensure that the nation's standards needs are clearly identified and met in a timely fashion.

g. Establish and operate a suitable appeals mechanism as called for in VIII(3) of this policy.

2. Centralized Private Sector Focus.[4] There shall be established, or identified, a private sector organization to serve as the private sector standards coordinating center. This organization shall have the primary responsibility for the coordination of private sector activities covered by this policy. In carrying out these responsibilities, it shall, as a minimum:

a. Coordinate private sector standards activity and encourage conformity with this policy by private sector standards organizations writing standards for products, systems, and services identified as being national (or international) in scope.

b. Provide for meaningful participation in all of its major boards and councils by the major affected interests, including government and consumers.

c. Provide a mechanism, or mechanisms, for confirming whether or not a national standard has been prepared in accordance with this policy.

d. Having identified the need for a particular standards project, encourage qualified organizations to accept the project and move toward development of a national standard in a manner consistent with this policy as expeditiously and as effectively as possible, with due regard for the need to minimize unnecessary duplication of effort.

e. Not compete with standards writing organizations in standards development.[5]

f. Develop a broad and adequate financial base that is of such a nature that the center is reasonably independent of financial pressures of any single societal group or interest.

g. Work closely and cooperatively with the government standards coordinating center to ensure that the nation's standards needs are clearly identified and met in a timely fashion.

h. Serve as the recognized and designated representative of the United States in international, nontreaty, standards setting bodies.

3. Appeals Mechanisms

a. Both the government and the private sector standards writing activities should include realistic and identifiable appeals procedures for those interests or individuals who believe they have been, or will be, disadvantaged by the standard in question or the lack thereof, or who have a substantive disagreement with the technical content of the standard or the procedures by which it was developed.

[4]One member (David Swankin) expressed the view that this policy statement should not recommend a centralized private sector focus because the thrust of the policy is directed toward improving the method by which private voluntary standards are produced, something that can and should be accomplished with or without an umbrella organization.

[5]One member (George Papritz) expressed the view that the following should be added to this provision: "However, the center shall develop and, if necessary, revise standards whenever it appears that this will not be accomplished expeditiously and effectively by extant private standards-making machinery."

b. The government standards coordinating center established by VIII(1) of this policy shall establish and operate a dispute resolution mechanism where interested parties can pursue disputes arising from private sector standards activities. As a prerequisite to entering the federal appeals process, the complaining party shall first exhaust his initial appeal rights within the private sector, providing such appeals processes exist and they meet generally recognized criteria of fairness and due process. If the federal process finds that the complaint has merit, the complaint, along with a complete record of the federal appeal, should be returned to the relevant standards writing organization for a timely resolution.[6]

A RECOMMENDED IMPLEMENTATION PLAN FOR THE NATIONAL POLICY ON STANDARDS FOR THE UNITED STATES

1. INTRODUCTION

The National Policy on Standards (NPS) reflects the view of the National Standards Policy Advisory Committee (NSPAC) that the nation's standards needs will be best satisfied within a working environment that is characterized by effective cooperation between the government sector and private sector standards activities. The Committee believes that the NPS provides both the foundation and guidelines for such needed cooperation.

Appendix 3 of the draft "Recommended National Standards Policy for the United States," published in February 1978 for public comment, called attention to the intent of the NSPAC to include a Recommended Implementation Plan as a part of the final report prepared by the NSPAC. The responses indicated that such a plan is not only desirable, but is essential to the success of the project.

There are basically two ways of implementing the NPS—either invite mandating by the federal government or seek voluntary acceptance by all affected organizations, including the federal government.

The NSPAC recognizes that only the U.S. Congress, through legislation, could mandate the NPS as United States policy. The Committee believes, however, that legislation is not required, nor necessarily desirable, for the NPS to become the de facto standards policy for the nation.

With respect to the private sector, the NSPAC hopes that each affected private sector organization will see fit to voluntarily agree to conduct its activities in accordance with the applicable NPS provisions and will communicate this decision to the private sector standards coordinating center (PSSCC).

With respect to the federal government sector, the NSPAC believes that the essential government actions required to implement the NPS provisions will be accomplished with the issuance of the pending OMB Circumlar on Federal Participation in the Development and Use of Voluntary Standards. The pending Circular will be a Presidential Order directed toward meeting the federal government's procurement and regulatory standards needs by encouraging a cooperative relationship with the private sector standards bodies. The basic thrust of that important document is believed to be compatible with the NPS document. Any additional federal activity with respect to various NPS provisions is within the policy discretion of the individual federal executive branch agencies.

This Recommended Implementation Plan is believed to be conceptually sound as well as pragmatic. During the development of the plan, the relevant decision principles contained in the NPS document were followed. This included the decision process described in Section V(2)(b) of the NPS, which calls for "much more than a simple majority," as well as a "requirement to consider and attempt to resolve all substantive negative comments." This plan does represent the views of much more than a simple majority of NSPAC members, even though unanimous agreement on all sections could not be attained.

2. GOVERNMENT SECTOR—AS NSPAC BELIEVES IT SHOULD BE

a. General. The federal government has many reasons to be interested in national standards activities. National standards serve to aid individual agencies in supporting or implementing programs established by law or regulation, e.g., procurement, safety and environmental programs, consumer protection, energy policy, etc.

In a broader sense, the federal government should have a legitimate interest in the effect of national standardization activities on increasing the efficacy of government operations, on the health of the general economy, international trade performance, and national defense.

b. Agencies That Write/Use Standards. The NSPAC believes that each of the individual federal government agencies that develop and/or use national standards should:

- Identify its standards needs and assign a reasonable sense of priority to those needs.
- Actively cooperate with those standards organizations in the private sector that can, and are willing to, aid the agencies in satisfying its standards needs in an effective and timely manner.
- Encourage those private sector bodies with which it cooperates to follow the policies and procedures that are set forth in the NPS.
- Give consideration to and/or use national standards developed in the private sector when they will meet the agency's needs.
- Take care that ther standards it develops and/or uses do not have unnecessary adverse effects on costs, innovation, competition, interstate commerce, and international trade.
- Establish suitable policies to guide involvement of its employees in private sector standards activities.
- Establish policies by which all affected societal interests have a reasonable opportunity to participate in agency standards activities.

c. Overall Coordination of Government Standards Activities. The NSPAC believes that effective central coordination of federal government standards activities is essential to elimination of many standardization problems which have received widespread attention in recent years. This central coordinating body should:

- Serve as an initial inquiry and referral point for outside parties seeking information on specific federal standards matters.
- Assist, on request, the individual federal agencies on standards matters.
- Cooperate with individual federal agencies in identifying federal employees with appropriate expertise to participate in private sector standards activities.
- Cooperate with private sector organizations, particularly the private sector coordinating center, to ensure that the nation's standards needs are effectively and promptly met.
- Provide a "last resort" appeals mechanism where private sector standards disputes can be aired and resolutions proposed.

3. GOVERNMENT SECTOR—AS NSPAC BELIEVES IT EXISTS TODAY

a. General. Until recently, there has been a general lack of understanding at the policy levels of the federal government as to the extent of national standards activity in the United States, as well as its relevance and impact on major national issues. More often than not, attention is focused on an individual standard rather than the activity as a whole, particulary when it is involved in regulatory controversy or is the subject of a media report.

Recent activities, such as the national focus on regulatory reforms, the multilateral trade negotiations, and

[6]The nonvoting member (Dr. Ernest Ambler) expressed the view that any federal appeals process should deal only with questions of adherence to established procedures for the development of national standards and should not be broadened to include disputes over substantive technical decisions reached in national standards development activities.

also, in cooperation with governments, nontreaty standardization organiza- annually spend ten times the total or-

V 4 3 / 2 3 6

the federal attention given to safety, health, procurement, and energy policies have served to elevate the policy attention given to the role of standards in such matters.

NSPAC members are well aware of two important developments affecting national standards policy considerations, which are expected to be completed in the near future. Both are believed to be complementary to and mutually reinforcing of the National Policy on Standards.

GATT Standards Code (General Agreement on Tariffs and Trade)

As a part of the Multilateral Trade Negotiations, the U.S. government has been an active participant in the negotiation of a proposed GATT Standards Code. Although the negotiations in Geneva are not yet completed, drafts of the code suggest that, if the U.S. is to meet the obligations of the code, and, more importantly, take advantage of the opportunities provided under the code, a close cooperative relationship needs to be established between the federal government and the private sector in national as well as international standards activities. The NPS provides the framework needed for such a cooperative effort.

OMB Circular on Federal Participation in the Development and Use of Voluntary Standards

The pending OMB Circular on Federal Participation in the Development and Use of Voluntary Standards is directed toward meeting the federal government's standards needs through a cooperative relationship with the private sector standards bodies. It also provides policy guidance to all federal employees regarding their participation in various private activities. The basic thrust of this important document is believed to be compatible with the NPS contained herein.

b. Individual Federal Government Agencies. Attitudes, policies, and procedures of the variour federal agencies vary widely with respect to standards initiation, development, and use. Many of the agencies are constrained in their activities by legislation. Others have not adequately focused on standards matters at the policy level. The NSPAC believes that the following statements are indicative of various agency standards activities at the present time.

- Not all agencies attempt, or have the data bases to allow for, an orderly identification of their priority standards needs.
- Some agencies encourage private sector cooperation in meeting the agency's standards needs, while others encourage the opposite response from the private sector.
- Except very recently, there has been little or no systematic government-wide effort to use federal government regulatory and procurement leverage to improve the effectiveness and responsiveness of the nation's standards system.
- Agency policies with respect to use of private sector standards cover a wide spectrum—from use with little in-house review to virtual refusal to even consider the documents.
- Agencies having regulatory authority generally have policies or statutes governing the involvement of all interested parties in standards matters, but the procurement agencies' policies vary more widely in this respect.
- Inadequate attention has been given by several agencies to the effect of their standards on costs, competition, innovation, interstate commerce, and international trade.
- Personnel policies governing federal personnel participation in private sector standards activities vary widely—including outright prohibition, highly detailed policies, and total silence.

c. Overall Coordination of Federal Government Standards Activities. A major complaint over the past few years has been the lack of a central focal point in the federal government for coordination of standards matters. The NSPAC believes this complaint has merit and has therefore included in the NPS a section calling for a federal government focus.

4. RECOMMENDATIONS TO GOVERNMENTS

a. General. The NPS addresses the whole specturm of government involvement in national standards activities. For instance, it recognizes that in the regulatory areas of health, safety, environment, etc., the final decision on whether to propose a mandatory standard is properly a decision of the appropriate elected or appointed officials. Consequently, the NPS provisions in this area are designed to initiate and stimulate cooperative efforts between government and the private sector which, if successful, will reduce the need to impose mandatory requirements, while at the same time not infringe on statutory mandates.

The NSPAC believes that the pending OMB Circular on Federal Participation in the Development and Use of Voluntary Standards, in essence, implements major elements of the NPS, and urges its official promulgation at the earliest possible date.

b. individual Federal Government Agencies. 1. The NSPAC believes the OMB Circular on Federal Participation in the Development and Use of Voluntary Standards provides adequate guidance to the various agencies to ensure that their employees participate only in activities in accord with the National Standards Writing Activities section of the NPS (i.e., those based on generally accepted principles of procedural fairness).

2. The NSPAC urges each government agency to examine its policies and activities in light of each of the General Principles contained in the NPS and to align its policies and activities accordingly, consistent with existing governing statutes.

3. The NSPAC particularly calls to the attention of the relevant regulatory agencies the NPS section on Health, Safety, and Environment and urges the relevant agencies to align their policies and activities in accordance with this section. The NSPAC is unaware of any legislative provisions that would prohibit the adoption of such policies, but rather believes it to be in the policy option realm of the agency concerned.

4. The NSPAC recognizes that the Government Procurement section, particularly the Standards Preference secion, goes beyond the pending OMB Circular on Federal Participation in the Development and Use of Voluntary Standards but nevertheless believes it is consistent with the Circular. The Committee urges the procuring agencies to adopt, as a policy option, this section and thereby use federal procurement leverage to ensure procedural fairness in national standards development.

c. Federal Government Standards Coordination. The NSPAC acknowledges that the U.S. Department of Commerce is an appropriate organization to assume the role of the government sector standards coordinating center (GSSCC). Need for such a government-wide standards coordinating activity has been identified in the proposed GATT Standards Code, the pending OMB Circular on Federal Participation in the Development and Use of Voluntary Standards, and the recent report on the "Implementation of the GATT Standards Code in Federal Agencies" prepared by the Interagency Committee on Standards Policy, dated April 1978.

The OMB Circular also designates the U.S. Department of Commerce to fulfill the role of federal standards coordinator—an action consistent with the NPS.

5. PRIVATE SECTOR—AS NSPAC BELIEVES IT SHOULD BE

a. General. The private voluntary standards system in the United States should have the primary responsibility for developing the standards needed by the nation. This responsibility includes not only development of the broad range of national standards essential to the efficient and orderly functioning of the U.S. economy but also, in cooperation with governments, development, in a timely manner, of effective standards that may be necessary to aid government agencies in the fulfillment of their statutory missions.

Standards activity should be conducted in such a manner as to ensure that all societal interests are treated fairly and equitably.

The private sector should bear the primary responsibility for U.S. participation in international nontreaty standardization activities.

b. Standards Writing Organizations. The NSPAC believes that each of the organizations developing national standards should:

- Adopt and adhere to standards development procedures that ensure procedural fairness.
- Help identify national standards needs and, through coordination of standards developing activities, minimize duplication of effort in meeting those needs.
- Participate with and support activities designed to meet government priority standards needs.
- Participate with and equitably support the private sector central coordinating organization.
- Ensure that reasonable safeguards are provided to guard against any potentially harmful effects of standards on consumer/user costs, innovation, competition, interstate commerce, and international trade.
- Ensure that realistic appeals procedures are made available to all parties who feel they hae been, or will be, disadvantaged by the standards acitivity in question.

c. Central Standards Coordination. The NSPAC considers a private sector standards coordinating center essential to:

- Serve as a necessary organizational mechanism through which organizations and individuals concerned with national standardization activities may cooperate in making the voluntary standards system in the U.S. more effective.
- Help ensure that all societal interests are fairly and adequately represented in national standardization activity.
- Be a responsible and effective force with respect to maximizing responsible federal government interaction with the voluntary standards system.
- Serve as a source of qualified spokesmen for the voluntary standards system.
- Provide an appeals procedure for all interested parties to pursue alleged abuses within the private coordinated system.
- Ensure that the interests of the U.S. are farily, competently, and adequately represented in international nontreaty standardization organizations.
- Provide an independent mechanism for identifying standards that have been developed in accordance with the National Policy on Standards.

d. Other Affected Interests. The NSPAC believes that, in addition to those parties with a clear economic interest in the outcome of standards, other parties that have societal interest, or a less direct economic interest, should also be represented in national standards activities. Particularly, the Committee has in mind consumers, labor, small business, and governments. The Committee has identified, under the General Principles section of the NPS, provisions which highlight these views.

In the Committee's view, the groups identified above have been inadequately participating in the past; this lack may have been the result of inadequate communication, insufficient encouragement of such participation, inadequate fiscal resources, and procedural barriers in some instances.

6. PRIVATE SECTOR—AS NSPAC BELIEVES IT EXISTS TODAY

a. General. The United States voluntary standards system is a loosely coordinated group comprising a large number of separate organizations that write one or more national standards. Numbered among them are trade associations, professional societies, standards organizations, etc. as a result:

- The nation's voluntary standards are written by an estimated 300,000 individuals from all walks of life, who volunteer their part-time services.
- This massive voluntary effort is channeled into thousands of committees under the organizational umbrella of approximately 400 separate organizations.
- The procedures used by these organizations to govern their standards writing activities vary considerably, with many now complying with most of the provisions of the NPS.
- There may be as many as 20,000 U.S. voluntary standards that could qualify as "national standards" using the definition contained in the NPS. Of this estimated total, however, only 9,300 are currently identified as American National Standards (ANS) by the present central coordinating organization.
- The principal cost of standardization is not to be found in the budgets of the various standards organizations but is rather the collective burden of salary, transportation, and expenses associated with the individual volunteers who populate the various standards committees. (One major standards writing organization estimates that participants in their committees annually spend ten times the total organization budget.) To protect the heavy investment, it is equally important that there be adequate funding of central standards coordination activities.
- Of the tens of thousands of commercial and industrial companies benefiting from the voluntary standards system, less than one thousand are helping carry the financial burden of the present central coordinating body through corporate memberships.
- The various private sector standards activities, including coordination, directly and indirectly, aid the various agencies of the U.S. government in the fulfillment of their responsibilities and missions. Yet, there is virtually no direct financial contribution by the Federal Government to help offset the administrative costs incurred by the standards developing and coordinating bodies.
- Organizations and corporations benefiting either directly or indirectly from the private sector role in international standardization are numerous, but very few make equitable financial contributions to offset U.S. member body costs of international standardization (now approaching close to $2,000,000 per year).

b. Standards Writing Organizations. In addition to the comments relative to standards writing organizations contained in paragraph 6(a) above, the following observations, with respect to national standards writing organizations and their relationship to the present central coordinating organization, are considered significant.

- A number of organizations exist that develop "national standards" but maintain no relationship with and give no financial support to the present central coordinating organization.
- A number of organizations that develop many "national standards" are organizational members of the central coordinating body and occupy principal positions on its key boards and councils. These organizations, however, contribute a relatively small amount to the finances of the central coordinating body and submit few, if any, of their standards for approval and listing as American National Standards.
- In a voluntary system, the ability of a body to "coordinate" is only as good as the willingness of the standards developing organizations to be "coordinated." Today, many standards developing organizations are not fully participating in programs of the present central coordinating organization.
- Standards writing organizations, in order to play a full part in a coordinated system, should agree to certain coordination procedures, participate in coordination discussions, submit their standards for approval and central

D E 7 7 8 UMI

V 4 3 / 2 3 6

listing, and provide equitable fiscal support. An obvious precondition to active participation and involvement is that standards writing organizations be satisfied with the resulting role and manner of their involvement, as well as the organizational structure and management of the central coordinating body. That this precondition has not been satisfied is evidenced by the continuing unwillingness of many such bodies to comply with exlsting coordination procedures, participate in coordination discussions, submit their standards for approval and central listing, or provide equltable fiscal support.

● A high proportion of the approximately 9,300 standards designated as ANS standards are published by a relatively few standards writing organizations. Only a small proportion of the central coordinating body's income is derived from the sale of standards from these sources. It is important to the success of a voluntary national standards program that most, if not all, of the standards writing organizations recognize the coordinator role by submitting their standards for approval as ANS standards, as well as by providing equitable financial support. Such submittals are essential to the continuing viability of the central coordinating body.

● Most of the private organizations producing national standards have a proprietary interest, not only in the operation of the standards committees, but also in the publication and sale of the standards documents. This financial interest influences their support of the present national system in which they recognize competition in the production and dissemination of standards. Unless this economic situation is dealt with realistically, the PSSCC will likely not get the support it needs from the private standards writing organizations, which would consider its existence a threat.

c. *Central Standards Coordination.* The present private sector central coordinating body is the American National Standards Institute (ANSI). The following points are considered significant and should be read along with the points contained in paragraphs 6(a) and 6(b) above:

● ANSI as presently constituted does not possess clear coordination authority over the entire voluntary standards system; nevertheless, it has had a good measure of success in addressing various major probjems of standards coordination.

● ANSI now ofers to approve and list as American National Standards (ANS) those standards that were developed in accordance with ANSI procedures to ensure that a national consensus exists. The prestige of ANSI has enabled it to be a formidable enforcer of procedural fairness, but only as regards those organizations that seek ANS status for their standards.

● The key management boards and councils of ANSI are comprised of volunteers. There appears to be little direct correlation between the interest represented by the individuals who serve on these management groups and the organizational sources of the 9,300 existing ANS standards.

● Likewise, there is also little apparent correlation with the sources of the estimated 20,000 existing "national standards" and the principal sources of financial support for the Institute. The gross mismatches among those organizations that benefit from ANSI's activities, those that participate in ANSI's management boards and councils, and those that provide the source of financing are obvious. They are a source of needless confusion as well as inequity, and impair ANSI's ability to function as a strong central coordinating body.

● ANSI is often viewed as competing with standards writing organizations in standards development.

● The role of ANSI vis-a-vis the American National Standards Committees is a continuing source of misunderstanding, friction, and confusion, both within and without the standards community.

● The present financial income basis does not ensure the Institute's fiscal independence and viability and leaves it vulnerable to charges of special interest domination.

● ANSI is the recognized representative of the U.S. interests in international nontreaty standardization bodies.

d. Other Affected Interests. The participation and involvement in national standards activities of labor, consumers, small business, and some government agencies is inadequate.

7. RECOMMENDATIONS TO THE PRIVATE SECTOR

The private sector organizations that comprise the nation's voluntary standards system should work cooperatively and constructively together with governments and other affected interests to ensure that the nation's standards needs are met, to the fullest extent possible, by private action and in a manner consistent with the NPS.

The Committee recognizes that the consideration by the standards developing organizations of the NPS is closely linked with their present and future relationship with the organization that will serve as the private sector standards coordinating center (PSSCC), as detailed in Section VIII(2) of the NPS.

The viability of any organization in the PSSCC role depends, in the final analysis, on two things: (1) The acceptance by a preponderance of the nation's standards developing organizations and other interested groups of the requisite central coordination authority; and (2) their commitment to provide equitable fiscal and participatory support on an ongoing basis.

NSPAC believes that the functions of the PSSCC have tangible value to both developers and users of voluntary standards; hence it justifies fiscal support in a form that is in a reasonable relationship to the value received. The support for the PSSCC should not have to be sought on the basis of contributing to a "generally worthy cause," nor should the coordinating center be required to accommodate "free riders" if doing so impairs its autonomy or functional effectiveness.

Foregoing all standards writing activity may compound the financial problems of the central standards coordinating organization. Therefore, it is necessary and imperative that the private sector, and particularly the private standards writing organizations, assume a more important part of the financial burden of the central coordinating organization by means and under conditions yet to be agreed upon within the private sector.

One possiblity is for a proportionate service fee, earmarked to go to the coordinator, to be added to the selling price of national standards, regardless of the channel through which they are sold. Thus the costs of central standards coordinating activities will be spread across the broad base of standards users.

NSPAC recognizes that ANSI currently occupies the organizational position of the PSSSC. The Committee urges ANSI to assess its current operations against the parameters contained in both the NPS and this Recommended Implementation Plan, and make such changes as may be required in its constitution, policies, procedures, bylaws, and organization to align its operations with the NPS and this Implementation Plan.

Not only ANSI, but all other participating organizations, government and private alike, should, when considering the NPS, take cognizance of the interlocking nature of several provisions in that document. Particular attention is invited to the implications of change from the present institutional and financial structure of the following NPS provisions:

1. Section VIII(1)(f)—The GSSCC should work closely and cooperatively with the PSSCC.

2. Section VIII(2)(d)—The PSSCC should encourage other organizations to write the needed national standards.

3. Section VIII(2)(e)—The PSSCC should not compete with standards writing organizations in standards development.

4. Section VIII(2)(f)—The PSSCC should develop an adequate financial base that to the highest practical degree ensures its financial independence from threats or pressures from any single interest group.

5. Section V(3)—Standards writing organizations should commit themselves to fully participate in the coordinated system, both fiscally and through standards coordination activities.

6. Section V(7)—Standards writing organizations should work within the framework of the PSSCC to minimize duplication of effort.

Members of the Committee urge the various agencies and organizations involved in national standards activities to expeditiously consider the NPS and this Implementation Plan because of their belief that the NPS will provide an effective vehicle for:

1. Ensuring that the PSSCC is fully competent, independent, and viable.

2. Stimulating a trend toward national standards development that generally is conducted in accordance with the provisions of the NPS.

3. Facilitating recognition of national standards as American National Standards.

4. Providing a workable and cooperative relationship between the government(s) and the private sector, both domestically and internationally.

8. RECOMMENDATIONS TO THE JOINT GOVERNMENT/PRIVATE SECTOR

The principal burden of follow-up actions necessary to effectively implement the NPS most properly fall within the purview of the private and government coordinating centers. However, a number of steps toward that end are clearly indicated.

1. The ANSI Board of Directors must determine whether ANSI is in a position to assume the burdens of the private sector standards coordinating center as outlined in the NPS, and initiate the various actions required to ensure fulfillment of that imposing responsibility.

2. The Department of Commerce should, in accepting the responsibility assigned by the OMB Circular on Federal Participation in the Development and Use of Voluntary Standards, designate within its large organization the specific unit that is to have responsibility for activities falling within the scope of the government sector standards coordinating center, as described in the NPS.

3. Each standards writing organization must study the NPS and Recommended Implementation Plan with a view to quickly determining whether or not it is prepared to adopt the NPS and work within the voluntary national standards structure that it recommends.

4. The PSSCC and the GSSCC must quickly establish mechanisms for working closely and effectively together in the interest of strong national and international standards programs for the U.S.

9. FOLLOW-UP BY NSPAC

Finally, the NSPAC suggests that it be reconvened approximately two years from the date of this report for the sole purpose of independently assessing and reporting on the effectiveness of NPS, particularly its level of acceptance and implementation.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

DOMINICAN REPUBLIC

Consultations Concerning Possible Import Restraint Level for Certain Man-Made Fiber Textile Products

NOVEMBER 30, 1978.

On November 30, 1978, the United States Government, in furtherance of the objectives of, and under the terms of Article 3 of, the Arrangement Regarding International Trade in Textiles, done at Geneva on December 20, 1973, as extended on December 15, 1977, requested the Government of the Dominican Republic to enter into consultations concerning exports to the United States of man-made fiber brassieres in Category 649, produced or manufactured in the Dominican Republic. A complete description of the category in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 342). March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), and September 5, 1978 (43 FR 39408).

Notice is hereby given that under the provisions of Article 3 and Annex B of the Arrangement, if no solution is mutually agreed upon by the two governments at the conclusion of consultations to begin no later than February 15, 1979, entry and withdrawal from warehouse for consumption of man-made fiber textile products in Category 649, produced or manfactured in the Dominican Republic and exported to the United States during the twelve-month period beginning on the date of delivery of this note, could be unilaterally restrained.

There is published below market disruption information relating to Category 649. Any party wishing to express a view or provide data or information with respect to this category is invited to submit such in ten copies to Mr. Robert E. Shepherd, Chairman of the Committee for the Implementation of Textile Agreements and Deputy Assistant Secretary for Domestic Business Development, U.S. Department of Commerce, 14th and Constitution Avenue NW., Room 3826, Washington, D.C. 20230. To enable timely consideration, comments should be submitted at the earliest date possible, but no later than January 8, 1979

Views, data or information submitted under this procedure will be available for public inspection in the Office of Textiles, Room 2815 U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230, and may be obtained upon written request pursuant to the Freedom of Information Act, 5 U.S.C. 552 (1976), as amended, and the regulations of the Department of Commerce (15 CFR Part 4 1978). Whenever practicable, public comment may be invited concerning views, comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments on market disruption, or any other matter pursuant to this notice, is not a waiver in any respect of the exemption contained in 5 U.S.C. 533(a)(1) and 554(a)(4) (1976) relating to matters which constitute "a foreign affairs function of the United States."

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

MARKET STATEMENT—DOMINICAN REPUBLIC

Cat. 649—Body Supporting Garments.

Apparel items contained in this category include all man-made fiber brassieres, girdles, corsets, garters and other body supporting garments.

The U.S. man-made fiber body supporting garment industry is one of the severely impacted areas of the U.S. apparel industry. The import/production ratio was 50.7 in 1977, up from 42.9 percent in 1976.

Imports: Total U.S. imports of man-made fiber body supporting garments increased from 610,000 dozen in 1967 to 9,420,283 dozen in 1977 and to 10,273,634 dozen in the year ending September 1978. Brassieres accounted for 96 percent of this total.

The Dominican Republic is the fifth largest supplier of these items to the United States, accounting for 10 percent of total imports. The Philippine Republic is the largest supplier with 22 percent.

Imports from the Dominican Republic increased from 2,151 dozen in 1972

D E 7 7 8 UMI

Dominican Republic: U.S. General Imports of Category 649 (Bras) for Selected Periods

V 4 3 / 2 3 6

to 478,247 dozen in 1976, 821,065 dozen in 1977 and 1.1 million dozen in the year ending September 1978. Brassieres, both ornamented and non-ornamented, account for 97 percent of these items imported from the Dominican Republic.

Among the major suppliers of these items, the Philippine Republic, Hong Kong, Haiti and Korea control their exports to the United States.

Prices: The CIF value, including import duties of imports in this category from Dominican Republic are substantially below the domestic prices for similar goods produced in the United States.

Domestic Production: U.S. domestic production of man-made fiber body supporting garments declined from 22.1 million dozen in 1967 to 19.5 million dozen in 1976 a drop of 11.8 percent. Production in 1977 has declined an additional 5 percent from the 1976 levels. Brassieres account for 78 percent of U.S. Production of the items in this category.

Employment: Total employment in the body supporting garment industry declined from 31,300 in 1972 to 24,000 in 1976. Employment in 1977 decreased by about 13.7 percent to 20,700 from 1976 levels. Employment in August 1978 was down an additional 7.2 percent from December 1977.

MILITARY TRAFFIC MANAGEMENT COMMAND; MILITARY PERSONAL PROPERTY CLAIMS SYMPOSIUM

Meeting Cancellation

In FR Doc. 78-32542 appearing at page 54123 in the issue for Monday, November 20, 1978, the December 14, 1978 meeting of the Military Personal Property Claims Symposium has been cancelled. A meeting will be scheduled in June and announcement made in FEDERAL REGISTER accordingly.

Dated: November 30, 1978.

DONALD H. MENSCH,
Colonel, GS,
Director of Personal Property.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

AREA RATE PROCEEDING, ET AL. (TEXAS GULF COAST AREA)

Order Establishing Procedures for Claiming Recoupment of Excess Refund Payments

NOVEMBER 28, 1978.

Before Commissioners: Charles B. Curtis, Chairman; Don S. Smith, and Georgiana Sheldon.

In the Matter of Area Rate Proceeding, *et al.* (Texas Gulf Coast Area) *Docket Nos.* AR64-2, *et al.;* Area Rate Proceeding, *et al.* (Other Southwest Area) AR67-1, *et al.;* Area Rate Proceeding, *et al.* (Southern Louisiana Area) AR61-2, *et al.* and AR69-1, *et al.;* Area Rate Proceeding, *et al.* (Permian Basin Area II) AR70-1, *et al.*

The Commission [1] issued four area rate opinions, determining just and reasonable rates and providing for refunds of amounts collected in excess of such rates, wherein reserves dedication work-off credits could be utilized, as follows:

Area	Opinion No.	Date issued	Termination date for work-off credits	Date refunds ordered (flow-through)
Texas Gulf Coast	595	May 6, 1971	Jan. 1, 1976	June 1, 1976 (Aug. 2, 1976).
Southern Louisiana	598	July 16, 1971	Oct. 1, 1977	Oct. 31, 1977 (Nov. 29, 1977).
Other Southwest	607	Oct. 29, 1971	Jan. 1, 1978	June 1, 1978 (Aug. 2, 1976).
Permian Basin II	662	Aug. 7, 1978	Jan. 1, 1973	May 1, 1978 (June 15, 1978).

These opinions provided that the refund obligations derived therefrom could be discharged, totally or in part, by the producers through the dedication of gas in the form of a refund credit of one cent per Mcf of new gas reserves committed to interstate commerce. A producer could discharge up to 100% of its refund obligation to any buyer by dedicating gas to that buyer or up to 50% of such obligation through dedication of gas to other buyers. These opinions also provided that if producers' refund obligations had not been completely discharged by the termination dates for work-off credits as shown above the producers would have to make remaining refunds in cash plus additional interest at the rate of 7% per annum. The Commission has ordered refunds in each area. Most of the refund monies have been disbursed to the pipeline companies by the producers. Some of these monies have been flowed-through by the pipeline companies to their customers.

Opinion No. 749, effective January 1, 1976, in Docket No. R-478 established nationwide flowing gas rates for gas sold from wells commenced prior to January 1, 1973. The Commission ordered therein that gas currently being sold or dedicated to be sold from this class of wells in discharge of a refund obligation in any of the four captioned area rate proceedings could be sold at the increased national rate effective January 1, 1976, only if the seller waived its refund credits on and after that date. In *Tenneco Oil Co.* v. *Federal Energy Regulatory Commission*, 571 F.2d 834 (5 Cir. 1978) the Court of Appeals set aside that portion of Opinion No. 749 requiring waiver of refund credits for sales of gas made at the rate established in that opinion.

It will now be necessary for those producers desiring to claim recoupment of excess refund payments because of the Opinion No. 749 waiver requirement and the *Tenneco* decision to submit revised refund disbursement reports reflecting the additional reserves covered by Opinion No. 749 to be credited towards discharging of refund obligations.

To substantiate these credits, it will be necessary for the pipeline companies, at the requests of the producers, to submit revised Reserves Dedication Reports (Form 334),[2] reflecting recoverable reservoir reserve volumes in lieu

[1]These proceedings were commenced before the F.P.C. By joint regulation of October 1, 1977 (10 CFR 1000.1), they were transferred to the FERC. The term "Commission" when used in the context of action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

[2]Order 459, establishing Form 334, provides that the reserves estimate set forth in a submitted report shall be subject to review by the staff of the Commission. If the staff does not notify the producer and purchasers within 90 days after the date such report is filed or within 90 days after the date this order has been issued, if such report has been filed prior to the date of issuance of this order, that it disagrees with such estimate, the reserves set forth therein can be considered accepted.

of production volumes as originally specified in Opinion No. 749.[3]

Because of the additional refund credits, it will also be necessary for the producers to reallocate their total refund credits proportionately among their creditor pipelines in accordance with the United Distribution Companies Settlement Proposal (Appendix A to Opinion No. 598).[4] Each reallocation statement shall include (a) the total amount owed to each purchaser by rate schedule, including rate schedules of others; (b) the total direct reserves dedication credits to each purchaser by purchaser report number; (c) the excess credits or remaining amount owed to each purchaser; (d) the allocation of excess credits to each purchaser still owed money after application of direct credits and (e) the amount of excess refund monies paid out by the producer to each purchaser.

As validation, the pipeline companies shall be required to submit unqualified concurrences (or non-concurrences) in both the producers' revised refund disbursement reports and reallocation statements.

Following Staff review of the Forms 334, the producers' reallocation statements, and the revised refund disbursement reports, the Commission will issue a further order setting forth the procedures for the recoupment by the producers and the pipelines of excess monies refunded and flowed through.

The Commission orders: (A) Those producers desiring to claim additional refund discharge credits for dedications of reserves covered by Opinion No. 749 shall request the pipeline companies to whom they have made such dedications to file revised Reserves Dedication Reports (Form 334) with the Commission and shall file copies of such request with the Commission. The producers' requests and supporting reserves and production data shall be furnished the pipeline companies within 60 days of the date of this order. Since the deadlines for filing Forms 334 have passed, only revisions to previously filed reports will be permitted. The only exception to this prohibition will be in a situation where there had been no production from dedicated reserves covered by Opinion No. 749 prior to the Form 334 filing deadline date and, consequently, no refund credits could have previously been obtained by the producer by the filing of a Form 334. Any claims of this nature must be fully documented and must be accompanied by a statement that any production from such reserves is to be sold at the Opinion No. 749 rates.

(B) Within 120 days of the date of this order, the pipeline companies shall file the requested Form 334 with the Commission.

(C) Within 180 days of the date of this order, the producers shall:

(1) Submit revised refund disbursement reports and reallocation statements of all reserves dedications in accordance with the United Distribution Companies Settlement Proposal. The reallocations should be based on a producer's total outstanding refund obligations in the rate proceeding area, including its refund obligations as a working interest owner under the rate schedules of others, and

(2) File with the Commission unqualified concurrences (or non-concurrences) of the pipelines in the revised refund disbursement reports and reallocation statements.

(D) No excess refund monies paid out shall be repaid to the producers pending further order of the Commission.

(E) All producer and pipeline filings required in this order shall be submitted in triplicate, with copies served on all interested parties, except revised Form 334, which shall be submitted in an original and three copies. In addition, all producer and pipeline refund reports shall be signed by a corporate officer or, if an individual or group of individuals, by such individual or individuals.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-34054 Filed 12-6-78; 8:45 am]

[3]The previously submitted Forms 334 showed only actual production volumes prior to the effective date of a producer rate increase to the rate prescribed in Opinion No. 749, in accordance with the waiver requirements of Opinion No. 749. These revised Forms 334 should show the greater total recoverable reserves volumes in accordance with the *Tenneco* decision.

[4]Section 8.2.2(d) of the Settlement Proposal provided ". . . if new reserves are committed to a purchaser to which the producer owes no refund or in an amount which exceeds the refund obligation owed to that purchaser, then the one cent (1.0 cent) per Mcf credit shall be applied to reduce the producer's remaining refund obligations to all other purchasers as to each in proportion that the obligation owed to each bears to the remaining total refund obligation of such producer."

[Docket No. RM79-3]

NATURAL GAS POLICY ACT OF 1978

Receipt of Report of Determination Process

DECEMBER 4, 1978.

Pursuant to section 18 CFR 274.105 of the Federal Energy Regulatory Commission's Regulations, a jurisdictional agency may file a report with the Commission describing the method by which such agency will make certain determinations in accordance with sections 102, 103, 107, and 108 of the Natural Gas Policy Act of 1978.

Reports in conformance with 18 CFR 274.105 have been received by the Commission from the following jurisdictional agencies:

Agency, and date

State of New Mexico Energy and Minerals Department, Oil Conservation Division, November 29.
Railroad Commission of Texas, November 30.
State of Louisiana Department of Conservation, November 29.
West Virginia Department of Mines, Oil and Gas Division, November 30.
Alabama State Oil and Gas Board, November 30.
State Oil and Gas Board of Mississippi, November 30.
Kansas State Corporation Commission Conservation Division, November 30.

Copies of these reports are available for public inspection in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. RP72-110 (PGA-78-12B]

ALGONQUIN GAS TRANSMISSION CO.

Rate Change Pursuant To Purchased Gas Cost Adjustment Provision

NOVEMBER 28, 1978.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on November 6, tendered for filing Second Substitute 44th Revised Sheet No. 10 to its FERC Gas Tarriff, First Revised Volume No. 1.

Algonquin Gas states that this sheet is being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision set forth in Section 17 of the General Terms and Conditions of its FERC Gas Tariff, First Revised Volume No. 1. Algonquin Gas also indicates that the rate change proposed to be effective October 1, 1978, is being filed to reflect a reduction in purchased gas costs filed by its supplier, Texas Eastern Transmission Corporation, under both its Second Substitute 44th Revised Sheet No. 14D and its Third Substitute 44th Revised Sheet No. 14D.

Algonquin Gas proposes that the revised tarriff sheet become effective on October 1, 1978.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.0). All such petitions or protests should be filed on or before December 4, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. CI77-641]

ARKANSAS LOUISIANA GAS CO. v. DYCO PETROLEUM CORP.

Offer of Settlement

NOVEMBER 28, 1978.

Take notice that on November 2, 1978, Dyco Petroleum Corporation submitted an offer of settlement in the captioned proceeding.[1] The issue in this case, which Dyco states the offer is designed to settle fully, is whether natural gas production attributable to Dyco's interest in certain acreage in Dewey County, Oklahoma, is dedicated to interstate commerce by reason of a predecessor's commitment of the acreage to a gas purchase contract with Arkansas Louisiana Gas Company (Arkla), the complainant herein.

Dyco states that litigation respecting the issue in this case[2] may be prolonged and costly. Dyco therefore offers to settle the proceeding by committing to Arkla natural gas reserves equivalent to or greater than Dyco's share of reserves attributable to the disputed acreage. The equivalent reserves underlie a separate tract of land leased by Dyco, on which a well has been drilled. Appended to the settlement offer are executed 20-year gas purchase contracts commiting Dyco's interest in production of the equivalent reserves to Arkla. The contract provides for a price at the highest applicable rates permitted by law.

The offer of settlement, and the gas purchase contracts, are conditioned upon Commission approval of the settlement no later than January 1, 1979. Dyco states that the conditions were imposed because of the necessity felt by the producers of commencing deliveries from the shut-in well to generate cash flow from sales of the gas.

The Commission will provide for the filing of comments on Dyco's offer of settlement on an expedited basis. Any person desiring to be heard or to protest the offer of settlement should file comments by December 8, 1978, with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426.

All protests and comments will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any party wishing to become a party must file a petition to intervene in accordance with the Commission's Rules, provided, however, that persons that have previously filed a notice or petition for intervention in this proceeding need not file additional notices or petitions to become parties with respect to the instant filings. Copies of the Settlement Agreement are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

FR Doc. 78-34072 Filed 12-6-78; 8:45 am]

[1] Joining in the offer of settlement are McCulloch Oil Corporation, Statex Petroleum, Inc., and HBOP, Ltd., jointly referred to in this notice as "Dyco."

[2] Apart from the proceeding before the Commission, a judicial proceeding instituted by Dyco, *et al.* is pending in the United States District Court for the Western District of Oklahoma. *Hoover & Bracken, Inc., et al.* v. *Arkansas Louisiana Gas Co.* and *FERC, W.D. Okla. No. CIV-78-0191-B (complaint filed 1978). The offer of settlement provides that upon approval, Dyco will move to dismiss its complaint with prejudice.*

[6740-02-M]

[Docket No. CP76-60]

ARKANSAS LOUISIANA GAS CO., COMPLAINANT v. McCULLOCH OIL CORP. OF TEXAS, DEFENDANT

Order Providing for Formal Conference

NOVEMBER 27, 1978.

On August 18, 1975, Arkansas Louisiana Gas Company (Arkla), an interstate pipeline company, filed a complaint with the Commission pursuant to Section 1.6 of the Rules of Practice and Procedure against McCulloch Oil Corporation of Texas (McCulloch), a gas producer, alleging that McCulloch had made and was continuing to make sales of natural gas to an intrastate gas pipeline company that had been previously dedicated to the interstate market and Arkla. Following the filing of the complaint and McCulloch's answer thereto, the two parties entered into a settlement agreement dated March 29, 1976. Arkla thereafter filed a notice of withdrawal of its complaint pursuant to Section 1.11(d) of the Commission's Rules. We hereby exercise our authority under Section 1.18(c) of the rules to order the parties to appear at a formal conference for the purposes set forth below.

The complaint filed by Arkla states that it had entered into a contract with Amarex, Inc. (Amarex), a gas producer, dated June 6, 1970, under which Arkla would purchase from Amarex gas produced from certain fields that were part of a large block of leaseholds held by Amarex, as lessee, in the Texas Panhandle. The complaint further states that this contract was filed with the Commission as part of Arkla's application for a certificate of public convenience and necessity permitting Arkla to construct a pipeline 298 miles long from the Deep Anadarko Basin in the Texas Panhandle to Wilburton, Oklahoma.[1]

The complaint alleges that following the execution of its contract with Arkla, Amarex assigned certain of the leases dedicated to the contract to McCulloch. Amarex proceeded to file for and receive a small producer certificate in Docket No. CS71-92 on August 12, 1971. Arkla states that on November 24, 1971, Amarex initiated sales to the interstate market from certain of the leases retained by Amarex and covered by the contract.

The complaint avers that McCulloch drilled and completed one or more gas wells on certain of the leaseholds which McCulloch had acquired by assignment from Amarex and that McCulloch thereafter delivered gas from these wells to an intrastate gas company, Pioneer Natural Gas Company (Pioneer). It further states that Arkla had demanded that McCulloch deliver the gas from these wells to Arkla and that McCulloch had refused to do so.

Arkla noted in its complaint that McCulloch had filed suit in United States District Court for the Northern District of Texas, Amarillo Division, asking the court to issue an order declaring that Arkla is not entitled to the gas produced and sold from those leaseholds McCulloch had originally acquired from Amarex as an assignee.[2]

Arkla prayed in its complaint for relief in the form of (1) finding McCulloch in violation of the Natural Gas Act, (2) requiring McCulloch to provide an accounting of all sales to Pioneer from the wells in question, and (3) ordering McCulloch to cease and desist the delivery of gas to Pioneer and repay Arkla for the amounts of gas delivered to Pioneer.

McCulloch filed its answer together with a motion to dismiss the complaint on September 26, 1975, contending that it was not in violation of the Natural Gas Act and requesting that the relief sought by Arkla be denied. McCulloch further stated that Arkla's complaint lacked facts specific enough for response or sufficient enough to establish a basis for Commission jurisdiction. McCulloch stated, therefore, that Arkla's complaint did not comport with Section 1.6 of the Rules.

McCulloch asserted in its answer that any sales to Pioneer are from fields not covered by the Amarex contract with Arkla but are, instead, from fields covered by leases entered into by McCulloch subsequent to the execution of the Arkla-Amarex contract.

McCulloch then made an alternative motion to hold in abeyance the Commission proceeding pending resolution of its contract action filed against Arkla in U.S. District Court. McCulloch stated that the primary dispute between it and Arkla is a question of contract law—whether certain of its leases are a part of the Arkla-Amarex gas purchase contract.

As noted above, Arkla and McCulloch proceeded to enter discussions aimed at resolving their dispute. On March 29, 1976, they joined in a settlement agreement. Under this agreement, McCulloch agreed to dedicate to Arkla all future gas developed in fields known as the Grand and Brown Prospects, Ellis County, Oklahoma, and from Section 7 and the south half of Section 19 in the Mendota Prospect. Arkla, in turn, agreed to release its prior claims to gas in the Mendota Prospect. No provision was made for past sales or current sales from those wells purported to be dedicated to the intrastate market by McCulloch. This settlement agreement was conditioned upon Arkla's successfully withdrawing its complaint in this proceeding.

On May 10, 1976, Arkla filed a notice of withdrawal of its complaint stating that the controversy raised by its complaint and joined by McCulloch by its answer no longer exists.

On July 12, 1977, McCulloch filed a motion for expedited review and attaches as an exhibit an amendment to the settlement between the two parties.

No petitions to intervene or notices of intervention were filed in this matter.

It appears that the pleadings in this case do not set forth the facts necessary for a well-informed Commission decision. In an effort to obtain the necessary additional information and to expedite the resolution of this case we direct that, pursuant to Section 1.18(c) of the Rules, a conference be held and that the parties to this proceeding appear to consider the matters set forth below. This course of action had been taken in similar situations in the past. See, *e.g., Northern Natural Gas Company,* Docket No. CS71-6, Order Initiating Prehearing Conference and Granting Petitions to Intervene, September 26, 1975.

The aim of a formal conference before a Presiding Administrative Law Judge is to enable the parties to agree to stipulations of all relevant facts necessary to resolve this case. So that stipulations may be arrived at more readily we direct Staff counsel to draft stipulations and serve them upon the parties no later than seven days before the convening of the conference. Hopefully, the use of stipulations will eliminate the need for an evidentiary hearing. The Presiding Judge, of course, will have those powers prescribed in Section 1.18(d) of the Rules. The parties are reminded of the effect of a failure to stipulate at such a conference to matters of fact later proved as provided by Section 1.18(f) of the Rules.

We further direct that the parties at the conference submit documents in support of the settlement agreement.

Following the conference, the Presiding Judge shall submit a report to the Commission for its consideration prior to further action by it.

We think it appropriate to respond at this time to McCulloch's argument that this proceeding should be stayed pending resolution of its action in U.S. District Court. McCulloch asserted in its answer that the issue of dedication of the leaseholds it originally acquired as an assignee of Amarex is one merely of contract law. This view is incorrect. The effect of dedication of reserves—if that is what occurred in this case—is to attach a separate and independent *federal obligation* on leaseholds or wells or a certain service that is above and beyond common law contractual obligations. *See, California, et al. v. Southland Royalty Co., et al.,* 98 S. Ct. 1955, 1959 (1978); *Sunray Mid-Continent Oil Co. v. F.P.C.,* 364 U.S. 137, 155 (1960). This federal obligation is not imposed by the contract but by the effect of dedication as provided by the Natural Gas Act. No reason exists, therefore, to await a ruling on the force of common law contract obligations. It is within the purview of this Commission to determine the existence and effect of the federal obligation attached to gas reserves dedicated to the interstate market.

Moreover, we do not believe that the recent enactment of the Natural Gas Policy Act of 1978 makes inappropriate the course of action directed here. There may exist an issue of past dedication and volumes of gas wrongly diverted from the interstate market.

The Commission finds: It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the Commission initiate, pursuant to Section 1.18(c) of its Rules of Practice and Procedure, a conference, as more fully set forth hereinbefore, to assist the Commission in reaching a proper and informed decision in this matter.

The Commission orders: A conference shall be convened in the proceeding in Docket No. CP76-60 in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on December 19, 1978 at 10:00 a.m. (EST). The Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for the purpose—see Delegation of Authority 18 CFR 3.5(d)—shall preside and shall make relevant procedural determinations not provided for herein.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER79-109]

ARIZONA PUBLIC SERVICE CO.

Filing

NOVEMBER 28, 1978.

Take notice that Arizona Public Service Company ("APS") on November 20, 1978, tendered for filing a proposed change in its rate schedule for wholesale electric service to the City of Lowell, Arizona.

APS states that the proposed change would increase revenues from jurisdictional sales and service by $1,000 based on the 12 month period ending December 31, 1979.

APS requests that the proposed change become effective January 1, 1979.

APS states that a copy of the filing has been served upon the City of Lowell, Arizona.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 4, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. ER79-66]

CENTRAL LOUISIANA ELECTRIC COMPANY, INC.

Filing

NOVEMBER 29, 1978.

Take notice that on November 17, 1978, Central Louisiana Electric Company, Inc. (CLECO) tendered for filing a Letter Agreement dated October 16, 1978 covering the sale of 100 MW of surplus capacity to Gulf States Utilities Company (GSU) for twelve (12) months beginning January 1, 1979. CLECO states that GSU desires to purchase this capacity for its system needs and CLECO agrees to provide this capacity and that the Agreement will be beneficial to both systems. CLECO further states that the Agreement is contingent upon CLECO obtaining equivalent capacity and energy from Southwestern Electric Power Company and upon CLECO obtaining approval of all regulatory bodies having jurisdiction. CLECO indicates that deliveries will be made over existing interconnection facilities.

CLECO proposes an effective date of January 1, 1979, and therefore requests waiver of the Commission's notice requirements.

According to CLECO copies of this filing have been sent to the Louisiana Public Service Commission, GSU and Southwestern Electric Power Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 18, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. CP77-423 (Phase II)]

COLORADO INTERSTATE GAS CO.

Amendment

NOVEMBER 27, 1978.

Take notice that on November 2, 1978, Colorado Interstate Gas Company (Applicant), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP77-423 (Phase II), an amendment to its pending application in said docket pursuant to Section 7 (c) of the Natural Gas Act so as to request authorization for the establishment of a new point for deliveries of natural gas to applicant from the La Barge area in place of the delivery point originally proposed,[1] all as more fully set forth in the amendment which is on file with the Commission and open for public inspection.

Applicant asserts that the application in Docket No. CP77-423 requested authority for it to transport for and exchange natural gas with, Panhandle Eastern Pipe Line Company (Panhandle) from the Red Desert and East La Barge areas of Sweetwater County, Wyoming. As a result of the filing of a petition to intervene by Northwest Pipeline Corporation concerning the transportation of gas from the La Barge area, Panhandle moved the Commission to phase the application since no objections were raised concerning the Red Desert proposal, and the Commission agreed to phase the application and designated the Red Desert and La Barge proposals as Phase I and Phase II, respectively, it is said.

Applicant further asserts that on February 17, 1978, it received certificate authority in Docket No. CP77-423 (Phase I) to transport for, and exchange natural gas with Panhandle from the Greater Green River Basin area in southwestern Wyoming in accordance with the terms of a gas purchase and exchange agreement, dated December 3, 1976. The certificate granted in Phase I authorized Panhandle to construct facilities in the Red Desert area of Sweetwater County, Wyoming and to deliver natural gas to Applicant for transportation and redelivery by Applicant to Panhandle with Applicant having an option to purchase 25 percent of all volumes delivered to it, it is said. The balance would be redelivered, less applicable fuel and unaccounted-for volumes, on a thermally equivalent basis to Panhandle at existing delivery points located in Kearny County, Kansas, and Texas County, Oklahoma, it is asserted.

Applicant further asserts that after the order in Phase I issued, Panhandle negotiated a transportation and exchange agreement dated June 28, 1978 with Mountain Fuel Supply Company (MFS) and Applicant. Under the terms of that agreement, (MFS) would transport on behalf of Panhandle natural gas produced in the La Barge area from a proposed point of interconnection between MFS and Panhandle to Applicant at a proposed point of interconnection of the facilities of MFS and Applicant situated in Sweetwater County, Wyoming, it is said. Applicant states that it would agree to accept natural gas delivered by MFS for Panhandle's account at that location.

Applicant states it would transport and redeliver to Panhandle the East La Barge gas received from MFS for Panhandle's account at the delivery point proposed herein, as well as gas currently being received from Panhandle at the Red Desert delivery point, in accordance with the terms of the December 3, 1976, agreement between Applicant and Panhandle. The delivery point proposed herein is some 25 miles downstream from the location originally proposed for receipt of the La Barge area gas and the effect on Applicant's system would not be substantially different from that reflected in the initial application in this proceeding, it is asserted.

Applicant states that the agreement would be beneficial to both Panhandle and Applicant. It is asserted that Panhandle would benefit by receiving gas supplies in the La Barge area without the expenditure for constructing major connection facilities, and Applicant would benefit from the exchange by obtaining an option to purchase up to 25 percent of all volumes delivered from the La Barge area and by receiving transportation revenues from Panhandle.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before December 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc. 78-34074 Filed 12-6-78; 8:45 am]

[1] The new delivery point (designated as the North Baxter delivery point) is located in Section 2, T19N, R104W, Sweetwater County, Wyoming at a proposed point of system interconnection between Applicant and Mountain Fuel Supply Company.

[Docket Nos. RP77-105, RP76-76 and RP75-86, *et al.* (Reserved issues)]

COLORADO INTERSTATE GAS CO.

Filing of Settlement

NOVEMBER 29, 1978.

Take notice that on November 13, 1978, Colorado Interstate Gas Company (CIG) filed a settlement agreement with the Commission which, if approved, will resolve all issues in Docket Nos. RP77-105 and RP76-76 and all reserved issues in Docket No. RP75-86.

Any person desiring to be heard or to protest the proposed settlement agreement should file comment with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before December 12, 1978. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

CONSOLIDATED GAS SUPPLY CORP.

Settlement Conference

NOVEMBER 22, 1978.

Take notice that an informal settlement conference will be convened in the subject gas pipeline rate proceedings at 11:00 a.m. on December 14, 1978 in a hearing room at the office of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance at the conference will not be deemed to authorize intervention as a party in the proceeding.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER79-62]

CONSUMERS POWER CO.

Filing

NOVEMBER 29, 1978.

Take notice that on November 16, 1978, Consumers Power Company (Consumers) tendered for filing a contract and rate schedule for wholesale electric service to the City of Lowell, Michigan. Consumers states that the contract provides for the delivery of energy to an intermediary at the rate of 500 kW, for transmission to the City of Lowell. Consumers further states that the rates and charges established by the contract are the same as those accepted for filing and permitted to become effective with respect to service to other members of the jurisdictional service class by letter of the Commission dated November 1, 1977 in Docket No. ER77-534.

Consumers proposes an effective date of November 1, 1978, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 18, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CI79-107]

DEVON CORP., ET AL.

Petition for Declaratory Order

NOVEMBER 29, 1978.

On November 1, 1978, Devon Corporation, *et al.* (Devon) filed a petition pursuant to § 1.7(c) of the Commission's Rules of Practice and Procedure (18 CFR 1.7(c)) requesting that the Commission issue an order stating whether regulatory approvals are necessary for the construction and operation of the proposed AB Gathering Line to be built by Devon.[1]

Devon states that it entered into a contract on October 6, 1978 with Columbia Gas Transmission Corporation (Columbia) under which Devon would construct and operate 5.11 miles of gathering line to gather gas produced by Devon and Columbia and deliver it to a point on Columbia's existing V 28 8 inch gathering line at Columbia's existing meter No. 244, located in Logan County, West Virginia. Columbia would reimburse Devon for the cost of constructing the line, and the cost of the capital so employed, by paying Devon 30 cents per Mcf for all volumes delivered to Columbia (whether produced by Columbia or Devon) until such time as 110% of the cost expended by Devon (not to exceed 700,000 dollars) has been recouped. Additionally, Columbia would reimburse Devon for the actual cost of operating the line, not to exceed 2 cents per Mcf. After reimbursement Columbia would have the option to purchase the line for a nominal consideration. Volumes produced by Devon would be sold to Columbia at the applicable ceiling rate. Volumes produced by Columbia would be taken into its own system. Devon requests the Commission to clarify what authorization is required to carry out the terms of this contract.

Any person desiring to be heard or to make any protest with reference to said petition should on or before December 22, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure applicable in this proceeding (18 CFR 1.8 and 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP77-582]

EL PASO NATURAL GAS CO.

Petition To Amend

NOVEMBER 27, 1978.

Take notice that on November 1, 1978, El Paso Natural Gas Company (Petitioner), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP77-582 a petition to amend the order issued December 14, 1977 in the instant docket pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(c) of the Commission Regulations (18 CFR 157.7(c)) so as to permit the aggregate total project cost limita-

V 4 3 / 2 3 6

tions for the budget-type construction for miscellaneous rearrangement of facilities during the calendar year 1978, to be increased to an amount not to exceed $400,000, all as more fully set forth in the petition which is on file with the Commission and open for public inspection.

Petitioner states that it projected at the time the initial application was filed in Docket No. CP77-582 that the aggregate cost limitation of $300,000 was adequate to cover all anticipated projects to be performed by it during the calendar year 1978; however, on October 23, 1978, Petitioner had undertaken miscellaneous rearrangement projects during the calendar year 1978 which have committed an estimated $295,719 in costs under the budget-type authorization issued herein. Petitioner further states that it has pending a project which it has been requested to accomplish this year but which would cause Petitioner to exceed the current aggregate cost limitation of $300,000 prescribed by Section 157.7(c); accordingly, Petitioner requests waiver of the provisions to enable it to exceed the $300,000 limitation.

Petitioner asserts it has been advised by St. Mary's Hospital located in Tucson, Arizona, that it has commenced construction of a long term care facility at its existing hospital facility site. It is further asserted that to accommodate the planned expansion of St. Mary's Hospital and provide continuity in the existing construction schedule, it would be necessary for Petitioner, commencing on or about December 1, 1978, to remove approximately 1,100 feet of its existing 10¾-inch O.D. Tucson-Phoenix pipeline serving Tucson Gas and Electric Company (TG&E), a distributor customer of Petitioner, and to relocate and replace such facilities by the construction of approximately 2,070 feet of new 6-⅝-inch O.D. pipeline, with appurtenances, all located in Pima County, Arizona. Petitioner estimates the total cost of removing the existing segment of pipeline and of constructing the replacement pipeline at approximately $68,000, such cost to be reimbursed to Petitioner by St. Mary's Hospital.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before December 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc. 78-34077 Filed 12-6-78; 8:45 am]

[6740-02-M]

[Docket No. RP78-18]

EL PASO NATURAL GAS CO.

Tariff Filing

NOVEMBER 28, 1978.

Take notice that on November 20, 1978 El Paso Natural Gas Company ("El Paso") tendered for filing Second Revised Sheet No. 1-E and Third Revised Sheet No. 1-I to its FERC Gas Tariff, Original Volume No. 2A.

El Paso states that on September 15, 1978, it tendered for filing certain revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1 which were designed to modify El Paso's Purchased Gas Cost Adjustment Provision ("PGAC") contained in said tariff. Such modifications were made in accordance with El Paso's Stipulation and Agreement dated June 23, 1978, which was approved and adopted by the Commission's letter order dated September 5, 1978, at Docket No. RP78-18.[1] By letter order dated October 10, 1978, the Commission accepted said tariff tender and made the related tariff sheets effective as of the dates requested by El Paso in said filing.

El Paso further states that the modified PGAC provision which was the subject of the aforementioned September 15, 1978, tariff tender applies to all rate schedules contained in El Paso's Original Volume No. 1 Tariff, as well as certain special rate schedules contained in its Third revised Volume No. 2 and Original Volume No. 2A Tariffs. Such modified PGAC provision does not, however, address itself to those special rate schedules contained in El Paso's Volume No. 2A Tariff, which rate schedules contain rates that are based upon the purchased cost of clean, high pressure, pipeline quality gas and are subject to adjustment under the provisions of the Purchased Gas Cost Adjustment Provision—Clean High Pressure gas ("PGAC-CHPG") contained in said Volume No. 2A Tariff.[2] Since the procedures utilized in adjusting rates are similar under both the PGAC and the PGAC-CHPG provisions, El Paso states that the purpose of the subject tender is to effectuate certain modifications in the PGAC-CHPG provision in order to bring that provision into harmony with the general tariff policy approved by the Commission in connection with its approval of the Stipulation and Agreement at Docket No. RP78-18. El Paso further states that such modifications provide that all producer-supplier refunds received by El Paso during the period June 1, 1978, through May 31, 1981, applicable to sales made to El Paso's clean high pressure gas customers will be flowed through to such customers on a cash basis. Such cash refunds will be made concurrently with those refunds, if any, which are distributed to El Paso's jurisdictional customers under rate schedules subject to El Paso's Original Volume No. 1 Tariff PGAC provision pursuant to ARTICLE XVI(l) of the aforementioned Stipulation and Agreement approved at Docket No. RP78-18.

El Paso has requested that the Commission accept the tendered tariff sheets for filing and permit them to become effective thirty (30) days following the date filed.

El Paso states that copies of the filing were served upon each of its affected customers and the Railroad Commission of Texas.

Any person desiring to be heard or to make any protest with reference to said tariff filing should, on or before December 11, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations Under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc. 78-34078 Filed 12-6-78; 8:45 am]

---

[1] Such modifications are set forth on the tariff sheets included under Appendix C of said Stipulation and Agreement.

[2] The currently effective special rate schedules which are subject to El Paso's PGAC-CHPG provision are Rate Schedules FS-3, FS-6, FS-7, FS-10 and FS-32.

[6740-02-M]

[Docket No. ES79-12]

GULF STATES UTILITIES CO.

Application

NOVEMBER 28, 1978.

Take notice that on November 14, 1978, Gulf States Utilities Company (Applicant) filed an application seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance of up to 350,000 shares of New Preferred Stock. Applicant is incorporated under the laws of Texas with its principal business office at Beaumont, Texas, and is engaged in the electric utility business in portions of Louisiana and Texas. Natural gas is purchased at wholesale and distributed at retail in the City of Baton Rouge, Lousiana and vicinity.

The Applicant proposes to sell the new securities by competitive bidding in accordance with the Commission's Regulations under the Federal Power Act to underwriters who will in turn make a public offering of such stock.

The proceeds from the sale of the new securities will be used to pay off part of the Company's outstanding short-term bank loans previously authorized by the Commission.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 7, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10).

All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

HENRY GRACE PRODUCTION CO.

[Docket No. RI77-22]

Amended Petition for Special Relief

NOVEMBER 28, 1978.

Take notice that on November 7, 1978, Henry Grace Production Company (Grace) 813 City National Bank Bldg., Wichita Falls, Texas 76301, filed an amended petition for special relief in Docket No. RI77-22, requesting authorization to charge a rate of $0.73 per MMBTU for the sale of gas from the following producing properties: A. R. King and A. R. King D. Leases, Lipscomb County, Texas; and W. J. Godwin Lease, Cimarron County, Oklahoma. The pipeline purchaser is Transwestern Pipeline Company. Originally Grace requested a special relief rate of $1.52 per MMBTU.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before December 7, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. ES79-15]

ILLINOIS POWER CO.

Application

NOVEMBER 29, 1978.

Take notice that on November 16, 1978, Illinois Power Company, a corporation organized under the laws of the State of Illinois, with its principal business office in Decatur, Illinois, filed an application pursuant to Section 204 of the Federal Power Act, seeking authority to issue up to $125 million unsecured short-term notes and commercial paper, on or before December 31, 1979, and to mature on or before December 31, 1980.

The short-term debt will be added to working capital for ultimate application toward the cost of gross additions to utility properties.

Any person desiring to be heard or to make any protests with reference to said Application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before December 18, 1978. The Application is on file and available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc. 78-34062 Filed 12-6-78; 8:45 am]

[6740-02-M]

[Docket No. RI78-95]

JOSEPH P. MUELLER

Amended Petition for Special Relief

NOVEMBER 28, 1978.

Take notice that on September 15, 1978, Joseph P. Mueller (Petitioner), 1010 Wilson Building, Corpus Christi, Texas 78476, filed a petition for special relief in Docket No. RI78-95 pursuant to §2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76). Petitioner asserts that due to water influx and lower flowing pressures additional two-stage compression is required in order to continue production.

Take further notice that on November 9, 1978, Petitioner filed an amendment to his petition in order to request authorization to charge $0.9806 per Mcf at 14.65 psia for the sale of gas from the Thomas Sainz No. 1 Well and the Isabelle R. Ferrell "C"-1 Well, Ramirena Field, Live Oak County, Texas to Valley Gas Transmission Company, rather than the 101.21¢ per Mcf as earlier requested.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before December 8, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding.

Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP79-61]

LONE STAR GAS CO.

Application

NOVEMBER 28, 1978.

Take notice that on November 7, 1978, Lone Star Gas Company, a Division of Enserch Corporation (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP79-61 an application pursuant to Section 7 of the Natural Gas Act and Section 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)), for a certificate of public convenience and necessity authorizing the construction and for permission for and approval of the abandonment, during the calendar year 1979, and operation of field gas compression and related metering and appurtenant facilities, all as more fully set forth in the application on file with the Commission and open for public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in the construction, relocation, and operation and abandonment of facilities which will not result in changing Applicant's system saleable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment of facilities would not exceed $1,300,000 with no single project exceeding $325,000. Applicant states that it would finance such cost from working capital.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.70). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. CP79-65]

LONE STAR GATHERING CO.

Application

NOVEMBER 28, 1978.

Take notice that on November 7, 1978, Lone Star Gathering Company (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP79-65 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(c) of the Regulations thereunder (18 CFR 157.5(c)) for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1979, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material changes in the service presently rendered by Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $100,000, which cost Applicant would finance from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426 a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOUISIANA POWER & LIGHT CO.

Refund Report

NOVEMBER 24, 1978.

Take notice that Louisiana Power & Light Company on November 3, 1978, tendered for filing in compliance with Commission Opinion Nos. 813 and 813-A a report containing the monthly billing determinants and revenues under prior, present and adjudicated rates, monthly adjudicated rate increase, monthly rate refund and monthly interest computation for the period September, 1974 through August, 1978. Louisiana Power indicates that refunds in the amount of $3,994,224.57 were delivered to Cajun Electric Power Cooperative, Inc. on October 25, 1978.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before December 4, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. ER79-71]

MISSOURI POWER & LIGHT CO.

Filing of Amendment to Facility Use and Operating Agreement

NOVEMBER 29, 1978.

Take notice that on November 20, 1978, Missouri Power & Light Company (MPL) tendered for filing an Amendment and revised Appendix "E" to the Facility Use and Operating Agreement dated May 23, 1975 between MPL and Missouri Edison Company (MoEd). Said documents reflect added substation investment by MPL and the subsequent increase in rental charges MPL receives from MoEd, according to MPL.

MPL requests an effective date of January 1, 1979.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. ES79-11]

MISSOURI POWER & LIGHT CO.

Application

NOVEMBER 29, 1978.

Take notice that on November 13, 1978, Missouri Power & Light Company, a corporation organized under the laws of the State of Missouri, with its principal business office in Jefferson City, Missouri, filed an application pursuant to Section 204 of the Federal Power Act, seeking authority to issue up to $12 million unsecured short-term notes, on or before September 30, 1979, with final maturities not later than December 31, 1979.

The short-term debt will be used to finance construction costs pending permanent financing.

Any person desiring to be heard or to make any protests with reference to said Application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) on or before December 18, 1978. The Application is on file and available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. ER78-279]

NIAGARA MOHAWK POWER CORP.

Order Setting Procedural Date

NOVEMBER 27, 1978.

On June 23, 1978, the Commission issued in this docket an Order Accepting Filing, Suspending Proposed Rates, Granting Waiver and Instituting Investigation. The subject of this docket and of the order is a filing by Niagara Mohawk Power Corporation of a Capability Sales Agreement between it and Central Hudson Gas & Electric Corporation (Central Hudson).

In our order of June 23, 1978, we pointed out that the only intervenor in this docket, Central Hudson, supports the filing, and specifically the 8 percent floor on Niagara Mohawk's rate of return. However, Central Hudson's position in support of the 8 percent floor is stated as based upon its having negotiated a similar floor in its contract for providing transmission service to Niagara Mohawk, which was the subject of Docket No. ER78-220. However, we have rejected the floor in Docket No. ER78-220 as not just and reasonable upon considerations not applicable to the floor in this docket and we shall not reinstate the former floor, as requested by Central Hudson in its petition to intervene in this docket. Since our action in Docket No. ER78-220 has overturned the negotiated symmetry of the rate of return floors of the parties, we are scheduling a prehearing settlement conference for the parties, including Staff, to explore means by which compensation adjustments may be made, if necessary, to the rate of return provisions of the filing in this docket.

In our order of June 23, 1978, we postponed setting any procedural events in this docket, which we now are prepared to set, as follows.

The Commission orders: (A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 402(a) of the Department of Energy Act and by the Federal Power Act, Particularly Sections 205, 206, 301, 308 and 309 thereof, and pursuant to the Commission's Rules of Practice and Procedure and to the Regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of the rate change proposed by Niagara Mohawk Power Corporation in this proceeding.

(B) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose, shall preside at a prehearing conference in this proceeding to be held within thirty (30) days after the date of issuance of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Said Judge is authorized to establish procedural dates and to rule upon all motions (except motions to consolidate and sever, and motions to dismiss) as provided for in the Com-

DE 7 8 UMI

mission's Rules of Practice and Proce-

or protests should be filed on or before

[6740-02-M]

the Commission and are available for

joint petition to amend the Commis-

cordance with the requirements of the

V 43/236 DE 7 78 UMI

mission's Rules of Practice and Procedure.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No. RP73-8]

NORTH PENN GAS CO.

Proposed Changes in FERC Gas Tariff

NOVEMBER 28, 1978.

Take notice that North Penn Gas Company (North Penn) on November 16, 1978, tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1, pursuant to its PGA Clause for rates to be effective November 1, 1978.

The rates contained in Third Substitute Fifty-Eighth Revised Sheet No. PGA-1 reflect a decrease of 0.012¢ per Mcf from the rates contained in Second Substitute Fifty-Eighth Revised Sheet No. PGA-1 filed on October 30, 1978 for effectiveness November 1, 1978.

Third Substitute Fifty-Eighth Revised Sheet No. PGA-1 contains the same changes reflected in Second Substitute Fifty-Eighth Revised Sheet No. PGA-1 and additionally reflects the decrease in rates filed by Consolidated Gas Supply Corporation (Congas) on October 30, 1978 for effectiveness November 1, 1978.

Additionally, North Penn submits for filing Substitute Fifty-Ninth Revised Sheet No. PGA-1 for effectiveness December 1, 1978.

Substitute Fifty-Ninth Revised Sheet No. PGA-1 reflects the surcharge credit contained in Fifty-Ninth Revised Sheet No. PGA-1 filed October 31, 1978 and additionally reflects the increase in rates filed by Congas on November 1, 1978 for effectiveness December 1, 1978.

North Penn requests a waiver of any of the Commission's Rules and Regulations as may be required to permit the revised tariff sheets to become effective as proposed.

Copies of this filing were served upon North Penn's jurisdictional customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 5, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. ER79-72]

OHIO EDISON CO.

Filing

NOVEMBER 29, 1978.

Take notice that Ohio Edison Company on November 20, 1978, tendered for filing a proposed change in its FERC electric service tariff FERC No. 66, an Amendment No. 2 to the Interconnection Agreement between the Dayton Power and Light Company and Ohio Edison Company. The reason for the amendment is to reflect a change in transmission line routings and thus in delivery points and responsibilities for facilities, according to Ohio Edison.

A copy of the filing was served upon the Dayton Power and Light Company with whom the new agreement has been reached.

Any person desiring to be heard or to protest said application should file a petition to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before December 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the application are on file at the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket Nos. RP72-115 and R-406]

OKLAHOMA NATURAL GAS GATHERING CORP.

Filing of Revised Tariff Sheets

NOVEMBER 29, 1978.

Take notice that on November 13, 1978, Oklahoma Natural Gas Gathering Corporation (Gathering Corporation) tendered for filing the following tariff sheets:

Second Revised Sheet No. 58
Fourth Revised Sheet No. 59
Second Revised Sheet No. 60
Second Revised Sheet No. 61
Second Revised Sheet No. 62
Second Revised Sheet No. 63

Gathering Corporation states that said tariff sheets will become effective on January 1, 1979, and revise its Purchased Gas Cost Adjustment clause to include a provision for carrying charges on balances accumulated in its Unrecovered Purchased Gas Adjustment Clause are changed from January 1 and July 1 to April 1 and October 1, respectively. Gathering Corporation also states that this filing is made pursuant to and in compliance with Commission Order No. 13, issued October 18, 1978. Gathering Corporation further states that in order to avoid two PGA filings in a three-month period, it proposes to postpone its PGA filing, which would have been effective on January 1, 1979, and make a later filing to become effective on the new determination date of April 1, 1979.

Gathering Corporation states that copies of this filing were served upon all its jurisdictional customers, as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 12, 1978. Protests will be considered by the Commission in determing the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with

the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

[Docket No. ER79-68]

ORANGE & ROCKLAND UTILITIES, INC.

Filing

NOVEMBER 29, 1978.

Take notice that Orange & Rockland Utilities (O&R) on November 17, 1978, tendered for filing as a change in a filed rate schedule an agreement between O&R and Consolidated Edison Company of New York (ConEd) providing for the exchange of electric generating capability between O&R and ConEd and for associated energy transactions during the period October 29, 1978–April 21, 1979.

O&R requests waiver of the Commission's notice requirements to permit the agreement to become effective as of October 29, 1978, and to permit Rate Schedule No. 36, as amended, to terminate as of October 24, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before December 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02-M]

[Docket No. CP77-479]

PANHANDLE EASTERN PIPE LINE CO. AND TRUNKLINE GAS CO.

Petition To Amend

NOVEMBER 28, 1978.

Take notice that on November 1, 1978, Panhandle Eastern Pipe Line Company (Panhandle) and Trunkline Gas Company (Trunkline), P.O. BOX 1642, Houston, Texas 77001 (Petitioners) filed in Docket No. CP77-479 a joint petition to amend the Commission's order issued on December 16, 1977 in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to reflect the changes in the transportation service rendered to Libbey-Owens-Ford Company (LOF), all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Petitioners assert that the Commission order of December 16, 1977, authorized them to transport certain quantities of gas produced from reserves in the Fritzlen Field, in Woods County, Oklahoma, in accordance with a transportation agreement dated March 31, 1977; that is, 1,300 Mcf per day on a firm basis and 1,200 Mcf per day on a best efforts basis. The natural gas transported on a firm and best efforts basis is delivered by Panhandle and Trunkline to Transcontinental Gas Pipe Line Corporation, Northern Natural Gas Company, and Columbia Gas Transmission Corporation for the account of LOF and for redelivery to LOF, it is said.

Petitioners further assert that the transportation agreement also provides for Panhandle to deliver 500 Mcf per day on a firm basis to Transwestern Pipeline Company (Transwestern). Authorization for this service, however, has never been sought, nor is such service contemplated in the foreseeable future and, accordingly, Panhandle, Trunkline and LOF have amended the transportation agreement by an instrument dated September 11, 1978, which, among other things, deleted the point of redelivery to Transwestern in Hansford County, Texas, it is stated. It also reduces the firm transportation volume from 1,800 Mcf per day to 1,300 Mcf per day and increases the best efforts volume from 1,200 Mcf per day to 1,700 Mcf per day the petition states further.

Petitioners assert that the Commission order issued December 16, 1977, requires that the firm monthly charge to LOF be reduced by the proposed charge for the delivery of gas to Transwestern and, therefore, by way of conformity with this requirement, the September 11, 1978 amendment to the transportation agreement provides for the reduction of the monthly charge for the service from $7,650 to $6,136. It is further stated that the amendment provides for additional changes to bring the agreement into full harmony with that requirement and to reflect the actual charges since the commencement of the service.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before December 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[6740-02-M]

SHELL OIL CO.

[Docket No. CI79-114]

Limited-Term Certificate application

NOVEMBER 21, 1978.

Take notice that on November 3, 1978, Shell Oil company (Shell) P. O. Box 2099, Houston, Texas 77001, filed in Docket No. CI79-114 an application for a limited-term certificate of public convenience and necessity with pregranted abandonment authority requesting that Applicant be authorized to sell in interstate commerce, for resale, natural gas produced by Applicant from Mississippi Canyon Block 311 Field, Offshore Louisiana to Southern Natural Gas Company, pursuant to the provisions of Section 7 of the Natural Gas Act, as amended, and § 2.70 of the Commission's rules of practice and procedure.

Applicant states that it is seeking a limited-term certificate of public convenience and necessity for a term from the date of initial delivery of gas to Southern at their facilities in West Delta Block 133 until such time as both Shell and Southern are prepared to deliver and receive the subject gas at the Mississippi Canyon Block 311 Platform "A" facility, or until such time as Shell no longer has the capacity to gather gas to West Delta Block 133 through its crude oil pipeline whichever is earlier.

Any person desiring to be heard or to make any protest with reference to said application, on or before December 13, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties

V 4 3 / 2 3 6

to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02-M]

[Docket No: ER79-75]

SOUTHERN CALIFORNIA EDISON CO.

Filing of Interruptible Transmission Service Agreement

NOVEMBER 29, 1978.

Take notice that on November 20, 1978, Southern California Edison Company (Edison) tendered for filing an interruptible transmission service agreement, dated November 9, 1978, with the City of Anaheim providing for the transmission by Edison on an interruptible basis of power purchased by Anaheim from Nevada Power Company on a non-firm basis. Edison indicates that the power will be delivered by the Department of Water and Power of the City of Los Angeles (DWP) to the Victorville-Lugo Point of Interconnection. Edison will provide interruptible transmission service under said agreement from the Victorville-Lugo Point of Interconnection to Anaheim's Point of Delivery at the City of Anaheim. Edision states that it will charge Riverside as specified in the Agreement for transmission, dispatching, and scheduling services, and for losses between the Point of Interconnection with DWP and with the Anaheim Point of Delivery.

Edison and Anaheim request that service be initiated as soon as possible under this Agreement, and for that reasons Edison requests that the notice provisions of the Commission's regulations be waived and the filing be permitted to become effective at the time of acceptance of filing but in no event later than the appropriate number of days.

Copies of this filing were served upon the City of Anaheim California, and the Public Utilities Commission of the State of California, according to Edison.

Any person desiring to be heard or to protest this filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol St., N.E., Washington D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not service to amek protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

SOUTHERN NATURAL GAS CO.

Certification of Settlement

NOVEMBER 29, 1978.

Take notice that on November 9, 1978, Presiding Administrative Law Judge Samuel Kanell certified to the Commission a proposed Stipulation and Agreement in this proceeding. The settlement, if approved, would resolve all issues in the proceeding save for rate design, cost allocation, cost classification, rate zone, consolidated tax and certain cost-of-service issues related to Southern Energy Corporation.

Any person desiring to be heard or to protest the proposed settlement agreement should file comment with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before December 12, 1978. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

[6740-02-M]

[Docket No. CP79-55]

TRANSWESTERN PIPELINE CO.

Application

NOVEMBER 28, 1978.

Take notice that on November 6, 1978, Transwestern Pipeline Company (Applicant), P.O. Box 2521, Houston, Texas 77001, filed in Docket No. CP79-55 an application pursuant to Section 7(c) of the Natural Gas Act and § 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction, during the 12-month period commencing January 1, 1979, and operation of facilities to enable it to take into its certificated main pipeline system natural gas which would be purchased or received from producers or other similar sellers thereof, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally co-extensive with its pipeline system or the systems of other pipeline companies which may be authorized to transport gas for the account of or exchange gas with Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $8,600,000 and the cost of any

single project would not exceed $1,500,000, and further states that these facilities would be initially financed utilizing existing corporate funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 18, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene if filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Forty-Sixth Revised Sheet No. 4 reflects the elimination of all cost associated with facilities not in service at October 31, 1978, the anticipated advance payment balance at November 30, 1978 and includes the purchased gas cost and surcharge adjustment as filed in United's PGA on May 24, 1978 to be effective July 1, 1978.

Copies of the revised tariff sheets are being mailed to United's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing shall file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 14, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB
Secretary.

[Docket No. ER79-64]

UPPER PENINSULA GENERATING CO.

Filing

NOVEMBER 29, 1978.

Take notice that on November 17, 1978, Upper Peninsula Generating Company (Upper Peninsula) filed the 1978 Power Contract which is intended to supersede and replace the 1974 Power Contract and various supplements thereto. Upper Peninsula states that the 1978 Power Contract will govern the sale of power and energy by Upper Peninsula to Upper Peninsula Power Company (Power Company) and to Cliffs Electric Service Company (Service Co.) from the nine units owned by Upper Peninsula at its Presque Isle station. Upper Peninsula further states that the 1978 Power Contract provides for a rearrangement in the entitlements of Power Company and Service Co. in the various units owned by Upper Peninsula.

Upper Peninsula requests that the filing be permitted to become effective on January 1, 1979, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance

D E 7 7 8 UMI

V 4 3 / 2 3 6 D E 7 7 8 UMI

with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 18, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

Office of Hearings and Appeals

NOTICE OF CASES FILED

Week of November 17, 1978, Through November 24, 1978

Notice is hereby given that during the week of November 17, 1978 through November 24, 1978 the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 29461.

Dated: November 30, 1978.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

List of Cases Received by the Office of Hearings and Appeals

[Week of Nov. 17 through Nov. 24, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Nov. 17, 1978	O'Meara Bros., New Orleans, La	DEE-2021	Price exception (sec. 212.73). If granted: O'Meara Bros. would be permitted to sell crude oil produced from the Vinton Production Co. located in Lake Charles, at upper tier ceiling prices.
Nov. 20, 1978	No. 2 Home Heating Oil, Washington, D.C.	DEX-0123	Supplemental order. If granted: The Office of Hearings and Appeals publishes its decision and recommendation to the Deputy Secretary for the DOE and to the Administrator of the Economic Reegulatory Administration regarding the need for further regulatory action with respect to No. 2 (Home) Heating Oil.
Do	Phillips Petroleum Co., Bartlesville, Okla	DXE-2019 and DXE-2020.	Extension of relief granted in *Phillips Petroleum Company*, 2 DOE Par. —— (1978). If granted: Phillips Petroleum Co. would be permitted to sell the crude oil produced from Holder "B" lease and Yount "B" lease, located in Oklahoma County, Okla. at upper tier ceiling prices.
Do	Salem Oil Co., Lincoln, Nebr	DEE-2018	Exception to the reporting requirements. If granted: Salem Oil Co. would no longer be required to submit form EIA 9 (No. 2 Heating Oil Supply/Price Monitoring Report).
Nov. 21, 1978	Belridge Oil Co., Los Angeles, Calif	DXE-2025	Extension of relief granted in *Belridge Oil Company*, case No. DXE-1273 (decided on Aug. 8, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Kern County plant.
Do	City of Long Beach, Calif	DXE-2023	Extension of relief granted in *City of Long Beach*, 2 DOE par. 81,008 (June 23, 1978). If granted: The city of Long Beach, Calif., would be permitted to sell the crude oil produced from the Fault block II unit, Wilmington oil field, Los Angeles County, Calif., at upper tier ceiling prices.
Do	Coastal States Gas Corp., Houston, Tex	DRD-0015 and DRH-0113.	Motion for evidentiary hearing and motion for discovery. If granted: Discovery and an evidentiary hearing would be permitted in connection with Coastal States Gas Corp.'s statement of objections to a proposed remedial order (case No. DRO-0113).
Do	Crystal Oil Co., Shreveport, La	DEA-0253	Appeal of the April and August 1978 entitlement notices. If granted: The April and August 1978 entitlement notices would be modified with respect to Crystal Oil Co.'s classification of crude oil purchased from Permian Corp.
Do	Sanford P. Fagadau, Dallas, Tex	DXE-2026	Extension of relief granted in *Sanford P. Fagadau* case No. DXE-1120 (decided on Aug. 8, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Bluegrove plant.
Do	Gulf Oil Corp., Tulsa, Okla	DXE-2024	Extension of relief granted in *Gulf Oil Corporation*, 2 DOE Par. —— (Nov. 11, 1978). If granted: Gulf Oil Corp. would be permitted to sell the crude oil produced from the NW Graylin "D" Sand unit located in Logan County, Colo., at upper tier ceiling prices.
Do	Research Enterprises, Inc., New Orleans, La.	DRH-0122	Request for evidentiary hearing. If granted: Evidentiary hearing would be convened with respect to objections submitted to Research Enterprises, Inc. regarding the proposed remedial order issued to the firm.
Do	Union Oil Co. of California, Los Angeles, Calif.	DEE-2022	Price exception (sec. 212.73). If granted: Union Oil Co. would be permitted to sell the crude oil produced from the Coalinga Nose field unit located in Fresno County, Calif., at upper tier ceiling prices.
Nov. 22, 1978	Bock & Bacon, Houston, Tex	DXE-2027	Extension of relief granted in *Bock and Bacon*, 2 DOE par. —— (Nov. 7, 1978). If granted: Bock & Bacon would be permitted to sell the crude oil produced from the Champion Paper lease located in Newton County, Tex., at upper tier ceiling prices.
Do	Lehigh Oil Co., Norwich, Conn	DEE-2031	Exception to change supplier. If granted: Lehigh Oil Co. would receive a new base period supplier of gasoline to replace its present supplier, Coastal States Marketing, Inc.
Do	Marathon Oil Co., Cleveland, Ohio	DFA-0254	Appeal of information requests denials. If granted: The DOE's October 20, 1978 information request denials would be rescinded and Marathon Oil Co. would receive access to certain DOE documents.
Do	Quincy Oil, Inc., Boston, Mass	DMR-0036	Request for modification. If granted: The DOE's October 27, 1978 interlocutory order on motions for an evidentiary hearing would be modified to broaden the scope of the hearing.
Nov. 24, 1978	Swann Oil, Inc., Bala Cynwyd, Pa	DPI-0027	Exception to base fee requirements. If granted: Swann Oil Co. would be permitted to import residual fuel oil on a fee-exempt basis during the current allocation period, May 1, 1978 through Apr. 30, 1979.

FEDERAL RESERVE SYSTEM

CLAYTON BANCSHARES, INC.

Formation of Bank Holding Company

Clayton Bancshares, Inc. Clayton, Illinois, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 82.6 per cent (less directors' qualifying shares) of the voting shares of Clayton State Bank, Clayton, Illinois. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than 26 days of the date of this notice. Any comment on an application that requests a hearing must be to the Secretary's Office and must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, November 30, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01-M]

METROPOLITAN BANCORPORATION

Formation of Bank Holding Company

Metropolitan Bancorporation, Tampa, Florida, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 90 per cent or more of the voting shares of Metropolitan Bank and Trust Company, Tampa, Florida and 80 per cent or more of the voting shares of Bank of Holiday, Holiday, Florida. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than January 1, 1979. Any comment on an application that requests a hearing must be sent to the Secretary's Office within 30 days of the date of this notice and must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, December 1, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc. 78-34098 Filed 12-6-78; 8:45 am]

[6210-01-M]

NATIONAL WESTMINSTER BANK, LIMITED AND NATWEST HOLDINGS, INC.

Formation of Bank Holding Company

National Westminster Bank, Limited, London, England, and Natwest Holdings, Inc., Wilmington, Delaware, have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring directly or indirectly 75.1 percent of the voting shares of National Bank of North America, Jamaica, New York. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

National Westminster Bank, Limited, London, England, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to retain its indirect interest in C.F. International, Inc., New York, New York. Notice of the application was published on November 10, 1978, in *The New York Times*, a newspaper circulated in New York, New York.

Applicant states that the proposed subsidiary would continue to engage in the activity of factoring principally in connection with the import and export of goods to and from the United States. Such activity has been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than December 30, 1978.

Board of Governors of the Federal Reserve System, November 30, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01-M]

FEDERAL OPEN MARKET COMMITTEE

Domestic Policy Directive of October 17, 1978

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on October 17, 1978.[1]

The information reviewed at this meeting suggests that real output of goods and services grew moderately in the third quarter, although the pace was somewhat below the average for the first two quarters of the year. In September, as in August, the dollar value of total retail sales rose considerably. Industrial production continued to expand while nonfarm payroll employment changed little. The unemployment rate edged up from 5.9 to 6.0 per cent. Average producer prices of finished goods rose substantially in September, as prices of foods increased sharply after having declined for 2 months. The advance in the index of average hourly earnings has been somewhat faster so far in 1978 than it was on the average during 1977.

The trade-weighted value of the dollar against major foreign currencies has declined further since Mid-September in frequently volatile exchange markets. The U.S. trade deficit fell sharply in August, reversing the jump recorded in July; for the 2 months the deficit was close to the rate for the second quarter.

Growth in M-1, which had been rapid in August, accelerated in September. Inflows of the interest-bearing deposits included in M-2 and M-3 remained strong, and expansion in the broader aggregates also accelerated somewhat. Short-term market interest rates have risen further in recent weeks; long-term rates also have increased, but they remain below their July peaks. An increase in Federal Reserve discount rates from 7¾ to 8 per cent was announced on September 22; another increase to 8½ per cent was announced on October 13.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster monetary and financial conditions that will resist inflationary pressures while encouraging continued moderate economic expansion and contributing to a sustainable pattern of international transactions. In setting ranges for the monetary aggregates, the Committee recognized the uncertainties concerning the effects that the November 1 introduction of the automatic transfer service (ATS) would have on measures of the money supply, especially M-1. Against that background, the Committee agreed that appropriate monetary and financial conditions would be furthered by growth of M-2 and M-3 from the third quarter of 1978 to the third quarter of 1979 within ranges of 6½ to 9 per cent and 7½ to 10 per cent, respectively. The narrowly defined money supply (M-1) was expected to grow within a range of 2 to 6 per cent over the period, depending in part on the speed and extent of transfers from demand to savings deposits resulting from the introduction of ATS. The associated range for bank credit is 8½ to 11½ per cent. Growth of M-1+ (M-1 plus savings deposits at commercial banks and NOW accounts) in a range of 5 to 7½ per cent was thought to be generally consistent with the ranges of growth for the foregoing aggregates. These ranges are subject to reconsideration at any time as conditions warrant.

In the short-run, the Committee seeks to achieve bank reserve and money market conditions that are broadly consistent with the longer-run ranges for monetary aggregates cited above, while giving due regard to developing conditions in domestic and international financial markets more generally and to uncertainties associated with the introduction of ATS. Early in the period before the next regular meeting, System open market operations shall be directed at attaining a weekly average Federal funds rate slightly above the current level. Subsequently, operations shall be directed at maintaining the weekly average Federal funds rate within the range of 8¾ to 9¼ per cent. In deciding on the specific objective for the Federal funds rate the Manager shall be guided mainly by a range of tolerance for growth in M-2 over the October-November period of 5½ to 9½ per cent, provided that growth of M-1 over that period does not exceed an annual rate of 6½ per cent.

NOTE.—On November 1, 1978, the domestic policy directive adopted at the meeting of October 17, 1978 was modified by raising the range for the Federal funds rate to 9½ to 9¾ per cent and by instructing the Manager, in deciding on the specific objective for the rate within that range, to be guided by developing conditions in domestic and international financial markets.

By order of the Federal Open Market Committee, November 28, 1978.

MURRAY ALTMANN,
Secretary.

GENERAL SERVICES ADMINISTRATION

National Archives and Records Service

RECORDS EQUIPMENT AND SUPPLIES

New Federal Stationery Size Standard—8.5 by 11 Inches

AGENCY: National Archives and Records Service, General Service Administration.

ACTION: Notice.

SUMMARY: The National Archives and Records Service (NARS) proposes to revise Federal Property Management Regulation 101-11.603-2 to change the standard size of Federal stationery from 8 by 10.5 to 8.5 by 11 inches, effective January 1, 1980. The change is based upon a unanimous decision of the Congressional Joint Committee on Printing. NARS will issue written guidance to help Executive agencies make an orderly and economical conversion to the new size by depleting current stock and phasing in the use of the new.

FEDERAL ALLOTMENT TO STATES FOR SOCIAL SERVICES EXPENDITURES INCLUDING CHILD DAY CARE SERVICES PURSUANT TO TITLE XX OF THE SOCIAL SECURITY ACT

Promulgation for Fiscal Year 1979—Revised

In FR Doc. 77-25158 published in the FEDERAL REGISTER at page 43670 on August 30, 1977, the limitations promulgated to the States were based on the then maximum amount of $2,500,000,000. Pub. L. 95-600, dated November 6, 1978, increased the maximum amount to $2,700,000,000 for the basic title XX program and also provided $200,000,000 for Child Day Care Services. Accordingly, the promulgation contained in such document is rescinded and the promulgation, as revised, is set forth below in its entirety.

Promulgation is made of the Federal allotment for Fiscal Year 1979 for purposes of grants to States under Title XX of the Social Security Act, as amended pursuant to Section 2002(a)(2) (Pub. L. 95-600, dated November 6, 1978) of the Act which provides that the Federal allotment shall be determined and promulgated in accordance with said section.

For Fiscal Year 1979, the allotment limitations are based on the Bureau of the Census population statistics contained in its publication, "Current Population Reports" (Series P-25, No. 646, February 1977) which was the most recent satisfactory data available from the Department of Commerce at the time the original allocations were made for Fiscal Year 1979 as to population of each State and of all States.

It is hereby promulgated, for purposes of grants to States for social services under title XX, that the Federal allotment of each of the 50 States and the District of Columbia for the fiscal year ending September 30, 1979, as determined pursuant to the Act and on the basis of said population data, shall be as set forth below:

State	Federal allotment
Total	$2,700,000,000
Alabama	46,108,000
Alaska	4,806,000
Arizona	28,558,000
Arkansas	26,533,000
California	270,736,000
Colorado	32,496,000
Connecticut	39,214,000
Delaware	7,322,000
District of Columbia	8,832,000
Florida	105,942,000
Georgia	62,526,000
Hawaii	11,159,000
Idaho	10,455,000
Illinois	141,268,000
Indiana	66,703,000
Iowa	36,107,000
Kansas	29,061,000
Kentucky	43,127,000
Louisiana	48,322,000
Maine	13,461,000
Maryland	52,134,000
Massachusetts	73,081,000
Michigan	114,534,000
Minnesota	49,882,000
Mississippi	29,615,000
Missouri	60,111,000
Montana	9,473,000
Nebraska	19,538,000
Nevada	7,674,000
New Hampshire	10,341,000
New Jersey	92,292,000
New Mexico	14,694,000
New York	227,509,000
North Carolina	68,804,000
North Dakota	8,089,000
Ohio	133,947,000
Oklahoma	34,798,000
Oregon	29,300,000
Pennsylvania	149,232,000
Rhode Island	11,662,000
South Carolina	35,830,000
South Dakota	8,830,000
Tennessee	53,015,000
Texas	157,094,000
Utah	15,449,000
Vermont	5,989,000
Virginia	63,306,000
Washington	45,441,000
West Virginia	22,909,000
Wisconsin	57,984,000
Wyoming	4,907,000

Dated: December 1, 1978.

State	Federal allotment
Total	$200,000,000
Alabama	3,416,000
Alaska	357,000
Arizona	2,116,000
Arkansas	1,966,000
California	20,051,000
Colorado	2,408,000
Connecticut	2,905,000
Delaware	543,000
District of Columbia	654,000
Florida	7,847,000
Georgia	4,632,000
Hawaii	827,000
Idaho	775,000
Illinois	10,463,000
Indiana	4,941,000
Iowa	2,674,000
Kansas	2,153,000
Kentucky	3,195,000
Louisiana	3,580,000
Maine	998,000
Maryland	3,861,000
Massachusetts	5,413,000
Michigan	8,483,000
Minnesota	3,695,000
Mississippi	2,193,000
Missouri	4,453,000
Montana	703,000
Nebraska	1,448,000
Nevada	569,000
New Hampshire	767,000
New Jersey	6,835,000
New Mexico	1,089,000
New York	16,849,000
North Carolina	5,095,000
North Dakota	600,000
Ohio	9,921,000
Oklahoma	2,578,000
Oregon	2,171,000
Pennsylvania	11,053,000
Rhode Island	865,000
South Carolina	2,655,000
South Dakota	640,000
Tennessee	3,927,000
Texas	11,635,000
Utah	1,145,000
Vermont	444,000
Virginia	4,689,000
Washington	3,366,000
West Virginia	1,698,000
Wisconsin	4,295,000
Wyoming	364,000

Dated: December 1, 1978.

ERNEST L. OSBORNE,
Commissioner, Administration for Public Services.

Approved by: December 4, 1978.

ARABELLA MARTINEZ,
Assistant Secretary for Human Development Services.

Social Security Administration

COMMISSIONER OF SOCIAL SECURITY

Redelegations of Authorities to the Position of Social Insurance Claims Examiner (Disability) Located in the Guam Branch Officer of the Social Security Administration's Office of Program Operations

Under titles II and XVI of the Social Security Act, as amended (the Act), the Secretary of Health, Education, and Welfare (the Secretary) may make various findings of fact, decisions and determinations affecting the rights of individuals to benefits under these titles of the Act. The Secretary has delegated his authority to perform these functions to the Commissioner of Social Security (the Commissioner), with authority to redelegate (33 FR 5836-37, dated April 16, 1968 and 38 FR 15648, dated June 14, 1973). As appropriate, the Commissioner previously redelegated this authority to various subordinate positions in the Social Security Administration (SSA).

The Northern Mariana Islands, a chain of islands stretching northward from Guam for about 500-600 miles, is one of six administrative areas of the Trust Territory of the Pacific Islands over which the United States was given a trusteeship by the United Nations in 1947. In 1976, President Ford signed the Northern Marianas Covenant, which established a procedure whereby the Northern Mariana Islands would eventually become a United States Commonwealth. On October 24, 1977, President Carter proclaimed that the Constitution of the Northern Mariana Islands and certain provisions of the covenant between the Northern Mariana Islands and the United States would go into effect on January 9, 1978. Pursuant to this proclamation, section 502 of the covenant (Pub. L. 94-241), which extends the United States Supplemental Security Income (SSI) program to the Northern Mariana Islands, became effective on January 9, 1978.

I. Notice is hereby given that, to implement section 502 of Pub. L. 94-241 as it pertains to SSI disability and blindness claims filed in the Northern Mariana Islands, the Commissioner has redelegated the following authorities to the position of Social Insurance Claims Examiner (Disability) located in the Guam Branch Office of SSA's Office of Program Operations (hereafter referred to as the Guam Disability Examiner):

A. Pursuant to sections 1602, 1611, 1612, 1613, 1614, 1615, 1616, 1631 and 1633 of the Act, authority to make findings of fact and decisions affecting individuals who are, or claim to be, eligible for payments under the SSI program.

B. Pursuant to sections 1614(a), 1631(a)(4)(B), and 1633 of the Act, authority to make findings of fact and decisions as to the presumption that individuals applying for SSI benefits are disabled or blind, within the meaning of section 1614 of the Act, prior to completion of a formal determination of disability or blindness, and authority to authorize payment for not more than 3-months benefits to such individuals presumptively eligible.

C. Pursuant to sections 1614, 1631, and 1633 of the Act, authority to make Federal findings of fact and decisions regarding the existence, absence, duration or continuation of disability or blindness, as defined in section 1614 of the Act.

D. Pursuant to section 1611(e)(3) of the Act, authority to determine whether individuals eligible for SSI payments, and medically determined to be drug addicts or alcoholics, are complying with the terms and conditions of appropriate available treatment.

E. Pursuant to section 1631(c) of the Act, authority to review initial determinations and render reconsideration determinations in cases involving individuals who are, or claim to be, eligible for SSI payments, and who are in disagreement with determinations under title XVI of the Act. This includes authority to make findings as to whether good cause exists for failure to request reconsideration of an initial determination within 60 days after receiving notice of such determination.

II. Notice is hereby further given that, with respect to claims filed by persons living in the Northern Mariana Islands and entitled to disability insurance benefits under the regular Social Security Disability Insurance program, the Commissioner has redelegated to the Guam Disability Examiner authority, under section 221(g) of the Act, to make Federal determinations of disability, and authority to make findings of fact and decisions relating to periods of disability.

III. Notice is also hereby given that, with respect to social security disability insurance benefit claims adjudicated by the Guam Disability Determination Section, the Commissioner has redelegated to the Guam Disability Examiner authority, under section 221(c) of the Act, to review determinations of disability; to take such action in these cases as is provided in the Act; and, where permitted, to make findings of fact and decisions relating to periods of disability in such cases.

IV. The redelegations described in sections I., II. and III. above shall be effective as of the date that this General Notice thereof is published in the FEDERAL REGISTER. To the extent that any actions taken by the incumbent of the Guam Disability Examiner position, in effect, involve the exercise of any of the authorities redelegated by this document, prior to the date that this notice is published in the FEDERAL REGISTER, such actions are hereby affirmed and ratified, provided they fall within the scope of these redelegations. The subject redelegations do not carry with them the power to make further redelegations.

Dated: November 28, 1978.

STANFORD G. ROSS,
Commissioner of Social Security.

Office of Education

EMERGENCY SCHOOL AID ACT

Availability of Preimplementation Assistance

Applications are invited for new projects under the Emergency School Aid Act.

Authority for this program is contained in section 708(a)(2) of the Emergency School Aid Act (Title VII of Pub. L. 92-318, as amended (20 U.S.C. 1601-1619)).

This program issues awards to local educational agencies (LEAs), State educational agencies (SEAs), and other public agencies and organizations.

The purpose of the awards is to assist LEAs to prepare for the implementation of desegregation plans (or other plans described in section 706(a)(1)(A)(i), (B), or (C) (i) or (ii) of the Act, involving the elimination or reduction of minority group isolation in public elementary and secondary schools) under which children (or, in the case of required plans described in section 706(a)(1)(A), faculty) will be reassigned to schools in the 1979-80 school year. However, applications will not be accepted from agencies or organizations which engaged in the illegal segregation that gave rise to a required plan.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: Applications for awards will be accepted at any time. Applications received after August 30, 1979, which cannot be properly processed by September 30, 1979, will be returned to the applicant.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Office of Education, Application Control Center, Attention: 13.532J, Washington, D.C. 20202.

Proof of mailing must consist of a legible U.S. Postal Service dated postmark or a legible mail receipt with the date of mailing stamped by the U.S.

Postal Service. Private metered postmarks may be used by mail users other than Federal agencies, but these postmarks will not be accepted as proof of timely mailing. Applications sent by mail will not be accepted if received after the closing date.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the Office of Education, Application Control Center, Room 5673, 400 Maryland Avenue, SW., Washington, D.C. 20202.

The Application Control Center will accept hand delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

APPLICATIONS NOT DELIVERED BY MAIL OR BY HAND: An application that is not delivered by mail or by hand will not be accepted for review.

PROGRAM INFORMATION: Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the application kit for this program. The application kit is available from the Office of Education, Emergency School Aid Act Program, Room 2177, 400 Maryland Avenue, SW., Washington, D.C. 20202, telephone (202) 245-2181.

Postal Service. Private metered postmarks or mail receipts will not be accepted without a legible date stamped by the U.S. Postal Service. (NOTE: The U.S. Postal Service does not uniformly provide a dated postmark. Applicants should check with their local post office before relying on this method.) Applicants are encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept hand delivered applications between 8:00 a.m. and 4:00 p.m. (Washington, D.C., time) daily, except Saturdays, Sundays, and Federal holidays.

PROGRAM INFORMATION: The Commissioner will consider for funding any activity authorized under the Act, so long as the activity is reasonably related to preparation for an LEA's implementation of a qualifying plan. The Assistant Secretary for Education has determined that these activities will make substantial progress in achieving the purposes of the Act.

The Commissioner will consider applications for funding when they are received. In evaluating the merits of an application the Commissioner will apply the criteria in 45 CFR 185.14(b).

An applicant which is not a local education agency should include in its application evidence that the LEA to which the application relates will cooperate in carrying out the proposed activities.

AVAILABLE FUNDS: The Commissioner anticipates that $2,000,000 will be made available for preimplementation grants, and encourages applicants to seek assistance in the amount of $100,000 or less.

PROJECT PERIODS: Awards made pursuant to this notice will be for projects starting no earlier than March 1, 1979, and ending no later than December 31, 1979.

APPLICATION FORMS AND FURTHER INFORMATION: Application forms and any further information may be obtained by contacting David Lerch, U.S. Office of Education, 400 Maryland Avenue, S.W., Room 2017, Washington, D.C. 20202, Telephone 202-245-2465.

APPLICABLE REGULATIONS: The regulations applicable to this program are:

(a) Regulations relating only to assistance under the Emergency School Aid Act (45 CFR Part 185) and, in particular, 45 CFR 185.94-185.94-4; and

(b) The Office of Education general provisions regulations (45 CFR Parts 100, 100a, and Appendixes), except to the extent that these regulations are inconsistent with 45 CFR Part 185.

(20 U.S.C. 1601-1619).

DEPARTMENT OF THE INTERIOR

Geological Survey

KNOWN SODIUM LEASING AREA

Revision

Pursuant to authority contained in the Act of March 3, 1879 (43 U.S.C. 31), as supplemented by Reorganization Plan No. 3 of 1950 (43 U.S.C. 1451, note), 220 Departmental Manual 2, Secretary's Order 2948, Federal lands within the State of Wyoming have been classified as subject to the competitive sodium leasing provisions of the Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 261). The name of the area, effective date, and total acreage involved are as follows:

(50) WYOMING

Revised Green River Basin (Wyoming) Known Sodium Leasing Area (KSLA); April 24, 1978; 114,632 acres were added. Total area now classified for leasing is 694,207 acres.

A diagram showing the revised boundaries and acreage has been filed with the appropriate land office of the Bureau of Land Management. Copies of the diagram and the land description may be obtained from the Conservation Manager, Central Region, U.S. Geological Survey, MS 609, Box 25046, Federal Center, Denver, Colorado 80225.

Dated: November 28, 1978.

Bureau of Land Management

COLORADO 24402 o

R/W Application for Pipeline, Northwest Pipeline Corp.

DECEMBER 1, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Northwest Pipeline Corporation, 315 East 200 South, Salt Lake City, Utah 84111, has applied for a right-of-way for a 4¼" o.d. natural gas pipeline for the East Douglas Creek Gathering System approximately 0.181 miles long, across the following Public Lands:

SIXTH PRINCIPAL MERIDIAN, RIO BLANCO COUNTY, COLO.

T. 2 S., R. 101 W.
Section 35: N½SE¼

The above-named gathering system will enable the applicant to collect natural gas in areas through which the pipeline will pass and to convey it to the applicants' customers.

The purposes for this notice are: (1) to inform the public that the Bureau of Land Management is proceeding with the preparation of environmental and other analytic reports, necessary for determining whether or not the application should be approved and if approved, under what terms and conditions. (2) To give all interested parties the opportunity to comment on the application. (3) To allow any party asserting a claim to the lands involved or having bona fide objections to the proposed natural gas gathering systems to file its claim or objections in the Colorado State Office. Any party so filing must include evidence that a copy thereof has been served on *Northwest Pipeline Corporation.*

Any comment, claim or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202, as promptly as possible after publication of this notice.

ANDREW W. HEARD, Jr.,

COLORADO 26176 f

R/W Application for Pipeline

Northwest Pipeline Corp.

DECEMBER 1, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Northwest Pipeline Corporation, 315 East 200 South, Salt Lake City, Utah 84111, has applied for a right-of-way for a 4¼" o.d. natural gas pipeline for the Rocky Mountain Natural Gas Gathering System approximately 0.745 miles long, across the following Public Lands:

SIXTH PRINCIPAL MERIDIAN, MOFFAT COUNTY, COLO.

T. 9 N., R. 93 W.
Section 8: E½NE¼
Section 9: SW¼NW¼, N½SW¼

The above-named gathering system will enable the applicant to collect natural gas in areas through which the pipeline will pass and to convey it to the applicant's customers.

The purposes for this notice are: (1) to inform the public that the Bureau of Land Management is proceeding with the preparation of environmental and other analytic reports, necessary for determining whether or not the application should be approved and if approved, under what terms and conditions. (2) to give all interested parties the opportunity to comment on the application. (3) to allow any party asserting a claim to the lands invloved or having bona fide objections to the proposed natural gas gathering system to file its claim or objections in the Colorado State Office. Any party so filing must include evidence that a copy thereof has been served on *Northwest Pipeline Corporation.*

Any comment, claim or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202, as promptly as possible after publication of this notice.

NEW MEXICO

Applications

NOVEMBER 29, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for ten 4½-inch natural gas pipeline rights-of-way across the following lands:

T. 17 S., R. 27 E.,
Sec. 28, SW¼NW¼.
T. 18 S., R. 29 E.,
Sec. 18, NE¼SW¼.
T. 24 S., R. 31 E.,
Sec. 3, SW¼SW¼;
Sec. 4, SE¼SE¼;
Sec. 9, NE¼NE¼.
T. 19 S., R. 33 E.,
Sec. 1, E½SE¼;
Sec. 12, E½E½;
Sec. 13, NE¼NE¼.
T. 20 S., R. 33 E.,
Sec. 11, E½NE¼;
Sec. 12, SW¼NW¼ and W½SW¼;
Sec. 13, W½NW¼ and SW¼;
Sec. 24, E½NW¼.
T. 30 S., R. 36 E.,
Sec. 30, SE¼NE¼ and N½SE¼.

These pipelines will convey natural gas across 5.096 miles of public lands in Eddy and Lea Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

Order Providing for Opening of Public Land

NOVEMBER 30, 1978.

1. By Power Site Cancellation No. 296 of June 13, 1974, the U.S. Geological Survey canceled Power Site Classification 382 of July 15, 1947, as to the following described land:

WILLAMETTE MERIDIAN, OREGON

T. 40 S., R. 22 E.,
Sec. 28, NE¼NE¼.

The area described contains 40 acres in Lake County.

2. At 10:00 a.m. on January 10, 1979, the land described above shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on January 10, 1979, shall be considered to be simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The land shall be made immediately available for consummation of a pending Bureau of Land Management exchange, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law.

3. The land described above has been and remains open to applications and offers under the mineral leasing laws and to location under the United States mining laws, subject to the provisions of the Act of August 11, 1955, 69 Stat. 682, 30 U.S.C. 621 (1970).

4. The State of Oregon has not exercised the preference right of application for highway rights-of-way or material sites afforded it by Section 24 of the Federal Power Act.

Inquiries concerning this land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

HAROLD A. BERENDS,
Chief, Branch of Lands
and Minerals Operations.

[OR 19056]

OREGON

Opening of Land Subject to Section 24 of the Federal Power Act

NOVEMBER 30, 1978.

Pursuant to Section 24 of the Act of June 10, 1920, 41 Stat. 1075, as amended, 16 U.S.C. 818 (1970), the determination of the Federal Power Commission in DA-559-Oregon of September 28, 1976, and section 2.5(c) of Bureau Order 701 of July 23, 1964, as amended, it is ordered as follows:

1. In DA-559-Oregon, the Federal Power Commission determined that the power value of the following described land, withdrawn in Power Site Reserve No. 265, will not be injured or destroyed by restoration to location, entry, or selection under appropriate land laws, subject to the provisions of Section 24 of the Federal Power Act:

WILLAMETTE MERIDIAN, OREGON

T. 40 S., R. 22 E.,
Sec. 4, Lot 4;
Sec. 5, Lots 1, 2, and 3, and NW¼SW¼;
Sec. 8, NE¼NW¼.

The area described contains 259.74 acres in Lake County.

2. At 10:00 a.m. on January 10 1979, the public land described below shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law, and the provisions of Section 24 of the Federal Power Act, supra. All valid applications received at or prior to 10:00 a.m. on January 10, 1979, shall be considered to be simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The land shall be made immediately available for consummation of a pending Bureau of Land Management exchange, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, and subject to the provisions of Section 24 of the Federal Power Act.

WILLAMETTE MERIDIAN, OREGON

T. 40 S., R. 22 E.,
Sec. 4, Lot 4;
Sec. 5, Lots 1 and 2.

Containing 135.74 acres.

V 43/236 DEC 78 UMI

3. At 10:00 a.m. on January 10, 1979, the national forest land described below shall be open to such forms of disposition as may by law be made of national forest lands, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable law and the provisions of Section 24 of the Federal Power Act, supra.

WILLAMETTE MERIDIAN, OREGON

FREMONT NATIONAL FOREST

T. 40 S., R. 22 E.,
Sec. 5, Lot 3 and NW¼SW¼;
Sec. 8, NE¼NW¼.

Containing 124 acres.

4. The land described in paragraphs 2 and 3 above has been and remains open to applications and offers under the mineral leasing laws and to location under the United States mining laws, subject to the provisions of the Act of August 11, 1955, 69 Stat. 682, 30 U.S.C. 621 (1970).

5. The State of Oregon has not exercised the preference right of application for highway rights-of-way or material sites afforded it by Section 24 of the Federal Power Act.

Inquiries concerning this land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

HAROLD A. BERENDS,
Chief, Branch of Lands and Minerals Operations.

National Park Service

SNOWMOBILES

Revision of Management Policy and Public Meetings

AGENCY: National Park Service, Interior.

ACTION: Proposed revision to management policy on snowmobiles and notice of meetings to receive public comment.

FOR FURTHER INFORMATION CONTACT:

Chief, Office of Management Policy, National Park Service, 18th and C Streets NW., Washington, D.C. 20240.

INTRODUCTION: The National Park Service is proposing revisions to its management policy on snowmobiles by clarifying the criteria to be met and the procedures to be followed where this activity may be permitted in National Park System areas.

The National Park Service is interested in obtaining public participation in the formulation of official policy and public understanding of the policy that is adopted. The Bureau has scheduled a series of public meetings to receive comments about the proposed policy as set forth below.

Written and verbal comments will be considered in the further revision and clarification of the National Park Service snowmobile policy. Closing date for submitting comments will be thirty (30) days after the date of the last meeting.

After compilation and review of all comments received, the National Park Service may further revise its snowmobile policy. The intent is to have a revised policy on or about May 1, 1979, to be implemented in all respects at the beginning of the next winter season.

Purpose: The purposes of this notice are to (1) inform the public of the snowmobile policy under discussion; (2) provide for public comment on the proposed policy; and (3) announce the schedule of public meeting dates, times and locations.

Statement of policy: The following proposed policy statement will be the basis for comment and discussion:

Snowmobiles: In the coterminous United States, snowmobiles may be permitted in units of the National Park System as a mode of transportation to provide the opportunity for visitors to see, sense, and enjoy the special qualities or features of the park in winter. Snowmobiling shall be consistent with the park's purpose and objectives, applicable laws, executive orders, regulations, and Departmental policy. It shall not be permitted where it will adversely affect the park's natural, cultural, scenic, or aesthetic values, disturb the wildlife or damage other park resources, cause safety hazards, or conflict with other visitor uses.

Where permitted, snowmobiles shall be confined to properly designated routes and water surfaces which are used by motorized vehicles or motorboats during other seasons. Exceptions must be approved by the Director.

Routes and water surfaces to be designated for snowmobile use shall be promulgated as special regulations in the CFR (Title 36, Section 7). Implementation of this policy shall be covered in the General Management Plan for each park area where snowmobiles are used.

Remarks: The National Park Service is proposing revision of the snowmobile policy in order to:

1. clarify it by restating the intent of Executive Order 11644, "Use of Off-Road Vehicles on the Public Lands," as amended by Executive Order 11989; and

2. use the term, route, to refer only to land surfaces, and add the term, water surfaces, to apply to snowmobile use on designated lakes and rivers.

Routes and water surfaces within those parks that permit snowmobiling will be listed and described as special regulations in the Code of Federal Regulations. These special regulations must be approved by the Director of the National Park Service, as must any exception to this policy.

There are three exceptions to the current snowmobile policy which would continue under the proposed policy: Acadia National Park and Delaware Water Gap National Recreation Area where designated routes are established on maintained roadways not open to motorized vehicles, and Grand Teton National Park where snowmobile use is permitted in the Potholes Area.

Public meetings schedule: Public meetings will be held on the following schedule:

Acadia National Park, ME; Visitor Center Auditorium, Bar Harbor, ME; January 15, 1979; at 7:30 p.m.

Billings, MT; Holiday Inn of Billings-West, I-90 and Mullowney Lane, Billings, MT; January 25, 1979; at 7:00 p.m.

Denver, CO; Holiday Inn of Denver-West, 14707 W. Colfax, Golden, CO; January 23, 1979, at 7:00 p.m.

Medford, OR; Holiday Inn, 2300 Crater Lake Hwy., Medford, OR; January 9, 1979; at 1:00 and 7:00 p.m.

St. Paul, MN; Earle Brown, Continuing Education Center, Room 135, 1890 Buford St., St. Paul Campus, University of Minnesota, St. Paul, MN; January 29, 1979; at 7:30 p.m.

San Francisco, CA; Fort Mason Visitor Center, Golden Gate National Recreation Area, Headquarters Building No. 201; January 9, 1979; from 2:00-4:00 and 7:30-end.

Seattle, WA; Seattle Center, Conference Room B, Seattle, WA; January 10, 1979; from 7:00-10:00 p.m.

Washington, D.C.; NPS Conference Room, Eighth Floor, Interior Building 18th and C Streets NW., Washington, D.C.; January 30, 1979; from 1:00-5:00 p.m.

Written comments: Written comments, offered independent of, or in addition to, any verbal comment given at the public meetings, will be accepted until thirty (30) days after the last public meeting. Comments should be addressed to: Director, National Park Service, Attention: Chief, Office of Management Policy, 18th & C Streets NW., Washington, D.C. 20240.

Dated: December 4, 1978.

WILLIAM J. WHALEN,
Director, National Park Service.

Bureau of Indian Affairs

INDIAN TRIBES PERFORMING LAW ENFORCEMENT FUNCTIONS

Determination—Amendment

NOVEMBER 21, 1978.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 230 DM 1 and 2.

Section 601(d), Title I of the Omnibus Crime Control and Safe Streets Act of 1968, places responsibility on the Secretary of the Interior to determine those Indian tribes which perform law and order functions. The listing published beginning on page 13758 of the May 25, 1973 issue of the FEDERAL REGISTER (38 FR 13758) identified all eligible Indian tribes and the specific law enforcement functions they have responsibility to exercise. Determination and certification of those tribes not listed will be made on an individual basis upon application by such tribes. The Secretary's authority to make such determinations was delegated to the Assistant Secretary—Indian Affairs by 230 DM 1 and 2.

It has been determined by the Assistant Secretary—Indian Affairs that the Tule River Indian Tribe, California, has responsibility to perform the functions listed below.

Therefore, the listing published beginning on page 13758 of the May 25, 1973 FEDERAL REGISTER (38 FR 13758), and last amended at page 43932 of the September 24, 1975 FEDERAL REGISTER (40 FR 43932), is further amended by adding the entry for the Tule River Indian Tribe of California to read as follows:

Tribal entities recognized by the Federal Government and listed by State	Employ tribal police	Establish a tribal court	Adopt a tribal law and order code	Undertake correction function	Undertake program for prevention of adult crime and juvenile delinquency	Undertake juvenile and adult rehabilitation program
California:						
Tule River Tribe.....	X	X	X	X	X	X

RICK C. LAVIS,
Acting Assistant Secretary, Indian Affairs.

[S 229]

CALIFORNIA

Partial Termination of Proposed Withdrawal and Reservation of Land

NOVEMBER 28, 1978.

Notice of a Bureau of Reclamation, U.S. Department of the Interior, application S 229, for withdrawal and reservation of land for the planned facilities of the Auburn-Folsom South Unit of the Central Valley Project, California, was published as FR Doc. 65-11539 on pages 13747 and 13748 of the issue of October 28, 1965 and republished as FR Doc. 77-5913 on page 11283 of the issue of February 28, 1977. The applicant agency has cancelled its application as to the following described lands:

MOUNT DIABLO MERIDIAN

T. 15 N., R. 11 E.,
Sec. 17, W½;
Sec. 20, W½.

The area described aggregates 320 acres.

Therefore, pursuant to the regulations contained in 43 CFR Part 2350, such lands at 10 a.m. on January, 8, 1979, will be relieved of the segregative effect of the above-mentioned application.

JOAN B. RUSSELL,
Chief, Lands Section, Branch of Lands and Minerals Operations.

CEDAR CITY DISTRICT GRAZING ADVISORY

Board Meeting

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Cedar City District Grazing Advisory Board will be held on January 11, 1979.

The meeting will begin at 9:30 a.m. in the conference room of the Bureau of Land Management, Dixie Resource Area Office at 24 E. St. George Blvd., St. George, Utah. Attendees will then tour grazing allotments around the St. George area.

The agenda for the meeting will include: (1) Tour of grazing allotments to review and make recommendations on implementation of allotment management plans included in the Hot Desert Grazing Environmental Statement; (2) expenditure of range betterment funds; (3) arrangements for the next meeting.

The meeting is open to the public. Interested persons may make oral statements to the board at 9:30 a.m. or file written statements for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 1579 North Main Street, Cedar City, Utah 84720 by January 9, 1979. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager. Persons desiring to make the tour with the advisory board should be prepared to furnish their own transportation, food, and drink.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproductions (during regular business hours) within 30 days following the meeting.

MORGAN S. JENSEN,
District Manager.

NEVADA

Order Providing for Opening of Public Land

NOVEMBER 28, 1978.

In an exchange of land made under the provisions of Section 8 of the Act of June 28, 1934, as amended, the following described land has been reconveyed to the United States:

MOUNT DIABLO MERIDIAN

T. 37 N., R. 53 E.,
Sec. 11, Lot 3, SW¼SW¼;
Sec. 13, W½SW¼, SE¼SE¼.

The area described comprises approximately 199 acres.

The land consists of three separate parcels located approximately 27 miles northwest of Elko, Nevada. It is rough and mountainous terrain and supports a moderate density of diverse vegetation, consisting of various species of sagebrush, rabbitbrush, aspen, willow and numerous types of native grasses. Elevation ranges from 6,720 feet to over 8,080 feet with the drainage pattern running from north to south. The principal land use is livestock grazing and wildlife habitat.

which have nonfederal interests there-

NEVADA

Order Providing for Opening of Public Land

NOVEMBER 28, 1978.

In connection with the issuance of a new and correct patent under the provisions of Title 43, Code of Federal Regulations, the following described land has been reconveyed to the United States:

MOUNT DIABLO MERIDIAN

T. 21 N., R. 35 E.,
Sec. 18, E½SE¼SE¼NE¼.

The area described comprises 5 acres in Churchill County.

The land, located in northwestern Churchill County, was patented in 1962. It remained in an undeveloped condition until reconveyed in 1975. Mineral rights were reserved to the United States in the original patent.

Subject to valid existing rights, the land is hereby opened to the operation of the public land laws including the mining laws. The land has never been closed to the mineral leasing laws.

WM. J. MALENCIK,
Acting Chief, Division of Technical Services.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-47]

CERTAIN FLEXIBLE FOAM SANDALS

Notice of Commission Order for Written Comments and Information Concerning Presiding Officer's Recommendation, Relief, Bonding, and the Public Interest

Recommendation of "violation" issued.—In connection with the Commission's investigation, under section 337 of the Tariff Act of 1930, of alleged unfair methods of competition and unfair acts in the importation and sale of certain flexible foam sandals in the United States, the presiding officer recommended on October 23, 1978, that the Commission determine that there is a violation of section 337. The presiding officer certified the record to the Commission for its consideration. Copies of the presiding officer's recommendation may be obtained by interested persons by contacting the office of the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436, telephone (202) 523-0161.

Commission considerations.—Should the Commission adopt the recommendation of the presiding officer, it must make determinations concerning the appropriate relief and bonding, if any, and it must consider the public interest. These issues are described below.

Relief.—In the event that the Commission were to find a violation of section 337, it would issue (1) an order which could result in the exclusion from entry of certain flexible foam sandals into the United States or (2) an order which could result in requiring respondents to cease and desist from alleged unfair methods of competition or unfair acts in the importation and sale of these sandals. Accordingly, the Commission is interested in what relief should be ordered, if any.

Bonding.—In the event that the Commission were to find a violation of section 337 and order some form of relief, that relief would not become final for a 60-day period during which the President would consider the Commission's determination. During this period, the certain flexible foam sandals would be entitled to enter the United States under a bond determined by the Commission and prescribed by the Secretary of the Treasury. Accordingly, the Commission is interested in what bond should be determined, if any.

The public interest.—In the event that the Commission were to find a violation of section 337 and order some form of relief, the Commission must consider the effect of that relief upon the public interest. Accordingly, the Commission is interested in the effect of any exclusion order or cease and desist order upon (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) the production of like or directly competitive articles in the United States, and (4) U.S. consumers.

Written comments and information concerning relief, bonding, and the public interest invited.—Parties to the Commission's investigation, interested agencies, public interest groups, and any other interested members of the public are encouraged to file written comments and information concerning relief, bonding, and the public interest. These written submissions will be very useful to the Commission in the event it determines that there is a violation of section 337 and that relief should be granted.

Written comments and information concerning relief, bonding, and the public interest shall be submitted in this order. First, complainant shall file and serve on all parties of record a detailed proposed Commission action, including a proposed determination of bonding, a proposed remedy, and a discussion of the effect of its proposals on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers, with the Secretary to the Commission by no later than the close of business on Friday, December 15, 1978. Second, the Commission's investigative staff shall file and serve on all parties of record a formal report reflecting its investigation of the public interest factors to be considered by the Commission with the staff's recommendations and conclusions no later than the close of business on Friday, December 22, 1978. Third, any other party, interested agency or department, public interest group, or other member of the public wishing to file written comments and information concerning the action which complainant has proposed, any available altenatives, and the advisability of any Commission action in light of the public interest considerations listed above by no later than the close of business on Friday, December 22, 1978.

Requests for oral argument and oral presentation.—At present, no oral argument is planned with respect to the recommended determination of the presiding officer concerning whether there is a violation of section 337 of the Tariff Act of 1930 in this matter. Similarly, no oral presentation is planned with respect to the relief, bonding, and the public-interest factors set forth in section 337(d) and (f) of the Tariff Act of 1930, as amended (19 U.S.C. 1337), which the Commission is to consider in the event it determines that relief should be granted. However, the Commission will consider requests for an oral argument or an oral presentation if they are received by the Secretary to the Commission not later than January 8, 1979.

Notice of the Commission's institution of the investigation was published in the FEDERAL REGISTER of February 17, 1978 (43 FR 7060).

Issued: December 4, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

U.S. CIRCUIT JUDGE NOMINATING COMMISSION, WESTERN FIFTH CIRCUIT PANEL

Meeting

The Western Fifth Circuit Panel of the United States Circuit Judge Nominating Commission will meet in Houston, Texas at the United States Court of Appeals, the Eleventh Floor of the Federal Building, 515 Rush Street, Houston, Texas, on December 20, 1978, at 10:00 a.m.

The morning session will be an orientation meeting to discuss the needs of the Fifth Circuit; it will be open to the public. The afternoon session will discuss applicants for the vacancies available and will be closed to the public in accord with Pub. L. 92-463, Section 10(D) as amended.

JOSEPH A. SANCHES,
Advisory Committee, Management Officer.

DECEMBER 1, 1978.

Attorney General

CLEAN AIR ACT ENFORCEMENT ACTION

Notice of Consent Judgment

In accordance with Departmental policy, 28 CFR § 50.7, 38 FR 19029, notice is hereby given that a proposed consent judgment in *United States* v. *The Connecticut Department of Transportation, et al.* has been lodged with the United States District Court for the District of Connecticut. The decree requires the defendants to ultimately comply with the applicable provisions of the federally-approved Connecticut state implementation plan by shutting down their Cos Cob generating facility by December 1980. During the interim period of time, defendants will be required to replace two of the three non-complying coal-fired boilers at that plant with complying oil-fired boilers and will only be allowed to operate the remaining coal-fired boiler in certain limited instances.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed consent judgment. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530 and should refer to *United States* v. *The Connecticut Department of Transportation, et al.*, D.J. Ref. 90-5-2-3-747.

The consent decree may be examined at the office of the United States Attorney, District of Connecticut, 270 Orange Street, New Haven, Connecticut 06508, at the Region I office of the Environmental Protection Agency, John F. Kennedy Federal Building, Boston, Massachusetts 02203, and the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2625, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed judgment may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice.

JAMES W. MOORMAN,
Assistant Attorney General, Land and Natural Resources Division.

[AAG/A Order No. 20-78]

PRIVACY ACT OF 1974

Deletion of Systems of Records

Notices previously published in the FEDERAL REGISTER pursuant to the Privacy Act relating to the systems of records maintained by the Office of Management and Finance, Internal Audit Staff, are hereby rescinded. All records of JUSTICE/OMF-004, employee Clearance Record, 42 FR 53421 (September 30, 1977), and JUSTICE/OMF-006, Interim Performance Appraisal Record, 42 FR 53422 (September 30, 1977) are to be destroyed or distributed to the employee because they are duplicates of records maintained by the Office of Management and Finance, Personnel and Training Staff. All records of JUSTICE/OMF-005, Employee Time Distribution Record, 42 FR 53421 (September 30, 1977) are to be destroyed because the information can be derived from alternate sources.

Dated: November 30, 1978.

KEVIN D. ROONEY,
Assistant Attorney General for Administration.

NATIONAL COMMISSION NEIGHBORHOODS

MEETING

ACTION: Notice of meeting of the National Commission on Neighborhoods.

SUMMARY: This notice, required under the Federal Advisory Committee Act (5 U.S.C. Appendix I) announces a public meeting.

TIME AND DATE: Thursday, December 21, 1978; 9:00 am., to 9:30 p.m. Friday, December 22; 9:00 a.m. to 3:30 p.m.

PLACE: Alban Towers Apartment Hotel; 3700 Massachusetts Avenue, Washington, D.C. 20019.

AGENDA:

December 21: 9:00 a.m. Call to order.
9 to noon Consideration of drafts of the final report of the Commission.
Noon Adjourn.
1:00 p.m. Call to order.
1 to 5 Consideration of drafts of the final report by the Commission.
5:00 p.m. Adjourn.
7 to 9:30 Consideration of drafts of the final report by the Commission.
9:30 p.m. Adjourn.
December 22: 9:00 a.m. Call to order.
9 to noon Consideration of draft of the final report by the Commission.
Noon Adjourn.
1:00 p.m. Call to order.
1 to 3:30 Consideration of draft of the final report of the commission.
3:30 p.m. Adjourn.

STATUS: Open to the public.

CONTACT PERSON: John Eade, Administrator, Telephone Number: 202-632-5200.

JOHN EADE,
Administrative Officer.

NATIONAL COMMISSION FOR THE REVIEW OF ANTITRUST LAWS AND PROCEDURES

COMMISSION'S FINAL REPORT TO PRESIDENT AND ATTORNEY GENERAL

Public Meeting

In accordance with Executive Order 12,022 and section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 86 Stat. 770), notice is hereby given that the National Commission for the Review of Antitrust Laws and Procedures (hereinafter "Commission"), will hold a public meeting on Monday, December 18 beginning at 9:30 a.m. in Room 2228, Dirksen Senate Office Building, First and Constitution Avenue, NE., Washington, D.C.

The purpose of the meeting is to consider matters relating to the Commission's final report to the President and the Attorney General.

Dated: December 4, 1978.

WENDELL B. ALCORN, Jr.,
Special Counsel.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

AMENDED NOTICE; DANCE ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), as amended, notice is hereby given that a meeting of the Dance Advisory Panel to the National Council on the Arts, which appeared in the FEDERAL REGISTER, Vol 43, No. 223, p. 53868, Friday, November 17, 1978, is amended as follows: The meeting will be held December 9, 1978, from 9:00 a.m. to 6:00 p.m., December 10, 1978, from 9:00 a.m. to 6:00 p.m., and December 11, 1978, from 9:00 a.m. to 6:00 p.m., in Room 1422, the Columbia Plaza Building, 2401 E St., N.W., Washington, D.C. A portion of this meeting will be open to the public on December 10, 1978, from 1:30 p.m. to 6:00 p.m., and December 11, 1978, from 9:00 a.m. to 1:00 p.m. The topic of discussion will be Policy and Guidelines.

The remaining sessions of this meeting on December 9, 1978, from 9:00 a.m. to 6:00 p.m., December 10, 1978, from 9:00 a.m. to 1:30 p.m., and December 11, 1978, from 1:00 p.m. to 6:00 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER March 17, 1977, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National En-

dowment for the Arts, Washington, D.C. 20506, telephone 202/634-6070, TDD 202/724-0232, at least seven days prior to the meeting date.

Dated: December 4, 1978.

[4910-58-M]

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 78-49]

RESPONSES TO SAFETY RECOMMENDATIONS

Receipt

The National Transportation Safety Board has recently received letters, summarized below, in response to safety recommendations issued following investigation of certain aviation and surface transportation accidents which occurred within the past several years.

Aviation

A-74-26.—The Secretary of Transportation on November 24 responded to the Safety Board's inquiry of October 30, 1978, regarding the status of this recommendation, issued following investigation of the November 3, 1973, crash of a Pan American World Airways Boeing 707 at Logan International Airport, Boston, Mass. The recommendation called for rulemaking action to require air carriers to notify the shipper and the FAA when a shipment deviates from Federal or air carrier regulations.

The Secretary's November 24 letter informs the Safety Board that Materials Transportation Bureau now has the responsibility for rulemaking in this area, and, in conjunction with the Federal Aviation Administration, has completed a review of current Federal Air Regulations and Hazardous Materials Transportation Regulations that pertain to the transportation of hazardous materials by aircraft. As a result of this action, a notice of proposed rulemaking will be published within the next 60 days. A portion of this rulemaking action will relate to recommendation A-74-26.

A-76-109, A-76-114, and A-76-115.—Response of November 24 from the Federal Aviation Administration to the Safety Board's September 12 letter concerns recommendations released in conjunction with the Board's 1976 special study, "General Aviation Accidents Involving Aerobatics, 1972-1974." The Safety Board's letter referenced FAA's June 14, 1978, response which reaffirmed FAA's previous conclusions that the inflight failures listed in the report have no more than a tenuous relation to the recommendations. (See 43 FR 29196, July 6, 1978.)

In asking for FAA's further reconsideration, the Safety Board on September 12 referred to the discussion of these recommendations during the NTSB/FAA quarterly recommendations meeting last July 18. The Board believes it was apparent, as a result of this meeting, that FAA had misconstrued the Board's rationale for making these recommendations and was not aware of certain substantiating information relating to them. The Board said that, although the special study contains adequate substantiation for the recommendations (see pages 19-28), it believes that FAA has (mistakenly) used the nature and number of airframe failure inflight accidents as the only basis for its response. The recommendations were not based on accidents alone, and FAA should broaden its viewpoint concerning them to include other aspects, especially those dealing with accident prevention measures.

The Board pointed to several accidents in the United States and Canada involving negative wing failures of Bellanca Citabria airplanes which relate to the subject recommendations. This information has been made available to FAA either by letter (from the Safety Board and individual citizens) or through related discussions with FAA safety staff members. The Boards also referred to independent studies on aircraft conducted by the National Aeronautics and Space Administration which relate to the Board's recommendations. These studies show the ease with which values of negative load factor as low as -3_g can be exceeded (the negative limit in Bellanca Citabria airplanes is only -2_g), and point out that pilot control forces are not a reliable indication of negative load factors nor would such control forces be a physical limit for load factors exceeding the minimum required negative load factor.

Further, the Board noted that in addition to improving the margins of safety in aerobatic operations, particularly as applied to the novice aerobatic pilot, the recommendations are also intended to update and standardize aerobatic airworthiness standards and certification criteria. For example, the maximum value of maneuvering load factors which applied under CAR 4a are not equivalent to those presently required for aerobatic certification under FAR 23. The newer standards obviously are more rigorous and provide for a stronger, safer aerobatic airplane. The Safety Board believes that this situation can and should be changed through amended regulatory controls or through "special conditions" imposed during the certification period.

Regarding the Bellanca Citabria aircraft, the Board notes that on January 17, 1977, certain technical data was forwarded to FAA requesting evaluation to determine compliance with the intent of all certification criteria and whether these airplanes are safe for continued normal and aerobatic operations. FAA's evaluation subsequently disclosed lack of compliance with some structural requirements; consequently, AD 77-22-05 was issued, effective November 7, 1977, requiring, among other things, restriction of the maximum operating speed of airplanes in service until a structural modification was made.

FAA in its November 24 response indicates that it has carefully reviewed the information and repeated previous reviews of the accidents listed in the special study. FAA does not believe that there is sufficient evidence to support regulatory action beyond that taken with the issuance of the airworthiness directive noted above. FAA assures that it will continuously monitor acrobatic activities and that any condition which has an adverse effect on safety will receive prompt attention.

A-77-35.—FAA's letter of November 20 advises of completion of action with respect to this recommendation, which asked FAA to conduct an engineering analysis to determine the adequacy of present livestock restraining systems. It was also recommended that this analysis should determine the load distribution and maximum amount of permissible load shift without causing an intolerable shift of the airplane's center of gravity.

FAA reports that it has completed an audit of engineering approvals of livestock restraint systems and considers them acceptable. FAA believes that this action and the issuance of Order 8110.29, "Cargo Compartment Requirements for Air Shipment of Livestock," confirms the Federal Aviation Regulations compliance of previous certifications and assures uniform policy for certification in the future.

A-78-67 through A-78-74.—Letter of November 28 from FAA provides the agency's initial response to eight recommendations issued on September 6 when the Safety Board expressed its concern about multiple tire failures on wide-bodied aircraft, such as that experience by the Continental Air Lines' DC-10 at Los Angeles International Airport last March 1. (See 43 FR 41101, September 14, 1978.)

FAA reports that it has assessed the entire process by which tires are approved, including use of the Tire & Rim Association Handbook. FAA notes that aircraft tires are approved on the basis of conformance to prescribed certification and performance requirements of the Federal Aviation Regulations and the associated Technical Standard Order (TSO). The selected tire ratings, substantiated by compliance with these requirements, result in compatibility of the tire with the airframe and its intended operation. Tests of the tire installed on the airplane are completed before the configuration is approved, FAA stated.

FAA proposes to issue in February 1979 revisions to FAR §§ 25.733 and 31.67, Aircraft tires—TSO-C62b, tire certification and performance standards; these proposals will include higher tire load margins and more severe testing provisions. FAA notes that current procedures consider compatibility during airplane certification. Tire load ratings take into account variations in design, maintenance and operational practices and are substantiated in accordance with regulatory requirements; improvements in this area are contained in the proposals. Also, the proposed revision to TSO-C62b will include a provision that manufacturers furnish maintenance and repair information to the FAA-TSO approving office upon request by that office. An advisory circular dealing with tire recapping will be developed.

Considered in current proposals is the variation in tire loads, as experienced on airplanes with dual or tandem landing gear trucks. Higher load margins and more severe testing provisions are being proposed to account for tire load variations, such as those resulting from different model tires or tires from different manufacturers, FAA reports.

Operator maintenance and operational practices, as contained in the FAA-approved operators' manuals, are considered satisfactory. FAA says that in most cases they closely parallel the manufacturer's recommendations and in some cases exceed them. Operators in most cases have developed programs which best suit their own requirements; i.e., frequent maximum versus less-than-maximum load conditions, environmental conditions, stage lengths, etc. FAA notes that Advisory Circular 20-97, "High-Speed Tire Maintenance and Operational Practices," and Maintenance Bulletin No. 32-3, "Aviation Tire Maintenance Practices," were issued in 1977. Last April a selected 30-day tire surveillance program was conducted, and FAA inspectors were directed to increase surveillance to check for conformity with the advisory circular and maintenance bulletin; result: 1,500 special inspections revealed 46 cases requiring corrective action. FAA expects to complete this month a research and development progran (R&D) to evaluate the capability of several nondestructive inspection methods for identifying flaws and failure areas in tires.

FAA states that it does not have data to support a limit for the number of retread cycles allowed. Surveys conducted over the years indicate that new and recapped tires have almost identical reliability experience. The reliability of any tire, new or recapped is dependent primarily on maintenance and operational practices. FAA notes that the installation of new treads is predicated on the condition of the tire carcasses and recapping procedures. The information contained in the proposed TSO revision and the findings from the R&D project will provide the basis for an advisory circular dealing with tire recapping.

Marine

M-78-70 through M-78-72.—Letter of November 8 from Halliburton Services of Duncan, Okla., is in response to recommendations issued on September 28 following investigation into the explosion last February 4 of the industrial vessel M/V HALLIBURTON 207 while the vessel was attempting to plug an offshore oil well in the Garden Island Bay section of the Mississippi River Delta. (See 43 FR 48742, October 19, 1978.)

The recommendations asked Halliburton Services to: Install a device at the outlet end of the cement discharge piping of its cementing vessels to prevent flow from the well back into the vessel, and provide a means to release entrapped pressure downstream of the device; establish instructions requiring the hydrostatic testing of both the cement discharge lines and the mixing discharge lines before servicing petroleum wells; and require supervisors of petroleum well servicing operations to formulate contingency plans with the person in charge of the well before commencing service operations, such

plans to include, but not be limited to, the manning of key valves.

Halliburton Service reports that it has carefully reviewed the Safety Board's accident report and recommendations and has conducted its own investigation of the accident. Procedures, including those recommended by the Board, have been adopted in an effort to prevent such accidents from occurring in the future.

Pipeline

P-76-66.—Letter of November 9 from the Research and Special Programs Administration (RSPA), U.S. Department of Transportation, addresses a recommendation issued August 11, 1976, following investigation of the rupture of a 1,000-gallon liquefied petroleum gas tank in a residential neighborhood of Lehigh Acres, Fla., March 23, 1976. Liquid and vapors escaped from the ruptures, formed a white, fog-like cloud near the ground, and ignited. The recommendation asked DOT to modify the exemption from 49 CFR Part 192 for pipelines with less than 10 customers to include systems that have pipeline facilities which expose a substantial part of a community or neighborhood to a potential hazard.

RSPA refers to a DOT letter dated December 23, 1976, indicating:

> Under 49 CFR 192.11, a petroleum gas system serving less than 10 customers is not subject to the Federal safety standards unless a portion of the system is located in a public place. This exemption is based on a concern that the transportation of gas involved must affect interstate commerce significantly enough to sustain a Congressional grant of regulatory authority. Although the Board's recommendation appears to be in keeping with this concern, we object to it because the test of jurisdiction over a system—whether the system exposes a substantial part of a community or neighborhood to a potential hazard—would be too vague. Under this test it would be extremely difficult if not impossible for either government or industry to identify the pipeline facilities subject to Federal regulation. As a consequence, the regulation would be unenforceable and probably ruled invalid.
>
> Our refusal to adopt this recommendation does not mean, however, that the systems would go unregulated. Most States regulate petroleum gas systems for safety. By and large, the safety standards adopted by the States are the standards in NFPA Standard No. 58, which as you know, is also incorporated by reference in Part 192. Systems not covered by State regulation are either subject to local controls or bound to follow NFPA Standard No. 58 as the generally recognized industry standard of performance.

RSPA is informed that the Safety Board is keeping this recommendation in an "open unacceptable action" status. RSPA states that no comments regarding its response to this recommendation have been received from the Board.

P-78-50 and P-78-51.—RSPA's letter of November 8 is in response to recommendations issued on August 8 following investigation of the gas main accident which occurred in Mansfield, Ohio, last May 17. (See 43 FR 38960, August 31, 1978.) The recommendations, addressed to DOT's Materials Transportation Bureau, called for revising 49 CFR Part 192 to require that gas company system maps and records be maintained accurately to identify the location, size, and operating pressure of all of their pipelines, and to require that gas system operators verify through pressure monitoring or other means the identity of all pipelines before performing hot taps.

RSPA reports that MTB has completed its review of the Safety Board's accident report and concludes that implementation of these recommendations would improve pipeline safety. The recommendations will be considered in developing DOT's regulatory schedule commencing in January 1979. However, RSPA informs, because of competing demands on resources, consideration of these recommendations does not necessarily mean they will be included in the 1979 regulatory schedule. MTB will evaluate the current priorities or the basis on the causes and frequency of accidents occurring because of the lack of appropriate regulations and the effect on human life, health, and property of such accidents.

Railroad

R-78-14 through R-78-16.—Letter of November 20 from Illinois Central Gulf (ICG) is in response to the Safety Board's July 31 inquiry as to the status of these recommendations, issued March 23, 1978, following investigation of the rear end collision of two ICG commuter trains in Chicago, Ill., last January 26. The recommendations were aimed at correcting design deficiencies of the brake system on the Highliner cars to ensure that prolonged operation with the "snow brake" activated will not prevent the brake shoe wear compensating feature of the hydropneumatic booster assembly from maintaining the hydraulic fluid volume needed to assure proper brake performance in all weather conditions. (See 43 FR 13443, March 30, 1978.)

IGC reports a joint investigation with New York Air Brake and Abex. No recommendation for change has been forthcoming from New York Air Brake. Based on a series of field tests, a decision has been made to use a cast-iron high phosphorous brakeshoe. IGC states that immediately subsequent to the accident, tests were conducted by ICG with New York Air Brake to determine guidelines for producing the most efficient braking effort with the present braking system under adverse weather conditions. When this was established, instructions were posted on bulletin boards (copies provided with IGC's letter) and classes were held at the Randolph Street Station in Chicago for engineers and trainmen, instructing them in the function of the brake system, proper use of the snow brake, and proper air brake tests to preclude a brake slack adjuster malfunction.

Further, IGC reports that instructions have been issued to engineers and control operators to inform the dispatcher's office at Randolph Street of the first sighting of snow in the area, thus enabling the dispatcher's office to implement the operation procedures. This consists of first notifying each engineer to place the snow brake in operation and informing all crews of air brake test procedures to ensure the proper adjustment for cylinder strokes due to brake shoe wear.

R-78-48.—The Federal Railroad Administration on November 27, 1978, informed the Safety Board that it is now drafting amendments to 49 CFR Part 231 and that careful consideration will be given to § 231.6 regarding the location of side handholds on flatcars. The recommendation was issued August 21 following Board investigation into the death last December 1 of a Louisville and Nashville Railroad switchman when he fell from the deck of a moving flatcar at the company's yard in Atlanta, Ga. (See 43 FR 38960, August 31, 1978.)

NOTE.—The above notice reports on recommendation response letters recently received by the Safety Board. Copies of these letters, as well as copies of related Board correspondence, are available without charge. All requests must be in writing, identified by recommendation number and date of publication of this notice in the FEDERAL REGISTER. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93-633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)).)

MARGARET L. FISHER,

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on November 30, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes:

The name of the agency sponsoring the proposed collection of information;

The title of each request received;

The agency form number(s), if applicable;

The frequency with which the information is proposed to be collected;

An indication of who will be the respondents to the proposed collection;

The estimated number of responses;

The estimated burden in reporting hours; and

The name of the reviewer or reviewing division or office.

Request for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

Agency for International Development

RESEARCH ADVISORY COMMITTEE

Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(a)(2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the A.I.D. Research Advisory Committee meeting on January 29-30, 1979, at the Pan American Health Organization Building, 23rd Street and Virginia Avenue, NW., Conference Room 'C' to review, appraise and make recommendation to the Administrator, agency for International Development, concerning projects proposed for A.I.D. central research funding in the field of food and nutrition, health and population. The meeting will begin at 9:00 a.m. and adjourn at 5:30 p.m. each day. The meeting is open to the public. Robert C. Simpson, Director, Office of Program, Bureau for Development Support, is designated as the A.I.D. representative at the meeting. It is suggested that those desiring more specific information, contact Mr. Simpson, 1601 N. Kent Street, Arlington, Va. 22209 or call area code (202) 235-8898.

Dated: November 29, 1978.

ROBERT C. SIMPSON,
A.I.D. Representative, Research Advisory Committee.

Materials Transportation Bureau

[Docket No. 77-3W, Notice 2]

ALGONQUIN GAS TRANSMISSION CO.

Grant of Waiver

By a petition dated December 27, 1976, the Algonquin Gas Transmission Company petitioned for a waiver of compliance with paragraph (a)(4) of Section 192.619 of the Federal gas pipeline safety standards (49 CFR Part 192) for its "G-6-4 inch" pipeline, which is located in the towns of Seekonk, Rehobeth, and Swansea, Massachusetts. Section 192.619 establishes the maximum allowable operating pressure (MAOP) for steel and plastic pipelines, and paragraph (a)(4) provides that furnace butt-welded steel pipe may not be operated at a pressure higher than 60 percent of the test pressure to which the pipe was subjected in the mill.

Algonquin's petition states that the "G-6-4 inch" pipeline was constructed in 1952. It comprises 14,415 feet of 4½ inch outside diameter, 0.237 inch wall Republic API Class I Open Hearth butt-welded pipe, which was subjected to a 1200 psi mill test. The present MAOP of the pipeline is 720 psig, based on the requirements of § 192.619(a)(4). Algonquin now wishes to operate the pipeline at 750 psig, a pressure equal to the MAOP of connecting pipelines.

To qualify the line to operate at this higher pressure, Algonquin hydrostatically retested the pipeline without failure in accordance with the requirements of Subpart J of Part 192 at a minimum field test pressure of 1250 psig and met the requirments of Subpart K of Part 192 applicable to increasing an established MAOP. Under these circumstances, § 192.619 would permit the desired operating pressure if it were not for the requirements of paragraph (a)(4).

In response to this petition, a notice of petition for waiver was published in the FEDERAL REGISTER on April 20, 1978 (43 FR 16842). This notice stated that the Materials Transportation Bureau (MTB) was considering granting the proposed waiver for the following reasons:

1. The field test is a better, more reliable indicator of the present condition of the pipeline than the preinstallation mill test because it was performed at a higher pressure and for a significantly longer time. Also, the postinstallation field test served as a check on possible defects which could not have been detected in the mill.

2. The requirements of Part 192 in Subpart J, Test requirements, and Subpart K, Uprating, provide for an acceptable level of safety in increasing the MAOP of furnace butt-welded pipe without the restriction of § 192.619(a)(4).

Interested persons were invited to comment on the proposed waiver. Only three persons submitted comments, and they all supported the proposed waiver.

In consideration of the foregoing, it appears that the increase in MAOP proposed by Algonquin will not lessen public safety, and compliance with § 192.619(a)(4) is not necessary in this case. Further, MTB finds that Algonquin has taken appropriate action to verify the continued integrity of this pipeline. Therefore, effective immediately, the Algonquin Gas Transmission Company is granted a waiver from compliance with 49 CFR 192.619(a)(4) for the 14,415 feet of its "G-6-4 inch" pipeline for which the waiver was requested.

(Sec. 3, Pub. L. 90-481, 82 Stat. 721, 40 U.S.C. 1672, 40 FR 43901, 49 CFR 1.53 Appendix A of Part 1 and Appendix A of Part 106)

Issued in Washington, D.C., on December 1, 1978.

CESAR DE LEON,
Associate Director for Pipeline Safety Regulation.

EXEMPTIONS

Grants and Denials of Applications

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of Grants and Denials of Applications for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted October 1978. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo-vessel, 4—Cargo-only aircraft 5—Passenger-carrying aircraft.

Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
		RENEWALS		
930-X	DOT-E 930	Callery Chemical Co., Callery, Pa., Liquid Carbonic Corp., Chicago, Ill.	49 CFR 172.101, 173.2, 173.34(d)(3), 173.328.	To ship a flammable poisonous gas in DOT Specification 3AA1800, 3AA2015, and 3AA2400 cylinders. (Modes 1, 2, 3.)
970-X	DOT-E 970	Callery Chemical Co., Callery, Pa	49 CFR 173.21(b), 173.300, 173.301.	To ship a flammable poisonous gas in DOT Specification 3AA2015 or 3AA2400 cylinders. (Modes 1, 2.)
2051-X	DOT-E 2051	International Plastics, Inc., Colwich, Kans.	49 CFR 173.34(d), 173.304(a)(1), (2), 175.3.	To ship certain nonflammable and nonpoisonous refrigerant gases in non-DOT aluminum containers. (Modes 1, 2, 3, 4, 5.)
3126-X	DOT-E 3126	E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.	49 CFR 173.62	To ship a class A explosive in DOT-5 metal drums; and non-DOT Specification containers. (Mode 1.)
3216-X	DOT-E 3216	E. I. du Pont de Nemours & Co., Inc., Wilmington, Del.; Pennwalt Corp., Philadelphia, Pa.	49 CFR 173.314(c)	To ship certain compressed gases in a proposed DOT Specification 110A3000W tank car tank. (Modes 1, 3.)
3768-X	DOT-E 3768	Chemetron Corp., La Porte, Tex	49 CFR 173.119, 173.245, 173.288.	To ship certain flammable and corrosive liquids in an insulated DOT Specification MC-304, MC-307 or MC-312 cargo tank. (Mode 1.)
3941-X	DOT-E 3941	Aerojet Solid Propulsion Co., Sacramento, Calif.; Kerr-McGee Chemical Co., Oklahoma City, Okla.	49 CFR 173.239a(a)(2)	To ship an oxidizer in non-DOT specification aluminum portable tank.
4052-X	DOT-E 4052	The Boeing Co., Seattle, Wash	49 CFR 173.34, 173.305, 175.3	To ship an aerosol formulation in DOT Specification 39 seamless aluminum cylinders. (Modes 1, 2, 4, 5.)
4282-X	DOT-E 4282	Hercules, Inc., Wilmington, Del	49 CFR 173.93(a), 173.182(c)	To ship a class B explosive and oxidizer in privately owned and specially designed cargo tanks. (Mode 1.)

DENIALS

5849-X—Request by Diamond Shamrock Corp., Cleveland, Ohio—To ship calcium hypochlorite mixtures in DOT Specification 21C fiber drums, denied October 25, 1978, as being unnecessary. (HM-121 obviates the need)

6908-P—Request by Rockwell International, Columbus, Ohio—To become a party to exemption 6908 for the shipment of compressed gases in non-DOT specification steel spherical pressure vessels, denied October 31, 1978.

7094-P—Request by American Cyanamid Co., Wayne, N.J.—To become a party to Exemption 7094 for the stowage of certain corrosive materials aboard a vessel, denied October 26, 1978, as being unnecessary.

7240-P—Request by Rexnord Inc., Brookfield, Wis.—To become a party to Exemption 7240 for shipment of certain corrosive liquids in a DOT Specification 12B fiberboard box, denied October 18, 1978, as being unnecessary.

7413-X—Request by Chilton Metal Products, Chilton, Wis.—To reconsider the denial of application to authorize reduction in the cylinder sidewall thickness, denied October 6, 1978.

7837-P—Request by Sea-Land Service, Inc., Elizabeth, N.J.—To become a party to Exemption 7837 for the shipment of cigarette lighters in non-ventilated freight containers by cargo vessel, denied October 18, 1978, as being unnecessary.

7863-N—Request by Paragon Molding Co., Melrose Park, Ill.—To authorize the use of non-DOT specification removable head polyethylene containers for shipment of corrosive liquids, denied October 20, 1978.

7982-N—Request by Applied Equipment Co., Van Nuys, Calif.—To ship nonflammable gases in non-DOT specification welded high-pressure cylinders made of PH 15-5 corrosion resistant steel, denied October 10, 1978.

8030-N—Request by Jet Research Center, Inc., Arlington, Tex.—To transport charged oil well jet perforating guns having a detonating fuze, Class C explosives installed, denied October 12, 1978.

8038-N—Request by Rea Magnet Wire Co., Inc., Fort Wayne, Ind.—For re-use of DOT Specification 17E drums for shipment of a flammable waste product, denied October 20, 1978.

8062-X—Request by Hamill Manufacturing Co., Washington, D.C.—To qualify shipment of an explosive power device, Class B or C, when shipped as an integral part of a passive restraint system, as a nonregulated material, denied October 6, 1978.

8075-N—Request by Hercules Inc., Wilmington, Del.—To authorize loading of certain oxidizers aboard vessels at other than remote facilities, denied October 18, 1978.

National Highway Traffic Safety Administration

[Docket No. IP78-11; Notice 1]

AMERICAN HONDA MOTOR CO., INC.

Receipt of Petition for Inconsequential Noncompliance

American Honda Motor Co., Inc., of Gardena, California, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act for a noncompliance with 49 CFR 571.105, Motor Vehicle Safety Standard No. 105, *Hydraulic Brake Systems*. The basis of the petition is that the noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Paragraph S5.3.2 of Standard No. 105 requires that all brake system indicator lamps shall be activated as a check of lamp function when the ignition switch is turned to the "on" position when the engine is not running. Honda has informed NHTSA that this will not occur in Honda passenger cars manufactured between January 1, 1976, and the end of the 1978 model year unless the hand brake is applied when the ignition switch is turned "on". The total number of vehicles involved is 600,000. NHTSA had initially discovered this failure in compliance tests of the 1978 Honda Accord (CIR File 1985). For several reasons Honda argues that the noncompliance is inconsequential as it relates to motor vehicle safety. It has never received any complaint relating to the warning system. Its operator manuals recommend starting the car with the hand brake applied and if this procedure is followed, the lights would be checked. Finally, in order to constitute a hazard, several events would have to occur in sequence—failure of the driver to apply the hand brake during parking and starting, followed by failure of the lamp, followed by failure of the brake system.

Interested persons are invited to submit written data, views and arguments on the petition of American Honda Motor Co., described above. Comments shold refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the FEDERAL REGISTER pursuant to the authority indicated below.

Comment closing date: January 8, 1979.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on November 29, 1978.

MICHAEL M. FINKELSTEIN,
Associate Administrator for Rulemaking.

Federal Aviation Administration

INTERCHANGE ARRANGEMENTS INCLUDING OPERATION OF CONCORDE AIRCRAFT BETWEEN DALLAS AND EUROPE

SUMMARY: The Federal Aviation Administration (FAA) in response to the recent change in the Federal Aviation Act of 1958 (Act) and requests from aircraft users is considering an interchange policy with respect to the eligibility and mechanisms for obtaining U.S. registration for aircraft being used under certain interchange arrangements. The first such program would involve utilization of the Concorde airplane by a United States flag air carrier in transportation of passengers between Dulles International Airport (Dulles) and the Dallas/Fort Worth International Airport (Dallas). Similar operational programs could be authorized using different aircraft types should any U.S. air carrier wish to do so provided equivalent safety and factual circumstances are met. Comments on this proposed program are solicited from the public. While the FAA contemplates certain rule making action of a technical nature to facilitate the mechanisms for registering the Concorde in question, as well as a more all encompassing amendment to Part 47 of the Federal Aviation Regulations (14 CFR Part 47) to reflect the "alien registration" amendments to Section 501 of the Act (49 U.S.C. 1401), it is believed that to facilitate public awareness this policy should be published and the public provided an opportunity to comment.

DATE: Comments must be received on or before December 27, 1978.

ADDRESSES: Send comments on the policy statement in duplicate to the Federal Aviation Administration, Office of the Chief Counsel, Attention: Public Docket (AGC-24), Docket No. 18566, 800 Independence Avenue, S.W., Washington, DC. 20591.

FOR FURTHER INFORMATION CONTACT:

Clark H. Onstad, Esq., Chief Counsel, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, 202-426-3773.

BACKGROUND

Braniff International Airways (Braniff) is a United States flag air carrier which has been issued economic authority and given route approval for operations between Dulles and Dallas by the Civil Aeronautics Board (Board). Braniff is eligible to operate any aircraft on this route, if it is registered as a civil aircraft of the United States and it meets various other regulatory requirements. Braniff has proposed that it operate a foreign-owned Concorde on this route under an arrangement with British Airways Board (British Airways) and Campagnie National Air France (Air France). The Board has issued route authority to Braniff, and Braniff has opted to use the Concorde on a daily interchange basis. For Braniff's decision to be implemented, certain actions must be taken by the FAA.

The FAA has heretofore never been confronted with the administrative problems involving registration associated with an operation where the registration of the aircraft must change on a flight by flight basis. There have been however lease arrangements involving a change of registration every few monts (e.g. an Eastern Air Lines/Air Canada cross-lease arrangement was approved by the FAA in December, 1972, by Agency Order 8000.27). With the recent passage of the amendment to section 501 of the Act, it has become possible to effectuate a flight by flight interchange arrangement between a U.S. air carrier and a foreign air carrier where the aircraft is owned by a foreign interest incorporated in the United States. Significantly there was and is no problem of registration confronting a proposed interchange where the aircraft is owned by a U.S. air carrier rather than the foreign air carrier.

The Braniff proposal presents the FAA with a situation where: (a) Braniff will have economic authority issued by the Board to operate under the interchange agreement (certain questions about the interchange are still pending before the Board), (b) there is no sefety question due to the extensive cooperation between U.S., French and British authorities on the certification and maintenance program of the aircraft, (c) the aircraft will be U.S. certificated and maintained in accordance with the requirements of the FARs, (d) the environmental considerations have been extensively considered and resolved (Amendment 91-153, "Noise and sonic Boom Requirements," as published in the Federal Register (43 FR 28406, June 29, 1978)) and, (e) but for the fact that the aircraft are owned by British Airways and Air France rather than Braniff and, the standard registration procedures cannot accommodate the time constraints the interchange agreement imposes on the transfer of the aircraft to Braniff's operations, these operations could go forward without the new registration mechanism. It should also be noted that through the International Civil Aviation Organization (ICAO), the U.S. has supported an amendment to the Chicago Convention to facilitate the lease, charter and interchange of aircraft, without a change of registry.

THE PROGRAM

Braniff's proposal is that British Airways and Air France operate a Concorde (under foreign registry) to Dulles Airport. After arrival at Dulles, the Concorde will be operated at subsonic speed by Braniff over its Dulles/Dallas route. Braniff will return the Concorde at subsonic speed from Dallas to Dulles at which time it will be operated across the Atlantic by the foreign air carrier.

This proposal permits the direct Concorde ticketing of passengers from Europe, through Dulles to Texas, although the sequenced flight will be separately operated by air carriers of two different nations.

In connection with this arrangement, the FAA has been contacted by representatives of Braniff, the two foreign air carriers, and the Civil Aviation Authorities of the United Kingdom and of the Republic of France. As a result of these discussions, procedures were proposed to conform this arrangement with the Act and the FARs to allow implementation of the Board's order.

OWNERSHIP

Section 501(c) of the Act (49 U.S.C. 1401) states that a Certificate of Aircraft Registration shall only be issued to the "owner" of the aircraft, and section 501(b) of the Act [as amended by Public Laws 95-163 and 95-241] provides in pertinent part that:

(b) An aircraft shall be eligible for registration if, but only if—
(1)(A) it is—

* * * * *

(ii) owned by a corporation (other than a corporation which is a citizen of the United States) lawfully organized and doing busi-

DEC 7 1978 UMI

V 4 3 / 2 3 6 DE 7 7 8 UMI

ness under the laws of the United States or any State thereof so long as such aircraft is based and primarily used in the United States; and

(B) it is not registered under the laws of any foreign country; * * *

In order to meet this requirement, it has been proposed that the "owner"—as to the British Airway's Concorde—will be a subsidiary of that air carrier, incorporated in the United States (corporation). United States registration is thus permissible under section 501(b) of the Act since the corporation—although it be foreign controlled—will be organized and doing business under the laws of a State, and the Concorde, while registered in the United States, will be based and used exclusively within the United States. A comparable pattern will be adopted for the French Concorde. This application of "based and primarily used in" will be set forth in a Special Federal Aviation Regulation which will be issued shortly.

The qualifying ownership interests in the Concorde by the corporation will be created by a document in the nature of a lease or bailment, from the foreign air carrier to the corporation. This document will contain terms consistent with section 101(16) of the Act (49 U.S.C. 1301) whereby the corporation becomes, or has the option of becoming, the complete owner of the Concorde (in accordance with section 501(c) of the Act) at the termination of the agreement.

REGISTRATION

Foreign civil aircraft are not permitted to take on commercial passengers at any point within the United States for transport to another point in the United States (Section 1108(b) of the Act (49 U.S.C. 1507)). Scheduled interstate air transportation is authorized only to a flag or domestic air carrier of the United States holding both a Certificate of Public Convenience and Necessity (issued by the Board) and an Operating Certificate (issued by the FAA). To effectuate the provisions of Section 1108(b) of the Act, Part 121 of the FARs (14 CFR 121) prohibits flag air carrier operation of civil aircraft unless it first be registered in the United States.

Section 47.37 of the FARs (14 CFR § 47.37) (which implements the Chicago Convention, (61 Stat. 1180) states that in order to register an aircraft, it must be shown that the foreign registration has ended or is invalid. To comply with this requirement, it is proposed that the Concorde's British or French registration will be terminated when the flight from Europe lands at Dulles at which time an application will be filed for U.S. registration. United States registration can then be effected after a local designee of the foreign civil aviation registry confirms that the foreign registration has been cancelled.

When the Concorde returns to Dulles from Dallas, the United States registration will be cancelled at which time British or French registration will be issued and the foreign air carrier can operate the Concorde out of the U.S. Under this arrangement, the aircraft remains under United States registration only while operated by Braniff in interstate air transportation. This is consistent with the recent amendments to section 501(b) (1) (A) (ii) of the Act, to the effect that, when registered to a foreign-controlled corporation, the primary use of the aircraft must be within the United States. It is to be noted that the aircraft will always be under the registry of one nation or the other since the deregistration and the registration will take place in direct time sequence. In order to accomplish this arrangment, it is necessary for the parties to file for recordation with the FAA Aircraft Registry a document of title, or of any of the various qualifying ownership interests above discussed.

It is expected that the corporation will then enter into a lease or sublease to Braniff, authorizing its use in interstate air transportation during such time as the Concorde is under United States registry.

In view of the direct ticketing of passengers from Europe through Dulles to Texas and from Texas through Dulles to Europe, the period of time the Concorde will be at Dulles is too short a duration to accomplish registration and deregistration following normal registry procedures. In order to accomplish this registration and deregistration, a Memoranda of Understanding will be entered into between the FAA and the agencies of the United Kingdom and of the Republic of France having authority for aircraft registration. These procedures will provide for the designation of agents of the respective registries who will be available at Dulles to process the registration applications, forms, and notices.

Exemptions from certain administrative provisions of the aircraft registration provisions of Part 47 of the FARs (14 CFR Part 47) will be granted to the extent necessary to permit the expedited processing of this registration and deregistration by the FAA Aircraft Registry. The exemption will permit the use of registration forms designed for the interchange operation in lieu of FAA Form 8050-1 and permit the applications for registration and notices to be filed with an agent of the FAA Aircraft Registry stationed at Dulles instead of filing them at the Registry's office in Oklahoma City, Oklahoma.

OTHER AREAS OF IMPLEMENTATION

The following areas must also be addressed in connection with the proposal as it applies to ownership and registration:

1. The Concorde cannot be operated as proposed until a Type Certificate has been issued by the FAA. An application for type certification is pending before the FAA.

2. Even when type certificated and registered in the United States, a Concorde may not be operated by a flag carrier without an appropriate United States airworthiness certificate, confirming that the aircraft conforms to the United States Type Certificate and is airworthy. After the FAA issues a U.S. airworthiness certificate for the Concorde, its continued airworthiness is assured by the aircraft's maintenance program. The Concorde is the first aircraft to have its maintenance program established by a tripartite Maintenance Review Board (MRB) composed of representatives of the airworthiness authorities of the United States, Great Britain and France. The maintenance program will be accomplished by qualified foreign repair stations certificated by the FAA under Part 145 of the FARs (14 CFR Part 145). Thus the Concorde will be operated at all times under the FAA approved maintenance program. In addition, a tripartite Flight Operations Evaluation Board (FOEB) established the Minimum Equipment List (MEL) which will be applicable to the Concorde operations. In view of these tripartite actions and in order to expedite the reissuance of the airworthiness certificate each time the Concorde is registered in the United States, Braniff has applied for an exemption from the provisions of §§21.181 and 21.183 of the FARs to allow the retention of the airworthiness certificate during the period of time that the aircraft is not on the U.S. registry and to allow it to reissue the airworthiness certificate when the aircraft is returned to the U.S. registry. This petition is presently being reviewed by the FAA.

3. Systems for issuance of aircraft identification numbers (registration marks) vary between the United States and the two foreign States: Techniques being worked on by the parties will permit changes at Dulles of British (or: French) markings, into acceptable United States markings.

Issued in Washington, D.C., on December 5, 1978.

LANGHORNE BOND,
Administrator.

DEPARTMENT OF THE TREASURY

Office of the Secretary

CUMENE FROM ITALY

Antidumping; Discontinuance of Antidumping Investigation

AGENCY: Treasury Department.

ACTION: Final discontinuance of antidumping investigation.

SUMMARY: This notice is to advise the public that is has been determined to discontinue the antidumping investigation concerning cumene from Italy because the margin of dumping involved is minimal in relation to the volume of exports and appropriate assurances have been received that in the future sales will not be made at less than fair value. Future shipments will be monitored in order to insure that the price assurances are not being violated.

EFFECTIVE DATE: December 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Mary S. Clapp, Operations Officer, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue, NW, Washington, D.C. 20229, telephone (202) 566-5492.

SUPPLEMENTARY INFORMATION: On January 17, 1978, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from Gulf Oil Chemicals Co,. a division of Gulf Oil Corp., alleging that cumen from Italy is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) (referred to in this notice as the "Act"). An "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER on February 23, 1978 (43 FR 7497). A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER on September 1, 1978 (43 FR 39206).

DISCONTINUANCE OF ANTIDUMPING INVESTIGATION

On the basis of information developed in the Customs investigation and for the reasons noted below, pursuant to § 153.33(d) of the Customs Regulations (19 CFR 153.33(d)), I hereby determine that the antidumping investigation concerning cumene from Italy should be discontinued.

STATEMENT OF REASONS ON WHICH THIS DISCONTINUANCE IS BASED

The reasons and bases for the above determination are as follows:

a. *Scope of the investigation.* Virtually all the cumene imported from Italy was manufactured by Saras Chimica, a subsidiary of ANIC S.p.a. Therefore, the investigation was limited to this manufacturer.

b. *Basis of comparison.* For the purpose of considering whether the merchandise is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison was determined to be between the purchase price and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales to the United States were made to non-related customers. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold by Saras Chimica in the home market in sufficient quantities to provide a basis for comparison.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning sales in the home market and to the United States during the period September 1, 1977 through February 28, 1978.

c. *Purchase price.* For the purposes of this discontinuance, since all merchandise was purchased, or agreed to be purchased, prior to the time of exportation, by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, the purchase price has been calculated on the basis of the f.o.b. plant price to unrelated United States purchasers. No adjustments were deemed appropriate to these prices.

d. *Home market price.* For the purposes of this discontinuance, the home market price has been calculated on the basis of the f.o.b. plant price to unrelated Italian purchasers. No adjustments to this price were claimed or made. The merchandise sold in the home market was identical to that sold to the United States.

The petitioner claimed that sales made under a barter agreement should be included in the calculation of the home market price. Since the barter agreement was reached in a prior period, the inclusion of this transaction in the calculation was deemed inappropriate.

e. *Cost to produce.* The petition contained a sufficient allegation that sales of the subject merchandise in the home market were being made at less than the cost of production, pursuant to section 205(b) of the Act (19 U.S.C. 164(b)). An analysis of the Italian manufacturer's production costs, which were taken from actual records reflecting material, labor, and general expenses, indicates that the home market sales were not below the cost of production.

The petitioner claimed that the cost of materials should be based on the invoice prices of such materials, or if this is a related party transaction and therefore omits some element of cost, the European contract prices to third parties. No adjustment to the cost reported for materials was deemed appropriate. The costs reported for benzene were the actual prices paid to unrelated suppliers, or the production cost of materials manufactured by the respondent. The cost of propylene was based on its "fuel value," calculated as a ratio of the BTU yield of propylene to fuel oil, and then converted to monetary terms by applying this ratio to the market value of fuel oil. Saras Chimica claimed that the plant site in Sardinia had been chosen due to the low cost supply to propylene available there.

The petitioner claimed that cost incurred by the parent company (ANIC) should be included in the cost of production. These costs are billed to Saras Chimica as incurred and were included in the cost of production.

The credit taken for by-products was shown to reflect their actual selling prices and was deemed the appropriate measure for the credit.

The petitioner claimed that the production of the merchandise in Italy might benefit from a government subsidy. However, no evidence that any subsidies are received was presented and, in any event, a countervailing duty proceeding would be the appropriate forum for such claims.

f. *Result of fair value comparisons.* Using the above criteria, comparisons were made on virtually all of the sales of the subject merchandise to the United States by Saras Chimica during the representative period and these comparisons indicated that the purchase price was less than the home market price of such or similar merchandise. Margins were found to be approximately 0.5 percent on all sales to the United States. These margins have been determined to be minimal in relation to the volume of exports involved. In addition, formal assurances have been received from counsel acting on behalf of Saras Chimica that Saras Chimica will make no future sales at less than fair value within the meaning of the Act. These assurances were filed in accordance with § 153.33(c), Customs Regulations (19 CFR 153.33(c)).

For the reasons stated above, the antidumping investigation of cumene from Italy is being discontinued in accordance with section 201 (b)(3) of the Act (19 U.S.C. 160(b)(3)), and

V 4 3 / 2 3 6

§ 153.33(d), Customs Regulations (19 CFR 153.33(d)).

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

This notice is published pursuant to § 153.33(d), Customs Regulations (19 CFR 153.33(d)).

Dated: November 30, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

[4810-22-M]

CUMENE FROM THE NETHERLANDS

Antidumping; Determination of Sales At Not Less Than Fair Value

AGENCY: Treasury Department.

ACTION: Determination of sales at not less than fair value.

SUMMARY: This notice is to advise the public that it has been determined that cumene from the Netherlands is not being sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921. Sales at less than fair value generally occur when the price of merchandise sold from exportation to the United States is less than the price of such or similar merchandise sold in the exporter's home market or to third countries. This determination closes the investigation.

EFFECTIVE DATE: December 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Mary S. Clapp, Operations Officer, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On January 17, 1978, information was received in proper form pursuant to sections 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from Gulf Oil Chemicals Company, a division of Gulf Oil Corporation, alleging that cumene from the Netherlands is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) (referred to in this notice as "the Act"). An "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of February 23, 1978 (43 FR 7497). A "Withholding of Appraisement Notice", for a 6-month period, was published in the FEDERAL REGISTER of September 1, 1978 (43 FR 39205).

DETERMINATION OF SALES AT NOT LESS THAN FAIR VALUE

On the basis of the information developed in the Customs investigation and for the reasons noted below, pursuant to section 201(b) of the Act (19 U.S.C. 160(b)) I hereby determine that cumene from the Netherlands is not being, nor is likely to be, sold at less than fair value.

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

a. *Scope of the investigation.* Virtually all imports of the subject merchandise from the Netherlands were sold for export to the United States by Dow Chemical (Nederlands) B.V. (Dow-Europe). The investigation was therefore limited to sales by Dow-Europe.

b. *Basis of comparison.* For the purpose of this determination, the proper basis of comparison is between exporter's sales price and the third country price of such or similar merchandise. Exporter's sales price, as defined in section 204 of the Act (19 U.S.C. 163), was used since all export sales by Dow-Europe were made to a related importer in the United States, Dow Chemical Company (Dow-USA). Third country prices, as defined in § 153.3, Customs Regulations (19 CFR 153.3), were used since such or similar merchandise was not sold in the home market in sufficient quantities to provide an adequate basis for comparison.

A question has been raised as to whether the transactions used in calculating third country price are of sufficient size to constitute an appropriate basis for determining fair value. Since these sales constitute more than 9 percent of Dow-Europe's total sales during the period of investigation, it is determined that they do provide an adequate basis of comparison.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning sales to the United States during the period of September 1, 1977, through February 28, 1978, and to third countries during the period July 1, 1977, through February 28, 1978.

c. *Exporter's sales price.* For the purposes of this determination, since the merchandise under consideration was further manufactured by the related importer before sale to an unrelated United States purchaser, the exporter's sales price was calculated on the basis of the resale prices of the end products, phenol and acetone, in accordance with section 204 of the Act (19 U.S.C. 163). Adjustments were made for processing costs, including materials, labor and general expenses, and any additional costs and charges incident to bringing the merchandise from the point of shipment in the Netherlands to the point of delivery in the United States, such as ocean freight and insurance. All applicable charges incurred in the resale of the merchandise were included as part of the processing costs. An additional adjustment was made to convert the adjusted price of the end product to a per pound equivalent price of cumene. This adjustment was based on the ratio of the weight of cumene to the weight of the appropriate end product, phenol or acetone.

d. *Third country price.* For purposes of this determination, the third country price has been calculated on the basis of the weighted-average f.o.b. price to unrelated purchasers in Italy and West Germany. Deductions were made for inland freight and insurance. No other adjustments were claimed or made. The third country sales were selected and the prices were calculated to correspond with the time at which the cumene was exported to the United States.

e. *Cost of production.* Since the petition contained a sufficient allegation of sales at less than the cost of production, pursuant to section 205(b) of the Act (19 U.S.C. 164(b)), information was obtained concerning the production cost of cumene in the Netherlands. The cost of production was determined on the basis of the cost of materials, labor, and general expenses incurred in the manufacture and sale of the merchandise, as provided for in § 153.5, Customs Regulations (19 CFR 153.5).

A claim was made for an adjustment for an investment incentive allowance. This allowance is in the form of a reduction in corporate income taxes. This claim was denied since such taxes are not considered to be a part of the production costs. Therefore, any reduction in income taxes cannot be adjusted for as a production cost credit.

On the basis of the information submitted, it has been determined that Dow-Europe is not selling cumene to third countries at less than the cost of producing the merchandise.

f. *Results of fair value comparisons.* Using the above criteria, comparisons were made on approximately 65 percent of the sales of the subject merchandise to the United States during the period of investigation. Those comparisons indicated that the exporter's sales price of cumene from the Netherlands was not less, nor likely to be less, than the third country price of such or similar merchandise. A margin of approximately 0.053 percent was found on 0.03 percent of the sales compared. The weighted average margin of approximately 0.0016 percent was determined to be de minimis in relation to the total volume of such imports from the Netherlands.

Accordingly, the order issued September 1, 1978, to withhold appraisement on the subject merchandise from the Netherlands, which notice is cited above, is hereby revoked effective upon publication of this notice.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

This determination and statement of reasons therefor are published pursuant to § 153.34(d), Customs Regulations (19 CFR 153.34(d)).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

SILICON METAL FROM CANADA

Antidumping: Determination of Sales at Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Determination of Sales at Less Than Fair Value.

SUMMARY: Based upon an investigation it has been determined that silicon metal from Canada is being sold at less than fair value within the meaning of the Antidumping Act, 1921. Sales at less than fair value generally occur when the price of merchandise for exportation to the United States is less than the price of such or similar merchandise sold in the home market. This proceeding is being referred to the United States International Trade Commission for a determination concerning injury to an industry in the United States.

EFFECTIVE DATE: December 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Edward F. Haley, Operations Officer, U.S. Customs Service, Office of Operations, Duty Assessment Division, Technical Branch, 1301 Constitution Avenue, NW., Washington, D.C. 20229, telephone (202) 566-5492.

SUPPLEMENTARY INFORMATION: On January 4, 1978, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of the Ohio Ferro-Alloys Corporation, Union Carbide Corporation, Interlake, Inc., and Kawecki-Berylco Industries, Inc., indicating that silicon metal from Canada is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act").

On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of February 14, 1978 (43 FR 6350). A "Withholding of Appraisement Notice" was published in the FEDERAL REGISTER of August 29, 1978 (43 FR 38659).

For purposes of this notice, the subject merchandise is silicon metal, unwrought, containing by weight not over 99.7 percent pure silicon; and alloys of silicon metal, unwrought, containing by weight 96 percent or more but less than 99.0 percent silicon.

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, silicon metal from Canada is being, or is likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reasons and bases for the above determination are as follows:

a. *Scope of the investigation.* Virtually all imports of the subject merchandise from Canada during the period covered by this investigation were manufactured by SKW Electro-Metallurgy Canada Limited (hereinafter "SKW"); therefore, the investigation was limited to this manufacturer.

b. *Basis of comparison.* For the purpose of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between purchase price and the adjusted home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since U.S. sales were made to unrelated customers prior to the date of exportation of the merchandise. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used for fair value comparison purposes since such or similar merchandise was sold in the home market in sufficient quantities to provide an appropriate basis of comparison. In this case, Canadian sales of nearly 7 percent of all sales and over 22 percent of all sales to markets other than the United States, were deemed adequate to establish a home market for purposes of price comparisons.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports from Canada to the United States during the 6-month period September 1, 1977, through February 28, 1978, and home market sales of silicon metal during the same period.

On January 4, 1978, counsel for petitioner submitted information in support of its claim that, pursuant to section 205(b) of the Act (19 U.S.C. 164(b)), prices in the home market should be disregarded because they were at less than the cost of producing the merchandise. Information was then requested from SKW concerning the cost of producing the merchandise during the period calendar year 1977. This information was received and verified prior to the Tentative Determination. Information was also received and verified concerning the producer's costs during the time that merchandise sold during the period of investigation of September 1, 1977-February 28, 1978 was actually manufactured. This information indicates that the appropriate period for the examination of the cost of producing the merchandise is July 1, 1977 through December 31, 1977. The total actual cost of producing the merchandise during that time was determined to be less in every instance than the prices charged home market purchasers for such merchandise. Therefore, home market prices were not disregarded.

Subsequent to the Tentative Determination, petitioner submitted some additional information concerning the appropriate method for calculating the cost of producing the merchandise. This information included a claim that certain selling expenses which could only be attributed wholly to export sales had in fact been partially attributed to home market sales of this merchandise. This claim was determined to be wellfounded and an adjustment in the calculation of the cost of producing the merchandise has been made. It has been determined that this adjustment does not alter the prior conclusion that the cost of producing this merchandise was less in every instance than prices charged home market purchasers for such merchandise.

Petitioner has also claimed that Customs' investigation of the cost of producing this merchandise has failed to take account of certain production and selling expenses which may have been borne by a foreign parent company of the Canadian producer. Based on careful review of the cost information submitted by respondent and verified by the U.S. Customs Service, no reasonable basis exists for believing that any cost incurred in the production and/or sale of this merchandise by SKW has not been fully reported in the books and records of SKW as its own costs. No evidence was found that the parent companies absorbed such costs. Therefore, petitioner's claim has been rejected.

DEC 7 1978 UMI

V 4 3 / 2 3 6

Petitioner has claimed that the parent company's investment in the equity capital of SKW should be considered a "cost of producing" this merchandise. The amount would be based on the parent company's interest costs for borrowed funds or a comparable charge on internally generated capital. In the recent case of *Austrian Viscose Rayon Staple Fiber* (43 FR 40095) (1978), we determined that the cost of producing merchandise within the meaning of section 205(b) of the Act did not require the inclusion of an imputed interest charge for the use of internally generated corporate funds. It has been determined in the instant case that there is no valid distinction to be made between the situation presented in the *Austrian Viscose Rayon Staple Fiber* case, and the situation in which funds utilized by the producing unit are derived from equity capital contributed by the investing parent company. How that company derived the funds—from loans, new investments in equity or self-generation from operations, or otherwise—is not relevant under the cost of production by reference to the actual costs incurred, as determined in accordance with generally accepted accounting principles (GAAP) in the country of manufacture, whenever such principles do not have a significant distortive effect. All actual interest costs incurred by SKW have been included within the cost of production of this merchandise. The inclusion of any element of imputed cost of the use of invested capital would not constitute an actual cost of production under GAAP, and, thus, cannot appropriately be included within the meaning of section 205(b) of the Act (19 U.S.C. 164(b)).

c. *Purchase Price.* For the purpose of this determination of sales at less than fair value, the purchase price was calculated on the basis of prices to unrelated U.S. customers with deductions, for loading charges, freight, warehousing costs, U.S. duty, discounts, and sales commissions, as appropriate. Additions were made for those sales where additional amounts were separately billed the customer for packing materials and/or freight and for drawback received on Canadian Customs duties paid on imported components.

d. *Home Market Price.* For the purpose of this determination of sales at less than fair value, home market price was calculated on the basis of the weighted-average price to all customers during the period of comparison with adjustments for loading, packing and freight costs, selling commissions, selling expenses, and differences in merchandise, as appropriate.

An adjustment to the home market price of high quality silicon metal was made for purposes of comparing that price to prices charged U.S. customers for silicon metal of a different, and lower, quality, pursuant to § 153.11 (19 CFR 153.11) of the Customs Regulations. The difference was established as a requirement of home market buyers, and was assured through procedures followed by the producer to enable it to warrant the higher quality sold in the home market. The adjustment was based on the additional costs incurred in the manufacture of the higher grade, which is the only grade sold in the home market. Additional adjustment under § 153.11 in the form of a deduction from home market price for labor and direct factory overhead costs directly attributable to the allowable cost of difference in the merchandise compared was not claimed and, therefore, not made.

Allowance has been claimed for commissions paid to a Canadian company related to SKW in connection with the home market. Normally a sales commission is considered to be directly related to a particular sale and is a circumstance of sale for which adjustment is made under § 153.10(a) of the regulations (19 CFR 153.10(a)). On the other hand, presale selling expenses are generally regarded as overhead expenses which do not constitute an allowable adjustment under § 153.10(a).

Section 153.10(b) (19 CFR 153.10(b)) of the regulations, in stating exceptions to the general rule that an adjustment will be made only for directly related circumstances of sale, provides:

> • • • reasonable allowance for selling expenses generally will be made in *cases where a reasonable allowance is made for commissions in one of the markets* under consideration and no commission is paid in the other market under consideration, the amount of such allowance being limited to the actual selling expense incurred in the one market or the total amount of the commission allowed in such other market, whichever is less. (Emphasis provided.)

In the instant case, a sales commission was paid to an unrelated party in respect of sales to the United States. It was therefore necessary to determine whether and, if so, to what extent, sales commissions paid in the home market to a related party could be properly deducted from home market price consistent with §§ 153.10(a) and 153.10(b) of the Regulations. At the time of the Tentative Determination, it was determined:

1. That under § 153.10(a), adjustment for sales commissions paid to a "related" company must be denied, wholly or in part, as a mere shift of income from one part of a corporate organization to another; and

2. That under § 153.10(b), adjustment may be allowed to the extent actual selling expenses, incurred either by the payee or payor of the commission, are shown, up to the amount of any commission paid in the "other" market.

On these bases, an adjustment to home market price was made at the time of the Tentative Determination, in connection with a portion of the sales commission paid to a related party. The adjustment was disallowed on a pro rata basis to the extent of the corporate relationship between payor and payee, pending submission of evidence of actual selling expenses. Information sufficient to establish that such actual selling expenses were incurred in full amount of the commission paid having been received since the Tentative Determination, this adjustment has now been fully allowed.

e. *Result of fair value comparisons.* Using the above criteria, the U.S. purchase prices were found to be lower than the home market price of such or similar merchandise in certain instances. Comparisons were made on virtually all the silicon metal sold in the United States by SKW during the period of investigation. Margins were found ranging from 0.4 percent to 18.3 percent on 44 percent of sales compared. The weighted-average margin computed over all sales was 2.7 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

The U.S. International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

VETERANS ADMINISTRATION

ELECTRICAL DEFICIENCIES PROJECT, VAMC, SEPULVEDA, CA.

Finding of No Significant Impact

The proposed project will correct the electrical deficiencies at the Sepulveda, California, Veterans Administration Medical Center (VAMC), through the installation of new high voltage switchgear, feeders, a substation and emergency generators.

The correction of electrical deficiencies involves primarily the upgrading of interior electro-mechanical equipment (in Buildings No. 2 & 3) plus the exterior siting and installation of two emergency generator units serving Buildings No. 2 and 3, and a substation for Building No. 3. The focus of the assessment is the two emergency generator units and the substation which are the only exterior addition/modifications to the facility.

The impacts, as a result of the proposed action, are primarily associated with noise and exhaust emissions from the emergency generators. Mitigating actions for noise impacts are in the form of sound deadening enclosures, air silencers and exhaust mufflers on the equipment. Impacts of exhaust emissions are minimal during normal conditions of weekly 30-minute maintenance operations.

An analysis of all environmental factors related to the correction of electrical deficiencies indicates a Finding of No Significant Impact.

Questions and requests of single copies of the Environmental Assessment should be addressed to: Willard S. Sitler, Environmental Affairs Office (66), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420.

By direction of the Administrator.

Dated: November 30, 1978.

MAURY S. CRALLE, JR.,
Assistant Deputy Administrator for Financial Management and Construction.

INTERSTATE COMMERCE COMMISSION

[Decisions Volume No. 50]

DECISION-NOTICE

Decided: November 13, 1978.

The following applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We Find: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and juridictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the national transportation policy subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of section 210 of the Interstate Commerce Act.

It is ordered: In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decisions notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a noncomplying applicant shall stand denied.

By the Commission, Review Board Number 2, Members Boyle, Eaton, Liberman (Review Board Member Eaton not participating).

H. G. HOMME, JR.,
Secretary.

MC 4405 (Sub-583F), filed October 17, 1978. Applicant: DEALERS TRANSIT, INC., 522 South Boston Avenue, Tulsa, OK 74103. Representative: Alan Foss, 502 First National Bank Bldg., Fargo, ND 58102. To operate as *common carrier,* by motor vehicle, over irregular routes, transporting *such commodities* as ar dealt in or used by meat-packing houses, in bulk, in tank vehicles, from Clovis, NM, and Amarillo and Lubbock, TX, to points in TX, restricted to the transportation of traffic moving in foreign commerce only. (Hearing site: Lubbock or Dallas, TX)

MC 144791 (Sub-2F), filed September 7, 1978. Applicant: DONALD EDWARD McKENZIE, d.b.a, C & D CONTRACTING, 13491-112th Ave., Surrey, British Columbia, Canada, V3R 2E7. Representative: Donald Edward McKenzie (same address as applicant). To operate as *contract carrier,* by motor vehicle, over irregular routes, transporting *plastic bins,* from Tacoma, WA, to ports of entry on the international boundary line between the United States and Canada, at or near Blaine, Lynden, and Sumas, WA, under continuing contract(s) with Agri-Tramer Corp., of Wenatchee, WA, restricted to the transportation of traffic destined to points in the Province of British Columbia, Canada. CONDITION: Prior receipt from applicant of an affidavit setting forth its appropriate complementary Canadian authority or explaining why so such Canadian authority is necessary. (Hearing site: Seattle, WA)

NOTE.—The restriction and condition contained in the grant of authority in this pro-

V 4 3 / 2 3 6

ceeding are phrased in accordance with the policy statement entitled Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with the appropriate Canadian officials regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect.

MC 144858 (Sub-5F), filed October 23, 1978. Applicant: DENVER SOUTHWEST EXPRESS, INC., A Nebraska Corporation, P.O. Box 9950, 1310 Stagecoach Road, Little Rock, AR 72209. Representative: John T. Wirth, 717—17th Street, Suite 2600, Denver, CO 80202. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *shampoo and toilet preparations, and accessories* for shampoo and toilet preparations (except commodities in bulk, in tank vehicles), from Clark and Piscataway, NJ, to Chicago, IL, Cleveland, OH, and Detroit, MI. (Hearing site: Little Rock, AR or Washington, DC.)

NOTE.—Dual operations are involved in this proceeding.

MC 144859 (Sub-1F), filed October 24, 1978. Applicant: SCOTT PALLETS, INC., Box 341, Amelia, VA 23002. Representative: Calvin F. Major, 200 West Grace St., Suite 415, Richmond, VA 23220. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting *lumber* used in the manufacture of furniture, from points in OH, PA, WV, and MD, to points in VA and NC, under continuing contract(s) with (a) GMC Hardwoods, Inc., of Dover, MA, and (b) National Lumber Co., Inc., of Augusta, GA. Conditions: Said carrier shall conduct separately its contract carrier operation and its other business activities. Carrier shall maintain separate accounting systems for each such business. Carrier shall not transport property as both a private and for-hire carrier at the same time and in the same vehicle. (Hearing site: Richmond, VA.)

MC 144915 (Sub-1F), filed October 11, 1978. Applicant: R. & M. SERVICES, INC., 1501 Marlborough Street, Montreal, P.Q. H1W2L1, Canada. Representative: Brian L. Troiano, 918 16th Street, Washington, DC 20006. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *animal and poultry nutritional feed, and animal and poultry feed ingredients*, (1) between ports of entry on the international boundary line between the United States and Canada (a) in Franklin and Clinton Counties, NY, and (b) in VT, on the one hand, and, on the other, points in Albany, Renssalaer, Saratoga, Washington, Warren, Essex, Clinton, Franklin, and St. Lawrence Counties, NY, and points in VT, and (2) from Swanton, VT, to points in Albany, Renssalaer, Saratoga, Washington, Warren, Essex, Clinton, Franklin, and St. Lawrence Counties, NY, restricted in (1) above to the transportation of traffic originating at or destined to points in the Province of Quebec, Canada.

NOTE.—The restriction contained in the grant of authority in this proceeding is phrased in accordance with the policy statement entitled Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and from Points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate Canadian officials regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect. (Hearing site: Montpelier, VT or Albany, NY.)

MC 145071 (Sub-2F), filed September 11, 1978. Applicant: EATON BROS., INC., 1020 West Brady, Clovis, NM 88101. Representative: Edward A. O'Donnell, 1004 29th Street, Sioux City, IA 51104. (Hearing site: Washington, DC.)

NOTE.—Applicant is cautioned that arrangements for charter parties or groups should be made in conformity with the requirements set forth in *Tauck Tours, Inc., Extension—New York, N.Y.*, 54 M.C.C. 291 (1952).

[FR Doc. 78-34028 Filed 12-6-78; 8:45 am]

[7035-01-M]

[Decisions Volume No. 52]

DECISION—NOTICE

Decided: November 21, 1978

The following applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the FEDERAL REGISTER. Failure to file a protest, within 30 days, will be considered as a waiver of opposition to the application. A protest under these rules should comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (as specifically noted below), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. A protestant should include a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest in-

V 4 3 / 2 3 6

cludes a request for oral hearing, such request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

We find:

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the national transportation policy. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision is neither a major Federal action significantly affecting the qualify of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the national transportation policy subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of section 210 of the Interstate Commerce Act.

It is ordered:

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant) except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decisions-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a noncomplying applicant shall stand denied.

By the Commission, Review Board Number 1, Members Carleton, Joyce and Jones.

H.G. Homme, Jr.,
Secretary.

MC 808 (Sub-55F), filed October 27, 1978. Applicant: ANCHOR MOTOR FREIGHT, INC., a Delaware corporation, 21111 Chagrin Boulevard, Cleveland, OH 44122. Representative: J. A. Kundtz, 1100 National City Bank Building, Cleveland, OH 44114. To operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting *motor vehicles*, (1) from Linden, NJ, to points in AZ, AR, CA, CO, ID, IA, KS, LA, MN, MS, MO, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, WI, and WY, and (2) from Tarrytown, NY, to points in AL, AZ, AR, CA, CO, FL, GA, ID, IA, KS, LA, MN, MS, MO, MT, NE, NV, NM, ND, OK, OR, SC, SD, TX, UT, WA, WI, and WY, under contract with General Motors Corp., of Warren, MI. (Hearing site: Washington, DC.)

Note.—Dual operations may be at issue in this proceeding.

MC 1585 (Sub-11F), filed October 20, 1978. Applicant: BARNES TRUCK LINE, a corporation, 1320 Highway 13 North, Columbia, MS 39429. Representative: Harold D. Miller, Jr., 1700 Deposit Guaranty Plaza, P.O. Box 22567, Jackson, MS 39205. To operate as a *common carrier*, by motor vehicle, over regular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between McComb and Tylertown, MS, over U.S. Hwy 98, (2) between Brookhaven and Prentiss, MS, over U.S. Hwy 84, and (3) between Jackson, MS, and New Orleans, LA, from Jackson over U.S. Hwy 51 and Interstate Hwy 55, to LaPlace, LA, then over Interstate Hwy 10 to New Orleans, and return over the same route, serving all intermediate points in MS. Restriction: Service to intermediate points in MS is restricted to the handling of shipments moving to, from, or through New orleans or points within its commercial zone. (Hearing site: New Orleans, LA.)

MC 2368 (Sub-84F), filed October 18, 1978. Applicant: BRALLEY-WILLETT TANK LINES, INC., a Virginia corporation, 2212 Deepwater Terminal Road, P.O. Box 495, Richmond, VA 23204. Representative: Steven L. Weiman, 4 Professional Drive, Suite 145, Gaithersburg, MD 20760. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *chemicals*, in bulk, between points in VA, on the one hand, and, on the other, points in GA, MD, NC, and SC. (Hearing site: Washington, DC.)

MC 5470 (Sub-162F), filed October 23, 1978. Applicant: TAJON, INC., a Delaware corporation, R.D. 5, Mercer, PA 16137. Representative: Brian L. Troiano, 918 16th Street NW., Washington, DC 20006. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *sand*, in dump vehicles, (1) from points in La Salle County, IL, to points in CT, IN, KY, ME, MD, MA, MI, NH, NJ, NY, OH, PA, RI, VA, VT, and WV, and (2) from Oregon, IL, and Portage, WI, to points in CT, IN, KY, MI, NJ, NY, OH, PA, and WV. (Hearing site: Washington, DC, or Chicago, IL.)

MC 22311 (Sub-8F), filed September 15, 1978. Applicant: WEST SHORE TRANSFER, INC., 215 Marble Street, Hammond, IN 46320. Representative: Anthony E. Young, 29 South LaSalle Street, Suite 350, Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting (1) *iron and steel articles*, from the facilities of Northwestern Steel and Wire Co., at or near Sterling and Rock Falls, IL, to those points in the United States in and east of WI, IA, NE, KS, OK, and TX; and (2) *materials, equipment, and supplies* used in the manufacture and distribution of the commodities named in (1) above, in the reverse direction, restricted in (1) and (2) above to the transportation of traffic originating at the named origins and destined to the indicated destinations except traffic moving in foreign commerce. (Hearing site: Chicago, IL)

MC 30803 (Sub-4F), filed October 9, 1978. Applicant: WALSH BROS., INC., 33 Brill Street, Newark, NJ 07105. Representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, NJ 08904. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting (1) *iron and steel articles*, (2) *metal roofs, floor deckings, and metal sidings* (except those which are iron and steel articles) and (3) *materials, equipment, and supplies* used in the installation, manufacture and sale of the commodities

named in (1) and (2) above, (except commodities in bulk), between Allentown, Malvern, and Morrisville, PA, and the facilities of United Steel Deck, Inc., at South Plainfield, NJ, on the one hand, and on the other, points in the United States on and east of a line beginning at the mouth of the Mississippi River, and extending along the Mississippi River to its junction with the western boundary of Itasca County, MN, thence northward along the western boundaries of Itasca and Koochiching Counties, MN, to the International Boundary line between the United States and Canada, restricted to the transportation of traffic originating at and destined to the named points. (Hearing site: Newark, NJ)

MC 35320 (Sub-160F), filed October 5, 1978. Applicant: T.I.M.E.-DC, INC., P.O. Box 2550, Lubbock, TX 79408. Representative: Kenneth G. Thomas (same address as applicant). To operate as a *common carrier*, by motor vehicle, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, ammunition and parts of ammunition commodities in bulk, and those requiring special equipment), serving the facilities of General Tire Rubber Co., at or near Waco, TX, as an off-route point in connection with carrier's otherwise authorized regular-route operations. (Hearing site: Dallas, TX, or Oklahoma City, OK)

MC 40270 (Sub-14F), filed September 22, 1978. Applicant: CRABBS TRANSPORT, INC., P.O. Box 3486, Enid, OK 73701. Representative: Rufus H. Lawson, 106 Bixler Building, 2400 Northwest 23rd Street, Oklahoma City, OK 73107. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *salt and salt products* (except in bulk), from Lyons, KS, to points in OK. (Hearing site: Oklahoma City, OK, or Wichita, KS)

MC 40898 (Sub-23F), filed October 27, 1978. Applicant: S & W MOTOR LINES, INC., P.O. Box 11439, Greensboro, NC 27409. Representative: A. W. Flynn, Jr., 314 South Eugene Street, P.O. Box 180, Greensboro, NC 27402. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *glass containers*, from Greensboro and Clemmons, NC, to Eden, NC. (Hearing site: Greensboro, NC).

MC 40978 (Sub-42F), filed October 25, 1978. Applicant: CHAIR CITY MOTOR EXPRESS CO., a corporation, 3321 Business 141 South, Sheboygan, WI 53081. Representative: William C. Dineen, Suite 412 Empire Building, 710 North Plankinton Avenue, Milwaukee, WI 53203. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *new furniture*, from Archbold, Bedford, Celina, Lancaster, Swanton, and Youngstown, OH, to points in IL, MN, WI, and those in the Upper Peninsula of MI. (Hearing site: Columbus, OH, or Chicago, IL).

MC 40978 (Sub-43F), filed October 26, 1978. Applicant: CHAIR CITY MOTOR EXPRESS CO., a corporation, 3321 Business 141 South, Sheboygan, WI 53081. Representative: William C. Dineen, Suite 412 Empire Building, 710 North Plankinton Avenue, Milwaukee, WI 53203. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *new furniture*, (1) from Sturgis, MI, to points in IL, and (2) from Monroe, MI, to points in IL, MN, WI, and those in the Upper Peninsula of MI. MC 118806 (Sub-63F), filed July 3, 1978, and previously noticed in the FEDERAL REGISTER issue of September 19, 1978. Applicant: ARNOLD BROS. TRANSPORT, LTD., 851 Lagimodiere Boulevard, Suite 200, Winnepeg, MB, Canada R25 3K4. Representative: Bernard J. Kompare, Suite 1600, 10 South LaSalle Street, Chicago, IL 60603. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *such commodities as are dealt in by agricultural equipment and lawn and leisure product manufacturers and dealers*, (except commodities in bulk), between the ports of entry on the International Boundary line between the United States and Canada in MI and NY, on the one hand, and, on the other, points in the United States (except AK and HI), restricted to the transportation of traffic (a) moving in foreign commerce and (b) originating at or destined to points in the Provinces of Ontario, Quebec, New Brunswick, Nova Scotia, Newfoundland, and Prince Edward Island, Canada. Condition: Prior receipt from applicant of an affidavit setting forth its complementary Canadian authority or explaining why no such Canadian authority is necessary. (Hearing site: Chicago IL.)

NOTE: The restriction and conditions contained in the grant of authority in this proceeding are phrased in accordance with the policy statement entitled Notice to Interested Parties of New Requirements Concerning Applications for Operating Authority to Handle Traffic to and from points in Canada published in the FEDERAL REGISTER on December 5, 1974, and supplemented on November 18, 1975. The Commission is presently considering whether the policy statement should be modified, and is in communication with appropriate Canadian officials regarding this issue. If the policy statement is changed, appropriate notice will appear in the FEDERAL REGISTER and the Commission will consider all restrictions or conditions which were imposed pursuant to the prior policy statement, regardless of when the condition or restriction was imposed, as being null and void and having no force or effect. This republication corrects the commodity and territorial description.

APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS

DECEMBER 1, 1978.

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION NOTICE

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of a petition for leave to intervene in the proceding must be filed with the Commission on or before January 8, 1979. Such pleading shall comply with Spe-

V 4 3 / 2 3 6

cial Rule 247(e) of the Commission's General Rules of Practice (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 105636 (Sub-39F) (corrected republication), filed March 27, 1978, published in the FEDERAL REGISTER issue of May 11, 1978 and November 9, 1978, and republished this issue. Applicant: ARMELLINI EXPRESS LINES, INC., Oak and Brewster Roads, Vineland, NJ 08360. Representative: Wilmer B. Hill, 805 McLachlen Bank Building 666 Eleventh Street NW., Washington, DC 20001. A Decision of the Commission, Review Board Number 3, decided September 29, 1978, and served October 12, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *Petroleum products*, in containers, from the facilities of Shell Oil Company, at or near Sewaren, NJ; the facilities of Sun Oil Company, at or near Marcus Hook, Pa; and the facilities of Royal Lubricants Company, Inc., at or near Hanover, NJ to Riviera Beach, FL; restricted to the transportation of traffic having an immediately subsequent movement by water, that applicant is fit, willing, and able properly to perform such service, and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate the authority granted as having three origin points and one destination point.

MC 118838 (Sub-18F) (Republication), filed February 9, 1978, published in the FEDERAL REGISTER issue of March 16, 1978, and republished this issue. Applicant: GABOR TRUCKING INC., Rural Route 4, Detroit Lakes, MN 56501. Representative: Robert D. Gisvold, 1000 First National Bank Building, Minneapolis, MN 55402. A Decision of the Commission, Review Board Number 2, decided September 26, 1978, and served November 2, 1978, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *Lumber, lumber mill products, and wood products*, from the facilities of Potlatch Corporation, at or near Couer d'Alene, Jaype, Kamiah, Lewiston, Post Falls, Potlatch, Santa, St. Maries, and Spalding, ID, to points in IL, IN, IA, MI, MN, MO, OH, PA, WV, and WI, restricted to the transportation of traffic originating at the named origins and destined to the indicated destination States, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations. The purpose of this republication is to indicate applicant's actual grant of authority.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

NOTICE

The following applications are governed by Special Rule 247 of the Commission's *General Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with Section 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use a such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. All pleadings and documents must clearly specify the "F" suffix where the docket is so identified in this notice. If the protest includes a request for oral hearing, such requests shall meet the requirements of Section 247(e)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission decision which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the* FEDERAL REGISTER *of a notice that the proceeding has been assigned for oral hearing.*

Each applicant states that approval of its application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation Act of 1975.

MC 105120 (Sub-17F), filed October 5, 1978. Applicant: FREIGHTWAYS EXPRESS, INC., 2700 Sterick Building, Memphis, TN 38103. Representative: James N. Clay, III (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between St. Louis, MO, and Memphis, TN, over Interstate Hwy 55. (Hearing site: Memphis, TN, and St. Louis, MO)

NOTE.—Applicant has concurrently filed a petition to consolidate the above proceeding with MCC 10162, Dodds Truck Line, Inc. and Dodds Truck Line, Inc., Operator and Lessee of Bennett Truck Line, Inc. V. Freightways Express, Inc.

MC 105566 (Sub-178F), filed August 1, 1978, and previously published in the FEDERAL REGISTER issue of October 19, 1978. Applicant: SAM TANKSLEY TRUCKING, INC., P.O. Box 1120, Cape Girardeau, MO 63701. Representative: Thomas F. Kilroy, Suite 406, Executive Building, 6901 Old Keene Mill Road, Springfield, VA 22150. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting (1) *Agricultural chemicals and pesticides* (except commodities in bulk); and (2) *applicators* for agricultural chemicals, from points in Alameda, Contra Costa, and Solano Counties, CA, to points in the United States in and east of ND, SD, NE, KS, OK, and TX. (Hearing site: Washington, DC)

MC 114457 (Sub-445F), filed: October 24, 1978. Applicant: DART TRANSIT CO., a corporation, 2102 University Avenue, St. Paul, MN 55114. Representative: James H. Wills, 2102 University Avenue, St. Paul, MN 55114. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (a) *Alcoholic beverages*, (b) *Such commodities as are dealt in by distributors of alcoholic beverages; and* (c) *materials, supplies, and equipment used in the sale of alcoholic beverages* (except commodities in bulk), from points, in AZ, AR, CA, CO, CT, DE, DC, FL, ID, IL, IN, IA, KA, KY, LA, ME, MD, MA, MI, MO, MT, NE, NV, NH, NJ, NM, NY, OH, OK, OR, PA, RI, TN, TX, UT, VT, VA, WA, WV, and WY, to points in MN, ND, SD, and those points in WI on and north of U.S. Hwy 151. (Hearing, January 15, 1979, 5 days, at 9:30 a.m., local time, in Court Room No. 984, Federal Building, 316 North Robert Street, St. Paul, MN.)

MC 115331 (Sub-471F), filed November 6, 1978. Applicant: TRUCK TRANSPORT INC., 29 Clayton Hills Lane, St. Louis, MO 63131. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, DC 20001. To operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *chemicals*, in bulk, in tank vehicles, from points in the United States, to Sedalia, MO. (Hearing: December 18, 1978, at 9:30 a.m. local time, at the offices of the Interstate Commerce Commission, Washington, D.C.). Common control may be involved.

MC 118989 (Sub-204F), filed October 2, 1978, and previously published in the FEDERAL REGISTER issue of November 2, 1978. Applicant: CONTAINER TRANSIT, INC., 5223 South 9th Street, Milwaukee, WI 53221. Representative: Albert A. Andrin, 180 North La Salle Street, Chicago, IL 60601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *Such commodities* as are dealt in or used by manufacturers and distributors of containers (except commodities in bulk), between points in the United States (except AK and HI). (Pre-Hearing conference: Dec. 18, 1978, at 9:30 a.m. local time, at the Offices of the ICC, Washington, DC).

NOTE.—This republication is to indicate the exact hearing information.

FINANCE APPLICATIONS

NOTICE

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to Sections 11343 (formerly Section 5(2)) or 11349 (formerly Section 210a(b) of the Interstate Commerce Act.

An original and one copy of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's *General Rules of Practice* (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

Each applicant states that approval of its application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation Act of 1975.

MC-F-13174 (Republication). Authority granted (Decision of Administrative Law Judge Samuel Horwich served October 23, 1978), for purchase by Truck Transport Incorporated, 29 Clayton Hills Lane, St. Louis, MO 63131 and Material Delivery Service, Inc. Alabaster, Alabama, of a portion of the operating rights and prperties of Ecoff Trucking, Inc., P.O. Box 127 Fortville, IN 46040, and for acquisition by Robert B. Schilli, 29 Clayton Hills Lane, St. Louis, MO 63131 of control of such rights and property through the purchase. Applicant's attorneys: Leonard A. Jaskiewicz, 1730 M Street, N.W., Suite 501, Washington, D.C. 20036 and Robert W. Loser II, 1009 Chamber of Commerce Building, Indianapolis, IN 46204. The operating rights contained in MC-119934 and approved to be transferred to Truck Transport Incorporated are as follows: *sulphate soap* skimmings, in bulk, in tank vehicles, from Krannert and Macon, GA, Monroe, LA, Port St. Joe, and Palatka, FL and Calhoun, TN, to Tuscaloosa, AL and points within 5 miles thereof; *tall oil*, in bulk, in tank vehicles, from Valdosta, GA to Fox, AL; *anhydrous ammonia*, in bulk, in tank vehicles, and *dry urea*, in bulk, from the plantsite of American Cyanamid Company at Avondale, LA, to points in NC, SC, GA, FL, AL, MS, LA, TX, TN, KY, AR, MO, OK, and KS; *sugar*, dry, in bulk, from points in AL, LA, MS and TN, with restrictions; *dry sugar*, in bulk, from points in St. Bernard Parish, LA to points in AR and TX, with restrictions; *dry sugar*, in bulk, from points in LA (except points in St. Bernard Parish), to points in AR, TX, AL, MS and TN (except Memphis and points in its commercial zone as defined by the Commission), with restrictions. *Corn syrup, liquid sugar, and blends of corn syrup and liquid sugar*, in bulk, in tank vehicles, from points in St. Bernard, Orleans, Jefferson and St. John the Baptist Parishes, LA to points in AL, AR, FL, MS, TN and TX, with restrictions; *liquid sugar*, in bulk, in tank vehicles, from Reserve, LA to Oak Grove and Monroe LA; *molasses*, in bulk, in tank vehicles, from New Orleans LA to points in Georgia, with restrictions, *molasses*, in bulk, in tank vehicles, from the plant sites of Colonial Molasses Company, located at New Orleans and Gretna, LA to Baerfield (Allen County), IN and Springfield, MO with restrictions; *molasses*, in bulk, in tank vehicles, from New Orleans, LA to points in OH, with restrictions, *molasses*, in bulk, in tank vehicles, from the facilities of Colonial Molasses Co. of LA and Xtravim, both Divisions of Su-Crest Corporation at New Orleans and Gretna, LA to points in AL, AR, CO, ID, IL, MD, MI, MS, and WI, with restrictions. The operating authorities in MC-119934 approved for transfer to Material Delivery Service, Inc. are as follows: *Sulfuric Acid*, in bulk, in tank vehicles, as a common carrier over irregular routes from Coosa Pines, AL to points in GA; *nitrogen solutions, and anhydrous ammonia*, in bulk, in tank vehicles, from Ketona, AL, to points in GA, points in that part of FL on and north of Florida Highway 60, points in that part of TN on and east of a line bginning at the KY, TN State Line and extending along U.S. Highay 51; *lime and limestone*, in bulk, from points in Shelby County, AL to points in MS, TN, FL, GA, LA, AR, NC, and SC, with restrictions: (1) *lime and cement*, from the facilities of Cheney Lim. & Cement Company at or near Graystone (Blount County) AL, to points in FL, GA, LA, MS, NC, SC and TN (2) *cement*, from the facilities of the shipper in (1) above located at or near Landmark (Shelby County), AL to points in the States named in (1) above; (3) *lime*, in bulk, from the facilities described in (2) above to points in Fulton County, A with restrictions. Vendee Truck Transport Incorporated is authorized to operate as a motor common carrier in all states in the United States (except AL, HI and the District of Columbia). Vendee Material Delivery Service, Inc. holds no authority from the Interstate Commerce Commission at the present time. As originally filed, the application called for the purchase of all of the identified operating authority by Truck Transport Incorporated. A petition for partial substitution of Material Delivery Service as applicant-vendee was filed July 19, 1978. That petition was granted in the identified Decision of Administrative Law Judge Samuel Horwich, and the purpose of this republication is to identify specifically the operating authority to be acquired by Material Delivery Service as a result of the Decision of the Administrative Law Judge. Within 30 days of the date of republication herein, any interested party may file a petition identifying specifically its interest, and stating in what way such interest-

D E 7 7 8 UMI

V 4 3 / 2 3 6

ed party would be prejudiced by the substitution of Material Delivery Service as applicant-vendee for the identified operating authorities.

MC-F-13797. Authority sought for purchase by JACKSON and JOHNSON, INC., W. Church St., Box 327, Savannah, NY 13146, of a portion of the operating rights of S.T.L. TRANSPORT, INC., 1000 Jefferson Road, Rochester, NY 14623, and for acquisition by JOHN W. JACKSON, of Savannah, NY, of control of such rights through the transaction. Applicants' attorneys: S. Michael Richards/Raymond A. Richards, 44 North Avenue, P.O. Box 225, Webster, NY 14580. Operating rights sought to be purchased: *Cleaning compounds* and *windshield washer anti-freeze solvents* (except commodities in bulk), as a *contract carrier*, over irregular routes, from Rochester, NY to points in CT, ME, MA, NH, RI, VT, and NY, under continuing contract, or contracts, with Kleen Brite Chemical Co., Inc., at Rochester, NY, as described in Permit MC-140118 (Sub-No. 4). Vendee is authorized to operate as a *contract carrier* in MA, NY, PA, DE, MD, NJ, CT, DE, ME, NH, NC, OH, RI, VT, VA, and DC. Vendee is also authorized to operate as a *common carrier* in NY, CT, ME, MA, NH, NJ, RI, VT, add PA. Application has been filed for temporary authority under Section 210a(b).

MC-F-13808F. (Correction) (B. J. McADAMS, INC.—CONTROL—HUGHES REFRIGERATED EXPRESS, INC.), published in the November 24, 1978, issue of the FEDERAL REGISTER, on page 55049. Previous notice inadvertently published the notice as Docket No. MC-F-13805F. The correct number is No. MC-F-13808F.

MC-F-13817F. Applicant: SILVER EAGLE, CO., 2532 Southeast Hawthorne Boulevard, Portland, OR 97214. Representative: Robt. R. Hollis, 400 Pacific Building, Portland, OR 97204. Authority sought for purchase by SILVER EAGLE COMPANY, 2532 Southeast Hawthorne Blvd., Portland, OR 97214, of the common carrier operating rights and properties of MID-OREGON EXPRESS, INC., through its receiver in bankruptcy John B. Franzwa, 6438 SW Hamilton Way, Portland, OR 97221, and for acquisition by Silver Eagle Company of control of the rights through the purchase. Applicant's attorney: ROBT. R. HOLLIS, 400 Pacific Bldg., Portland, OR 97204. Operating rights sought to be transfered: under Certificate No. MC-138600, authorizing the transportation by common carrier of general commodities, except those of unusual value, uncrated house hold goods, commodities in bulk, and those requiring special equipment over regular routes, between Portland, OR, and Bend, OR, serving the intermediate points of Warm Springs, Madras, Terrebonne, Prineville Junction and Redmond, OR, and the off-route points of Culver, Metolius and Prineville, OR, and General Commodities, except those of unusual value, uncrated household goods, commodities in bulk, commodities requiring special equipment and commodities requiring refrigeration, over irregular routes, between points in Deschutes, Crook and Jefferson County, OR. To the extent that this authority authorizes the transportation of Classes A & B explosives, it is limited, in point of time, to a period expiring August 28, 1980. Vendee is authorized to operate as a common carrier in the states of Oregon and Washington. Application has also been filed for temporary authority under Section 210a(b) of the Act.

MC-F-13826F. Applicant (transferee): H & W MOTOR EXPRESS CO., 3000 Elm Street, Dubuque, IA 52001. Applicant (transferor): THE ROCK ISLAND MOTOR TRANSIT CO., 2744 Southeast Market Street, Des Moines, IA 50317. Representative (transferee): WILLIAM S. ROSEN, 630 Osborn Building, St. Paul, MN 55102. Representatives (transferor): RAYMOND GOLDFARB, 72 West Adams Street, Chicago, IL 60603 and DONALD F. NEIMAN, 1119 High Street, Des Moines, IA 50309. Authority sought for purchase by H & W MOTOR EXPRESS COMPANY, 3000 Elm Street, Dubuque, IA 52001, of a portion of the operating rights of THE ROCK ISLAND MOTOR TRANSIT COMPANY, 2744 Southeast Market Street, Des Moines, IA 50317, and for acquisition by URBAN R. HAAS and MARY E. WISSEL, 3000 Elm Street, Dubuque, IA 52001, of control of such rights through the transaction. Transferee's attorney: WILLIAM S. ROSEN, 630 Osborn Building, St. Paul, MN 55102; Transferor's attorneys: RAYMOND GOLDFARB, 72 West Adams Street, Chicago, IL 60603 and DONALD F. NEIMAN, 1119 High Street, Des Moines, IA 50309. Operating rights sought to be transferred: *Classes A & B explosives*, except nitroglycerine, and *general commodities*, except those of unusual value, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment: Between Rock Island, IL and Peoria, IL, serving all intermediate and off-route points which are stations on the rail line of The Chicago, Rock Island and Pacific Railway Company between Rock Island and Peoria, IL, including Milan, IL: Route No. 67: From Rock Island over U.S. Hwy 150 via Orion, IL, to junction IL Hwy 81, then over IL Hwy 81 to junction IL Hwy 82, then over IL Hwy 82 to junction IL Hwy 17, then over IL Hwy 17 to junction US Hwy 34, then over US Hwy 34 to Galva, IL, then over IL Hwy 17 to Wyoming, IL, then over IL Hwy 91 to junction IL Hwy 174, then over IL Hwy 174 to junction IL Hwy 88, and then over IL Hwy 88 to Peoria, and return over the same route. Route No. 68: From Rock Island over U.S. Hwy 67 to Milan, IL, then over IL Hwy 92 to junction US Hwy 150, and then via Orion, IL to Peoria, as specified above, and return over the same route. Route No. 69: From Rock Island to Orion, IL, as specified above, then over unnumbered Hwys, via Osco, IL, to junction IL Hwy 81, at or near Andover, IL, and then to Peoria as specified above, and return over the same route. Route No. 70: From Rock Island over US Hwy 150 to junction IL Hwy 81, thence over IL Hwy 81 to junction unnumbered Hwy approximately three miles east of Cambridge, IL, then over unnumbered Hwy via Ulah and Bishop Hill, IL, to junction US Hwy 34 approximately four miles east of Nekoma, IL, and thence to Peoria as specified above, and return over the same route. (This authority is contained in Certificate No. MC-29130.) Applicants request that the Commission cancel the following restriction contained in the authority sought to be transferred herein: RESTRICTION: The service authorized under Route Nos. 67 through 70, inclusive, is subject to the following conditions: The service to be performed by said carrier shall be limited to service which is auxiliary to, or supplemental of rail service of the C.R.I.& P. RR, hereinafter called the Railway. Said carrier shall not serve any point not a station on the rail line of the Railway. No shipments shall be transported by said carrier between any of the following points, or through or to or from more than one of said points: LaSalle, Peoria, and Rock Island, IL. All contractual arrangements between said carrier and the Railway shall be reported to the Commission and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties. Such further specified conditions as the Commission, in the future, may find it necessary to impose in order to restrict said carrier's operation to service which is auxiliary to, or supplemental of rail service. Transferee is authorized to operate as a regular route common carrier in the states of IA, IL, IN, MN and WI. Application has been filed for temporary authority under Section 210a(b). (Hearing site: Des Moines, Iowa.)

MC-F-13827F. Authority sought for purchase by KUJAK TRANSPORT, INC., Junction Avenue, Winona, MN., 55987 of a portion of the operating rights of KATUIN BROS., INC., Hiway 61 South, P.O. Box 311, Dubuque, IA and for acquisition by HUBERT KUJAK and MARTIN KUJAK of control of such rights through the acquisition. Applicants representatives: John P. Rhodes, P.O. Box 5000, Waterloo, IA., 50704 and Carl E. Munson, 469 Fischer Bldg., Dubuque, IA., 52001. Operating rights sought to be purchased are those contained in MC-126539 Sub No's 26, 29, 31, and 33 thereunder which authorize transportation of: liquid fertilizer, in bulk, (1) from Fulton, IL to points in IA, MO (except St. Louis and Commercial Zone), MN and WI; and (2) from Durant, IA to points in AR, IL (except St. Louis and Commercial Zone), IN, KS, KY, MN, MO, NE, SD, TN and WI; fertilizer and fertilizer materials, in bulk, from Albany, IL to points in IA, MN, and WI; restricted in (1) above to shipments originating at the named origin and destined to the named destinations; metal containers, composite containers, and container ends from Massillon, OH to points in IL, IN, IA, MI, MN, MO, NE and WI and from Fort Madison, IA to Massillon, OH, restricted to the transportation of traffic originating at the named origin points and destined to the named destinations. KUJAK TRANSPORT, INC., holds no authority from this Commission. However, the stock of KUJAK TRANSPORT, INC. is owned by the same persons owning stock of KUJAK BROS. TRANSFER, INC. KUJAK TRANSPORT INC. is operator of KUJAK BROS. TRANSFER, INC., pursuant to Docket MC-F-13730F authorizing transportation of specific commodities between named points and places in MN, WI, IA, IL, IN, OH and KY. No dual operations or duplicate authority involved. Application has been filed for temporary authority under section 210a(b). (Hearing site: Chicago, IL).

MC-F-13830F. Authority sought for control and merger by PAUL ARPIN VAN LINES, INC., 150 Manton Avenue, Providence, RI 02909, of the operating rights of T.E.K. VAN LINES, INC., 9123 East Garvey Boulevard, Rosemead, CA 91770, and for acquisition by PAUL G. APRIN and LOUISE M. ARPIN, both of 150 Manton Avenue, Providence, RI 02909, of control of such rights through the transaction. Applicants' attorneys: Herbert Burstein, Suite 2373, One World Trade Center, New York NY 10048 and Robert J. Gallagher, Suite 1200, 1000 Connecticut Avenue, N.W., Washington, D.C. 20036. Operating rights sought to be controlled and merged: Under Certificate No. MC-119049, authorizing *household goods* as a *common carrier* over irregular routes between points in AZ and CA on the one hand, and, on the other, points in LA, MO, and TX. PAUL ARPIN VAN LINES, INC., holds authority in MC-621 as follows: Household goods, as defined by the Commission, as a *common carrier* between points in that part of the US east of a line beginning at the mouth of the Mississippi River and extending along the Mississippi River to junction of the MN-WI State line, and thence along the MN-WI State line to Lake Superior; Between points in NY and NJ on the one hand, and, on the other, points in AR, IA, KS, LA, MN, MO, NE, ND, OK, SD, and TX; Between points in Cowley Country, KS, on the one hand, and, on the other, points in AR, CO, MO, and NE; Between Winfield KS, and points in KS within 50 miles of Winfield, on the one hand, and, on the other, points in AR, IL, MO, and NE. Emigrant movables, between Winfield, KS, and points in KS within 50 miles of Winfield, on the one hand, and, on the other, points in AR, IL, MO, and NE. Sub-4: Household goods as defined by the Commission, between points in AR, CO, IL, IA, KS, KY, LA, MN, MS, MO, NE, OK, TN, TX, and WI. Application has been filed for temporary authority under section 210a(b).

MOTOR CARRIER ALTERNATE ROUTE DEVIATIONS—NOTICE

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Property (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this FEDERAL REGISTER notice.

Each applicant states that there will be no significant effect on either the quality of the human environment or energy policy and conservation.

MOTOR CARRIERS OF PROPERTY

MC 2202 (Deviation No. 167), ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Blvd., Akron, OH 44309, filed November 8, 1978. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Columbus, GA over US Hwy 80 to junction AL Hwy 169, then over AL Hwy 169 to junction US Hwy 280, then over US Hwy 280 to junction US Hwy 78, then over US Hwy 78 to Fulton, MS, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Columbus, GA over US Hwy 280 to Birmingham, AL, then over US Hwy 11 to junction US Hwy 82, then over US Hwy 82 to Reform, AL, then over AL Hwy 17 to Sulligent, AL, then over US Hwy 278 to Amory, MS, then over MS Hwy 25 to Fulton, MS, and return over the same route.

MC 11220 (Deviation No. 36), GORDONS TRANSPORTS, INC., 185 W. McLemore Ave., P.O. Box 59, Memphis, TN 38101, filed November 14, 1978. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Durant, OK over US Hwy 69 to junction Interstate Hwy 44, then over Interstate Hwy 44 to junction OK Hwy 10, then over OK Hwy 10 to junction OK Hwy 137, then over OK Hwy 137 to junction US Hwy 66, then over US Hwy 66 to junction KS Hwy 26, then over KS Hwy 26 to junction US Hwy 69, then over US Hwy 69 to Kansas City, MO and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Durant, OK over US Hwy 70 to junction US Hwy 271 near Hugo, OK, then over US Hwy 271 to junction AR Hwy 45, then over AR Hwy 45 to Fort Smith, AR, then over US Hwy 71 to Kansas City, MO and return over the same route.

NOTE.—The above-described authority is restricted against service between Texarkana, TX-AR, on the one hand, and, on the other, Sherman and Dallas, TX.

MC 29555 (Deviation No. 25), BRIGGS TRANSPORTATION CO., North 400, Griggs-Midway Bldg., St. Paul, MN 55104, filed October 10, 1978, as amended. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Cedar Rapids, IA, over Interstate Hwy 380 to junction Interstate Hwy 80, then over Interstate Hwy 80 to junction IA Hwy 38, then over IA Hwy 38 to junction US Hwy 61, then over US Hwy 61 to Burlington, IA, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Cedar Rapids, IA over US Hwy 30 to junction Alternate US Hwy 30, then over Alternate US Hwy 30 to Chicago, IL, then over US Hwy 34 to Burlington, IA and return over the same route.

MC 69901 (Deviation No. 7), COURIER-NEWSOM EXPRESS, INC., 2830 National Road, Columbus, IN 47201,

D E 7 7 8 UMI

V 4 3 / 2 3 6

filed November 14, 1978. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Nashville, TN over Interstate Hwy 65 to Gary, IN, then over Interstate Hwy 90 to Chicago, IL, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Nashville, TN, over U.S. Hwy 70N to junction U.S. Hwy 70S, then over U.S. Hwy 70S to junction U.S. Hwy 70, then over U.S. Hwy 70 to junction U.S. Hwy 25W, then over U.S. Hwy 25W to junction TN Hwy 61, then over TN Hwy 61 to junction TN Hwy 62, then over TN Hwy 62 to junction U.S. Hwy 27, then over U.S. Hwy 27 to junction U.S. Hwy 150, then over U.S. Hwy 150 to junction KY Hwy 35, then over KY Hwy 35 to junction KY Hwy 151, then over KY Hwy 151 to junction U.S. Hwy 60, then over U.S. Hwy 60 to junction U.S. Hwy 31E, then over U.S. Hwy 31E to junction U.S. Hwy 31, then over U.S. Hwy 31 to junction IN Hwy 9, then over IN Hwy 9 to junction IN Hwy 7, then over IN Hwy 7 to junction Alternate U.S. Hwy 31, then over alternate U.S. Hwy 31 to junction U.S. Hwy 31, then over U.S. Hwy 31 to junction U.S. Hwy 421, then over U.S. Hwy. 421 to junction IN Hwy 29, then over IN Hwy 29 to junction U.S. Hwy 35, then over U.S. Hwy 35 to junction IN Hwy 2, then over IN Hwy 2 to junction U.S. Hwy 6, then over U.S. Hwy 6 to junction IL Hwy 1-A, then over IL Hwy 1-A to Chicago, IL, and return over the same route.

MC 75320 (Deviation No. 68), CAMPBELL SIXTY-SIX EXPRESS, INC., P.O. Box 807, Springfield, MO 65801, filed May 31, 1978. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Houston, TX over Interstate Hwy 10 to junction US Hwy 171 near Lake Charles, LA, then over US Hwy 171 to junction Interstate Hwy 20 near Shreveport, LA, then over Interstate Hwy 20 near Shreveport, LA, then over Interstate Hwy 20 to Jackson, MS, and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: (1) From Houston, TX over US Hwy 290 to Hempstead, TX, then over TX Hwy 6 to Waco, TX then over US Hwy 81 to Hillsboro, TX, then over US Hwy 77 to Dallas, TX, and (2) From Dallas, TX over US Hwy 80 to Jackson, MS and return over the same routes.

NOTE.—This deviation is premised on a grant of temporary authority under section 210(a)(b). If applicant's right to operate all or part of the leased authority expires, this deviation, if authorized, will likewise expire.

MOTOR CARRIER INTRASTATE APPLICATION(S)—NOTICE

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 10931 (formerly Section 206(a)(6)) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's *General Rules of Practice* (49 CFR 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of state Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

Alaska Docket No. 78-525-MF/E, filed October 20, 1978. Applicant: KEYSTONE SERVICES, INC., 5511 Minnesota Drive, Anchorage, AK 99502. Representative: Timothy G. Middleton, 645 G Street, Suite 404, Anchorage, AK 99501. Certificate of Public Convenience and Necessity sought to operate a freight service, as a common carrier, as follows: Transportation of: *General commodities* (except household goods as defined by the Interstate Commerce Commission, and commodities in bulk, but including copying, duplicating and reproducing machines, parts, accessories, supplies, office equipment and furnishings), between points and places in Alaska. Intrastate, interstate and foreign commerce authority sought. HEARING: Date, time and place not yet fixed. Requests for procedural information should be addressed to Alaska Transportation Commission, 1000 MacKay Building, 338 Denali Street, Anchorage, AK 99501, and should not be directed to the Interstate Commerce Commission.

By the Commission.

H. G. HOMME, JR.,
Secretary.

[Notice No. 751]

ASSIGNMENT OF HEARINGS

DECEMBER 4, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 504 (Sub No. 102), Harper Motor Lines, Inc., now assigned December 4, 1978, is canceled; application dismissed.

MC 136981 (Sub No. 8F), Blair Cartage, Inc., now assigned for hearing on December 12, 1978, at Columbus, Ohio and will be held in Room 235, Federal Building.

MC 115654 (Sub No. 88F), Tennessee Cartage Co., Inc., now assigned for hearing on December 13, 1978, at Columbus, Ohio and will be held in Room 235, Federal Building.

MC 138469 (Sub-No. 67F), Donco Carriers, Inc., now being assigned for hearing on February 6, 1979, (4 days), at Dallas, Texas in a hearing room to be later designated.

MC 96324 (Sub-No. 25F), General Delivery, Inc., now being assigned for hearing on February 21, 1979, (3 days), at Pittsburgh, PA. in a hearing room to be later designated.

MC 134922 (Sub-No. 255F), B. J. McAdams, Inc., now being assigned for hearing on February 26, 1979, (1 day), at Columbus, Ohio in a hearing room to be later designated.

MC 144231 (Sub-No. 2F), Leann, Inc., now being assigned for hearing on February 27, 1979, (1 day), at Columbus, Ohio in a hearing room to be later designated.

MC 124211 (Sub-No. 325F), Hilt Truck Lines, Inc., now being assigned for hearing on February 28, 1979, (1 day), at Columbus, Ohio in a hearing room to be later designated.

MC 52861 (Sub-No. 42F), Wills Trucking, Inc., now being assigned for hearing on March 1, 1979, (2 days), at Columbus, Ohio in a hearing room to be later designated.

H. G. HOMME, JR.,
Secretary.

[No. 37056]

COLORADO INTRASTATE FREIGHT RATES AND CHARGES—1978

Decision

By joint petition filed October 18, 1978, petitioners, 10 common carriers by railroad[1] operating in intrastate commerce in Colorado, request that this Commission institute an investigation of their Colorado intrastate freight rates and charges, under 49 U.S.C. 11501 and 11502; section 13 of the former Interstate Commerce Act. They seek an order authorizing them to increase such rates and charges in the same amounts approved for interstate application by this Commission in Ex Parte No. 349. Petitioners have stated grounds sufficient to warrant instituting an investigation.

It is ordered:

The petition is granted. An investigation, under 49 U.S.C. 11501 and 11502, is instituted to determine whether the Colorado intrastate rail freight rates in any respect cause any unjust discrimination against or any undue burden on interstate or foreign commerce, or cause undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce and persons or localities in interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full increases authorized for interstate application by this Commission in Ex Parte No. 349. In the investigation we shall also determine if any rates or charges, or maximum or minimum charges, or both, should be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist.

All common carriers by railroad operating in Colorado subject to the jurisdiction of the Commission are made respondents in this proceeding.

All persons who wish to participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, DC 20423, on or before 15 days from the FEDERAL REGISTER publication date. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. This Commission desires participation of only those who intend to take an active part in this proceeding.

As soon as practicable after the last day for indicating a desire to participate in the proceeding, this Commission will serve a list of names and addresses on all persons upon whom service of all pleadings must be made. Thereafter, this proceeding will be assigned for oral hearing or handling under modified procedure.

A copy of this order shall be served upon each of the petitioners and respondents. Colorado shall be notified of the proceeding by sending copies of this order by certified mail to the Governor of Colorado. Further notice of this proceeding shall be given to the public by depositing a copy of this order in the Office of the Secretary of the Interstate Commerce Commission at Washington, DC, and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

This is not a major Federal action significantly affecting the quality of the human environment. Furthermore, this decision is not a major regulatory action under the Energy Policy and Conservation Act of 1975.

Dated at Washington, DC, this 28th day of November, 1978.

By the Commission, Alan Fitzwater, Director, Office of Proceedings.

H. G. HOMME, JR.,
Acting Secretary.

FOURTH SECTION APPLICATION FOR RELIEF

DECEMBER 4, 1978.

This application for long-and-short-haul relief has been filed with the I.C.C.

Protests are due at the I.C.C. within 15 days from the date of publication of this notice.

FSA NO. 43636, Southwestern Freight Bureau, Agent's No. B-780, rates on single empty freight trailers, new or used, between stations in Southwestern and Southern Territories, in Sup. 229 to its Tariff SW/S-84-H, ICC 5012, to become effective December 30, 1978. Grounds for relief—motor carrier competition; modified short line distance formula and grouping.

By the Commission.

H. G. HOMME, JR.,
Secretary.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

DECEMBER 1, 1978.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination Rules* (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before December 17, 1978. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will *not* operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a *common carrier*, by motor vehicles, over irregular routes.

MC 96324 (Sub-E29) (Correction), filed February 9, 1976, published in the FEDERAL REGISTER, issue of November 14, 1978, and republished as corrected, this issue: Applicant: GENERAL DELIVERY INC., P.O. Box 1816, Fairmont, WV. Representative: Harold G. Hernly, Jr., Esq., 118 North St. Asaph Street, Alexandria, VA 22314. *Glass containers and pottery containers*, from those points in PA on and north and west of a line beginning at the PA-OH State line, and extending along U.S. Hwy 22 to junction of U.S. Hwy 219, then north along U.S. Hwy 219 to the PA-NY State line, to points in NC. Gateways eliminated: Harrison County and Short Gap, WV. The purpose of this republication is to correct the territorial description.

MC 107012 (Sub-E255), filed July 7, 1977. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Fort Wayne, IN 46801. Representatives: David D. Bishop and Gary M. Crist (same address as above). *New Household Appliances, crated*—

WV; (2) between points in WY on and west of a line beginning at the WY-CO State line and extending along WY Hwy 430 to junction U.S. Hwy 187, then along U.S. Hwy 187 to junction U.S. Hwy 89, then along U.S. Hwy 89 to the WY-MT State line, on the one hand, and, on the other, points in NY on and east of a line beginning at the NY-PA State line, and extending along I Hwy 81 to junction N.Y. Hwy 7, then east along NY Hwy 7 to junction N.Y. Hwy 30, then north along NY Hwy 30 to junction N.Y. Hwy 8, then north along NY Hwy 8 to junction U.S. Hwy 9, then along U.S. Hwy 9 to the International Boundary line between the United States and Canada, points in NH, VT, and those points in PA on and south and east of a line beginning at PA-WV State line and extending along I Hwy 70 to junction I Hwy 76, then along I Hwy 76 to junction I Hwy 81, then north along I Hwy 81 to the PA-NY State line; (3) between points in WY, on the one hand, and, on the other, points in IL on and south of Hwy 13, points in IN on and south of Hwy 50, and points in OH on and south of U.S. Hwy 50; (4) between points in WY on and west of WY Hwy 120 and WY Hwy 789, on the one hand, and, on the other, points in WV; and (5) between points in WY on and east of Hwy 120 and WY Hwy 789, on the one hand, and, on the other, points in WV on and south of U.S. Hwy 60 (West Memphis, AR and South Haven, MS);* (40) between points in WY, on the one hand, and, on the other, points in AL, GA, and FL (points in AR);* (41) between points in WY, on the one hand, and, on the other, points in MS (points in AR);* (42) between points in MO, on the one hand, and, on the other, points in NC, SC, and VA (points in West Memphis, AR and South Haven, MS);* (43) between points in MO on and west of a line beginning at the MO-KS State line, and extending along U.S. Hwy 66 to junction U.S. Hwy 65, then south along U.S. Hwy 65 to junction U.S. Hwy 60, then east along U.S. Hwy 60, to the MO-KY State line, on the one hand, and, on the other, points in CT, DC, DE, MD, NH, NJ, NY, RI, and VT (West Memphis, AR and South Haven MS)* (44) between points in MO on and east and south of a line beginning at the MO-AR State line, and extending along U.S. Hwy 63, then along U.S. Hwy 63 to junction U.S. Hwy 60, then east along U.S. Hwy 60 to junction U.S. Hwy 67, then south along U.S. Hwy 67 to the MO-AR State line, on the one hand, and, on the other, points in MI on and east of I Hwy 75, and points in OH (West Memphis, AR and South Haven, MS);* (45) between points in MO on and west and south of a line beginning at the MO-IA State line, and extending along U.S. Hwy 65, then south along U.S. Hwy 65 to junction U.S. Hwy 40, then east U.S. Hwy 40 to junction U.S. Hwy 63, then south along U.S. Hwy 63 to the MO-AR State line, on the one hand, and, on the other, points in TN (West Memphis, AR and South Haven, MS)* (46) between points in MO on and east of a line beginning at the MO-IA State line and extending along U.S. Hwy 65, then along U.S. Hwy 65 to junction U.S. Hwy 40, then east along U.S. Hwy 40 to junction U.S. Hwy 63, then north along U.S. Hwy 63 to the MO-IA State line, on the one hand, and, on the other, points in TN on and south of Hwy 70; (47) between points in MO on and east and south of a line beginning at the MO-AR State line, and extending along U.S. Hwy 63 to junction U.S. Hwy 60, then MO-KY State line, on the one hand, and, on the other, points in PA, points in ND on and west and south of a line, beginning at the International Boundary line between United States and Canada, and extending along U.S. Hwy 83, then south along U.S. Hwy 10, then east along U.S. Hwy 10 to junction ND Hwy 3, then south along ND Hwy 3 to the ND-SD State line, points in SD on and west of a line beginning at the SD-ND State line and extending along U.S. Hwy 85 to junction U.S. Hwy 385, then south along U.S. Hwy 385 to the SD-NE State line (West Memphis, AR and South Haven, MS);* (48) between points in MO on and south and west of a line beginning at the MO-KS State line and extending along U.S. Hwy 40, then along U.S. Hwy 40 to junction U.S. Hwy 65, then along U.S. Hwy 65 to junction U.S. Hwy 60, then east along U.S. Hwy 60 to the MO-KY State line, on the one hand, and, on the other, points in MS and ME (West Memphis, AR and South Haven, MS);* (49) between points in MO on and south and west of a line beginning at the MO-KS State line and extending along U.S. Hwy 66 to junction U.S. Hwy 65, then along U.S. Hwy 65 to junction U.S. Hwy 60, then east along U.S. Hwy 60 to junction U.S. Hwy 63, then along U.S. Hwy 63 to the MO-AR State line, on the one hand, and, on the other, points in KY on and east of U.S. Hwy 31-E, points in OH on and east and south of a line beginning at the OH-KY State line and extending along U.S. Hwy 23, then along U.S. Hwy 23, then along U.S. Hwy 23 to junction U.S. Hwy 50, then along U.S. Hwy 50 to the OH-WV State line, and points in WV (West Memphis, AR and South Haven, MS);* (50) between points in Missouri, on the one hand, and, on the other, points in GA, AL, and FL (points in AR);* (51) between points in MO, on the one hand, and, on the other, points in MS (points in AR);* (52) between points in OK, on the one hand, and, on the other, points in CT, DE, KY, ME, MD, MA, NH, NJ, NY, NC, OH, PA, RI, SC, TN, VT, VA, WV, and DC (South Haven, MS);* (53) between points in OK on and south and west of a line beginning at the OK-TX State line and extending along U.S. Hwy 66 to junction U.S. Hwy 281, then south along U.S. Hwy 281 to the OK-TX State line, on the one hand, and, on the other, points in Illinois on and east of U.S. Hwy 51 (South Haven, MS);* (54) between points in OK on and east of a line beginning at the OK-TX State line, and extending along U.S. Hwy 281 then along U.S. Hwy 281 to junction OK Hwy 33, then along OK Hwy 33 to junction U.S. Hwy 177, then south along U.S. Hwy 177 to junction U.S. Hwy 70, then west along U.S. Hwy 70 to junction U.S. Hwy 77, then south along U.S. Hwy 77 to the OK-TX State line, on the one hand, and, on the other, points in IL on and east and south of a line beginning at the IL-KY State line and extending along U.S. Hwy 51 to junction IL Hwy 54, then east along IL Hwy 54 to junction U.S. Hwy 150, then east along U.S. Hwy 150 to junction U.S. Hwy 136, then along U.S. Hwy 136 to the IL-IN State line (South Haven, MS);* (55) between points in OK on and east and south of a line beginning at the OK-TX State line, and extending along U.S. Hwy 77 to junction OK Hwy 19, then east along OK Hwy 19 to junction OK Hwy 1, then north along OK Hwy 1 to junction U.S. Hwy 270, then east along U.S. Hwy 270 to the OK-AR State line, on the one hand, and, on the other, points in IL (South Haven, MS);* (56) between points in OK on and north of a line beginning at the OK-TX State line, and extending along U.S. Hwy 66, then along U.S. Hwy 66 to junction U.S. Hwy 281, then north along U.S. Hwy 281 to junction OK Hwy 33, then east along OK Hwy 33 to junction U.S. Hwy 177, then south along U.S. Hwy 177 to junction OK Hwy 19, then along OK Hwy 19 to junction OK Hwy 1, then along OK Hwy 1 to junction U.S. Hwy 270, then east along U.S. Hwy 270 to the OK-AR State line, on the one hand, and, on the other, points in Illinois on and south of IL Hwy 13 (South Haven, MS);* (57) between points in OK on and south of I Hwy 40, on the one hand, and, on the other, points in IN (South Haven, MS);* (58) between points in OK on and north of I Hwy 40 (except those points on and east of a line beginning at the OK-KS State line and extending along U.S. Hwy 183 to junction U.S. Hwy 64, then east along U.S. Hwy 64 to junction U.S. Hwy 81, then north along U.S. Hwy 81 to the OK-KS State line), on the one hand, and, on the other, points in IN on and east and south of a line beginning at the IN-MI State line, and extending along U.S. Hwy 31 to junction U.S. Hwy 40, then south along U.S. Hwy 40 to the IN-IL State line (South Haven, MS);* (59) between points in OK on and west and south of a line beginning at the OK-KS State line, and extending along U.S. Hwy 77, then south along U.S. Hwy 77 to junction U.S. Hwy 60, then east along U.S. Hwy 60 to the OK-MO State line, on the one hand, and on the other, points in MI (South Haven, MS);* (60) between points in OK on and east and south of a line beginning at the OK-TX State line, and extending along U.S. Hwy 69 to junction U.S. Hwy 270, then east east along U.S. Hwy 270 to the OK-AR State line, on the other hand, and, on the other, points in WI (South Haven, MS);* (61) between points in OK on and south extending along U.S. Hwy 51 to junction U.S. Hwy 151, then along U.S. Hwy 151 to junction U.S. Hwy 41, then along U.S. Hwy 41 to junction WI Hwy 57, then north along WI Hwy 57 to Green Bay (South Haven, MS);* Restriction: The service authorized herein is subject to the following conditions: The authority granted herein is restricted to the transportation of traffic originating at or destined to pipeline rights-of-way. The authority granted herein is restricted against the transportation of traffic (1) from Lone Star, TX, to Memphis, TN, and points in AL, AR, FL, GA, KS, LA, MS, and OK; (2) from the plant sites and warehouse facilities of Jones & Laughlin Steel Corporation, at or near Gainesville, TX, to points in AR, LA, MO, OK, and TX; and (3) from the plant site of Tex-Tube Division, Detroit Steel Corporation, at Houston, TX, to points in the United States (except AK, HI, and TX). The purpose of this filing is to eliminate the gateways denoted by asterisks above.

NOTE.—This letter-notice originally filed as MC-106407 (Sub-No. E5). By application for transfer of authority cited in MC-106407 (Sub-No. 21), Mercer Water & Sewer Transportation Co. Transferee and T. E. Mercer Trucking Co. Transferor, filed on or about March 11, 1976 in MC-FC-76451, an order was entered March 7, 1977 (corrected order served April 4, 1977) and the transfer was approved.

By the Commission.

H. G. HOMME, Jr.,
Secretary.

[Notice No. 229]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

DECEMBER 4, 1978.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

W-406 (Sub-12TA). By order entered October 25, 1978, the Motor Carrier Board granted Ohio Barge Line, Inc., Pittsburgh, PA, 180 day temporary authority to engage in the transportation by water vessel, in interstate commerce, in the transportation of iron and steel articles, by non-self propelled vessels with the use of separate towing vessels, from the facilities of United States Steel Corporation at South Chicago, IL, and Central Wharf facility of Homestead District Works, at Munhall, PA, to lock and dam number one (mile 42.6) on the Red River in Louisiana. Henry M. Wick, Jr., 2310 Grant Building, Pittsburgh, PA 15219, for applicant. Any interested person may file a petition for reconsideration within 20 days of the date of this publication. Within 20 days after the filing of such petition with the Commission, any interested person may file and serve a reply thereto.

MC 140025 (Sub-2TA), filed July 31, 1978, published in the FEDERAL REGISTER October 16, 1978 and republished this issue. Applicant: L & T, INC., 2650 West Beaver Street, Jacksonville, FL 32205. Representative: McCarthy Crenshaw, 21 West Church Street, 1205 Universla Marion Building, Jacksonville, FL 32202. By order entered November 21, 1978, the Motor Carrier Board granted applicant, 180 day temporary authority to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, in containers or trailers, (except motor vehicles, commodities in bulk and those requiring specialized handling or rigging), between points in the Jacksonville, FL commercial zone, restricted to traffic having an immediate prior or subsequent movement by water. Supporting shipper(s): (1) Sea and Services, Inc., P.O. Box 1050, Elizabeth, NJ. (2) Puerto Rico Maritime Shipping Authority, P.O. Box 26483, 10001 Lake Forest Blvd., 4th Floor, New Orleans, LA 70186.

Any interested person may file a petition for reconsideration within 20 days of the date of this publication. Within 20 days after the filing of such petition with the Commission, any interested person may file and serve a reply thereto.

Purpose of this republication is to reflect the broader scope of authority granted by the Motor Carrier Board.

H. G. HOMME, Jr.,
Secretary.

[7035-01-M]

[Notice No. 138]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission, on or before January 8, 1979. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Com-

D E 7 7 8 UMI

V 43/236 DEC 7 78 UMI

mission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which portestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

FD-28902. By decision of December 1, 1978, the Motor Carrier Board approved the transfer from Brent Towing Company, Inc., Lake Ferguson, P.O. Drawer 8, Greenville, MS 38701, to Brent Contract Carriers, Inc., Industrial Fill, Greenville, MS 28701 of the operating rights set forth in Permit W-1315 (Sub-No. 1) issued August 7, 1978 as follows: By towing vessels, in the transportation of plastic materials and products, in containers, between Texas City and North Seadrift, TX, on the one hand, and, on the other, Leetsdale, PA, limited to a transportation service to be performed under a continuing contract(s) with Union Carbide Corporation. Applicants representative: David A. Sutherland, Esq., 1150 Connecticut Avenue, N.W., Washington, D.C. 20036.

MC-FC-77878, filed September 26, 1978. Transferee: NEW WEST TRANSPORTATION, INC., 1431 North 15th Avenue, Tucson, AZ 85705. Transferor: Tucson Warehouse & Transfer Co., 1431 North 15th Avenue, Tucson, AZ 85705. Representative: John Patrick Lyons, Attorney, P.O. Box 3017, Tucson, AZ 85702. Authority is sought for purchase by transferee of a portion of the operating rights of transferor set forth in Certificate of Registration No. MC-38835 (Sub-No. 1) issued June 1, 1965, as follows: Machinery, structural steel, prefabricated steel, trusses and contractors equipment and outfits, to and from all points and places within the State of Arizona, with base of operations at Tucson, AZ. Contractors equipment and outfits shall be defined as tools and machinery necessary for and used in construction. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

MC-FC-77928, filed November 9, 1978. Transferee: WINSTON LIMOUSINE SERVICE, INC., 41 Pembrook Drive, Stony Brook, NY 11790. Transferor: Tri-Cities Limo Service, Inc., 567 Main Street, Passaic, NJ 07055. Representative: Sidney J. Leshin, Attorney, 575 Madison Avenue, New York, NY 10022. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-135268, issued May 1, 1972, as follows: Passengers, having a prior or subsequent movement by air or water, and their baggage in the same vehicle with passengers, in special operations in nonscheduled door-to-door service limited to the transportation of not more than 11 passengers in any one vehicle, not including driver thereof, between points in Bergen, Passaic, Hudson, Essex, Union and Morris Counties, NJ, on the one hand, and, on the other, JFK International Airport, La Guardia Airport, and the steamship piers in New York, NY. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

H. G. HOMME, Jr.,
Secretary.

1

CIVIL AERONAUTICS BOARD.

Notice of addition and deletion of items to the December 7, 1978, agenda.

TIME AND DATE: 10 a.m., December 7, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

Delete: 8. Docket 32293, *Northeast Points-Puerto Rico/Virgin Islands Service Investigation* (OGC).

Addition: 22a. Exemption of Air Carriers and Foreign Air Carriers from section 403(b) of the Act to Satisfy Passenger Complaints and Claims (BCP, BPDA, BIA, OGC) (Memo 8334).

STATUS: Open.

PERSON TO CONTACT:

Phylis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The staff attorney originally assigned to Docket 32293 became ill and staff work was not completed in time to allow the Board to consider the matter thoroughly. Due to additional time needed by the staff for coordination item 22a was not received on time in order to be placed on the December 7, 1978, agenda. This item concerns a proposal to grant U.S. and foreign air carriers an exemption from tariff observance requirements to permit resolution of consumer complaints. The reason for short-notice is to have the Board permit this action prior to the Christmas holiday season when air traffic is the heaviest and the likelihood of consumer problems is greater than at any other time of the year. Accordingly the following Members have voted that agency business requires the deletion of item 8 and the addition of item 22a to the December 7, 1978, agenda and that no earlier announcement of these changes was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

2

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., December 7, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of items adopted by notation.

2. Docket 31704, Nordair application to amend and renew one of its three foreign air carrier permits to operate charters between 20 named European countries and any point or points in the United States, subject to conditions and limitations (Memo 8313, BIA, OGC).

3. Docket 26487, *Transatlantic, Transpacific and Latin American Service Mail Rates Investigation* (OGC).

4. Dockets 28848, 29445, 29186, 21162, and 28800; *Improved Authority to Wichita Case; Las Vegas-Dallas/Fort Worth Nonstop Service Investigation, Memphis-Twin Cities/Milwaukee Case, Midwest-Atlanta Nonstop Service Investigation, Ohio/Indiana Points Nonstop Service Investigation and Phoenix-Des Moines/Milwaukee Route Proceeding.* (OGC).

5. Docket 32143, *Austin/San Antonio-Atlanta Service* (Memo 8270-B, OGC).

6. Docket 30182, *Iowa/Illinois-Atlanta Route Proceeding,* Tentative Opinion and Order disposing of deferred issues (Memo 6950-C, OGC).

7. Docket 31570, *Southeast Alaska Service Investigation,* Procedural order (OGC).

8. Docket 32293, *Northeast Points-Puerto Rico/Virgin Islands Service Investigation* (OGC).

9. Docket 33849, *Application of Southeast Airlines* for emergency exemption in the Miami-Borinquen market (OGC).

9a. Docket 30055, Phoenix-Las Vegas-Reno Competitive Nonstop Service Proceeding (OGC).

10. Docket 27186, *Schedules of KLM Royal Dutch Airlines*—Order to vacate Part 213 Orders by reason of mootness in light of Protocol to Air Transport Agreement signed March 31, 1978 (OGC, BIA, BCP).

11. Dockets 32674 and 33634, Petition of Aeroamerica, Inc., for reconsideration of Order 78-10-106 which denied Aeroamerica exemption authority to operate in the Seattle-Portland-Honolulu market pending resolution of certain consumer protection issues (Memo 8248-E, PPDA, BCP).

12. Dockets 30699 and 33019, *Oakland Service Case,* and *Chicago-Midway Expanded Service Proceeding* (Memo 8316 BPDA).

13. Dockets 33927 and 33967, National's Applications for exemptions from 401(j) to permit it to suspend air service on less than ninety-day notice at Baltimore, Boston, Philadelphia, Providence, Atlanta, Key West and Panama City (Memo 8327, PBDA).

14. Docket 32994, Order 78-10-32, Allegheny's Charleston, W. Va.-Pittsburgh Exemption and Order to Show Cause (Memo 8180-B, BPDA).

15. Dockets 31260 and 33658, Allegheny's application for certificate amendment permitting non-stop Boston-New York/Newark authority; Air New England's application for certificate amendment permitting nonstop Boston-New York/Newark authority (Memo 8326, BPDA).

16. Dockets 30909, 29531, 31371, 33260, and 33300, Application of TWA for realignment of Route 2 into two linear segments (BPDA).

17. Dockets 33750, 33751, and 33753; Airwest's notices of intent to terminate or suspend services at Stockton, Santa Barbara and Monterey-Salinas, California, respectively in 90 days (BPDA, OGC).

18. Docket 33172, Amend Allegheny Airlines' Certificate to Redesignate the Intermediate Point "Liberty-Monticello" the Intermediate Point "Catskills/Sullivan County." (Memo 8227-A, PBDA).

19. Docket 33764, et al., Petition of Braniff Airways for clarification of Order 78-11-96 (BPDA).

20. Docket 33712, Tiger International—Seaboard Acquisition Case. This case involves the preclearance of Tiger International's acquisition of up to 25 percent of Seaboard's stock in voting trust and the institution of a proceeding under section 408 for approval of acquisition control (BPDA).

21. Docket 33348, Board options on Regulation ER-1078, October 20, 1978, requiring advertising disclosure of non-compliance with denied boarding rules (BPDA, OGC, BCP, BIA).

22. Docket 33707, Application of Hawaiian for exemption from Part 250 of the Board's regulations governing denied boarding in order to carry emergency stretcher patients without paying DBC to bumped passengers (Memo 8318, BPDA).

23. Docket 32280, National Airlines' complaint regarding Western's failure to provide economic justification for its "YX Fare." (Memo 8319, BPDA).

24. Docket 27426; Application of Air New England, Inc. (ANE) and Delta Air Lines, Inc. (Delta) for approval of a refinancing agreement (5123-B, BPDA, BCP).

25. Docket 30332, IATA agreements proposing varying increases in Western Hemisphere cargo rates through September 30, 1979, to compensate for cost increases. The reporting carriers support the increases; no other comments or objections have been received (Memo 8322, BPDA, BIA).

V 43/236 DE 7 78 UMI

26. Docket 30777, IATA agreement proposing piece-based baggage system between the United States and Mexico (Memo 8195-B, BPDA, BIA).
27. Docket 23080-2, Determination of service mail rates for newly certificated services of Cochise and Sky West (Memo 7673-D, BPDA).
28. Dockets 32795 and 32796; Petition for review of staff action granting Profit By Air authority to file pickup and delivery tariffs (Memo 8317, BPDA, OGC).
29. Docket 30356, *Trancontinental Low Fare Investigation* (Instructions to staff).
30. Elimination of the reporting of freight loss and damage claims data (BAS, BPDA, BCP, OEA, OCCR, OGC, BLJ).
31. Authority delegated to the Director, Bureau of Accounts and Statistics. This rule adds new delegations of authority which would, among other things, permit the Director, BAS, to issue proposed and final accounting rules in areas where Board policy is clearly established or no issues of substance are involved (Memo 8325, BAS, OGC).

STATUS: Open.

WATER RESOURCES COUNCIL

PRIVACY ACT of 1974

Systems of Records; Annual Publication

In accordance with 552(e)(4) of the Privacy Act of 1974, the U.S. Water Resources Council hereby publishes the Systems of records currently maintained by the Council. No changes have occurred since the last annual publication on September 20, 1977 42 FR page 47492.

Dated at Washington, D.C. on November 28, 1978.

Leo M. Eisel,
Director.

TABLE OF CONTENTS

WRC—2 General Financial Records
WRC—3 Operating Personnel Records
WRC—4 Payroll Records
Appendix

WRC—2

System name: General Financial Records—U.S. Water Resources Council (WRC).

System location: General Services Administration, Central Office; copies held by the Council at 2120 L Street, NW., Washington, D.C. 20037. (GSA holds records for the Council under contract.)

Categories of individuals covered by the system: Council employees.

Categories of records in the system: SF 1038, application and account for advance of funds; vendor register and vendor payment tape. Information is used by accounting technicians to maintain adequate financial information and by other offices and employees of GSA and the Council who have a need for the record in the performance of their duties.

Authority for maintenance of the system: 31 U.S.C., generally; 42 U.S.C. 1962a et seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Records also are released to GAO for audits; to the IRS for investigation; and to private attorneys, pursuant to a power of attorney.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper and tape.

Retrievability: Manual and automated by name.

Safeguards: Stored in guarded building, released only to authorized personnel.

Retention and disposal: Disposition of records shall be in accordance with the HB GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager(s) and address:
Administrative Officer
U.S. Water Resources Council
2120 L Street, NW.
Washington, D.C. 20037

Notification procedure: Contact system manager listed above.

Record access procedures: See Council access regulations in 18 CFR section 701.305.

Contesting record procedures: See Council access regulations in 18 CFR section 701.307.

Record source categories: The subject individual; the Council.

WRC—3

System name: Operating Personnel Records—U.S. Water Resources Council (WRC).

System location: Office of Program Coordination and Management, U.S. Water Resources Council, 2120 L Street, NW., Washington, D.C. 20037.

Categories of individuals covered by the system: Council employees.

Categories of records in the system: These records basically consist of copies of information which is contained in the Official Personnel Folders maintained for the Council by the Agency Liaison Division, General Services Administration. As such, they are generally limited to personal qualifications statements, training records, position descriptions, locator files, performance appraisals, commendations, incentive awards, personnel actions, and adverse actions.

Authority for maintenance of the system: 42 U.S.C. 1962a et seq.; Federal Personnel Manual Supplement 293-31, Subchapter S8.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Information in these records may be used by Council employees having a need to know in connection with a variety of personnel actions including transfers, promotions, qualifications determinations, and selection for training. Information may also be disclosed to educational institutions for training purposes, to other agencies to the extent relevant and necessary, and to prospective employees and other organizations at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Retrievability: Manual by name.

Safeguards: Retained in locked file cabinet in secured office; released only to authorized personnel.

Retention and disposal: Records are maintained during the individual's employment with the Council. When the employee leaves the Council through transfer or other separation, the record is forwarded to the Agency Liaison Division, General Services Administration, which maintains the Official Personnel Folder. There it is screened to insure that it contains no documents that should be permanently filed in the Official Personnel Folder other than exact duplicates of papers already so filed. The record and its contents are then destroyed.

System manager(s) and address:
Administrative Officer
U.S. Water Resources Council
2120 L Street, NW.
Washington, D.C. 20037

Notification procedure: Contact system manager listed above.

Record access procedures: See Council access regulations in 18 CFR section 701.305.

Contesting record procedures: See Council access regulations in 18 CFR section 701.307.

Record source categories: Information in this system of records either comes from the individual to whom it applies or is derived from information the individual supplied, except information provided by GSA or Council officials on pay, leave, and allowance records.

WRC—4

System name: Payroll Records—U.S. Water Resources Council (WRC).

System location: General Services Administration Region 3 Office; copies held by the Council 2120 L Street, NW., Washington, D.C. 20037. (GSA holds records for the Council under contract.)

Categories of individuals covered by the system: Past and present Council employees.

Categories of records in the system: Varied payroll records, including, among other documents, time and attendance cards; payment vouchers; comprehensive listing of employees; health benefits records; requests for deductions; tax forms; W-2 forms; overtime requests; leave data; retirement records. Records are used by Council and GSA employees to maintain adequate payroll information for Council employees, and otherwise by Council and GSA employees who have a need for the record in the performance of their duties.

Authority for maintenance of the system: 31 U.S.C., generally; 42 U.S.C. 1962a et seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Records also are disclosed to GAO for audits; to the Internal Revenue Service for investigation; and to private attorneys, pursuant to a power of attorney.

A copy of an employee's Department of the Treasury Form W-2, Wage and Tax Statement, also is disclosed to the State, city, or other local jurisdiction which is authorized to tax the employees's compensation.

The record will be provided in accordance with a withholding agreement between the State, city, or other local jurisdiction and the Department of the Treasury pursuant to 5 U.S.C. 5516, 5517, or 5520, or, in the absence thereof, in response to a written request from an appropriate official of the taxing jurisdiction to the Administrative Officer, U.S. Water Resources Council, 2120 L Street, NW., Washington, D.C. 20037. The request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and should indicate whether the authority of the jurisdiction to tax the employee is base on place of residence, place of employment, or both.

Pursuant to a withholding agreement between a city and the Department of the Treasury (5 U.S.C. 5520), copies of executed city tax withholding certificates shall be furnished the city in response to written request from an appropriate city official to the Administrative Officer, U.S. Water Resources Council, 2120 L Street, NW., Washington, D.C. 20037.

In the absence of a withholding agreement, the Social Security Number will be furnished only to a taxing jurisdiction which has furnished this agency with evidence of its independent authority to compel disclosure of the Social Security Number, in accordance with Section 7 of the Privacy Act, Public Law 93-579.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper and microfilm.

Retrievability: Social Security Number.

Safeguards: Stored in guarded building; released only to authorized personnel.

Retention and disposal: Disposition of records will be in accordance with the HB GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager(s) and address:
Administrative Officer
U.S. Water Resources Council
2120 L Street, NW.
Washington, D.C. 20037

Notification procedure: Contact system manager listed above.

Record access procedures: See Council access regulations in 18 CFR section 701.305.

Contesting record procedures: See Council access regulations in 18 CFR section 701.307.

Record source categories: The subject individual; the Council.

APPENDIX—WRC

In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

A record from this system of records may be disclosed as a "routine use" to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision in the matter.

A record from this system of records may be disclosed to an authorized appeal grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee. A record from this system of records may be disclosed to the United States Civil Service Commission in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

A record from this system of records may be disclosed to officers and employees of a Federal agency for purposes of audit.

Information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

A record from this system of records may be disclosed as a routine use to a Member of Congress or to a congressional staff member in response to an inquiry of the congressional office made at the request of the individual about whom the record is maintained.

A record from this system of records may be disclosed to officers and employees of the General Services Administration in connection with administrative services provided to this agency under agreement with GSA.

TABLE OF CONTENTS

WRC—2 General Financial Records
WRC—3 Operating Personnel Records
WRC—4 Payroll Records
Appendix

WRC—2

System name: General Financial Records—U.S. Water Resources Council (WRC).

System location: General Services Administration, Central Office; copies held by the Council at 2120 L Street, NW., Washington, D.C. 20037. (GSA holds records for the Council under contract.)

Categories of individuals covered by the system: Council employees.

Categories of records in the system: SF 1038, application and account for advance of funds; vendor register and vendor payment tape. Information is used by accounting technicians to maintain adequate financial information and by other offices and employees of GSA and the Council who have a need for the record in the performance of their duties.

Authority for maintenance of the system: 31 U.S.C., generally; 42 U.S.C. 1962a et seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Records also are released to GAO for audits; to the IRS for investigation; and to private attorneys, pursuant to a power of attorney.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper and tape.

Retrievability: Manual and automated by name.

Safeguards: Stored in guarded building, released only to authorized personnel.

Retention and disposal: Disposition of records shall be in accordance with the HB GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager(s) and address:

Administrative Officer
U.S. Water Resources Council
2120 L Street, NW.
Washington, D.C. 20037

Notification procedure: Contact system manager listed above.

Record access procedures: See Council access regulations in 18 CFR section 701.305.

Contesting record procedures: See Council access regulations in 18 CFR section 701.307.

Record source categories: The subject individual; the Council.

WRC—3

System name: Operating Personnel Records—U.S. Water Resources Council (WRC).

System location: Office of Program Coordination and Management, U.S. Water Resources Council, 2120 L Street, NW., Washington, D.C. 20037.

Categories of individuals covered by the system: Council employees.

Categories of records in the system: These records basically consist of copies of information which is contained in the Official Personnel Folders maintained for the Council by the Agency Liaison Division, General Services Administration. As such, they are generally limited to personal qualifications statements, training records, position descriptions, locator files, performance appraisals, commendations, incentive awards, personnel actions, and adverse actions.

Authority for maintenance of the system: 42 U.S.C. 1962a et seq.; Federal Personnel Manual Supplement 293-31, Subchapter S8.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Information in these records may be used by Council employees having a need to know in connection with a variety of personnel actions including transfers, promotions, qualifications determinations, and selection for training. Information may also be disclosed to educational institutions for training purposes, to other agencies to the extent relevant and necessary, and to prospective employees and other organizations at the request of the individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Retrievability: Manual by name.

Safeguards: Retained in locked file cabinet in secured office; released only to authorized personnel.

Retention and disposal: Records are maintained during the individual's employment with the Council. When the employee leaves the Council through transfer or other separation, the record is forwarded to the Agency Liaison Division, General Services Administration, which maintains the Official Personnel Folder. There it is screened to insure that it contains no documents that should be permanently filed in the Official Personnel Folder other than exact duplicates of papers already so filed. The record and its contents are then destroyed.

System manager(s) and address:

Administrative Officer
U.S. Water Resources Council
2120 L Street, NW.
Washington, D.C. 20037

Notification procedure: Contact system manager listed above.

Record access procedures: See Council access regulations in 18 CFR section 701.305.

Contesting record procedures: See Council access regulations in 18 CFR section 701.307.

Record source categories: Information in this system of records either comes from the individual to whom it applies or is derived from information the individual supplied, except information provided by GSA or Council officials on pay, leave, and allowance records.

WRC—4

System name: Payroll Records—U.S. Water Resources Council (WRC).

System location: General Services Administration Region 3 Office; copies held by the Council 2120 L Street, NW., Washington, D.C. 20037. (GSA holds records for the Council under contract.)

Categories of individuals covered by the system: Past and present Council employees.

Categories of records in the system: Varied payroll records, including, among other documents, time and attendance cards; payment vouchers; comprehensive listing of employees; health benefits records; requests for deductions; tax forms; W-2 forms; overtime requests; leave data; retirement records. Records are used by Council and GSA employees to maintain adequate payroll information for Council employees, and otherwise by Council and GSA employees who have a need for the record in the performance of their duties.

Authority for maintenance of the system: 31 U.S.C., generally; 42 U.S.C. 1962a et seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Records also are disclosed to GAO for audits; to the Internal Revenue Service for investigation; and to private attorneys, pursuant to a power of attorney.

A copy of an employee's Department of the Treasury Form W-2, Wage and Tax Statement, also is disclosed to the State, city, or other local jurisdiction which is authorized to tax the employees's compensation.

The record will be provided in accordance with a withholding agreement between the State, city, or other local jurisdiction and the Department of the Treasury pursuant to 5 U.S.C. 5516, 5517, or 5520, or, in the absence thereof, in response to a written request from an appropriate official of the taxing jurisdiction to the Administrative Officer, U.S. Water Resources Council, 2120 L Street, NW., Washington, D.C. 20037. The request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and should indicate whether the authority of the jurisdiction to tax the employee is base on place of residence, place of employment, or both.

Pursuant to a withholding agreement between a city and the Department of the Treasury (5 U.S.C. 5520), copies of executed city tax withholding certificates shall be furnished the city in response to written request from an appropriate city official to the Administrative Officer, U.S. Water Resources Council, 2120 L Street, NW., Washington, D.C. 20037.

In the absence of a withholding agreement, the Social Security Number will be furnished only to a taxing jurisdiction which has furnished this agency with evidence of its independent authority to compel disclosure of the Social Security Number, in accordance with Section 7 of the Privacy Act, Public Law 93-579.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper and microfilm.

Retrievability: Social Security Number.

Safeguards: Stored in guarded building; released only to authorized personnel.

Retention and disposal: Disposition of records will be in accordance with the HB GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager(s) and address:

Administrative Officer
U.S. Water Resources Council

Contesting record procedures: See Council access regulations in 18 CFR section 701.307.

Record source categories: The subject individual; the Council.

APPENDIX—WRC

In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

A record from this system of records may be disclosed as a "routine use" to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision in the matter.

A record from this system of records may be disclosed to an authorized appeal grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator, or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee. A record from this system of records may be disclosed to the United States Civil Service Commission in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

A record from this system of records may be disclosed to officers and employees of a Federal agency for purposes of audit.

Information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

A record from this system of records may be disclosed as a routine use to a Member of Congress or to a congressional staff member in response to an inquiry of the congressional office made at the request of the individual about whom the record is maintained.

A record from this system of records may be disclosed to officers and employees of the General Services Administration in connection with administrative services provided to this agency under agreement with GSA.

Title 10—Energy

CHAPTER II—DEPARTMENT OF ENERGY

[Docket No. ERA-R-77-16]

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Adjustments To Lower and Upper Tier Crude Oil Price Ceilings To Reflect Impact of Inflation

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA), of the Department of Energy (DOE), by this action issues Crude Oil Price Schedule No. 13, effective December 1, 1978, for the months of December 1978, and January and February 1979. The Schedule provides monthly crude oil price increases to take into account the impact of inflation, as permitted under the Emergency Petroleum Allocation Act of 1973, as amended (EPAA, Pub. L. 93-159).

Beginning in December 1978, inflation adjustments will be applied to the projected November 1978 lower tier and upper tier prices (approximately $5.65 per barrel and $12.61 per barrel respectively), resulting in lower tier and upper tier prices for the months of December 1978, and January and February 1979 of approximately $5.68, $5.71, and $5.74 per barrel (lower tier) and $12.68, $12.75, and $12.82 per barrel (upper tier), respectively.

EFFECTIVE DATE: December 1, 1978.

SUPPLEMENTARY INFORMATION:

A. *Introduction.*
B. *Crude Oil Price Schedule No. 13.*

A. Introduction

Under the EPAA, Congress provided flexibility to control first sale prices of domestic crude oil as long as the national weighted average first sale price ("actual composite price") did not exceed $7.66 per barrel ("statutory composite price") for all domestic crude oil produced and sold in February 1976. Beginning in March 1976, the EPAA authorized increases in the statutory composite price to reflect the effects of inflation and to provide production incentives. Under present authority, the statutory composite price is adjusted upward at a rate not to exceed 10 percent annually.

With the issuance of Crude Oil Price Schedule No. 9, (42 FR 62125, December 9, 1977), the ERA undertook to continue the policy, announced by the President in the National Energy Plan (NEP) and implemented by the Federal Energy Administration (FEA) in Crude Oil Price Schedule No. 8 (42 FR 45284, September 9, 1977), to adjust both lower tier and upper tier ceiling prices to reflect only the rate of inflation as measured by the GNP deflator. Reference should be made to the Notice which accompanied Crude Oil Price Schedule No. 8 for a description of prior actions taken by FEA to achieve compliance with the composite price constraints of the EPAA and for a discussion of the domestic crude oil pricing policy set forth in the NEP.

B. Crude Oil Price Schedule No. 13

This price schedule continues the policy as described in the Notice which accompanied Crude Oil Price Schedule No. 8. Accordingly, under Crude Oil Price Schedule No. 13, effective December 1, 1978, the November 1978 lower tier ceiling price (the May 15, 1973 posted price plus $1.96 per barrel, resulting in an average first sale price of approximately $5.65 per barrel), and the November 1978 upper tier price (the September 30, 1975 posted price less $.06, resulting in an average first sale price of approximately $12.61 per barrel), are adjusted for inflation for December 1978, and January and February 1979, based on the first revision of the GNP deflator published on November 21, 1978, which reflects an annual rate of inflation of 7.1 percent.

1. LOWER TIER CEILING PRICES

Adjustments to ceiling prices for lower tier crude oil and the approximate average first sale prices pursuant to those ceiling prices in December 1978, and January and February 1979 are determined pursuant to the following methodology:

A. ERA has computed a monthly adjustment factor of .00573 which when applied over a twelve-month period yields an effective annual rate of adjustment of 7.1 percent.
B. December 1978 adjustment = ($5.65) (.00573) per barrel = $.032 per barrel rounded to $.03 per barrel.
C. January 1979 adjustment = ($5.65 + .03 (.00573) per barrel = $.032 per barrel rounded to $.03 per barrel.
D. February 1979 adjustment = ($5.65 + .03 + .03) (.00573) per barrel = $.033 per barrel rounded to $.03 per barrel.

Based upon the monthly adjustments computed above, average lower tier ceiling prices for the months of December 1978, and January and February 1979 are computed as follows:

December 1978 = $5.65 + $.03 = $5.68.
January 1979 = $5.68 + $.03 = $5.71.
February 1979 = $5.71 + $.03 = $5.74.

Using an average highest posted field price on May 15, 1973 of $3.69 per barrel and the monthly adjustments as computed above, lower tier prices for the next 3 months have been determined as follows:

Month	Ceiling price	Price [1]
December 1978	May 15, 1973, highest posted field price plus $1.99.	$5.68
January 1979	May 15, 1973, highest posted field price plus $2.02.	5.71
February 1979	May 15, 1973, highest posted field price plus $2.05.	5.74

[1] Estimated average first sale price.

2. UPPER TIER CEILING PRICES.

Adjustments to ceiling prices for upper tier crude oil and the approximate average first sale prices pursuant to those ceiling prices in December 1978, and January and February 1979 are determined pursuant to the following methodology:

A. Adjustment factor (explained above) = .00573.
B. December 1978 adjustment = ($12.61) (.00573) per barrel = $.072 per barrel rounded to $.07 per barrel.
C. January 1979 adjustment = ($12.61 + .07) (.00573) per barrel = $.073 per barrel rounded to $.07 per barrel.
D. February 1979 adjustment = ($12.61 + $.07 + $.07) (.00573) per barrel =$.073 per barrel rounded to $.07 per barrel.

Based upon monthly adjustments computed above, average upper tier ceiling prices for the months of December 1978, and January and February 1979 are computed as follows:

December 1978 = $12.61 + $.07 = $12.68.
January 1979 = $12.68 + $.07 = $12.75.
February 1979 = $12.75 + $.07 = $12.82.

Using an average highest posted field price on September 30, 1975, of $12.67 per barrel and the monthly adjustments as computed above, upper tier prices for the next 3 months have been determined as follows:

Month	Ceiling price	Price [1]
December 1978	Sept. 30, 1975, highest posted field price plus $0.01[2].	$12.68
January 1979	Sept. 30, 1975, highest posted field price plus $0.08[2].	12.75
February 1979	Sept. 30, 1975, highest posted field price plus $0.15[2].	12.82

[1] Estimated average first sale price.
[2] Beginning in December 1978, the monthly adjustment to upper tier ceiling prices becomes an addition to the September 30, 1975 highest posted price.

On or before March 1, 1979, the ERA will issue Crude Oil Price Schedule No. 14, setting forth lower tier and upper tier ceiling prices for the months of March, April, and May 1979.

Month	Estimated average lower tier ceiling price	Actual lower tier price	Estimated average upper tier ceiling price	Actual upper tier price [4]	Statutory composite price	Actual composite price [1]	Cumulative excess receipts (millions)
1976:							
February	$5.04	$5.05	$11.35	$11.48	$7.66	$7.87	$49
March	5.07	5.07	11.42	11.39	7.72	7.79	67
April	5.10	5.07	11.49	11.52	7.78	7.86	86
May	5.14	5.13	11.56	11.55	7.84	7.89	97

July	1.78	−.45
August	1.81	−.38
September	1.86	−.28
October	1.91	−.17
November	1.96	−.06
December	1.99	.01
1979		
January	2.02	.08
February	2.05	.15

[1] The price referred to in 10 CFR 212.73(b)(1) or in 212.73(c)(1), 212.73(c)(3), and 212.73(c)(4).
[2] The price referred to in 10 CFR 212.74(b)(1).

This schedule of monthly price adjustments was issued by the Economic Regulatory Administration on November 30, 1978 pursuant to 10 CFR 212.77. It restates without change the lower and upper tier price ceilings applicable to crude oil produced and sold in the months of February 1976 through November 1978, as determined under 10 CFR 212.73, 212.74, and 212.77. Both lower tier and upper tier ceiling prices, which were increased under Schedule No. 12 effective September 1, 1978, are further increased as indicated in this schedule, effective December 1, 1978.

This schedule is effective only through February 28, 1979. Price ceilings for subsequent months will be provided by Schedule No. 14, to be issued on or about March 1, 1979. This schedule may, however, be superseded prior to March 1, 1978 by early issuance of Schedule No. 14 to reflect further ceiling price adjustments based on presently unanticipated trends in actual composite price levels.

[49 CFR Part 620]

FHWA/UMTA MAJOR URBAN TRANSPORTATION INVESTMENT

Policy and Procedures

AGENCY: Federal Highway Administration (FHWA) and Urban Mass Transportation Administration (UMTA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to supplement FHWA/UMTA policies and procedures by specifically requiring an analysis of alternatives in support of proposed major urban transportation investments so as to meet local and national goals and objectives in a cost-effective manner. Consistent policy and procedures are established for evaluating major highway and mass transit investments. The procedures require that State and local transportation officials conduct an analysis of alternatives for all prospective major urban transportation investments, whether they be highway or public transportation projects.

DATE: Written comments are due on or before February 5, 1979.

ADDRESS: Submit written comments, preferably in triplicate, to FHWA Docket No. 78-21, Federal Highway Administration, Room 4205, HCC-10, 400 Seventh Street, SW., Washington, D.C. 20590. The public is invited to submit their views and comments on this proposed rule and policy. All comments and suggestions received will be available for examination by any interested person at the above address between 7:45 a.m. and 4:15 p.m., ET, Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Federal Highway Administration (FHWA): Ali F. Sevin, Urban Planning Division, 202-426-0215, or Lee J. Burstyn, Office of the Chief Counsel, 202-426-0786. Office hours for FHWA are from 7:45 a.m. to 4:15 p.m., ET. Urban Mass Transportation Administration (UMTA): Joel Ettinger, Office of Planning Assistance, 202-426-2360, or Robert Bergstrom, Office of Chief Counsel, 202-426-1906. Office hours for UMTA are from 8:30 a.m. to 5 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: This notice of proposed rulemaking issues, for review and comment, a statement of Federal policy and procedures for decisions on major urban transportation investments assisted under the Urban Mass Transportation Act of 1964, as amended, and under Title 23, United States Code, Highways. The policy seeks to ensure that all federally funded transportation investments for urbanized areas meet local and national goals and objectives in a cost-effective manner. It establishes a consistent policy and procedures for evaluating proposed major highway and mass transit investments. The types of highway and mass transit projects covered include all new construction, extension, and major widening of urban freeway segments and fixed guideway transit facilities.

The proposed procedures require that State and local transportation officials conduct an analysis of alternatives for all prospective major urban transportation investments, whether they be highway or public transportation projects. The required analysis of alternatives will compare the costs of each alternative against its effectiveness in achieving a broad range of transportation, social, economic, environmental, energy conservation, and urban revitalization objectives. Thus, the analysis will provide State, local, and Federal transportation officials with a systematic and comprehensive assessment of the alternatives as an aid in decisionmaking.

Under this policy, Federal project approval will be based on a careful review of the analysis of alternatives and the Environmental Impact Statement (EIS) to asssure that the proposed alternative meets the local and national goals and objectives in a cost-effective manner.

This proposed policy should be viewed as a further step toward improving the decisionmaking process for urban transportation investments by integrating the FHWA and UMTA project development processes and more explicitly considering social, economic, and environmental factors.

As a brief background, in September 1975, FHWA and UMTA issued joint planning regulations (40 FR 42976), which integrated the planning provisions of the various transportation programs administered by the two agencies. While the joint regulations broadly defined a common planning process for all transportation mode, projects emerging from this process were still subject to different policies and procedures administratively established by the Federal agency with funding authority for the project in question.

On September 22, 1976, at 41 FR 41512, UMTA issued its "Policy on Major Urban Mass Transportation Investments," which required an alternatives analysis for major urban mass transportation investments before such projects would be considered for funding.

In the case of major highway investments, FHWA, operating under different legislative requirements, has had no formal investment policy comparable to UMTA's "Policy on Major Urban Mass Transportation Investments." Rather, FHWA has relied on its close day-to-day working relationships with the States and several FHWA regulations to encourage the consideration of social, economic, and environmental impacts in project development. Such regulations include the Process Guidelines (23 CFR Part 795), Environmental Impact and Related Statements (23 CFR Part 771), and Public Hearings and Location/Design Approval (23 CFR Part 790).

Over the past 2 years, FHWA and UMTA have become increasingly aware of the need for greater consistency in their policies and procedures beyond the system planning process for major urban transportation investments. This need stems primarily from recent changes in the types of projects eligible for funding under the Federal-aid highway program.

The Federal-Aid Highway Act of 1976 and regulations (23 CFR 810) issued by FHWA, and published at 42 FR 47339 on September 20, 1977—"Mass Transit and Special Use Highway Projects"—broadened the definition of eligible projects for Federal-aid highway funds, permitting such funds to be used for mass transit-related facilities and special use highways (e.g., use restricted to high occupancy vehicles). Thus, for the first time, there was substantial overlap in project eligibility between the FHWA and UMTA grant assistance programs.

This proposed policy is an outgrowth of the Department's recognition of the the need for improved decisionmaking in major urban transportation investments. It provides for a systematic analysis of the performance of various alternatives with regard to local and national goals and objectives in the social, economic, environmental, and energy sectors.

In consideration of the foregoing, and under the authority of 23 U.S.C. 134 and 315 and 49 U.S.C. 1601 et seq., it is proposed that Chapter I of Title 23 and Chapter VI of Title 49, Code of Federal Regulations, be amended by adding new Parts 455 and 620, respectively, each with Subparts A and B, as set forth below.

NOTE.—The Federal Highway Administration and the Urban Mass Transportation Administration have determined that this document contains a significant proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044. An evaluation of this regulation is contained in the public docket and is available for inspection.

Issued on: December 4, 1978.

BROCK ADAMS,
Secretary of Transportation.

1. Proposed Part 455 of 23 CFR Chapter I reads as follows:

PART 455—FHWA/UMTA MAJOR URBAN TRANSPORTATION INVESTMENT POLICY AND PROCEDURES

Subpart A—General Requirments

Sec.

455.101 Introduction.
455.103 Policy.
455.105 Applicability.
455.107 System and corridor planning.

Subpart B—Procedures

455.201 Purpose of subpart.
455.203 Determination of administrative responsibility.
455.205 Procedures for jointly administered analysis of alternatives.
455.207 Procedures for analysis of alternatives when FHWA has administrative responsibility.
455.209 Procedures for analysis of alternatives when UMTA has administrative responsibility.
APPENDIX A—Advisory information on FHWA procedures for analysis of alternatives under the major urban transportation investment policy and procedures.
APPENDIX B—Major urban mass transportation investments policy.
APPENDIX C—Policy toward rail transit.

AUTHORITY: 23 U.S.C. 134 and 315; 49 U.S.C. 1601 et seq. (The Urban Mass Transportation Act of 1964, as amended); 49 CFR 1.48(b) and 1.51(f).

Subpart A—General Requirements

§ 455.101 Introduction.

(a) The wide array of options for federally aided major urban transportation investments has led to the need for establishing a single investment policy to cover both the Federal Highway Administration (FHWA) and the Urban Mass Transportation Administration (UMTA) projects to assure that Federal funds are used effectively. The policy in this regulation seeks to ensure that all federally funded major transportation investments for urbanized areas meet local and national goals and objectives in a cost-effective manner. It prescribes a consistent evaluation process for proposed major highway and transit investments. Types of projects covered include new or extended heavy rail, light rail, commuter rail, freeways, busways, and major widenings of freeways or fixed guideway transit facilities proposed for urbanized areas.

(b) The FHWA/UMTA joint urban transporation planning regulations, 23 CFR 450, provide consistency in the definition and administration of urban

D E 7 7 8 UMI

V 4 3 / 2 3 6

transportation planning, but as proposed investments move from systems planning through corridor studies, coordinative efforts are needed to provide a consistent policy on major urban transportation investments. This policy and the regulations in this part provide that consistency. They apply to both FHWA and UMTA-funded major investments proposed for urbanized areas and address the entire project development process from systems planning through identification of a selected alternative.

§ 455.103 Policy.

Every major urban transportation investment proposed for FHWA or UMTA funding shall be supported by an analysis of relevant alternatives including a cost-effectiveness analysis. The scope and scale of the analysis shall be appropriate to the type of alternatives being evaluated. Federal support for major urban investments will be based on an acceptable analysis of alternatives.

§ 455.105 Applicability.

(a) Major urban transportation investments include all new construction or extensions of urban freeway segments and fixed guideway transit facilities, major freeway segment widening on existing facilities, and major widening of fixed guideway transit facilities proposed for urbanized areas.

(b) The following projects are exempt from this regulation:

(1) Lesser improvements to existing freeway or fixed guideway transit facilities, such as rehabilitation, restoration and modernization;

(2) Safety improvements or resurfacing of existing facilities;

(3) Widening of short freeway and fixed guideway transit segments;

(4) Gap closing projects on the intercity portion of Interstate routes to provide a continuous Interstate Highway System;

(5) Projects identified as part of a demonstration program; and

(6) Projects for which an alternatives analysis as required by UMTA's Policy Statement (Appendix B) has been satisfactorily completed.

(c) In order not to disrupt the existing process, highway and transit projects for which circulation of a draft Environmental Impact Statement (EIS) or negative declaration have been completed are also excluded from this regulation. However, if a draft EIS is over 3 years old and a revision is required under 23 CFR 771.12(O), this regulation applies. Projects which are exempt under this paragraph will be coordinated informally by FHWA and UMTA staff as appropriate.

§ 455.107 *System and Corridor Planning.*

(a) The FHWA/UMTA joint planning regulations, 23 CFR 450 require that all project proposals shall originate from or be given formal recognition through the system planning process. Subpart C of Part 450 requires development of a long-range transportation system plan developed through "* * * an analysis of alternative transportation facilities." Most urbanized areas have produced a long-range systems plan which reflects an awareness that different levels and types of transportation service may be needed in different portions of the metropolitan area. Some of these needs may require major investments.

(b) In system planning, consideration shall be given to a wide range of alternatives, including improvements involving better management and operation of the existing highway and public transportation networks, and different levels of service. Before completing systems planning, every effort shall be made to resolve basic modal issues or narrow the range of alternatives.

(c) Proposals for major urban transportation investments in a corridor should include transportation system management (TSM) actions to be taken to enhance corridor accessibility and convenience. Among the options that should be considered are priority treatment of buses and carpools; metering of traffic flow on highway ramps; and transit route and schedule revisions.

(d) Both the system and corridor analysis should result in a comparison of the costs and effectiveness of each alternative. Costs should include any adverse social, economic, and environmental effects as well as the capital and operating costs. Effectiveness measures include the benefits of the alternatives with respect to transportation, social, economic, and environmental conditions.

(e) The assessment of each alternative in both the system and corridor levels shall include consideration of capital and operating costs; capital efficiency, operating efficiency and productivity; effects on modal choice, level of use, environmental impacts, and energy consumption; impact on land use and urban revitalization; extent of neighborhood disruption and displacement; job creation impact; and such other social, economic, and environmental factors considered important by the local community.

Subpart B—Procedures

§ 455.201 Purpose of subpart.

This subpart contains the procedures which FHWA and UMTA wil normally follow in administering the

D E 7 7 8 UMI

policy and requirements of this regulation.

§ 455.203 Determination of administrative responsibility.

(a) The transportation officials of the areas may recommend to FHWA and UMTA field staff, corridors that are considered candidates for joint administration. The FHWA and UMTA field staffs will be responsible for informing the FHWA and UMTA Headquarters offices on all corridors proposed for joint administration.

(b) The FHWA and UMTA will determine whether the analysis of alternatives will be jointly administered or whether FHWA or UMTA will have the administrative responsibility as follows:

(1) Generally, the FHWA and UMTA will jointly administer the analysis in urbanized area corridors where

(i) The long-range planning element is unable to resolve modal issues without more refined corridor studies,

(ii) The long-range element has identified a mix of major modal investments, or

(iii) It is not clear which modal administration will be requested to fund the major investment (e.g., busways).

(2) The administrative determination will generally depend upon the proposed source of funding. To clarify, if the range of major investment alternatives includes only FHWA-funded freeways, major freeway widenings, or busways, FHWA will have the administrative responsibility. Similarly, if the range of major investment alternatives include only UMTA-unded major investments (e.g., light rail, heavy rail, commuter rail, automated guideway transit or busways), UMTA will have the administrative responsibility. In cases where one agency has the administrative responsibility, that agency will coordinate with the other, primarily at the field level.

(c) The FHWA and UMTA Administrators may also designate additional corridors for jointly administered analysis regardless of the proposed source of funding. In these cases, the applicant will be notified promptly to prevent any undue delay in program delivery.

§ 455.205 Procedures for jointly administered analysis of alternatives.

For corridors that are determined to warrant joint administration of the required analysis, the following procedures will generally apply:

(a) When the Headquarters offices decide that a jointly administered analysis is warranted, an interoffice review team will be formed including field and Headquarters office representatives.

(b) Early in the process, the interoffice review team wil meet with the appropriate local and State agencies to reach agreement on the following aspects of the analysis:

(1) The range of alternatives;

(2) The evaluation methodology;

(3) The estimation of costs and effects;

(4) The travel forecasting procedures;

(5) The citizen participation mechanism;

(6) The financing assumptions;

(7) The time horizon of the analysis;

(8) The level of detail of the analysis; and

(9) The State or local agency with primary responsibility for coordinating the study.

(c) The interoffice review team will periodically review the progress of the analysis and provide guidance as required.

(d) The jointly administered analysis should include an analysis of the feasible alternatives, a draft EIS (where necessary), and a financial plan.

(e) Upon receipt of the completed analysis, the interoffice review team will review all material to insure that the analysis was conducted in conformance with FHWA and UMTA regulation and guidelines. This review will normally be completed within 90 days of the receipt of the analysis.

(f) After the completed analysis has been found in conformance with FHWA and UMTA regulation (23 CFR 455 and 49 CFR 620) and guidelines, the appropriate modal administration will circulate the draft EIS for comment (if necessary). During the circulation period, the applicant will hold a public hearing.

(g) At the end of the circulation period, the appropriate modal administration will address the questions and comments received and correct any deficiencies. The applicant may then select a recommended project for implementation.

(h) If the project recommended for implementation meets local and national goals and objectives in a cost-effective manner, the final EIS will be processed on the recommended alternative.

(i) In those corridors where major transportation investments for both modes are warranted, the review team formed for the joint corridor analysis may be called upon to coordinate subsequent project actions.

§ 455.207 Procedures for analysis of alternatives when FHWA has the administrative responsibility.

When FHWA has the administrative responsibility, advisory information on FHWA procedures for analysis of alternatives (Appendix A), will be used

V 4 3 / 2 3 6

in administering the investment policy.

§ 455.209 Procedures for analysis of alternatives when UMTA has the administrative responsibility.

When UMTA has the administrative responsibility, the procedures outlined in UMTA's publications on "Major Urban Mass Transportation Investments" and "Policy Toward Rail Transit" (published as Appendix B and C, respectively, to this regulation) will apply.

APPENDIX A—ADVISORY INFORMATION ON FHWA PROCEDURES FOR ANALYSIS OF ALTERNATIVES UNDER THE MAJOR URBAN TRANSPORTATION INVESTMENT POLICY AND PROCEDURES

I. INTRODUCTION.

These procedures define how FHWA will assure compliance with the major investment policy and procedures (23 CFR Part 455) when FHWA has the administrative responsibility. In keeping with the joint policy, FHWA support of major urban transportation investments will be based on an acceptable analysis of alternatives and the environmental documents prepared pursuant to the National Environmental Policy Act (NEPA). The procedures integrate the existing FHWA planning and project development process with the major investment policy to assure that a cost-effectiveness analysis of alternatives is a basis for State and local decisions in support of all proposals for major urban highway investments.

II. APPLICATION.

The analysis required under 23 CFR 455 applies to all major highway investments proposed for urbanized areas where the major transportation investment(s) to be considered for a specific corridor will be highway oriented with only minor or no mass transit investments. This determination will be made through the urban transportation planning process with FHWA and UMTA concurrence. Major urban highway investments include all new construction, extensions, or major widening of urban freeway segments, not specifically exempted by the major investment policy and procedures as listed in 23 CFR 455.105(b).

III. PROCEDURES.

A. *Systems Planning.* As information is gathered in the urban transportation planning process, every effort shall be made to incorporate cost-effectiveness considerations into long-range plan development. These cost-effectiveness considerations shall be made available to the decisionmakers before plan adoption. The FHWA Regional Office will explicitly consider the adequacy of alternatives and the cost-effectiveness analysis before certifying the planning process under 23 CFR 450.122.

B. *Project Development.* The FHWA will normally apply the following procedures in administering the major investment policy on major urban highway projects:

1. The FHWA Division Office will maintain surveillance over the State's cost-effectiveness analysis procedures using the review mechanism established to monitor the Environmental Action Plan under 23 CFR 795.

2. A cost-effectiveness analysis of alternatives shall be prepared as part of the studies made in support of the draft EIS and information pertinent to the discussion of impacts and alternatives should be summarized in the draft and final EIS.

3. The cost-effectiveness analysis of alternatives shall include, where appropriate, an analysis of vehicle occupancy and alternative strategies to increase vehicle occupancy for both buses and autos. The overriding consideration of urban improvements should be the movement of people and goods, not the movement of vehicles. Strategies to increase vehicle occupancy and coordination of transportation services should be assessed for projected person-trips during the peak traffic periods. The addition of lanes should not be considered without analyzing all other acceptable strategies for handling these person-trips.

C. *Cost-Effectiveness Analysis Review Procedures.*

1. Early in the process, the FHWA Division Office will give particular attention to the following aspects of the analysis:

a. The range of alternatives;
b. The evaluation methodology;
c. The estimation of costs and effects;
d. The travel forecasting procedures;
e. The citizen participation mechanisms; and
f. The level of detail of the analysis.

2. If the completed analysis conforms with 23 CFR 455 and FHWA policy and guidelines, the FHWA Division Office will circulate the draft EIS (if necessary) for comment to assure compliance with NEPA requirements. During the circulation period, the applicant shall comply with the public hearing requirements established under 23 CFR 790.

3. At the end of the circulation period, the comments and questions received will be addressed and any deficiencies corrected. Based on the analysis submitted, the FHWA Division Office will consult with the applicant regarding the promising alternatives which appear to meet local and national goals in a cost-effective manner. The applicant may then select a recommended alternative and submit the final environmental documents on the selected alternative.

4. If the alternative selected for implementation meets local and national goals and objectives in a cost-effective manner, the FHWA will process the final environmental document(s), subject to NEPA requirements. The FHWA Division Office will monitor subsequent project development steps to assure cost-effectiveness considerations in final project design.

D. *Interstate Cost Estimate.* The instruction manual (Instruction Manual For Preparation and Submission of the 1979 Estimate of the Cost of Completing the Interstate System, January 1978)[1] for estimating the cost of completing the Interstate System outlines specific cost-effectiveness considerations in estimating the cost of completing the Interstate System. The followintg paragraphs describe how this effort relates to the Major Urban Transportation Investment Policy and Procedures.

1. When a major design revision to the Interstate highway program is requested for Interstate cost estimating purposes, a cost-effectiveness analysis of alternatives will be required before the request is approved. As

[1] This Manual is available for inspection in accordance with 49 CFR Part 7, Appendix D.

D E 7 7 8 UMI

used here, major design revisions are revisions in location, design concept, geometrics, or capacity which would result in a cost estimate increase of 20 percent or more (excluding unit cost increases due to inflation) over the previously approved cost estimate.

2. For Interstate cost estimate purposes, high cost Interstate highway segments (as defined in the Interstate cost estimate manual) will be limited to the cost developed on the basis of design concept/location approved for use in preparing the latest approved Interstate cost estimate until an acceptable analysis has been submitted.

3. Existing location or design approval given for Interstate cost estimating purposes does not constitute a commitment by FHWA to build the segment. Such a commitment must be supported by an EIS where necessary and cost-effectiveness analysis when required.

4. When an acceptable cost-effectiveness analysis of alternatives is submitted in support of a proposed revision, additional analysis will not be required at the draft EIS stage unless the estimated cost has increased significantly (exclusive of unit price changes due to inflation) or new major investment alternative design concepts are involved.

IV. EXISTING PROCEDURES

The procedures described here are designed to augment and be used in conjunction with existing FHWA requirements for Action Plans (23 CFR 795), EIS (23 CFR 771), Hearings and Location/Design Approvals (23 CFR 790).

APPENDIX B—MAJOR URBAN MASS TRANSPORTATION INVESTMENTS POLICY

FEDERAL POLICY ON ASSISTANCE FOR MAJOR URBAN MASS TRANSPORTATION INVESTMENTS

Since the beginning of this decade, the Federal Government has provided an increasing share of the Nation's capital investment in urban mass transportation. In the years ahead, as more and more communities seek Federal financial aid to improve and expand their mass transportation systems, it is more essential than ever that Federal funds be effectively and efficiently utilized.

Since each metropolitan area has differing characteristics, Federal mass transportation assistance cannot be based on standardized prescriptions. Rather, Federal support should be flexible, relying heavily on local ability to assess present and anticipated transportation needs, identify and evaluate alternative opportunities for improvement, and initiate needed actions.

The Federal Government does, however, have a strong interest in ensuring that Federal funds available for mass transportation investments be used prudently and with maximum effectiveness. While there are no simple or standard procedures that will guarantee this outcome, a careful and systematic evaluation of the implications of alternative courses of action in advance of a Federal commitment should improve the quality of decisions. To this end an analysis of transportation alternatives and the filing of a final Environmental Impact Statement will be required as a condition of eligibility for Federal assistance for a major mass transportation investment. Federal support will be available only for those alternatives which the analysis has demonstrated to be cost-effective, where effectiveness is measured by the degree to which an alternative meets the locality's transportation needs, promotes its social, economic, environmental and urban development goals, and supports national aims and objectives.

A major mass transportation investment for purposes of this Statement is any project which involves new construction or extension of a fixed guideway system (rapid rail, light rail, commuter rail, automated guideway transit) or a busway, except where such project is determined by the Administrator to be of importance as a demonstration of advanced technology. Rehabilitation and modernization projects are not included in the scope of this definition.

The analysis of alternatives shall be carried out as part of a comprehensive transportation planning process in accordance with the following principles:

A. LONG RANGE PLAN

Proposals for major mass transportation investments shall be consistent with an urban area's comprehensive long range plan which articulates the overall direction for metropolitan development and identifies major transportation corridors.

The long range plan should reflect an awareness that different levels and types of transportation service may be needed in different portions of the metropolitan area. Each major corridor should be considered individually to determine the level and type of service that will best meet its projected requirements.

The long range plan should further recognize the need for local community-level transit service as well as for express line-haul connections that foster region-wide accessibility.

As an example, a comprehensive transportation plan may call for the constuction of a rail rapid transit line in a corridor of heavy demand, a "people mover" to facilitate local circulation in the central business district, a light rail network or busways to serve intermediate capacity corridors in the lower density portions of the metropolitan area, and fleets of fixed route buses and flexibly routed paratransit vehicles acting as feeders and distributors to the higher capacity line-haul systems and providing neighborhood circulation service in the local communities within the metropolitan region.

The long range plan should be reassessed and revised periodically as part of a continuing transportation planning process to reflect changes in local goals, priorities and long range forecasts; to respond to new land development and travel patterns; to adapt to new technologies as they are developed; and to adjust to the impact of previously implemented actions.

B. INCREMENTAL DEVELOPMENT

Where an area's comprehensive long range transportation plan calls for the creation of a fixed guideway system, the system should be proposed for implementation incrementally. Initial segments of the system should be proposed in corridors which can justify the need for fixed guideway service within 15 years of the date of the analysis. Each segment should be capable of justification on its own merits.

Corridors which cannot justify fixed guideway transit service within 15 years of the date of the analysis should be provided with levels and types of service appropriate to their needs, with the level of service being progressively upgraded as demand develops. Incremental developmental aims to

V 4 3 / 2 3 6

ensure that high priority corridors receive initial attention; that appropriate balance is maintained between the transportation requirements of the entire region and those of local communities within the region, and between long range and short range needs for transportation improvements; that flexibility is preserved to respond to changing technology, land use patterns and growth objectives; and that the fiscal burden is spread over a long period of time.

C. EVALUATION OF ALTERNATIVES

In the interest of improving the quality of the local planning and investment decisions, any metropolitan area which intends to apply for Federal assistance for a major mass transportation investment must undertake an analysis of transportation alternatives with regard to any corridors in which fixed guideway facilities have been proposed for implementation. The analysis should consider a range of alternatives, including improvements involving better management and operation of the existing street and highway network, e.g., through provision of reserved lanes for buses and other high occupancy vehicles.

This analysis should assess each alternative's capital and operating costs; ridership attraction; capital and operating efficiency and productivity; effects on modal choice, level of automobile use, environmental impacts and energy consumption; impact on land use and development patterns; extent of neighborhood disruption and displacement; job creation impact; and such other factors as are considered important by the local community.

The analysis should also compare the relative costs and effectiveness of each alternative, where effectiveness is measured by the degree to which the alternative meets the locality's transportation needs, promotes its social, economic, environmental and urban development goals, and supports national aims and objectives.

As part of the analysis of alternatives, a draft Environmental Impact Statement shall be prepared jointly by UMTA and the applicant in accordance with published guidelines.

D. TRANSPORTATION SYSTEM MANAGEMENT

Plans for a fixed guideway project should include transportation system management (TSM) actions to enhance the project's accessibility and convenience and to improve the quality of transportation service in other parts of the metropolitan area which will not be served by the fixed guideway project. Supportive TSM actions shall include the provision of adequate bus and paratransit feeder services and parking facilities at transit stations, and may include other measures aimed at increasing transit ridership and reducing unnecessary use of private automobiles within the transit corridor.

E. PUBLIC INVOLVEMENT

There should be full opportunity for the timely involvement of the public, local elected officials, and all levels of government in the alternatives analysis process. This involvement should be initiated early, so that all affected groups have an opportunity to influence the process in a timely and constructive fashion, particularly as to the alternatives to be considered, measures of effectiveness to be used, actions to be taken to minimize or avoid adverse effects and priority actions for implementation.

After completion of the draft Environmental Impact Statement a formal public hearing shall be held as required by the Urban Mass Transportation Act of 1964, covering both the analysis of alternatives and the draft Environmental Impact Statement.

PROCEDURES

This section states the procedures which UMTA will normally follow in reviewing the alternatives analysis, in implementing the Environmental Impact Statement requirement of the National Environmental Policy Act of 1969, and in making funding commitments to support major mass transportation investments.

1. The initial phase of the alternatives analysis process shall involve a preliminary analysis leading to the development of a citizen involvement mechanism, the choice of appropriate demand forecasting techniques and cost-effectiveness analysis methodology, the designation of a priority corridor(s), and the selection of a small set of promising transportation alternatives for analysis. UMTA must concur in these elements of analysis before the applicant may proceed with a detailed evaluation of the alternatives.

2. After obtaining UMTA's concurrence, the applicant shall proceed with the alternatives analysis and the preparation of a proposed draft Environmental Impact Statement (EIS). The proposed draft EIS shall be combined in a single document with the results of the alternatives analysis and shall be prepared jointly by UMTA and the applicant in accordance with published UMTA guidelines. Each alternative selected for study shall be presented at the same level of detail.

The applicant shall designate, in a separate document to be submitted simultaneously, the preferred cost-effective alternative which he recommends for implementation, and state a rationale for his choice. The recommended alternative shall be described in terms of its corridor location, length of initial segment(s), technology, horizontal and vertical alignment, grade separation, station location and other relevant factors. This document shall clearly state that any recommendation is soley that of the applicant and that UMTA's judgment is reserved until the environmental process is complete.

Upon receipt of the combined alternatives analysis and proposed draft Environmental Impact Statement, UMTA will undertake a review of the document to ensure that the analysis has been carried out in conformance with UMTA policy and UMTA guidelines. This review will normally be completed within 90 days of the receipt of the draft alternatives analysis and proposed draft EIS.

4. After the consolidated alternatives analysis and proposed draft Environmental Impact Statement has been found in conformance with UMTA guidelines, UMTA will circulate it for comment. During the circulation period the applicant will hold a public hearing on the document and may, at applicant's option, include in such hearing consideration of any application for a grant for preliminary engineering on the applicant's preferred alternative.

5. At the end of the circulation period UMTA and the applicant will address the

D E 7 7 8 UMI

questions and comments received, correct any deficiencies in the analysis, and begin preparation of a final Environmental Impact Statement on a recommended alternative. The final EIS shall be prepared at the same level of detail as the draft EIS.

The final Environmental Impact Statement may also incorporate UMTA's decision with respect to a preliminary engineering grant, subject to the condition of satisfactory completion of the 30-day circulation period required for the final Environmental Impact Statement. This decision will be based upon a comparison of projects emerging from the alternatives analysis process.

UMTA may admit projects into preliminary engineering whose combined cost exceeds available Federal contract authority. This will be done in anticipation of any of several possibilities: the withdrawal of projects as a result of changing local priorities; a local decision to use non-Federal resources to finance more than 20 percent of total cost; or changing conditions such as the availability of detailed cost estimates which might lead to a later decision that a particular project cannot be Federally financed.

6. During the execution of preliminary engineering, the applicant will be expected to complete all the steps which must precede a full Federal commitment of capital grant funds to the project. These steps include providing evidence of firm commitment of the non-Federal capital share, providing evidence of State and/or local consensus regarding the financing of operating deficits, and planning for and gaining financial commitment to necessary supportive actions to promote effective utilization of the proposed fixed guideway system.

7. Upon completion of the preliminary engineering phase, the applicant may prepare a capital grant application for the construction (including final engineering and right of way acquisition) of the proposed project, and shall hold a public hearing thereon.

8. A definite funding commitment by UMTA for construction in a specific dollar amount will be made upon review of the capital grant application, the transcript of the public hearing and the detailed cost estimates emerging from preliminary engineering. The decision will be based upon a comparison of projects then pending.

APPENDIX C—POLICY TOWARD RAIL TRANSIT

For purposes of this policy statement "rail transit" means all forms of rail passenger transportation serving metropolitan areas. It includes "rail rapid transit", "light rail" and "commuter (or regional) rail" technology operating on surface, elevated or subsurface rights-of-way. The definition excludes busways and "people movers" or other types of automated guideway technology (AGT), although similar rigorous standards are also applicable to those investments.

"Rail lines" means both extensions to existing metropolitan rail systems and initial segments of new urban or metropolitan rail systems.

I. THE RATIONALE FOR FEDERAL SUPPORT OF RAIL TRANSIT

Rail transit possesses certain qualities and attributes which make it suitable in certain circumstances and inappropriate in others. Thus:

Rail transit is a highly efficient carrier of large numbers of people, and in heavily traveled corridors it is a cost-effective transportation solution. However, the number of such corridors is limited. They are likely to be found mostly in densely populated cities that possess well-defined core areas containing large concentrations of employment and retail activities. In the newer metorpolitan areas that have grown in the past fifty years and have been shaped by highways, travel patterns are more diffuse and fewer trips begin or end in the city center. These cities are likely to have fewer corridors whose traffic density is sufficient to warrant rail transit service. Nationwide, therefore, there is a fairly well-defined limit to the number of rail projects that could be justified as meritorious and deserving of Federal support in the foreseeable future.

Rail transit can vary considerably in the type and level of service, performance capabilities, design characteristics and costs. While rapid transit or commuter rail service can be justified only in very intensively used corridors, light rail transit could be an appropriate solution in corridors at the lower end of the traffic density spectrum.

Careful, site-specific planning and anlysis is, of course, necessary to determine whether rail transit is warranted and, if warranted, what type of rail technology and service is most appropriate.

Rail transit can be a supportive tool of urban revitalization. When properly coordinated with land use planning and real estate development, rail investment can help rejuvenate declining core areas, increase the city's tax base, create a more attractive investment climate and promote a more efficient, livable urban environment. For older urban centers rail transit can thus be part of a strategy to arrest center city decline and stimulate economic recovery. For newer, auto-based cities, on the other hand, with multiple growth centers scattered throughout the metropolitan area, an efficient bus system may be the most effective means of maintaining urban mobility and a healthy urban economy.

Rail transit has a demonstrated capacity to influence patterns of development and foster more intensive used of land. Many decades after streetcars went out of existence one can still trace their routes by the higher density corridors they created, often from undeveloped land. While today rail facilities are less effective in shaping land use, because automobiles have given people much greater freedom to live and work where they choose, evidence shows that, when supported by appropriate zoning policies and development incentives, rail transit can still exert a strong shaping influence on the patterns of urban growth. To the extent that it can foster higher density, clustered development, rail transit can be a means to more efficient forms of urban settlement and an instrument of long range energy conservation efforts.

In short, rail transit is and will continue to be a valuable form of urban transportation in selected circumstances, provided that local public and private leaders and interests recognize and learn to exploit its unique contributions. In particular, rail transit should be viewed as part of a strategy to promote broader national purposes. Its effectiveness should be measured not just in terms of its ability to move people, but in terms of its positive influence on the urban economy and on the long term pat-

V 4 3 / 2 3 6

terns of urban growth. Specifically, rail transit can help in our nation's efforts to revitalize distressed cities and prepare the way for a gradual transition to an energy-constrained future.

In light of the above, the Department intends to pursue the following policy toward rail transit investment:

The Department will continue to finance the construction of new rail lines and extensions to existing rail systems in those urban corridors whose population densities, travel volumes and growth patterns indicate a need for high-capacity, high-performance mass transportation service. In making decisions on initial rail segments, preference will be given to corridors serving densely populated central portions of metropolitan areas, including central cities and close-in suburbs.

Preference will also be shown to metropolitan areas which view rail transit investment as part of a long-term regional strategy to protect the environment, conserve energy, promote urban economic development and support orderly patterns of metropolitan growth.

Localities building or planning to build new rail lines or extensions to existing systems with Federal assistance will be required to commit themselves to (1) the development of a financial plan to meet capital and operating expenses; and (2) a program of local supportive actions to enhance the project's cost-effectiveness, patronage and prospect for economic viability. Such actions may include: zoning and other incentives that stimulate private real estate development around transit stations; provision of coordinated feeder services and adequate parking facilities at transit stations to expand the service area of the rail system; local land use plans and policies that are compatibie with the objectives of the rail investment; and pricing and regulatory measures designed to manage automobile use during peak hours in corridors where rail service is to be introduced.

II. CONTROLLING THE COST AND INCREASING THE EFFECTIVENESS OF RAIL TRANSIT

The Federal Government has a strong obligation to ensure that the Federal assistance dollars are spent prudently and with maximum effectiveness. To this end the Department will adhere to the following set of policies, which will apply to all rail transit proposals:

1. Any approval of a rail transit proposal must be preceded by a federally ratified, rigorous analysis of alternatives which considers rapid transit, light rail, busway, people mover and transportation system management (TSM) options. *Applicants will be required to show clearly and convincingly the need for partially or fully grade-separated transit service and to demonstrate that the proposed transit solution is, on balance, superior to other options* in terms of ridership, capital and operating expenses, transportation service, and environmental, urban revitalization and energy conservation objectives.

2. *Urban areas will have to demonstrate a compelling need for high-capacity, high-performance transit service in order to obtain Federal assistance for rail rapid transit.* Light rail transit operating partially or fully on surface rights-of-way, may offer a substantially less costly, less disruptive and more flexible rail transit option, and should be seriously considered, especially in places where extensive underground or elevated construction would otherwise be required.

3. Where the long range plan of a metropolitan region calls for the construction of an area-wide network of rail lines, *the Department will require that the system be approved and built in stages—one segment at a time.* Federal financial support will be limited to such staged projects. This incremental approach to construction of urban rail transit is aimed to ensure that the burden of financing the system is spread out in time, that high volume corridors receive priority attention, that benefits of the public investment begin to accrue as soon as possible, and that maximum feasibility is preserved to modify the system in response to advances in technology, changes in growth patterns, and other unforeseen circumstances. Each successive line segment will normally be subject to a further alternatives analysis. This analysis must contain an assessment of the effectiveness of the initially funded segments in reaching stated objectives and a method for identifying and correcting problems encountered in the construction or operation of those line segments. This policy aims to encourage the construction of the most cost effective segments first, and to discourage localities from relying on a continued flow of federal funding to complete unworthy or marginally justified segments of a system.

4. *The Department will give preference to initial rail segments serving densely populated central portions of metropolitan areas including central cities and close-in suburbs.* This policy is designed to target Federal transit investment on areas with the greatest potential payoff in terms of ridership, relief of congestion, help to transit dependents and positive real estate development and revitalization impact.

5. *Localities proposing to build rail transit with Federal assistance will be required to commit themselves to the development and implementation of a program of local supportive policies and actions designed to enhance the proposed system's cost-effectiveness, patronage and prospect for economic viability.* The Department will require evidence of reasonable progress in carrying out this program of supportive policies as a condition of initial and subsequent construction funding approvals.

The supportive actions shall include the following:

Zoning policies and development incentives to stimulate high density private real estate development around selected transit stations;

Land use plans that support or reinforce the developmental impact and shaping influence of the rail transit system;

Station area improvements in the form of plazas, malls, walkways, open spaces and other pedestrian amenities that might help reverse the physical deterioraton of the central business district or revitalize declining residential neighborhoods;

Coordinated bus and/or paratransit feeder services to the rail system, especially in low density surburban areas;

Adequate parking and other mode transfer facilities at suburban transit stations;

Pricing, regulatory or traffic control measures aimed at managing the peak-period use of automobiles with rail corridors (e.g., traffic metering, tolls, higher parking fees, elimination of employer subsidized parking).

6. *The Department will require localities to develop realistic estimates of future operating expenses and to identify and reach a local consensus on the specific means of funding these expenses.* In particular, the Department will require, as a condition of Federal capital assistance, the development of a stable and reliable source of local revenue to cover operating deficits.

7. *Construction grant contracts will be negotiated with a fixed ceiling on the federal contribution,* subject to a defined method of adjustment for inflation. Localities will be required to complete the project as defined, and absorb any additional costs incurred, except under certain specified extraordinary circumstances.

8. The Department will strengthen its role in monitoring projects during the planning and design stages in order to prevent overdesign, the introduction of unnecessary embellishments, and the use of untested technologies, subsystems and components which might adversely affect system performance and future operating and maintenance costs.

III. PROCEDURES FOR THE APPROVAL OF RAIL TRANSIT AND OTHER MAJOR FIXED GUIDEWAY TRANSIT INVESTMENTS

The Department's procedures for the approval of major capital grant requests are governed by the Statement of Policy on "Major Urban Mass Transportation Investment" published in the FEDERAL REGISTER on September 22, 1976, as supplemented by the following clarifications:

1. Explicit UMTA authorization must be obtained by any locality wishing to undertake the detailed phase (Phase II) of alternative analysis.

2. After a locality has completed an alternatives analysis and an environmental impact analysis, the Department will review the analysis to determine whether a clear and convincing case has been made for a major capital investment, i.e., a partially or fully grade-separated fixed guideway project. If DOT concludes that a persuasive case for investment has been made, it will approve a preliminary engineering grant to develop a more precise specification of the selected alternative and an estimate of its expected cost. Approval of the preliminary engineering grant will not imply any commitment to finance construction of the project. This will be made clear in the letter to the grantee.

3. If, after a careful review of the preliminary engineering data, the Department determines that the project warrants Federal support, a formal pledge, to be called a "letter of intent," will be issued to the locality. This letter will (1) fix the total amount of the Federal contributions, subject to a defined method of adjusting for inflation; (2) include a mutually agreeable schedule for anticipating Federal contributions during the life of the project; and (3) require the locality to complete construction of the project as defined, and to absorb any additional cost incurred, except under certain specified "extraordinary" circumstances.

4. Specific annual contributions under the letter of intent will be made subject to the availability of appropriations and the ability of the grant recipient to use the funds effectively.

5. The sum total of all the pledges will be a basis for estimating the DOT's 5-year discretionary grant assistance requirements and its authorization request to Congress, and for guiding DOT's multi-year programming effort. However, the Department will limit the issuance of letters of intent so that the sum of annual payments under them does not exceed the total appropriation authorizations enacted for each future year by the Congress, after allowing sufficient amounts in each of those years to cover projected costs of the standing bus and rail modernization programs.

6. Preliminary engineering grants and letters of intent will be reported annually to the Authorization and Appropriation committees of the Congress.

7. During the transition to the new authorization/budget system, however, no letters of intent will be issued until new appropriation authorizations have been approved by Congress.

2. Proposed Part 620 of 49 CFR Chapter VI reads as follows:

PART 620—FHWA/UMTA MAJOR URBAN TRANSPORTATION INVESTMENT POLICY AND PROCEDURES

§ 620.1 General requirements and procedures.

For joint regulations regarding FWHA/UMTA major urban transportation investment policy and procedures, see 23 CFR Part 455.

(23 U.S.C. 134 and 315; 49 U.S.C. 1601 *et seq.* (The Urban Mass Transportation Act of 1974, as amended); 49 CFR 1.48(b) and 1.51 (f).)

UMI

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the LSA (List of CFR Sections Affected), the "Federal Register Index," or both.

LSA (List of CFR Sections Affected)
$10.00
per year

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the LSA (List of CFR Sections Affected) will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402
